Editorial Comment

MOTORISTS OPPOSE GAS TAX DIVERSION

Determined opposition to the proposal that \$8,500,000 of gasoline tax income be diverted from the highway fund to the state general fund each biennium is to be made by organized motorists at the present session of the Legislature. That such a stand has the backing of the general public is evidenced by the vote on State Proposition No. 4, which was defeated at the November election. In addition, resolutions opposing diversion of highway funds have been adopted by the Motor Car Dealers Association, California State Federation of Labor, and various chambers of commerce and other civic and official bodies.

E. B. DeGolia, president of the California State Automobile Association, in a statement reviewing the position of organized motorists regarding the proposed gasoline tax diversion, said:

"By a vote of 1,103,891 to 544,222, or more than two to one, the people of California have forcefully declared that they will not tolerate diversion of highway funds to any other purposes than those to which the funds are especially pledged and dedicated. That vote was cast against State Proposition No. 4 at the recent election. Proposition No. 4 involved depriving the highways of only a comparatively small sum of money, too small to have been alone responsible for the emphatic defeat which the proposal received.

"The successful campaign which organized motorists conducted against that proposition dealt mainly with the dangers of setting a precedent for diversion of highway funds. The overwhelming 'No' vote clearly expressed a determination that highway funds shall not be made a convenient grab bag for the bolstering of the state general fund.

"It might have been hoped that in the light of this definite expression of popular will there would be an end to such attempts to raid highway funds. But the lesson of the election is being ignored by the persistence of a proposal that the huge sum of \$8,500,000 each biennium be taken from the gasoline tax revenues and placed in the state's general fund.

"The plan is sought to be justified on the ground that the amount is the same as is required to be paid out of the general fund for interest and capital payments on old highway bonds.

"While the proposal is being made with a show of plausibility in the claim that the money thus diverted would be applied to highway purposes, any honest approach to the question quickly challenges the fairness of that argument.

"Those old highway bonds were voted by all the people for the development and economic welfare of the state, thus justifying the provision that the bonds were to be retired out of the state general fund.

"Subsequently the motorists of California willingly assented to gasoline taxes for further highway development, also benefitting the entire state.

"The gasoline taxes were levied with the distinct and specific pledge that they would be used for new additions and improvements to the highway system, over and above those provided for by the bond issues.

"In the face of that fact there is little justice in the claim that the proposed diversion of gasoline tax revenues would be for highway purposes. The motoring public would simply be singled out for a discriminatory share of general State expenses."

FEDERAL HIGHWAY FUNDS ENDANGERED

"The majority members of the national House of Representatives are a singular set of individuals," comments the Reno Evening Gazette, in an editorial pointing out that federal highway work will be suspended on July 1 unless the construction policy adopted by the federal government is supported by a new appropriation.

The editorial continues:

Last summer, just prior to adjournment, the Senate passed a bill authorizing the appropriation of \$130,000,000 for highway construction during the year beginning July 1, 1933. The Democratic leaders in the House refused to let it pass in that chamber. However, they gave their approval to the Garner bill, which would have erected useless postoffices all over the land, and blamed the Republican administration then, and afterward during the campaign, for not authorizing the expenditure of billions of dollars for all sorts of public works.

As matters stand there are virtually no Federal funds available for highway work in the States for the year beginning July 1 next and ending June 30, 1934. The House committee this week not only eliminated the usual \$100,000,000 to \$130,000,000 for Federal aid construction, but eliminated the usual appropriations for forest highways and the one for highway construction over the public lands under the Oddie-Colton law. It is possible, of course, that when the Agricultural Department bill, in which highway funds are carried, reaches the Senate, the latter will amend it to provide proper highway funds, but there is no certainty that the House will accept it.

The situation is one of great seriousness, particularly for the Far Western States with small population. Most of their highway funds are derived from the Federal government. If these funds are not forthcoming for the next fiscal year they will be compelled to reduce their programs more than one-half, which will result in throwing thousands of persons out of work. It is not a reassuring outlook.

\$61,700,000 Recommended For California Roads in Biennium

CALIFORNIA will spend \$61,700,000 on its highway systems in the next biennium if the recommendation of the State Highway Commission is adopted at the current session of the legislature. This total includes:

- \$23,800,000 for new construction.
- \$14,190,000 for reconstruction.
- \$13,540,000 for maintenance.
- \$2,170,000 for administration.

Major projects in the 1933-35 budget include 77 items of improvement in the northern counties and 74 items in southern counties. The total mileages involved are 360 miles in the north and 507 miles in the south. Of the mileage in the south, 265 miles are financed from reconstruction funds and 245 miles from new construction and general funds. Of the mileage in the north, 130 miles are financed from the reconstruction fund and 230 miles from construction and general funds.

Director of Public Works Earl Lee Kelly said in making recommendations for the proposed budget a determined effort has been made to use the utmost economy in providing for and maintaining adequate traffic service over the entire system of highways and to apply funds where most urgently needed.

Under the existing statutory allocation of revenues state motor vehicle taxes, highway transportation taxes and gasoline taxes are used to maintain and extend the road system. One cent of the fuel tax is apportioned to construction of primary and secondary roads by the state. Half

of the balance of the three-cent gasoline tax and the other revenues, less costs of collection and costs of operating the California highway patrol also is expended by the state for highway maintenance and reconstruction. The other half is apportioned to the 58 counties for road purposes.

The construction fund, supplied by collection of one cent per gallon of motor fuel sold, is divided between primary and secondary construction in a ratio of 3 to 1. The funds for construction of primary highways are divided between the northern 45 counties and the southern 13 counties in proportion to the mileage of primary highways in each section. In the north section primary mileage is 2341 miles and in the south 1920 miles. This gives a ratio of 54.9 percent for the northern counties and 45.1 percent for the southern counties.

The funds for construction of secondary highways are equally divided between the north and south. Ten percent of the secondary highway construction fund is appropriated for state cooperation in joint highway districts.

Federal aid funds go into the highway general fund and are also divided between the north and south in proportion to the mileage of primary roads. Approximately \$8,000,000 was received by the state from the federal government in the last biennium. No federal aid appropriations have been made for work after July 1, 1933.

Below are summarized the principal highway projects scheduled in the highway commission budget now before the state legislature:

PRINCIPAL PROJECTS IN 1933-35 CALIFORNIA HIGHWAY BUDGET

ALAMEDA COUNTY

Grading, paving and bridge, 1.3 miles, Oakland to 1.3 miles south, \$104,300.

ALPINE COUNTY

Grading, surfacing, bridge, 6.6 miles, Centerville Bridge to Markleeville, \$236,000.

BUTTE COUNTY

Grading, 4 miles, Jarboe Pass to Bardees Creek, \$55,000.

Bridge, grading and paving, Pine Creek Bridge and approaches, \$25,300.

CALAVERAS COUNTY

Grading, surfacing, bridges, 9.4 miles, San Andreas to Angels (portion), \$120,000.

COLUSA COUNTY

Grading, paving, bridges, 8 miles, Maxwell to northerly boundary, \$381,000.

DEL NORTE COUNTY

Grading, 9.2 miles Last Chance Slide to Flaangan's, \$656,700.

Surfacing, 4.2 miles, Oregon Mountain Summit to state line, \$37,599.

EL DORADO COUNTY

Grading, 2.2 miles, Fred's Place to 2.2 miles easterly, \$190,000.

Surfacing, 9 miles, Kyburz to Strawberry, \$115,000.

Bridge and grading, Greenwood Creek and approaches, \$7500.

FRESNO COUNTY

Selma to Fowler Switch Canal, 1.3 miles, grading and paving, \$85,300.

HUMBOLDT COUNTY

Grading, surfacing and bridges, 7.5

miles, Benbow to 7 miles north of Garberville, \$575,800.

Grading and surfacing, 2 miles, Jordan Creek to South Scotia Bridge, \$102,100.

Surfacing, 9 miles, Trinidad to Big Lagoon, \$81,000.

Bridge, grading, surfacing, 0.7 mile, Smith Ranch to Twin Trees, \$116,300.

Bridge, grading, surfacing, 0.5 mile, Little River Bridge and approaches, \$73,300.

Sidewalk, Redwood Creek Bridge, \$9000.

HUMBOLDT - SISKIYOU COUNTIES

Grading, bridges, Weitchpec to Happy Camp (portion), \$190,000.

IMPERIAL COUNTY

Triobium Canal to twenty-foot pavement, 3.2 miles, grading and paving, \$80,800.

San Felipe Wash, bridge \$20,000.

Trifolium Canal to north boundary, 33.0 miles, surface shoulders, \$93,000.

Holtville to High Line Canal, 7.0 miles, surface shoulders, \$28,000.

Araz to Yuma, 6.1 miles, surface shoulders, \$6100.

East High Line Canal to Sand Hills, 21.0 miles, grading, paving, surface shoulders, \$590,000.

Arroyo Salado, Tule and Campbell washes, San Felipe sand dunes, grading, paving, bridges, \$80,700.

INYO COUNTY

South limits of Bishop to Birchim Canyon, 13.1 miles, grading and surfacing, \$170,000.

KERN COUNTY

Haypress Canyon to Bear Mountain ranch, 6.0 miles, grading and surfacing, \$490,000.

Mariposa to west boundary, 10.5 miles, grading and surfacing, \$250,000

One mile to two miles south of Delano, grading and paving, \$37,000.

South boundary to Oak Glen, 6.8 miles, grading, paving, bridges, \$752,000.

LAKE COUNTY

Middletown to 4 miles northerly, grade, surface bridges, \$223,500.

LOS ANGELES COUNTY

Grading, paving, bridges, 3.2 miles, near Newhall to Saugus, \$75,000.

.6 mile, Saugus to William's ranch (portions), \$37,000.

Grading, paving, 3.3 miles, Calabasas to west boundary (portions), \$132,000.

1.4 miles, William's ranch to Seeley's ranch (portions), \$70,000.

Paving, 10.6 miles, The Oaks to Acton road, \$152,000.

Grading, paving 24 miles, Lancaster to Mojave, \$220,000.

Grading, paving, bridges, 3.3 miles, Big Tujunga wash to Tujunga, \$114,000.

Grading, paving, bridges, 10.8 miles, Winter canyon to Ramirez canyon and Encinal canyon to west boundary, \$821,500.

8.8 miles Ramirez canyon to Encinal canyon and Las Flores canyon to Winter canyon, \$502,500.

Grading, paving, 5.4 miles, Santa Clara river to Castaic school, \$150,000.
Grading, paving, structures, .6 mile, Los Angeles west city limits to Beverly Blvd., \$100,000.

.02 mile, West Channel road to Santa Monica, \$20,000.

Grading, surfacing, 4.0 miles, Colby canyon to Mt. Wilson Road, \$420,000.
Co-operative grading (state share), San Gabriel canyon, \$113,000.

Grading, paving, 4 miles, Orange Ave., to Barranca St., \$180,000.

Grade separation, El Monte, \$90,000.

LOS ANGELES-KERN COUNTIES.
Lancaster to Mojave, 24.0 miles, grading and paving, \$220,000.

MADERA COUNTY

Bridge, Ash Slough, \$40,000.

MARIPOSA COUNTY

Surfacing, 15 miles, Orange Hill School to Mariposa, \$275,000.

MENDOCINO COUNTY

Bridge, grading, surfacing, 0.6 mile, Rattlesnake No. 3 Bridge and approaches, \$66,800.

Grading, surfacing, bridges, Macdonald to Navarro (portions), \$60,000.

MENDOCINO - HUMPOLDT CO.

County line bridge and approaches, 1.2 mile, bridge, grading and surfacing, \$211,900.

MERCED COUNTY

Grading, surfacing, 3.3 miles, West Boundary to foot Pacheco Pass Grade, \$260,000.

Bridge, grading, paving, Santa Rita Slough and approaches \$29,000.

MOFOC COUNTY

Grading and surfacing, 2.6 mile, Alturas to Cedarville (portions), \$81,000.

MONO COUNTY

Yosemite Park boundary to Mono Lake (portions), 15.3 miles, grading, \$243,125.

Crest View to point 2.2 miles south of Rush Creek, 9.5 miles, grading and surfacing, \$181,900.

Mono Inn to point 2.7 miles south, grading and surfacing, \$63,500.

Sherwin Hill to Wiskey Creek, 3.5 miles, grading and surfacing, \$35,000.

Point Ranch to Dressler's Corner, 6.2 miles, grading, surfacing, structures, \$117,180.

MONTEREY COUNTY

Grading and paving, 11.1 miles, King City to Greenfield, \$369,000.

Grading, paving, and bridges, 5.6 miles, from 6 miles south of San Ardo to Bradley \$339,500.

Grading and paving, 11 miles, Chualar to 6 miles south of Gonzales, \$361,000.

Grading, 1.5 miles, Carmel to Carmel River, \$59,000.

Grading, 4.7 miles, Big Sur to Molera Ranch, \$170,000.

Grading, 9.1 miles, San Lorenzo Creek to Priest Valley School (portions), \$150,000.

Bridges, South Boundary to Molera Ranch, \$307,500.

NEVADA COUNTY

Grading and surfacing, 5 miles, Hinton to 5 miles easterly, \$100,000.

Grading and surfacing, 4.7 miles, west end Donner Lake to Route 38, \$160,000.

Surfacing, 7.4 miles, from one mile west of Washington Rd. to 0.5 mile east of Summit, \$110,000.

NEVADA-PLACER COUNTIES

Surfacing, 11 miles, Yuba River to Soda Springs, \$25,000.

Grading and surfacing, 4.1 miles, Spaulding Canal to Route 37, \$190,000.

ORANGE COUNTY

Trabuco Creek, bridge, \$26,000.

Santa Ana Canyon (portions), grading and paving, \$209,000.

PLACER COUNTY

Bridge and grading, Ward Creek and approaches, \$14,000.

PLACER-NEVADA COUNTIES

Grading and surfacing, 4.1 miles, Spaulding Canal to Route 37, \$190,000.

PLUMAS COUNTY

Bridge, North Fork Feather River, \$32,600.

RIVERSIDE COUNTY

Black Butte to Blythe, 9.2 miles, grading and surfacing, \$52,000.

South boundary to Corona, 45 miles, surface shoulders, \$45,000.

Elsinore to Box Springs, 25 miles, surface shoulders, \$25,000.

South boundary to Avenue 62, 14.3 miles, surface shoulders, \$14,500.

Near Shavers Summit, westerly, 12 miles, oil surface, \$20,000.

Indio to 12.5 miles easterly, grading and surfacing, \$200,000.

Colorado River bridge interest purchase of bridge (State's share), \$1688.

Beaumont to Riverside, (portions), 19 miles, grading, surfacing, structures, \$601,500.

Banning to Whitewater, 12.1 miles, repair dips, \$70,000.

SACRAMENTO COUNTY

Bridges, Sacramento to McConneil, \$27,000.

SAN BERNARDINO COUNTY

San Timoteo Creek, grading, paving, bridge, \$35,000.

Camp Cajon to west boundary, 18 miles, grading and surfacing, \$240,000.

Sierra Ave. to Colton, 5.8 miles, grading and paving, \$200,000.

Ontario to Pomona, 2.1 miles, grading and paving, \$110,000.

Fawnskin, easterly, 1 mile, grading and surfacing, \$25,000.

San Bernardino to Arrowhead Springs, 1 mile, grading and surfacing \$40,500.

SAN DIEGO COUNTY

Del Mar to Oceanside, 16.4 miles, grading, paving, bridges, \$535,000.

Oceanside to San Mateo Creek, 18 miles, grading, paving, bridges, \$479,000.

Santa Margarita River bridge, \$200,000.

National City to San Ysidro, 10 miles, grading and paving, \$285,000.

El Cajon, easterly 1.2 miles, grading and paving, \$28,000.

SAN FRANCISCO-ALAMEDA CO.

Grading and paving, San Francisco Bay Bridge approaches, \$1,500,000.

SAN JOAQUIN COUNTY

Paving, 3.5 miles, French Camp to McKinley Ave., \$122,000.

Grading and paving, 4.4 miles, Lodi to Waterloo Road, \$121,000.

SAN LUIS OBISPO COUNTY

Pismo to San Luis Obispo (portions), 2.1 miles, paving, \$77,500.

SAN MATEO COUNTY

Grading and paving, 4.9 miles, San Mateo to Redwood City, \$485,000.

Grade separation, South San Francisco, \$150,000.

SANTA CRUZ COUNTY

Grading, surfacing, 6.7 miles, Inspiration Point to Scott Valley, \$277,000.

Grading, surfacing, 3.9 miles, Scott Valley to one mile north of Santa Cruz, \$300,000.

SHASTA COUNTY

Bridge, grading, surfacing, 1 mile, Redding to Sulphur Creek, \$253,000.

Surfacing, 16.2 miles, Diddy Hill to Montgomery Creek, \$55,000.

SISKIYOU COUNTY

Grading, surfacing, 0.3 mile, Big Canyon, \$56,500.

SANTA BARBARA COUNTY

Santa Ynez River and approaches, 1.4 miles, bridge and grading, \$150,000.

Santa Barbara to San Marcos Pass, 5.7 miles, grading and structures, \$500,000.

Arroyo Hondo to Gavilota, 5.3 miles, grading and paving, \$315,000.

Tajiguas to Arroyo Cuemado, 1.1 miles, grading and paving, \$60,000.

Nojoqui grade, 3.7 miles, grading, paving, bridge, \$479,000.

Richfield Tower to Santa Maria, 1.5 miles, grading and paving, \$62,000.

Santa Maria to Santa Maria River, 0.7 mile, grading and paving, \$27,000.

Hollister Avenue, subway to Santa Barbara, 1.6 miles, grading and paving, \$113,800.

Ortega Hill and San Ysidro Road to Santa Barbara 1.9 miles, grading and paving, \$147,000.

SOLANO COUNTY

Grading, paving, bridge, 3.3 miles, from 5.5 miles north of Fairfield to one mile south of Vacaville, \$172,000.

Grading, 11 miles, Benicia-Vallejo Road to Cordelia, \$400,000.

Grading, 1.5 miles, one mile north of Carquinez Bridge to Valley-Benicia Road, \$59,000.

Grading, surfacing, 0.7 mile, at Fairfield, \$20,000.

SONOMA COUNTY

Grading, surfacing, 0.9 mile, Foster line change, \$60,000.

SONOMA-MENDOCINO COUNTIES

Grading, paving, bridges, and grade separations, 13.8 miles, Cleverdale to Hopland, \$652,500.

SPANISLAUS COUNTY

Grading and paving 1.3 miles, 1/2 mile south to 3/4 mile north of Turlock, \$65,000.

TEHAMA COUNTY

Grading, surfaced shoulders, 26.5 miles, South Boundary to Red Bluff, \$250,000.

Grading and surfacing, 13.8 miles, Red Bluff to Dales, \$485,000.

TRINITY COUNTY

Grading and surfacing, 10.3 miles, South Fork to Burnt Ranch (portions) \$123,500.

TULARE COUNTY

Grading, over Oregon St., \$100,000.

Visalia to Merryman, 9.9 miles, grading, paving, bridges, \$340,000.

VENTURA COUNTY

Stallo to Santa Clara River, 3.4 miles, grading and paving, \$72,000.

South boundary to Newberry Park (portions), 1.2 miles, grading and paving, \$40,000.

Ventura to west boundary, 12 miles, grading and paving, \$672,000.

East boundary to Little Sycamore Creek, 1.2 miles, grading, paving, bridges, \$35,000.

Oxnard to Calleguas Creek, 8.1 miles, grading, paving, bridge, \$166,000.

At Big Sycamore Creek, 0.6 mile, grading, paving bridge, \$65,000.

Casitas Pass Road (portions), grading, \$150,000.

YOLO COUNTY

Grading, paving, 3.5 miles, Causeway to M St. Subway, \$122,000.

Grading and paving, 0.1 mile, West Approach to Causeway, \$6000.

YOLO-SACRAMENTO COUNTIES

Bridge at Sacramento, \$433,000.

YUBA COUNTY

Grading, paving, bridges, 2.5 miles, Wheatland to Morrison's Crossing, \$117,000.

MISCELLANEOUS

Prison Labor Camps, \$2,950,000.

Co-operative City Projects, Northern Counties, \$1,432,280.

Northern California Chapter A. G. C. Holds 1932 Annual Meeting

MORE than a hundred members of the Northern California Chapter, Associated General Contractors of America, attended the 1932 annual meeting of the Chapter, held December 22, in San Francisco.

An all-day business session was held in the Sharon room of the Palace Hotel, concluding with a banquet in the evening. State Director of Public Works Earl Lee Kelly was the principal speaker at the banquet. Kelly discussed general features of the Highway Commission budget for the coming biennium and the history of the State's highway development program.

Other speakers at the evening program were: State Senator Roy Fellom; Dr. L. I. Hewes, regional director of the Bureau of Public Roads; State Highway Engineer C. H. Purcell, and President Clyde Wood.

The concluding feature of the day's program was the showing of motion pictures provided by the Six Companies, Inc., depicting the Boulder Dam construction. W. A. Bechtel, president of the Six Companies, and Henry J. Kaiser, chairman of the executive committee of Six Companies, described different features of the work and the plant of the Six Companies as the pictures were shown.

Six resolutions were adopted by the Chapter: (1) Opposing diversion of gasoline tax money for uses other than highway construction, in accordance with the pledge given the automobile owner when the gasoline tax was proposed; (2) endorsing continuation of the Federal aid highway program as an effective measure of unemployment relief, proven by the experience of the past two years; (3) commending the board of directors of the Los Angeles Metropolitan Water District for constructing the San Jacinto Tunnel of the Colorado River Aqueduct under the contract system, and recommending to the Los Angeles Metropolitan Water District that the contract procedure be followed in construction of all other units of the Colorado River project, outlining its advantages over the day labor method; (4) commending the Los Angeles County Flood Control District for advertising and readvertising for bids until satisfactory offers were received on contracts; (5) pointing out that all legislation adopted under stress of present conditions should be regarded as strictly emergency in character, and urging that legislators emphasize the necessity of regarding such acts as temporary; (6) endorsing the appointment of standing committees in both houses of Congress and in the California State Legislature on building and construction legislation; (7) reiterating previous stands opposing the prevailing wage law and opposing the use of convict labor in road construction during present abnormal conditions.

The resolutions were drawn by a committee composed of A. J. Crocker, George Pollock and D. McDonald.

A special resolution, moved by C. V. Isbell, expressed appreciation to the present officers and directors for their services in the past year and congratulated the Southern California Chapter on its reorganization, which was aided by officers of the Northern California Chapter.

Officers for 1933 will be elected at a meeting of the board of directors in San Francisco early in January. Two new members were elected to the directorate at the meeting, and two directors were re-elected. Directors George Pollock of Sacramento and R. D. Watson of Oakland were reelected. A. B. Ordway of the Kaiser

Paving Co., Oakland, and J. E. Bell of Hemstreet and Bell, Marysville, were elected to succeed Directors Adolph Teichert, Jr., and A. J. Crocker, whose terms expired.

The morning meeting of the convention was devoted to committee reports by A. J. Crocker, chairman of the finance committee; K. K. Bechtel, membership committee; R. D. Watson, chairman, highway committee; Adolph Teichert, chairman of the credits committee; George Pollock, public relations committee.

Luncheon was served at the hotel and during the luncheon an address was delivered by J. A. Pettis, counsel and manager for the California Manufacturers' Association on the subject "Government Interference with Private Business."

In the afternoon the following speakers were heard: Frederick J. Koster, chairman of the committee on governmental expenditures of the California State Chamber of Commerce, on "The Statewide Campaign to Control and Reduce the Cost of Government"; W. H. George, president, San Francisco Builders' Exchange, on "Economics of the Prevailing Wage Law"; J. J. Jellick, Portland Cement Association, on "Important Legislation Affecting Our Highway Program."

An open forum discussion by members followed these addresses.

Discussion of the A.G.C. organization was led by Henry J. Kaiser, national president, and George Pollock, vice-president of the Northern California Chapter.

Kaiser told of the work of the national organization, particularly in regard to efforts made to promote national legislation. He said the greatest stumbling block was lack of a congressional committee on construction, authorized to consider the industry's problems.

"As one walks down the halls of the House building," he said, "you see over one door 'Agricultural Committee,' over another 'Labor Committee,' and so on until you finally reach the largest and most sumptuous of all, labeled 'Banking Committee,' but you look in vain for any 'Construction Committee.' The appointment of such a committee will be one of the major aims of the national association during the coming year.

"When the Wagner bill was before the Congress for consideration, one of the committee members told your national officers that he thought it would be impossible to get it reported out, unless some assistance was forthcoming. I asked him if it would help if we had telegrams urging its passage sent to the committee, and he said that telegrams from individuals would not help in the least, but if we could get telegrams signed by organizations it would help immensely. Through your national organization and its affiliations we were able to get several thousand signed messages, which aided greatly in facilitating the reporting of the message and its final passage. Under this bill the Bay District has received \$62,000,000, with more to come, and the southern part of the State has had loans of \$212,000,000 approved.

"We in Washington have discovered a system that might be applied to the State Legislature with equally gratifying results. Whenever a bill affecting legislation in which we are interested has been voted upon, we send a telegram to our representatives asking how he voted, and if he voted yes, why? If he voted no, why? Just a

few days ago, in talking with the gentleman whom I expect to be the next speaker of the House, and by the way, I think he is most admirably fitted for the position, he said that if such a system were more generally adopted it would result in a Congress of which we would be proud."

George Pollock, Chapter vice-president, discussed the benefits of local A.G.C. organizations, saying he had found by experience the advantages of improved relations developed by the Chapter activities between local contractors and engineers, architects and public officials; the establishment of friendly relations with competitors, and the success with which the contractors could campaign cooperatively for public policies beneficial to the construction industry.

The work of the Northern California Chapter was reviewed in the annual report of Secretary-Manager Floyd O. Booe. One of the major problems of the year was that occasioned by the attempt of political bodies to hold wage scales at artificial levels by enactment of the prevailing wage laws, Booe said.

Following is an excerpt from his report commenting on this subject:

"One of the most aggravating problems that has confronted our organization during the past year has been that of the prevailing wage law as it applies nationally, state-wide and locally through municipal ordinances. The original Federal law, known as the Bacon-Davis bill, has proven a tremendous handicap to contracting operations throughout the country and has now reached the point where it seems to be the consensus of opinion of the National A.G.C. that the only remedy left is to carry this law to the Supreme Court of the United States for a final test.

"We have devoted a great deal of time in the endeavor to work out satisfactory and proper wage rates and classifications under the State's prevailing wage law, and innumerable conferences and hearings have been held with State officials in reference to this matter. About the only success we have had has been, after months of effort, to convince most of the officials that the original wages specified have been too high, and there has been a general revision of wage scales downward on most of the projects, particularly of the State.

"There can be no doubt that this prevailing wage law is the most detrimental piece of legislation, and the most vicious, that has ever been enacted, so far as the employer of labor on public works is concerned. To date it has served to effectually stifle the legitimate contractor in his efforts to secure public work because of the opportunity it provides for the crooked operator to evade the provisions of the law and thereby under-bid the legitimate operator to such an extent as to eliminate him from the picture. Public officials and engineers, including the Labor Department, are positively helpless in enforcing a law of this kind, and it is so contrary in principle to the laws of supply and demand that it will never successfully function. Organized labor groups in every community in the State are using this law as a club over the heads of the officials to perpetuate wage rates on public work entirely out of line with the readjustments that have taken

place in the economic structure. This pressure is so extensive and so vicious in many respects that every wage established can invariably be termed a political wage rather than a prevailing wage. In every instance, when labor has been dissatisfied with any wage rate established by a public body, they have turned around and coerced and otherwise threatened and enjoined, and done everything possible to compel the officials to recede from their stand. A good example is the action that is pending at this moment against the Metropolitan Water District Board of Southern California.

"Throughout the year we have given wide publicity to the viciousness of this law and its operation, and we believe that most of the important taxpaying groups have finally realized its dire consequences and that there will be a real opportunity for its repeal at the forthcoming session of the Legislature.

"Following the fashion set up by the national and State laws, most of the chartered cities and counties operating under a freeholders' charter have likewise set up prevailing wage ordinances, and we have before us situations such as exist in Los Angeles County, where there are 26 different wage scales established by as many different public bodies."

ELECTRIC SHOVELS AT DAM—About 121 cubic yards (solid measure) per digging hour has been averaged by nine Westinghouse equipped Marion electric shovels operating at Hoover Dam, according to figures received by the Westinghouse factory. Individual records reached 200 cubic yards per hour and as much as 16,000 cubic yards, solid measurement, were removed in one day from the 56-foot diversion tunnels.

Electric Shovels at Hoover Dam

The shovels have been employed in digging the four diversion tunnels, each 56 feet in diameter and with a combined length of 15,909 feet. Electrical and mechanical maintenance on the shovels, including labor and supplies, is figured at approximately 0.6 cents per cubic yard and power consumption is estimated at 0.3 kw.-hr. per cubic yard.

Specifications for Liquid Asphaltic Road Materials

(Reprinted from pamphlet issued by Asphalt Institute)

THE specifications for liquid asphaltic road materials presented in this pamphlet have been developed as the result of numerous conferences with representatives of the United States Bureau of Public Roads and the various state highway departments, and supersede former Specifications Nos. 1 to 7 inclusive of The Asphalt Institute. They have been prepared to conform with the simplified scheme of analysis developed at these conferences, and cover the great bulk of satisfactory products which are now being furnished by the producers for various classes of highway treatment and construction.

General adoption of the simplified form of specification by the users of liquid asphaltic road materials is to be greatly desired for the following reasons:

1. The simplified form reduces all specifications to a common language by means of which the various products can be correctly compared and evaluated.

2. It eliminates a large number of unnecessary tests heretofore commonly used, with their accompanying variations, and makes possible a clearer interchange of opinions and experiences among consumers and producers.

3. It prevents the unnecessary overlapping in grades of products which are to serve a single purpose, which overlapping has resulted from the variable forms of specifications developed by individual localities.

The simplified scheme embodies the following three fundamental determinations:

1. Determination, by means of a viscosity test, of the consistency or degree of fluidity of the original material at as near normal temperature as practicable, which indicates the suitability of the product from the standpoint of application, for a given type of treatment or method of construction.

2. Determination, by means of the distillation test, of the amount and character of lighter constituents which may be expected to eliminate themselves through volatilization or absorption during manipulation and early use, which indicates the probable rate of curing.

3. Determination, by means of the penetration or float test, of the consistency of the residue from distillation, which indicates the probable extent of curing and the character of the product eventually retained by the mineral aggregate in the highway which has been treated.

In the following tabulated specifications, liquid asphaltic road materials have been grouped under three classifications: R. C., or rapid curing cut-back asphalts; M. C., or medium curing cutback asphalts; and S. C., or slow curing products. Under each classification the individual specifications have been numbered consecutively as the viscosity of the products increases. Numerical values opposite the individual tests, when followed by a + sign, signify not less than the value shown and if followed by a — sign, not more than the value shown.

Following each set of tabulated specification requirements are descriptions of the type of treatment or construction for which materials under each individual specification are best suited. The table of Principal Uses summarizes these descriptions and illustrates the inter-relationship of all of the products specified. Reference to standard tests and descriptions of tests not yet officially adopted as standard, which are embodied in these specifications, are given later in this article.

Specifications For Type R. C. Materials

Specification Designation	RC-1	RC-2	RC-3	RC-4
General Requirement	The material shall be free from water and shall meet the following requirements when tested in accordance with the methods hereinafter enumerated.			
Flash Point (Open Tag.) °F.	80+	80+	80+	80+
Furol Viscosity at 122°F.	80-160	200-400		
" " " 140°F.			275-400	700-1400
Distillation, per cent by volume:				
Total Distillate to 374°F.	5+			
" " " 437°F.	12+	10+	3+	0.5+
" " " 600°F.	25+	20+	14+	7+
" " " 680°F.	40—	35—	30—	25—
Tests on Residue from Distillation:				
Penetration 77°F. 100 g., 5 sec.	60-120	60-120	60-120	60-120
Ductility at 77°F.	60+	60+	60+	60+
Per cent Soluble in Carbon Disulphide	99.5+	99.5+	99.5+	99.5+

Type R. C.-1

It provides for a rapid curing liquid product of low initial viscosity suitable for surface treatment and re-treatment as seal coat, or in the construction of thin bituminous carpet courses with a light cover of suitable mineral aggregate free from dust.

It is not intended for use as a primer on untreated roads as it is apt to harden before it can penetrate the surface. Before application to non-bituminous surfaces the road should preferably be primed with Type M. C.-1 material.

Type R. C.-2

It provides for a rapid curing liquid product of relatively low viscosity, suitable for the preparation of cold-patch mixtures, with open graded mineral aggregate having little or no material passing the 10-mesh and practically none passing the 200-mesh sieve. If the asphaltic material is warmed prior to admixture with the mineral aggregate, suitable precautions should be taken to avoid fire hazard. The mixture should preferably be aged in stock piles for 24 hours or more before use.

This material may also be used in cool weather for the type of construction described under Type R. C.-3.

Type R. C.-3

It provides for a rapid curing product of relatively high viscosity suitable for use in the construction of roller compacted road-mix wearing courses, or for cold-patch mixtures, in which the mineral aggregate is of the open type, consisting principally of crushed fragments, maximum size not over 1½ inches, and practically all of which is retained on a ¼ inch screen. The asphaltic material should be warmed prior to application with suitable precautions to avoid fire hazard. It is not intended for use with aggregate containing a high dust content.

Type R. C.-2 material may be used for this class of construction in cool weather, particularly in cases where the maximum diameter of mineral aggregate particle does not exceed 1 inch.

Type R. C.-4

This specification provides for a rapid curing product of high viscosity suitable for use in the construction of roller compacted cold plant-mix wearing courses in which the mineral aggregate is of the open type, consisting principally of crushed fragments, maximum size not over 1½ inches and practically all of which is retained on a ¼ inch screen. It is particularly adapted for use under conditions where the mixture is to be laid and compacted imme-

diately after mixing. The asphaltic material should be warmed prior to use with suitable precautions to avoid fire hazard.

Specifications For Type M. C. Materials

Spec. Designation	MC-1	MC-2	MC-3	MC-4	MC-5
Gen. Requirement	The material shall be free from water and shall meet the following requirements when tested in accordance with the methods hereinafter enumerated.				
Flash Point (Open Tag.) °F.		150+	150+	150+	150+
Furol Viscosity at 77° F.	40-150				
" " " 140° F.	150-250	300-500	500-800		
" " " 180° F.				170-280	
Distillation, per cent by volume:					
Total Distillate to 437° F.	10-	2-	2-	1-	1-
" " " 600° F.	25+	10-20	8-20	16-	14-
" " " 680° F.	50-	27-	25-	25-	20-
Tests on Residue from Distillation:					
Penetration 77° F., 100 g., 5 sec.	70-300	100-300	100-300	100-300	100-300
Ductility at 77° F.	60+	60+	60+	60+	60+
Per cent Soluble in Carbon Disulphide	99.5+	99.5+	99.5+	99.5+	99.5+

Type M. C.-1

It provides for a liquid product of very low viscosity for cold application, suitable for use as a primer for initial surface treatment of road surfaces preparatory to the construction of bituminous carpet or wearing course. It is readily and completely absorbed by earth, gravel or broken stone surfaces, where it hardens in place. While it develops considerable cementitiousness upon drying, it is not intended to hold a cover of stone chips or gravel.

Type M. C.-2

It provides for a medium curing liquid product of low viscosity suitable for use in the construction of traffic compacted road-mix wearing courses in which the mineral aggregate is densely graded, from a maximum diameter of 1 inch down, with from 35 to 60 per cent of material passing a 10-mesh sieve and from 7 to 14 per cent passing a 200-mesh sieve. This material should ordinarily be warmed before application. Its viscosity increases materially after use so as to develop considerable cementitiousness. It is therefore adapted for the type of construction described, under severe climatic conditions. It does not, however, harden with sufficient rapidity to be used to best advantage as a binder for coarse open mineral aggregates free from dust.

Type M. C.-3

This specification provides for a medium curing liquid product of medium viscosity suitable for use in the construction of traffic compacted cold laid plant-mix wearing courses in which the mineral aggregate is densely graded from a maximum of 1 inch down, with from 35 to 60 per cent of material passing a 10-mesh sieve, and from 7 to 14 per cent passing a 200-mesh sieve.

It is also suitable for use in the construction of roller compacted, road-mix wearing courses in which the mineral aggregate is of the open graded type with a maximum diameter of not over 1 inch, containing little or no material passing the 200-mesh but having a relatively high percentage passing the 10-mesh sieve.

This material should be warmed before application. Its viscosity increases materially after use so as to develop considerable cementitiousness and it is therefore adapted to

both types of construction described, under severe climatic conditions.

Type M. C.-4

This specification provides for a medium curing liquid product of relatively high viscosity suitable for use in the construction of roller compacted, cold laid plant-mix wearing courses, or road-mix wearing courses in hot weather, in which the mineral aggregate is of the open graded type with a maximum diameter of 1 inch, containing little or no material passing the 200-mesh but having not less than 35 per cent passing the 10-mesh sieve. The asphaltic material, and sometimes the aggregate, require warming before mixing.

Type M. C.-5

This specification provides for a medium curing product of high viscosity suitable for use in the construction of roller compacted, cold laid plant-mix wearing courses, in which the mineral aggregate is of the open graded type with a maximum diameter of 1 inch, containing practically no material passing the 200-mesh but having an appreciable percentage passing the 1/4 inch screen. The asphaltic material and usually the aggregate require warming before mixing.

Specifications For Type S. C. Materials

Specification Designation	SC-1*	SC-2	SC-3	SC-4
General Requirement	The material shall meet the following requirements when tested in accordance with the methods hereinafter enumerated.			
Water and Sediment %	2-	2-	2-	2-
Flash Point (Cleveland Open Cup) °F.	150+	200+	200+	250+
Furol Viscosity at 77° F.	20-150			
" " " 122° F.		200-320		
" " " 140° F.			150-300	350-550
Distillation, per cent by volume:				
Total Distillate to 437° F.		2-	2-	2-
" " " 600° F.		15-	10-	8-
" " " 680° F.		25-	20-	18-
Tests on Residue from Distillation:				
Float at 122° F.	50-	25+	25+	25+
Per cent Soluble in Carbon Disulphide	99.0+	99.0+	99.0+	99.0+

* Within the viscosity limits specified, the Pacific Coast Producers will, when required, furnish material with a maximum Furol Viscosity limit of 40 at 77° F., formerly designated 30-40 Road Oil.

Type S. C.-1

It provides for a product of very low viscosity suitable for cold application as a dust layer. It may also be used for initial treatments in the progressive method of mat construction on soils or fine grained aggregates where gradual improvement is to extend over a number of years with subsequent treatments employing more viscous asphaltic road materials. This product is not intended to serve as a hardening or cementing medium.

Application

Type S. C.-1A specification covers material formerly designated in the Pacific Coast territory as 50-60 road oil. It is a non-hardening liquid product of relatively low viscosity which should ordinarily be warmed slightly before application. It does not develop cementitiousness and is generally used for dust laying on traffic bound gravel or macadam roads.

It is used in the initial surface treatment of well-bonded surfaces, for the purpose of laying dust just prior to application of cementitious asphaltic products used in the construction of bituminous carpet costs.

Type S. C.-2

This specification covers material formerly designated in the Pacific Coast territory as 65 + Road Oil.

It provides for a very slow curing liquid product of low viscosity suitable for use in dry climates during cool

Super Concrete Emulsions

weather in the construction of traffic compacted road-mix wearing courses in which the mineral aggregate is densely graded, from a maximum diameter of 1 inch down, with from 35 to 60 per cent of material passing a 10-mesh sieve and from 7 to 14 per cent passing a 200-mesh sieve. It should ordinarily be warmed before application. As it does not develop high cementitiousness, it cannot be expected to increase appreciably the stability of the aggregate.

This material may also be used in the blotter or mulch treatment of clay roads with a loose or floating cover of gravel aggregate.

Type S. C.-3

This specification covers material formerly designated in the Pacific Coast territory as 72 + Road Oil.

It provides for a very slow curing liquid product of medium viscosity suitable for use in dry climates during hot weather, in the construction of traffic compacted road-mix wearing courses in which the mineral aggregate is densely graded from a maximum diameter of 1 inch down, with from 35 to 60 per cent of material passing a 10-mesh sieve and up to 14 per cent passing a 200-mesh sieve. It requires warming before application. As this type of material does not develop high cementitiousness, it cannot be expected to increase appreciably the stability of the aggregate.

Type S. C.-4

This specification provides for a very slow curing liquid product of relatively high viscosity, suitable for use in dry climates in the construction of cold laid traffic compacted plant-mix wearing courses in which the mineral aggregate is densely graded from a maximum diameter of 1 inch down, with from 35 to 60 per cent of material passing a 10-mesh sieve and from 7 to 14 per cent passing a 200-mesh sieve. The asphaltic material and sometimes the aggregate require heating before mixing. As this material does not develop high cementitiousness, it cannot be expected to increase appreciably the stability of the aggregate.

Methods of Test

FLASH POINT—Open Tag. (Method Approved by the Bureau of Explosives.)

The Tagliabue open cup flash tester shall be used.

The instrument shall set firm and level.

Fill the metal bath cup with water at a temperature of at least 20 degrees F. below the probable flash point of the oil to be tested, leaving room for displacement by the glass oil cup, which is then placed in the bath.

Fill the glass oil cup with the oil to be tested to within $\frac{1}{8}$ inch of its upper level edge. See that there is no oil on the outside of the cup, or upon its upper level edge, using soft paper to clean the cup.

Adjust the horizontal flashing-taper guide-wire in place. Suspend the thermometer, with its bulb well covered by the oil. Heat bath with small flame lamp having the flame so adjusted that it will raise the temperature of the oil not faster than 2 degrees F. per minute, without removing the lamp during the whole operation.

For viscous liquids it is necessary that the liquid be stirred at intervals during the test.

Remove air bubbles, if any, from the surface of the oil before first trial for flash is made.

At the proper trial temperatures, noted below, try for flash with a small (not over $\frac{1}{8}$ inch) bead of flame by drawing it quickly and without pause across the guide wire from left to right.

The temperature at which the first or initial flash is obtained is called the flash point.

Trial temperatures: For materials which may be expected to flash at about 80 degree F. try for flash first at 70 degree F., then at 75, 77, 79, 81, 83 and 85 degrees. For other materials try flash first at a temperature about 20 degree F. below the expected flash point and then try for flash at every 5 degree F.

FLASH POINT (Cleveland Open Cup.) American Society for Testing Materials.—Standard Method D92-24.

FUROL VISCOSITY (Saybolt Furol.) American Society for Testing Materials.—Standard Method D88-30.

Distillation

American Society for Testing Materials.—Standard Method D20-30, with the following exceptions:

Sample distilled shall be 200 cubic centimeters, the weight of this volume to be calculated from the specific gravity at 60 degree F. Bulb of thermometer shall be immersed to a point one-fourth inch above bottom of flask. Condenser shall be water cooled. Distillate shall be collected in 100-cubic-cent. graduated glass cylinders and the amount of distillate shall be reported in percentages by volume of water-free material. Distillation shall be stopped at 680 degree F. and the amount of distillate read to the nearest cubic centimeter after the condenser has been allowed to drain thoroughly into the receiver. The total residue shall then be poured immediately into an 8-ounce tin and allowed to air cool without covering to a temperature below its fuming point suitable for pouring. It shall then be stirred and poured into proper receptacles for additional tests. Temperatures observed in the distillation test shall be corrected for the effect of the altitude of the laboratory in which the test is made. (See A. S. T. M. standard method D86-30.)

FLOAT TEST. American Society for Testing Materials.—Standard Method D139-27.

PENETRATION TEST. American Society for Testing Materials.—Standard Method D5-25.

DUCTILITY TEST. American Society for Testing Materials.—Tentative Standard Method D113-32T.

SOLUBILITY IN CARBON DISULPHIDE. American Society for Testing Materials.—Standard Method D4-27.

WATER AND SEDIMENT. American Society for Testing Materials.—Standard Method D96-30.

STEEL GUARD DESCRIBED—The Tuthill Highway Guard, recently announced by the Tuthill Spring Company, 760 Polk Street, Chicago, Illinois, is described in the new folder recently issued by that company.

Today with modern highways, higher powered automobiles and the public cry for more and more speed, the matter of protecting danger points has become a serious question. The old type wooden rail guard will no longer serve. It has become a menace rather than a safeguard to life and property.

Time after time we hear of wooden rails being driven clear through automobiles, impaling the driver or otherwise injuring the occupant. We hear of terrible disaster wrought by flying splinters or glass from the windshield.

This bulletin tells about a new type of road guard that is designed to deflect rather than to stop vehicles. A guard that sends cars on their way without damage to car or occupants.

A copy of this bulletin will be sent, gratis, upon request.

CO-OPERATIVE CONSTRUCTION CREDIT

F. H. Eichler, Chairman

A. J. McGarry, Mgr.

THE CASH PREMIUM

THAT the cash premium provision in a sales contract, generally designated as the "cash discount," is really a "privilege," from the point of view of the buyer, is easily demonstrated by an examination of figures indicating the annual interest rates to which the usual cash premiums are equivalent. The following will serve as examples:

1/2	per cent	10 days net	30 days	9	per cent	per annum
1	per cent	10 days net	30 days	18	per cent	per annum
1 1/2	per cent	10 days net	30 days	27	per cent	per annum
2	per cent	10 days net	30 days	36	per cent	per annum
3	per cent	10 days net	30 days	54	per cent	per annum

In determining these interest equivalents, the intervening period in days between the optional dates of payment is divided into 360 days (the number of days generally figured in the banking year) and the quotient is multiplied by the rate of discount which applies.

The figures given above are based on the discounting of each bill within 10 days from date of invoice or actual shipment of the goods. The privilege becomes, of course, even more advantageous to the buyer if he is allowed to discount his entire purchase for the month on an end-of-month statement. Under this arrangement, the seller (in order to get statements out promptly) generally closes the business two working days before the end of the month. Shipments made on these two days are treated as part of the next month's business.

In return for this privilege, it is certainly reasonable for the seller to expect the buyer to live up to the terms of the contract and take only such discounts as are actually earned by prompt payment. Cash premium abuse has been, however, one of the worst and most persistent evils that credit executives in manufacturing and wholesaling concerns have had to face since American business began to develop a real credit technique.

This abuse has been vigorously fought by many local and national organizations. The National Association of Credit Men has discussed it frequently in regional conferences and national conventions. The National Wholesale Conference, sponsored by the Chamber of Commerce submitted as part of the report of Committee IV, which dealt with "credits, sales terms and collections:"

"The tendency toward the taking of unearned discounts is one of the serious credit problems wholesalers face. Only united effort will prove effective in defending the sanctity of the contract which exists when goods are sold on clearly stated terms of sale."

If the contract says "ten days," it should mean exactly that, and not fifteen, or twenty, or more. A difference of a day or two is, of course, not important enough to haggle over. Some concerns place a limit of thirteen days on a ten-day premium arrangement, either returning checks received thereafter for correction or writing a letter asking that the matter be properly adjusted. There is also a fairly general practice of giving a few days' extra leeway to buyers located at a considerable distance from the selling center, as, for example, Pacific Coast concerns making purchases from sellers in the East or Mid-west.

O. H. WALKER

Secretary-Manager of Credit Managers' Association
of Northern and Central California

Fortunately, in spite of the frequency with which the premium piracy racket is attempted, the number of buyers who are taking advantage of the premium privilege, and remitting promptly according to stipulated terms, is decidedly on the increase. This is noticeable even during the present business depression, and the reason for it is clear. The buyer has discovered that discounting is one of the most profitable of all of his business operations, and in "hard times" he wants more than ever to do whatever is profitable.

There are, as discriminating buyers well know, many advantages in discounting beside the high rate of interest earned. It reduces bookkeeping and correspondence. It contributes immeasurably to good-will between buyer and seller. It assures prompt attention to orders, with quick and careful shipping of goods. This should not be interpreted as indicating that sellers divide their customers arbitrarily into discounters and non-discounters, with one kind of goods and service for the former and another kind for the latter. But, human nature being what it is, the prompt payer cannot fail to have the advantage in the long run, because the seller will always go out of his way to help him in every possible contingency.

Most important of all discounting is the shortest and surest way to a sound credit standing. It speaks volumes in a credit interchange report or in a roundtable exchange of credit information. The seller is bound to have more than a passive perfunctory interest in his discounting customers. His attitude towards them is one of active, persistent cooperation. And this attitude is contagious. It spreads from one seller to another, sometimes directly and personally and sometimes anonymously, so to speak, through the impersonal interchange report. The effect on the buyer's credit reputation is tremendous, as his credit title is his one best bet. Without it he cannot possibly do business.

Engineering Council Holds Hoover Public Works Plan Aid to Economy

PRESIDENT Hoover's creation of a Division of Public Works will result in a new era of economy in government construction, further the relief of unemployment and improve the Federal administrative organization, the American Engineering Council declares in calling upon Congress and the nation to give unqualified support to the President's program.

The Council, representing 60,000 engineers in this country, asserted the engineering and allied technical professions were in favor of a Division of Public Works because they are convinced it would eliminate archaic practices and call a halt in the duplication of effort, equipment and personnel.

The Division was established in one of a series of Presidential executive orders, issued on December 9, to take effect after sixty days or on February 9, 1933, unless specifically rejected by Congress. The orders now are being studied by the Senate's Special Economy Committee, of which Senator Hiram Bingham of Connecticut is chairman, and the House Committee on Expenditures, of which Representative John J. Cochran of Missouri is the head.

The President designated the Division of Public Works as a part of the Department of the Interior, to be presided over by an under-secretary. Under his program, it would assume control of the office of the Supervising Architect, in charge of all Federal public building construction, now in the Treasury Department; all work on rivers and harbors, heretofore directed by the Engineering Corps of the Army, and the Bureau of Public Roads, at present a division of the Department of Agriculture.

The Council concurred in President Hoover's statement that "these orders constitute the necessary initial action in carrying out the policy which Congress has proclaimed in connection with the reorganization of the executive branch of the Federal government."

Hailing the Hoover plan as a definite reduction in the cost of government, the Council declared:

"The Veterans Administration has clearly shown that such results followed the regrouping of the Veterans Services, and it is reasonable and logical to assume that similar results will follow the establishment of the Division of Public Works.

"A coordination and correlation of the public works functions of the Federal government will result in a greater utilization of the best and latest technical knowledge and methods. Current developments could be more universally observed and applied than is possible under the present divided authority and responsibility.

"The concentration of field services offers a large area of opportunity for reducing expenses. Undoubtedly a major saving could be realized through reducing the number of offices and employees, the amount of travel and equipment required and general overhead expenditures."

Regarding unemployment relief, the Council had this to say:

"There has been a great deal of disappointment because Federal construction has not relieved unemployment to the degree anticipated. This situation has been thoroughly studied by the American Engineering Council and it is convinced that public works can never be made as effective a factor as they might be in the relief of unem-

ployment until there is established a Division of Public Works.

"The work is now so scattered and there is such divided responsibility that there is no means of adequately regimenting public works to be immediately effective in times of emergency. Under a central authority, public works can be made a potent influence in relieving unemployment."

A complete plan of control for the Division of Public Works is another point in the Council's list of recommendations regarding the Hoover plan.

"With a Division of Public Works cooperating with the Bureau of the Budget and the Federal Employment Stabilization Board," it was said, "there would result a complete coordination and correlation of the planning, timing and financing of public construction.

"This would result in major economies and at the same time make public construction fit more adequately and effectively into our national economy."

The Council warned that "there is now a tax revolt in the country" and that the citizens "are going to see to it that taxes are reduced and that government expenses decrease—which, if not done wisely and methodically will be done unwisely and peremptorily."

"The construction industry," the Council added, "is the one great industry of the country in which government—Federal, state, county and municipal—take a large part. For more than thirteen years, public works has never been below twenty per cent of the entire industry in any one year, has been as much as fifty per cent some years and has averaged thirty-eight per cent.

"Public works comprise all kinds of construction. It is well known that in our governmental agencies engineers have charge by and large of public works. Hence their obligation and duty to make themselves heard in no uncertain terms with respect to this question."

Taking up the possibility of resistance to the Hoover program, the Council commented:

"Self-preservation is said to be the first law of nature and no act of Congress or any other legislative body can change it. The general theory of efficiency and economy resulting from consolidation of public work functions can hardly be refuted by any one. They seem obvious.

"Their obviousness, however, does not look so good to the particular individual in a Federal bureau. He prefers for his bureau to be let alone where it is. It is believed that the principal resistance to the establishment of a Division of Public Works comes from the activity in Washington of Federal employees in the several bureaus whose status, if not their jobs, are always in jeopardy when such a consolidation is brought about."

LETOURNEAU EQUIPMENT SALES—New LeTourneau heavy grading equipment purchased within the past few weeks is now at work on or on the way to construction jobs from Washington to Arizona, with one shipment going to Mississippi, for use on new levees.

The Washington shipment consisted of two 7-yard scrapers with double power control units to be used on the Elliott & Co. contract, at Seattle. The L. E. Dixon Company in Arizona bought a second bulldozer and double power control unit and has ordered two LeTourneau rooters. They already are using one bulldozer bought some time ago.

Cloverdale-Hopland Relocation to Straighten 17-Mile Roadway

Although their contract does not call for completion of the work until the summer of 1933, Granfield, Farrar & Carlin, San Francisco, are already nearing completion of grading for the Cloverdale-Hopland relocation of the Redwood Highway.

This new construction, when bridges and paving have been completed, will eliminate the old "Cloverdale grade" which has slowed down traffic in this section for many years. The new road will eliminate three miles of distance in the 17-mile stretch and will substitute for the 276 curves of the old route, many of which were of less than 100 feet radius, 49 long easy ones, none having less than 1,000 feet radius.

Notable improvements in grade will also be attained. Except for one short stretch the new road will have no grades as steep as 6 percent; the old road has five miles of 7 per cent grade and an additional three and a half miles of 6 per cent grade. The total rise and fall is also reduced from 3670 feet to 1,000 feet.

Crossing the Russian river a short distance north of Cloverdale, the new route follows the eastern bank of that stream practically all the way to Hopland. It is the only stretch of the Redwood Highway which does approach this stream's course and the state, in order to provide space for campsites and recreation areas, has extended the right-of-way purchases to the river's edge wherever possible. Some of the country traversed is quite rugged and extremely beautiful, and it is expected that this will become one of the most popular parts of the state with outdoor recreationists.

The contract involved 1,250,000 yards of excavation and 5,496,825 station yards of overhaul. Owing to the necessity for locating the road on the eastern bank of the river a great many slides were encountered, as this region is one of volcanic overflow over the bedrock formation and in certain sections, where this overflow is a porous tufa nature, it becomes very unstable when wet.

However, as the eastern bank was already occupied by the Northwestern Pacific railroad, the engineers had no choice but to place the highway on the opposite one. This has necessitated the drainage or destruction of the collecting reservoirs above each slide, where water gathered and caused the soil to become unstable.

Of the many slides encountered, the worst was opposite Squaw Rock, a practically vertical cliff on the west bank of the river about halfway between Cloverdale and Hopland. Here a bridge spanning the slide area is to be built and the slide eventually sluiced down, if necessary.

As the relocation lies quite close to the river at many points along the route, much flood-protection work was necessary and was included as part of the grading contract. For this work rock was taken direct from the river bed. The usual method was to cut a construction road from grade down to the stream and then place a power shovel directly in the bed of the river where it could pick up the required rock. This was hauled to place in either trucks or LeTourneau dumpcarts which were backed down the construction road to within reach of the shovel.

The specifications called for placing this protective

rockwork in neat lines and for grouting where necessary, so that the roadway, when complete, will be well protected from damage due to flood waters.

As about 60 percent of the grading work was in rock, considerable quantities of explosives were used. In the grading power shovels, a LeTourneau roter and powder were used, according to circumstances, to break up the material to be removed and then either trucks, LeTourneau scrapers or LeTourneau carts used to haul it away. Bulldozers on Allis Chalmers tractors were used to spread the material dumped from carts, but the scrapers spread the spoil so that no further work was necessary except to compact it with a LeTourneau sheepfoot roller. The fills were further compacted by the passage over them of the heavy LeTourneau carts and their loads, sometimes as much as 15 yards, of dirt or rock.

The grade is being finished to a minimum width of 37 feet. It is to stand through the winter for settlement and to permit any further possible slides to develop under the influence of the winter rains.

Beside the elimination of curves, many of them extremely abrupt, and the levelling out of grades, the new road has a distinct safety advantage over the existing route in that it does not cross any summits where fog is prevalent. The present road traverses seven of these, all of which are frequently blanketed by fog in winter.

Some Phases of the 1932 Federal Income Tax Law

FRANK T. ANDREWS, *Certified Public Accountant; Associate Member, Associated General Contractors*

The following is the fourth of a series of eight articles outlining Income Tax Regulations of interest to every contractor.

THE taxation of sales or exchanges of capital assets is a matter of considerable importance to the contractor. Capital assets means, for income tax purposes, property held by an individual taxpayer or partnership for more than two years, but excluding property such as supplies or merchandise for sale, which should properly be included in an inventory at the end of a year. The principal capital assets held by contractors are machinery and equipment, real estate and stocks and bonds.

Upon the sale or exchange of capital assets the income tax regulations allow some concessions to individuals and impose some restrictions. The concessions and restrictions apply only to the method of taxation and not to the computation of gain or loss.

In view of the increased rates of taxation under the 1932 Act a great many individual taxpayers will pay a tax in excess of 12½% of their net income. It is to this particular class of taxpayers that the capital net gain or loss provisions apply.

If it appears that due to the sale of capital assets the tax computed at the ordinary rates is in excess of 12½% of the total net income, at the election of the taxpayer, the following method of computing the tax may be substituted: The total net taxable income should be reduced by the amount of the capital net gain and the tax should be figured upon the remaining ordinary net income. Then a separate tax must be computed upon the capital net gain at the rate of 12½%. This amount added to the tax upon the ordinary net income will give the total tax.

It must be understood that gains from sale or exchange of capital assets must be considered along with losses from these sources. Although the regulations offer to the taxpayer a concession by way of a 12½% tax limitation on capital net gains, it also imposes a restriction upon capital net losses.

Should the sale or exchange of capital assets, during the year, result in a loss, the taxpayer may not take advantage of the loss in computing his tax beyond 12½% of such loss. This rule is effective when the tax computed in the ordinary manner is in excess of 12½% of the net income excluding the capital net loss. For example: a married man having no dependents and receiving no dividends or exempt interest earns \$40,000 for the year. His earnings consist of \$45,000 from his ordinary contracting business and a loss of \$5,000 from the sale of equipment held for more than two years. The total tax on his net income, computed in the ordinary way, including the loss on equipment, would be \$5,800. This method of figuring the tax is not permitted. The loss on sale of capital assets of \$5,000 must be added back to the ordinary net income and a tax computed on \$45,000 which would amount to \$7,140. From this new tax figure is deducted 12½% of the capital net loss; i. e. 12½% of \$5,000 or \$625. The total tax payable would then be \$7,140 less \$625, or \$6,515, instead of the \$5,800 tax figured in the ordinary manner.

There has been a great deal of misunderstanding about the method of handling an exchange of old machinery or equipment for new machinery or equipment.

The income tax regulations ordinarily hold that upon an exchange of assets the fair market value of the asset exchanged compared with the value of the asset received shall be the basis for determining profit or loss. However, where assets are exchanged upon an equal basis for other assets of like kind, not including stock in trade or securities, no gain or loss is recognized.

The bookkeeping as well as the tax procedure, in some cases, involving exchange is particularly interesting. Let us say that a contractor owns a paver that costs \$10,000 and which had been depreciated to a book value of \$5,000. This contractor exchanges the old paver plus \$7,000 for a new one which has a market value of \$9,000. Since the old paver had a book value of \$5,000 and \$7,000 additional cash was paid for the new one, the sum of these two items is \$12,000. Since the new paver is only worth \$9,000, many contractors would take a loss on their books of \$3,000; the difference between old book value plus cash and value of the new paver. This loss of \$3,000 is not deductible for income tax purposes. The Revenue Bureau has held that in a case like the one just shown, the new equipment should be valued, for the purposes of future depreciation, at the remaining value of the old equipment plus the cash paid out, or \$12,000. Although it would not be good accounting to value the new equipment upon the books at any other figure than its cost, namely \$9,000, in these instances an entry may be made upon the books charging surplus or undivided profits with the \$3,000 loss not allowed, and crediting an account which may be termed "Reserve for Valuation of Machinery and Equipment" with the same amount. As the new paver is depreciated each year upon the books, the aliquot part of each year's depreciation attributable to the \$3,000 may be charged against the "Reserve" and credited back to surplus or undivided profits. In this way, when the fictitious value of the equipment has been fully depreciated, the "Reserve" account will also have been cleared from the books. The transfer from the "Reserve" account to surplus or undivided profits is not taxable.

In order to avoid all of this bookkeeping and income tax trouble, it is suggested that should a contractor desire to turn in old equipment for new equipment, an arrangement be made to sell the old and purchase the new. If this is done the transaction would be a "sale" and not an "exchange." This procedure will require the receipt of cash or a check for the old equipment and the payment in full for the new equipment.

In the case of an exchange, if the book value or depreciated value of the paver referred to were \$1,000, the cash paid out \$7,000 and the value of the new paver were \$9,000, the exchange would result in a taxable profit of \$1,000. In other words, this is another rule which, apparently, works one way only.

Mr. Andrews will gladly answer your income tax questions during the time these articles are appearing in the *Pacific Constructor*. Address your communications to F. T. ANDREWS & CO., Certified Public Accountants, Russ Building, San Francisco.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

REINFORCED CONCRETE GIRDER BRIDGES--SAN DIEGO COUNTY

SAN DIEGO COUNTY, Cal.—M. H. Golden, 404 California Bank Building, San Diego, at \$44,242.75 submitted low bid Dec. 28 to the State Highway Commission, Sacramento, to construct in San Diego, two reinforced concrete girder bridges on concrete pile bents, one across Cudahy Channel, consisting of thirteen 30-ft. spans; and the other across Tecolet Creek, consisting of four 30-ft. spans, involving:
 (1) 4000 cu. yds. channel excav.;
 (2) 5600 lin. ft. reinf. conc. piles, Inc. test piles;
 (3) 1475 cu. yds. Class A Port. cement

concrete;
 (4) 41 cu. yds. Class E do;
 (5) 327,000 lbs. bar reinf. steel;
 (6) 2945 lbs. bronze expansion plates;
 (7) 1530 lin. ft. traffic stripe;
 (8) 1020 lin. ft. curb strip;
 (9) 1 lot misc. items of work.
 Complete bids follow:
 (A) M. H. Golden, San Diego, \$44,242.75.
 (B) B. O. Larsen, San Diego \$44,604.25
 (C) Walter Trepte, San Diego, \$45,369.00.
 (D) V. R. Dennis Const. Co., San Diego, \$47,037.50.

(E) Frank Doran, San Diego, \$47,414.60.
 (F) M. B. McGowan, San Francisco, \$47,441.00.
 (G) Bodenhamer Const. Co., Oakland, \$47,511.00.
 (H) Oberg Bros., Los Angeles, \$50,705.50.
 (I) W. E. Kier Const. Co., San Diego, \$54,426.15.
 (J) Dimmitt & Taylor, Los Angeles, \$55,428.00.

HAMILTON FIELD POST ROADS--GOV'T.—BIDS OPENED

SAN RAFAEL, Marin Co., Calif.—Hutchinson Co., 1450 Harrison Street, Oakland, at \$16,090 submitted low bid to Constructing Quartermaster, Hamilton Field (Marin Meadows Bombing Base) to construct post roads (North Oakwood, South Oakwood and Radio Road) at Hamilton Field, involving:
 (1) excav. earth, per cu. yd.;
 (2) excav., rock, per cu. yd.;
 (3) overhaul, per cu. yd.;
 (4) concrete, inc. forms, per cu. yd.;

(5) reinf. steel, per lb.;
 (6) corr. galv. iron drain pipe, per foot;
 (7) 12-in. do, per ft.;
 (8) terra cotta pipe, per ft.;
 (9) 12-in. do;
 (10) crushed rock or gravel, compacted, per cu. yd.;
 (11) catchbasin castings, per lb.;
 (12) asph. conc. pave., 2-course, per sq. yd.;

(13) oil treatment for gravel base, per sq. yd.;
 (14) concrete gutter, per lin. ft.
 Complete bids follow:
 (A) Hutchinson Co., Oakland, \$16,090.
 (B) Pacific States Const. Co., San Francisco, \$16,716.55.
 (C) V. Maggiora, Sausalito, \$18,211.
 (D) Highway Builders, San Anselmo, \$21,442.40.

LEAD-COVERED CABLE — LOS ANGELES

LOS ANGELES, Cal.—Bids for furnishing lead-covered cable under Spec. No. 2955 were received by City Purchasing Agent, A. J. Holm, Dec. 27. The items are:

- (1) 20,000 ft. 5-conductor, 19 strands, No. 22 A.W.G. insulated, lead-covered cable;
- (a) f.o.b. cars Davies Extension Spur, S. P. delivery, Los Angeles;
- (b) f.o.b. trucks, Dept. of Water and Power warehouse, 257 E 3rd St., Los Angeles;
- (c) f.o.b. cars bidder's factory with full freight allowed to L. A.;
- (d) f.o.b. cars bidder's factory with full freight allowed to L. A.;

(2) 11,000 ft. 9-conductor, 19 strands of No. 22 A.W.G. rubber insulated, lead-covered cable:
 (a) (b) (c) and (d) as above.

Bidders follow:
 (A) General Electric Company.
 (B) John A. Roebling Sons Co.
 (C) Simplex Wire Cable Co.*
 (D) General Cable Corp.
 (E) Columbia Steel Company.
 (F) Okonite Company.
 (G) Crescent Insulated Wire & Cable.
 (H) Anaconda Wire & Cable Co.
 (I) Graybar Electric Company.
 All terms 1/2 of 1%, 10 days.
 *Bid based on carload shipment.

MISCELLANEOUS CONSTRUCTION

Contract Awarded.
MAUSOLEUM Cost, \$15,000
 PALO ALTO, Santa Clara Co., Cal.
 Alta Mesa Memorial Park.
 One-story reinforced concrete mausoleum (60x80 ft.) to contain crematorium, columbarium and chapel, iron grilles doors, decorative tile, provision for 90 crypts.
 Owner—Alta Mesa Improvement Co., Palo Alto (Professor W. H. Sloan, Pres.), Stanford University, Palo Alto.
 Architect—Birge M. Clark, 310 University Ave., Palo Alto.
 Contractor—Carl Lindholm, Mountain View.

Plans Completed.
CREMATORIUM Cost, \$150,000
 VANCOUVER, Wash.—Evergreen Highway; 10-acre tract.
 Reinforced concrete crematorium (180 by 50).
 Owner—Columbia Memorial Co. (Mayor J. P. Higgins, vice-president).
 Architect—Day W. Hilborn, Vancouver.

GRADE SEPARATIONS—LOS ANGELES—BIDS OPENED

LOS ANGELES, Cal.—R. E. Campbell, Central Bldg., Los Angeles, submitted low bid to board of public works, Dec. 28, at \$209,960.01 (without structural steel and ornamental lighting system, and based on the lowest possible combination of alternatives) for the construction of the Sunset Blvd. and Silver Lake Blvd. and the Silver Lake Blvd. and Temple Street Grade Separations, under cash contract.

Consolidated Steel Corp., 6500 East Slauson Ave., Los Angeles, was the lowest bidder on structural steel at \$53,400. This figure was a combination of \$20,323 on Unit No. 2, \$33,458 on Unit No. 4, less a deduction of \$381 for combined award.

W. H. Rumble, 6507 Haas Ave., submitted low bid on the ornamental lighting system (Unit No. 5) at \$28,980. See note below in connection with H. H. Walker, Inc. bid, which offers to substitute Lalux for Marbelite, deducting \$6000, making a total of \$27,000.

The total of the bids, using the lowest possible combinations, amounts to \$292,340.01.

For further details of the various combinations, refer to the tabulations printed below.

The items bid on are as follows:

Separation, complete in place, except structural steel:

- (1) reinf. steel, lump sum;
- (2) 2300 cu. yds. Class F concrete;
- (3) 100 cu. yds. Class G concrete;
- (4) reinf. conc. piles, lump sum;
 - (a) pre-cast;
 - (b) cast in place;
- (5) grading, lump sum;
- (6) pavements, lump sum;
- (7) 1338 lin. ft. curb;
- (8) 850 sq. ft. concrete gutter;
- (9) 9050 sq. ft. cement walk;
- (10) sanitary sewer, lump sum;
- (11) storm drains, lump sum;
- (12) brickwork, lump sum;
- (13) ornamental iron railings, lump sum;
- (14) lighting system, lump sum.

Unit II—Structural steel in Sunset Blvd. and Silver Lake Blvd. Grade Separation, complete in place, lump sum.

Unit III—Silver Lake Boulevard and Temple St. Grade Separation, complete in place, except struc. steel:

- (2) 2015 cu. yds. Class F concrete;
- (3) 100 cu. yds. Class G concrete;
- (4) reinf. conc. piles, lump sum;
 - (a) pre-cast;
 - (b) cast in place;
- (5) grading, lump sum;
- (6) pavements, lump sum;
- (7) 690 lin. ft. curb;
- (8) 5912 sq. ft. cement walk;
- (9) sanitary sewers, lump sum.
- (10) ornamental conc. handrails and pylons, lump sum;
- (11) orn. iron railings, lump sum;
- (12) lighting system, lump sum.

Unit IV—Structural steel in Silver Lake Blvd. and Temple St. Grade Separation, complete in place, lump sum.

Unit V—Ornamental street lighting system in Silver Lake Blvd. between Glendale Blvd. and Virgil Ave. and in West Silver Lake Drive bet. Blamer Drive and Silver Lake Blvd.

Unit VI—Deduction, lump sum, if Units I and II are awarded in one contract.

Unit VII—Deduction, lump sum, if Units III and IV are awarded in one contract.

Unit VIII—Deduction, lump sum, if Units I and III are awarded in one contract.

Unit IX—Deduction, lump sum, if Units II and IV are awarded in one contract.

Unit X—Deduction, lump sum, if Units I, II, III and IV are awarded in one contract.

Unit XI—Deduction, lump sum, if Units I, II, III, IV and V are awarded in one contract.

The proposed structures will be of the steel deck girder span type. One structure which will be built at Sunset Blvd. will consist of an 85-ft. span 100 ft. wide, the other will carry Silver Lake Blvd. under Temple Street and will be 80 ft. in width with a 100-ft. span. Ornamental lighting system in Silver Lake Blvd. bet. Glendale Blvd. and Virgil Ave. will involve 135 Marbelite standards. The estimated cost of the project is \$350,000.

The unit prices, with bidders designated by letters, follow:

- (A) R. E. Campbell,
- (B) Oberg Brothers,
- (C) J. E. Haddock, Inc.
- (D) P. J. Akmadzich,
- (E) Artukovich Brothers,
- (F) Engineer's estimate.

PIPE LINES, WELLS, ETC.

SEATTLE, Wash.—Thomas Scalzo, 50th SW and W Stevens, Seattle, at \$217,631 awarded contract by the city council to construct 45,000 ft. 17th Ave. NE pipe line, using electric welded steel pipe. L. Coluccio, Ellensburg at \$170,051, submitted low bid for wood stave pipe. Complete bids on welded steel pipe follow:

Thomas Scalzo	\$217,631
Bayley Hipkins	223,431
Felix Arcorace	224,025
P. N. Badolato Co.	225,113
Lawlor Woodward	229,052
Puget Sound E. & D. Co.	231,817
L. Coluccio	234,086
General Const. Co.	243,277
Seattle Boiler Works	249,138
L. Romano Eng. Co.	249,599
Teufel & Carlson Co.	251,848
Mocerri Brothers	270,110

VENTURA, Cal.—Lyon Bros., 1363 Carmona St., Los Angeles, submitted low bid to City Council Dec. 27, at \$5363.93 for drilling a 20-in. water well on property located on Front St. between Figueroa and Walnut Sts. The proposed well will require a 22-ft. starter with 16-in. casing, and will be drilled to a depth of approximately 300 feet. The well will be designed to accommodate an 18-in. deep well pump. The other bids are:

Rosece Moss Co., \$5963.95; alternate \$5439.

W. A. Hood, \$6020, alternate \$6065.

Saunders Bros., \$6214.08.

Barber & Bridge Drilling Corp., \$6470.55, alternate \$6214.08.

Newton Palm, \$6863.97.

Western Pipe & Steel Co. submitted a bid of \$3976.55 for materials only. All bids were taken under advisement.

MODESTO, Stanislaus Co., Calif.—Osterberg Bros., Route 4, Box 738, Modesto, at \$865.10 submitted low bid to city council to drill water well, furnish and install casing, sand pumping and developing said well, involving:

- (1) drill 14-in. well, first 50 ft.;
- (2) do, second 50 ft.;
- (3) do, third 50 ft.;
- (4) do, fourth 50 ft.;
- (5) do, next 25 ft. or fraction thereof;
- (6) furnish and drive 14-in., 14-ga., 24.1 double casing;
- (7) furnish and drive special 12-inch perf. casing;
- (8) 1 14x6x3/4-in. steel driving shoe;
- (9) sand pump and develop well (per hour).

Complete bids follow:

(A) Osterberg Bros., Modesto...\$865.10

(B) O. K. Pemberton, Linden... 960.65

WATERWORKS

LOS ANGELES, Cal.—General Elec. Supply Corp. awarded contract by the City Purchasing Agent, A. J. Holm, at \$75,000 (estimated amount) for furnishing fibre conduit and fittings under Spec. No. 2960.

RIO VISTA, Solano Co., Cal.—Pacific Coast Engr. Co., foot of 14th St., Oakland, at \$6817.50 submitted low bid to U. S. Engineer Office, Sacramento, to furnish 270 lengths shore

pipe in 16-ft. lengths. Complete unit and total bids follow:

Pacific Coast Engr. Co., \$25.25; \$6.-\$17.50.

California Steel Products Co., San Francisco, \$25.83; \$6974.10.

Steel Tank & Pipe Co., Oakland, \$27.50; \$7425.00.

Western Pipe & Steel Co. San Francisco, \$31.04; \$8380.80.

Montague Pipe & Steel Co., S. F., \$31.30; \$8424.00.

Bids held under advisement.

LOS ANGELES, Cal.—Bids for furnishing about 180 miles of 5-in., 6-in., and 8 in. light weight O. D. steel gas line pipe for the construction of a water supply system of the Colorado River Aqueduct, were opened by the Metropolitan Water District Dec. 27. Bids were taken as follows:

The items are:

- (1) 20,000 ft. 8-in. plain end pipe, weighing 18.23 lbs. per ft.;
- (2) 43,000 ft. 8-in. plain end pipe, weighing 13.23 lbs. per ft.;
- (3) 23,000 ft. 6-in. plain end pipe, weighing 14.64 lbs. per ft.;
- (4) 249,000 ft. 6-in. plain end pipe, weighing 8.76 lbs. per ft.;
- (5) 619,000 ft. 5-in. plain end pipe, weighing 6.96 lbs. per ft.

Delivery shall be as follows:

Delivery of the following lot of pipe shall be commenced within five days after receipt of the District's order and shall be completed within forty days thereafter provided that the shipment shall be not less than 150 tons net week at any time, and that all six-inch pipe of 8.76 lbs. per foot shall be shipped first. It is further provided, however, that in the event the manufacturer's plant is located within 600 miles of Garnet, California, delivery of the following quantities shall be commenced within twenty-one days after receipt of the order and shall be completed within fifty days after receipt of such order.

85,000 feet of 5-inch—6.96 lbs per linear foot.

70,000 feet of 6-inch—8.76 lbs; per linear foot.

20,000 feet of 6-inch—14.64 lbs. per linear foot.

17,000 feet of 8-inch—13.23 lbs. per linear foot.

20,000 feet of 8-inch—18.23 lbs. per linear foot.

Delivery of the remaining quantity required by the Bidding Schedule shall be as required by the District at any time within eighteen months after receipt of the order provided that such remaining shall be ordered in lots of approximately 500 tons each and that for each such lot the delivery time shall be the same as required for the schedule herein above mentioned.

As an alternative to a portion of the foregoing material, bids were also taken on 85,000 lin. ft. or less of used rotary drill pipe of approximately 5.5 inches outside diameter and for 90,000 lin. ft. or less of used rotary drill pipe of approximately 6.6 inches outside diameter.

Unless otherwise noted, prices are f.o.b. cars at manufacturer's plant.

The bids were:

Hillman-Kelly, Inc.—lap welded—(1) \$.4914 ft., (2) \$.3364 ft., (3) \$.3504 ft., (4) \$.2262 ft., (5) \$.1794 ft Total, \$200,584, net. Will protect district on prices.

Duncommun Corp.—elec. resist weld pipe—52 to 42 ft. lengths—(1) \$49.14 per C ft., (2) \$35.64, (3) \$35.04, (4) \$22.62, (5) \$17.94. Total, \$200,584.80, net. Alt. (1) 19,569 lbs. per ft., 48.75c ft. Will protect district on prices.

California Hardware Co.—f.o.b. manufacturer's plant—lap welded pipe—

			UNIT NO. 5

SAN GABRIEL RIVER BRIDGE—L. A. COUNTY

LOS ANGELES, Cal.—E. S. McKittrick Co., Inc., and J. E. Burrell, 5905 Pacific Blvd., Huntington Park, submitted low bid to county supervisors December 19, at \$26,702, for the construction of a concrete bridge across San Gabriel river at Second St. in Long Beach, involving:

- (1) 12,000 cu. yds. excavation;
- (2) 1750 tons furnishing and placing rock rip-rap;
- (3) 6720 lin. ft. furnishing and driving pre-cast concrete piles;
- (4) 26 M.B.M. placing deck lumber;
- (5) 600 cu. yds. placing class A concrete;
- (6) 50 cu. yds. placing class B coner.;
- (7) 19,100 sq. ft. placing asphalt concrete wearing surface, including furnishing of all materials;
- (8) 27 M.B.M. placing Wakefield sheet piling.

The proposed bridge will be 390 ft. long, with a 50-ft. roadway and two 6-ft. walks. The super-structure will rest upon 14 pile bents. E. C. Eaton, 202 N. Broadway, County Flood Control Engineer.

Electric and Hydraulic Elevators
Otis Elevator Co., Washington, D. C., \$31,289.

Westinghouse Electric Elevator Co., Chicago, \$31,987.

Pacific Elevator Co., San Francisco, \$32,112.

Refrigeration and Ice Making Plan

Kohlenberger Engr. Corp., Fullerton, Calif., \$18,510.

York Ice Machine Co., York, Pa., \$19,475.

Volter Mfg. Co., Milwaukee, \$20,242.

Pennsylvania Engr. Co., Philadelphia, \$20,955.

Baker Ice Machine Co., Los Angeles, \$24,000.

*An amended bid was wired by K. E. Parker Co. raising their bid \$112,000, which if accepted will leave the Baruch Corporation low.

PROPOSED 1933 CONST.—METRO. WATER DISTRICT

LOS ANGELES, Calif.—During the year 1933, a total of \$17,600,000 will be expended by the Metropolitan Water District for tunnel and miscellaneous construction on the Colorado River Aqueduct, according to an estimate prepared by district engineers. The

total cost of the work for which work will be started probably within the first six months of 1933, amounts to \$78,742,000. These figures include engineering and administrative expense.

The table follows:

TABLE OF PROBABLE EXPENDITURES 1933
COLORADO RIVER AQUEDUCT
METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

Items or Units	Cost of Unit	Date of	Prob. Est. Expenditure		Year 1933
			1st half	2nd half

BRIDGE MEADOW VALLEY WASH—LINCOLN CO. NEV.

LINCOLN COUNTY, Nevada—A. O. Thorn, Strong & Grant, Springfield, Utah, at \$15,806.75 awarded contract by the State Department Highway to construct steel and concrete bridge over Meadow Valley Wash, one mile west of Caliente, Route 7, Section E-2, involving:
(1) 660 cu. yds. struc. excav.;
(2) 260 cu. yds. select borrow;
(3) .02 mi. subgrade;
(4) 52 cu. yds. lead. haul and spread gravel;
(5) 185 cu. yds. class A concrete;
(6) 1736 lin. ft. untreated piling;
(7) 1488 lin. ft. drive piles;
(8) 13,020 lbs. reinf. steel;
(9) 124,000 lbs. struc. steel;

(10) 3100 lbs. expansion rockers and plates;

(11) 3100 lbs. expansion rockers and
(12) 28 MFEM untreated Douglas fir;
(13) 372 sq. qds. asphalt plank wearing surface;

Complete bids follow:

(A) A. O. Thorn, Strong & Grant, \$15,806.75.

(B) Utah Constr. Co., Ogden, \$16,835.90.

(C) Dodge Eros., Inc., Fallon, \$16,832.40.

(D) Jas. J. Burke Co., Salt Lake City \$18,732.52.

(E) Engineer's estimate, \$18,863.00.

6.7-MI. GRADE & CEM. CONC. PAVE.—ALAMEDA CO.

ALAMEDA COUNTY, Calif.—Union Paving Co., 624 Call Bldg., San Francisco, at \$338,450.15 submitted low bid Dec. 21 to State Highway Commission, Sacramento for about 6.7 miles between Dublin and Castro Hill—4.4 mi. to be graded and paved with Portland cement concrete and about 2.3 miles to be graded and surfaced with bituminous treated crushed gravel or stone surfacing (plant mix).

Complete bids follow:

- (A) Union Paving Co., San Francisco, \$338,450.15.
 - (B) Fredrickson & Watson, Oakland, \$338,676.07.
 - (C) Basich Bros., Torrance, \$359,365.35.
 - (D) N. M. Ball, Porterville, Jack Casson, Hayward, and Hemstreet & Bell, Marysville, \$390,612.22.
 - (E) C. W. Wood Stockton, \$418,545.80.
 - (F) M. J. Bevanda, Stockton, \$446,841.20.
- The quantities are:
- (1) 8 acres clear and grub;
 - (2) 150 remove trees, size 1;
 - (3) 530 remove trees, size 2;
 - (4) 80 remove trees, size 3;
 - (5) 35 remove trees, size 4;
 - (6) 457,900 cu. yds. rdwy. excav., unclassified;
 - (7) 11,750 cu. yds. channel excav.;
 - (8) 3,548,700 sta. yds. overhaul;
 - (9) 4,500 M. gals. water (embank);
 - (10) 7900 cu. yds. struc. excav.;
 - (11) 54,500 tons crushed run base;
 - (12) 7800 tons crushed gravel or stone bit. treated surface;
 - (13) 400 tons cut-back asph. bit. surf.;
 - (14) 16,350 cu. yds. Class A cem. conc. (pave.);
 - (15) 1100 cu. yds. do (struc.);
 - (16) 452,150 lbs. bar reinf. steel (pave. and struc.);
 - (17) 13 cu. yds. concrete remove from

- exist. struc. and dispose of;
 - (18) 150 tons screenings bit. surface treat.;
 - (19) 900 tons screenings (shoulders & road approaches);
 - (20) 8 tons asph. road oil (bit. surf. treat.);
 - (21) 1245 bbls. heavy fuel oil (shoulders and road approaches);
 - (22) 2028 lin. ft. 8-in. corru. metal pipe
 - (23) 354 lin. ft. 15-in. do;
 - (24) 1677 lin. ft. 18-in. do;
 - (25) 991 lin. ft. 24-in. do;
 - (26) 236 lin. ft. 36-in. do;
 - (27) 20 lin. ft. 48-in. do;
 - (28) 575 lin. ft. 8-in. drain tile, remove and salvage;
 - (29) 284 lin. ft. corru. metal pipe, clean and relay;
 - (30) 1615 lin. ft. 8-in. perf. metal pipe underdrain;
 - (31) 25 culvert headwalls, remove and reset;
 - (32) 400 cu. yds. light rip-rap;
 - (33) 12,310 lin. ft. existing guard rail, remove and reset;
 - (34) 6620 lin. ft. laminated timber guard rail;
 - (35) 260 timber guide posts;
 - (36) 150 culvert markers;
 - (37) 5.07 miles existing property fence, remove and reset;
 - (38) 2.5 miles, new barbed wire fence;
 - (39) 2.5 miles new woven wire fence;
 - (40) 40 fence gates;
 - (41) 10.4 MFBM redwood timber dense sel. all-heart struc. grade;
 - (42) 16 MFBM do, sel. all-heart struc. grade;
 - (43) 354 sta. finish roadway;
 - (44) 144 monuments complete in place.
- State will furnish corrugated metal pipe, perforated metal pipe and spillway assemblies.

BIDS ON USED ROTARY DRILL
PIPE FOLLOW:

Buck & Stoddard, Inc.—used drill pipe—(1) 5.56 in. O. D. 19.59 lbs. ft.—21 ft. 6-in. lengths—\$5,000 ft. at 45c ft. f.o.b. Terminal Island; 2% 15th prox. Does not include loading pipe in cars.
Santa Fe Pipe & Supply Co.—drill pipe—data as follows: (A) 5-in. pipe, 19 lbs. ft. 6-in. 22½ lbs. ft.; (B) 85,000 ft. 5-in. 19 lbs. ft., 90,000 ft. 6-in. 21-23 lbs. ft.; (C) lengths—19 ft. 6-in., (D) guaranteed average weight 5-in. 19 lbs., 6-in. 22½ lbs.; f.o.b. L. A. and Long Beach. Prices: (1) 85,000 ft. 5.5 in. O. D. 26c ft., (2) 90,000 ft. 6-in. O. D. 36c ft.; total, \$54,500. Delivery—start in one day, 5000 ft. and over per day; 2% 30 days.

Imperial Pipe & Supply Co., Inc.—(1) 20,000 ft. 5.6-in. O. D. pipe at 40c ft. Delivery to start in 5 days. Terms 1% 10 days.

Petroleum Equipment Co.—(1) and (2): (A) wt. per ft. 5-in. (4.313-in.) 19 lbs., 5-in. (4.955 in.) 16 lbs. per ft.; 6-in. (5.939 in. I. D.) 22.5 lbs. ft.; (B) 6-in. 70%/16 lbs., 30% 19 lbs.; (C) average lengths 19 ft. 6-in., none under 18 ft., (D) guaranteed average weight: 5-in. to 4.813 in. 18 lbs. ft.; 4.955-in. 15 lbs. ft.; 5.939-in. 21 lbs. ft. Will supply pipe from sources as follows: General Petroleum Corp.—15,000 ft. 5-in. and 20,000 ft. 6-in. Vernon, Calif. Midway Supply Co., 60,000 ft. 5-in. and 20,000 ft. 6-in. Long Beach; Standard Supply Co.; 5000 ft. 5-in. and 25,000 ft. 6-in. at Los Angeles; 5000 ft. 5-in. and 25,000 ft. 6-in. from Los Angeles and contiguous points. Prices: (1) 5.5-in. at 27½c ft., (2) 6.6-in. pipe at 37c ft.; total, \$56,675.

Pacific Oil Well Supply Co., Ventura 7000 ft. 5 9/16-in. I. D.—30 ft. lengths—45c ft. f.o.b. yard at Piru; 7000 ft. 3½-in. seamless—30 ft. lengths—25c ft. f. o. b. yard, Piru.

SAN FRANCISCO.—U. Peira, 165 Howth St., San Francisco, submitted low bid to S. J. Hester, secretary, Department of Public Works, to improve connecting street between Laidley and 30th, and west half of Daidley bet. Noe and 30th, involving:

- (1) 450 cu. yds. excavation;
- (2) 3 brick catchbasins;
- (3) 1 brick manhole;
- (4) 45 10-in. V.C.P. culverts;
- (5) 70 ft. 6-in. do;
- (6) 420 ft. armored conc. curb;
- (7) 5350 sq. ft. 6-in. Class E concrete pavement;
- (8) 1160 sq. ft. 1-course concrete sidewalks.

Complete bids follow:

(A) U. Peira	\$1834.23
(B) Eaton & Smith	2223.00
(C) E. J. Treacy	2276.55
(D) Fay Imp. Co.	2369.75
(E) Theo. Cohn	2382.45

SAN FRANCISCO.—Until Jan. 11, 1:45 P. M., informal bids will be received by S. J. Hester, secretary, Department of Public Works, to repair pumping station at Fitzgerald Avenue and Griffith; estimated cost, \$165.

ENGINEERING NEWS

BRIDGES

PORTLAND, Ore.—Until Jan. 9 2 P. M., bids will be received by Lee A. Baumhover, city purchasing agent, room 208, City Hall, to wreck and remove timber trestle at Fourth and Sheridan Sts. Certified check 10% required with bids. Specifications obtainable from above office.

SAN DIEGO COUNTY, Cal.—M. H. Golden, 404 California Bank Bldg., San Diego, at \$44,242.75 awarded contract by State Highway Commission, to construct in San Diego, two reinforced concrete girder bridges on concrete pile bents, one across Cudahy Channel, consisting of thirteen 30-ft. spans; and the other across Tecolote Creek, consisting of four 30-ft. spans.

WOODLAND, Yolo Co., Cal.—Rocca & Caletti, P. O. Box 243, San Rafael, at \$136,988.15 submitted low bid to Joint Highway District No. 12, Second and C Sts., Yuba City, to construct Knights Landing drawbridge across the Sacramento river. Bridge will be of the double-leaf bascule type with a 200-ft. opening. Each leaf to be 111-ft. long, 24-ft. roadway, 3½-ft. sidewalk on each side of bridge, involving:

- 380 tons structural metal;
- 29 tons machinery;
- 3420 cu. yds. concrete;
- 112 tons reinforcing steel;
- 13,500 lin. ft. untreated timber piles;
- 5,600 lin. ft. treated timber piles;
- 43 M. ft. b.m. timber;
- 600 cu. yds. embankment;
- 375 sq. yds. concrete paving;
- 2 machinery houses;
- 2 electric operating motors;
- 2 gasoline engine units;
- various items of electrical equipment and wiring.

Bids were taken as follows:

PART NO. 1—Manufacture and delivery of structural metal, machinery, and electrical equipment.

PART NO. 2—Erection and installation thereof together with all other work at site.

PART NO. 3—Project as a whole.

Complete bids follow:

- Rocca & Caletti, San Rafael, (3) \$136,988.15.
 - M. B. McGowan, San Francisco, (2) \$85,888.00 (3) \$139,569.00.
 - Lord & Bishop, Sacramento, (2) \$93,318.00 (3) \$148,279.00.
 - Fredrickson & Watson, Oakland, (3) \$154,247.50.
 - Bodenhamer Const. Co., Oakland, (3) \$154,802.75.
 - Healy-Tibbitts Const. Co., S. F., (3) \$156,755.75.
 - Ward Eng. Co., San Francisco, (3) \$164,573.00.
 - Moore Dry Dock Co., San Francisco, (1) \$53,419.00.
 - Virginia Bridge & Iron Co., Los Angeles, (1) \$54,220.50.
 - Minneapolis Steel & Machinery Co., Los Angeles, (1) \$55,661.00.
- Bids held under advisement until Friday, January 6.

SANDPOINT, Idaho.—As previously reported, Geo. L. Arnett & Son, Sandpoint, at \$27,140 for labor only awarded contract by Bonner County Commissioners to construct new Sandpoint bridge. Plans provide for the construction of 10,000-ft. of timber pile trestle, the county to furnish the material and hardware. Lumber con-

tracts amounting to \$50,649 have been awarded.

SAN FRANCISCO.—Until Jan. 16, bids will be received by W. H. Kirkbride, chief engineer, Southern Pacific Co., 65 Market St., San Francisco, to construct substructure only for bridge across the San Joaquin river. Bridge is to be 235 ft. long with provision made for two 100-ft. channel spans—will be steel swing type on creosoted pile and concrete foundations, involving:

- (1) 525,000 lbs. struc. steel;
- (2) 18,000 lin. ft. creosoted piling;
- (3) 109 cu. yds. reinf. concrete;
- (4) 30 ft. trestle;
- (5) lump sum, certain amount of center pier protection.

Specifications obtainable from the above office.

LOS ANGELES, Cal.—John Strona, Pomona, submitted low bid to County Supervisors Dec. 27, at \$4452, for constructing a steel and concrete bridge to be built on Central Ave. over the Little Santa Anita Wash in the City of Arcadia. The bridge will consist of one 34-ft. span with 40-ft. roadway. It will have concrete abutments steel girders, concrete slab and concrete rail. W. B. Armstrong, 12th floor Hall of Records, County Bridge Engineer. The other bids were:

J. B. McIntosh	\$4601
Wm. T. Loesch & Son	4749
Atlas Const. Co.	4765
W. A. Taylor & Sons	4780
James Noon	4870
S & W Const. Co.	4884
Johnson Const. Co.	5187
Anton Johnson Co., Inc.	5220
Hess Const Co.	5311
W. J. Distell	5358
Carl Hallin	5380
N. I. Fadel	5900
Chas. W. Pettifer	6170
R. G. Whinery	6224
W. H. McCune, Jr.	6370

LOS ANGELES, Cal.—Atlas Const. Co., 39 Congress Street, Pasadena, awarded contract by County Supervisors Dec. 27 for the construction of a reinforced concrete bridge on Pomona Blvd. over Eaton Wash. The proposed structure will be a concrete slab bridge of two spans, with pipe railing. It will be 62 ft. in length and 70 ft. in width. W. B. Armstrong, 12th floor Hall of Records, Bridge Engineer. Bids opened Dec. 19.

WASHINGTON STATE.—Until Jan. 24, 10 A. M., bids will be received by Samuel J. Humes, Director of High-

ways, Olympia, for bridge construction as follows:

Okanogan County—Construct reinforced concrete arch bridge, 118 feet long over Bonapart Creek on the Tanasket easterly section of State Road No. 4, E. C. H. Proj. No. E-65, consisting of one 88-ft. arch span and three 9-ft. approach spans.

Okanogan County—Construct reinforced concrete girder bridge 100-feet long over Griggs Canyon on State Rd. No. 10, between Pateros and Brewster Flats, E. C. H. Proj. No. E-145-I, consisting of one 40-ft. and two 30-ft. spans.

Specifications obtainable from above office on deposit of \$2, returnable. Certified check 5% payable to State Treasurer required with bid.

SAN FRANCISCO.—Until Feb. 28, 2 P. M., bids will be received by the Department of Public Works, San Francisco-Oakland Bay Bridge, Assembly Chamber of the State Capitol, Sacramento, to construct first five piers, substructures for the West Bay Crossing from the San Francisco shoreline to Yerba Buena Island, involving:

- (1) 268,542 cu. yds. caisson work;
- (2) 10,000 cu. yds. add. caisson work;
- (3) 55,000 cu. yds. concrete seal;
- (4) 21,400 cu. yds. conc. foundations, Pier 2;
- (5) 27,000 cu. yds. conc. pier shafts and fenders, Piers 2, 3, 5, 6;
- (6) 60,500 cu. yds. superstructure for Pier 4;
- (7) 3,800,000 lbs. reinf. steel above foundations;
- (8) 300,000 lbs. struc. steel above foundations;
- (9) 1,100 MFBF timber in fenders;
- (10) 450,000 lbs. metal work in fenders;
- (11) alterations to Harbor Pier 24;
- (12) 500 bbls. extra Port. cement.

(San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco, Chas. H. Purcell, chief engineer).

PHOENIX, Ariz.—The Arizona Highway Commission will seek to obtain sufficient funds from the reconstruction finance corporation to start construction of a bridge across the Colorado River at Parker, Arizona. The commission will ask the eleventh legislature to give the road body authority to enter into negotiations with the finance corporation with a view to borrowing the money. It is proposed to have the California legislature take the same action. Then the highway departments would set up in their annual highway budgets, sufficient money to pay off the loan, extending over a 10-year period. The tenth Arizona legislature appropriated \$75,000 for the purpose of constructing the bridge, contingent on appropriations of \$75,000 each by California and the United States Indian Service. The bridge is entirely on the Colorado Indian bureau declined to consider the project. The proposed site for the River Indian reservation.

DREDGING, HARBOR WORKS & EXCAVATIONS

HONOLULU, T. H.—The War Department has recommended to Congress that an appropriation of \$792,000 be made for the improvement of the Honolulu harbor entrance channel. The department proposes to widen the channel to 500 ft. at a low water depth of 40 ft. Maintenance will cost \$3000 annually.

CAPITAL CITY TITLE COMPANY

▼

J. C. PALEN,
Manager

▼

914 Seventh Street
Sacramento :: California

SEATTLE, Wash.—Until Jan. 11, 10 A. M., bids will be received by Board of Public Works, room 512, County-City Bldg., to construct riprap bulkhead in Seaview Ave. from W 70th St. to approx. 200 ft. north of W 80th St. Certified check 5% payable to City Comptroller required with bid. Specifications obtainable from above office or from City Engineer.

SALEM, Oregon.—Until Jan. 12, 3 P. M., under Bid No. 33-221, bids will be received by U. S. Engineer Office, 321 Customhouse, Portland, to construct about 1623 lin. ft. of pile likes in Willamette River at eleven different sites located 16.9 to 17.76 miles below Salem, involving:

- (1) 33,700 lin. ft. piling;
- (2) 13 M. ft. b.m. lumber;
- (3) 19,960 lbs. hardware;
- (4) 1,250 cu. yds. stone, shore rock;
- (5) 2,600 cu. yds. stone, water rock;
- (6) 1,130 pile shoes.

Specifications obtainable from above office, or on file in office of Daily Pacific Builder, and may be inspected by those interested.

PORTLAND, Ore.—Hauser Const. Co., Multnomah Hotel, Portland, at \$498,754 submitted low bid to U. S. Engineer Office, Portland, to reconstruct north and south rubble mound jetties at the entrance to Yaquina Bay, Lincoln County, Oregon. Bids were taken on the north and south jetties separately and together, above bid on total for both jetties.

PORTLAND, Ore.—Until January 31, 3 p. m., under Bid No. 33-222, bids will be received by U. S. Engineer Office, 321 Customhouse, Portland, Ore., for dredging approximately 435,711 cu. yds. of material from a channel, and for constructing a dike with about 41,600 cu. yds. of the dredged material, in Willamette River between points about 1 mile and 2¼ miles downstream from Oregon City, Ore., involving:

- (1) 435,711 cu. yds. material dredging and disposal, including dike construction.

LOS ANGELES, Cal.—Contract for construction of the first unit of the new 12,500-ft. breakwater enrockment in Los Angeles Harbor was officially awarded at Washington, D. C., December 30 to the Puget Sound Bridge & Dredging Co. of Seattle. This unit will be 1400 ft. in length and cost \$466,410. Rock will be supplied from the Catalina Quarries.

NOME, Alaska.—Until March 1st, 3 P. M., bids will be received by U. S. Engineer Office, Burke Bldg., Portland for dredging approximately 5100 cubic yards of material from the mouth of the Snake River at Nome. Specifications obtainable from U. S. Engineer office at Seattle.

STREET LIGHTING SYSTEMS

LOS ANGELES, Calif.—Until 10 A. M., bids will be received by board of public works for constructing an ornamental lighting system in Flower St. bet. Washington St. and 38th St., in accordance with Plan No. B-1693 and Standard Plan No. B-1694, involving No. 1860 Southwest Street Lighting Standards. Cash contract.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Until Jan. 4, 5:30 P. M., bids will be received by John

H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., Oakland, to construct and furnish f.o.b. Valley Springs, Calaveras county, one slackline cableway excavator, capacity 26 cu. ft., complete with bucket and carrier blocks, track, tension and hoisting cables and hoisting engine. Specification No. 46 obtainable from above office.

RENO, Nev.—Monarch Gold Ledge Mines, 416 Clay Peters Bldg., Reno, Chas. E. Basso, president and manager, award contracts for mining equipment as follows:

Morse Bros. Machinery & Supply Co., Denver, at \$10,750 to furnish 120-hp. Diesel engine, mining equipment, assay equipment, water supply tank and pump.

Action on balance of equipment deferred until Jan. 20.

RESERVOIRS AND DAMS

PASADENA, Los Angeles Co., Cal.—Pacific Coast Steel Corp., 621 South Hope St., Los Angeles, awarded contract by city board of directors Dec. 27 at \$40,738 for furnishing 2,300,000 lbs. reinf. steel for the Pine Canyon Dam, delivered at dam site Other bids are:

Truscon Steel Co	\$41,014
Concrete Eng Co	43,452
Soule Steel Co	43,622
Blue Diamond Corp., Ltd.	44,192
Los Angeles Iron & Steel Co.....	48,443

LOS ANGELES, Cal.—West Slope Construction Co., Room 1205, 816 So. Spring St., awarded contract by county supervisors Dec. 28, at \$8,600,527, exclusive of steel, cement and valves, for the construction of San Gabriel Dam No. 1. The bid is on the basis of Gunite facing. The proposed dam will be a rock fill structure in San Gabriel Canyon, 2.4 miles downstream from the Forks and 8.6 miles above Azusa. The dam will be 295 feet in height above streambed, 1670 feet in length measured along the road on the crest, and 900 feet thick at the base.

E. C. Eaton, 202 N. Broadway, County Flood Control Engineer, prepared the plans.

The West Slope Construction Co. is composed of the following: Foley Bros., Bates & Rogers Constr. Co., J. C. Maguire, Butte, Mont., and The Lawler Corp., Butte, Mont.

W. A. Rogers is president of the company.

The Chief Engineer's letter, which was also signed by the consulting engineer, submitted to the Board Dec 28 and upon whose recommendation the award was made is printed herewith in full. The letter follows:

Honorable Board of Supervisors,
L. A. County Flood Control District,
501 Hall of Records,
Los Angeles, California.
Gentlemen:

Under date of December 19th, bids were opened for the construction of San Gabriel Dam No. 1.

Seven bids were received on the Alternative Proposals.

The following are the bids on Proposal No. 1:

Bidder	Amount
West Slope Constr. Co.....	\$8,600,527.00
Constructors, Inc.	8,767,415.00
Silas Mason Company.....	8,934,860.00
J. A. McEachern Co. and	
Guy F. Atkinson Co.....	9,052,898.50
Merritt Chapman & Scott ..	9,968,255.00
Walsh Constr. Co.....	10,189,499.75
Rosoff Subway Constr. Co.....	10,220,369.50

The item of Concrete Facing was not bid under the Alternative Proposals and, therefore no direct comparison with the bids under Proposal No. 1 is possible.

For the purpose of making a comparison between the lowest Alternative bids received for all items and Proposal No. 1 the Engineer's Estimate for the unbid item of Concrete Facing has been added to the lowest Alternative bids to make them complete. On this basis the total cost to the District under the Alternative bids would be \$8,532,572 as compared to West Slope Construction Company's bid of \$8,600,527, a difference of about \$68,000 in favor of the Alternative bids. However, under the Alternative bids all risk of damage by floods to any part of the structure must be assumed by the District. Under Proposal No. 1 the Contractor assumes this risk.

Constructing the dam under Alternative Proposals would materially increase the engineering costs to the District and possible settlements of claims due to conflicts between the several contractors would also add to the cost.

For these reasons we recommend that the Alternative bids be not accepted.

It is our opinion that sufficient rock of all classes to build the dam can be obtained from Quarry No. 10.

Excavation at the Pine Canyon Dam site and for the bridge pier of the new high line road up San Gabriel Canyon confirms our opinion that it will be necessary to excavate the entire river bed within the dam site in order to obtain adequate foundation.

Obtaining the entire rockfill from Quarry No. 10, completely excavating the river bed within the limits of the dam and backfilling with rock the West Slope Construction Company's bid is lower than Constructors, Inc., by about \$189,000.

After a careful engineering analysis of all of the bids and after making due allowance of any reasonably possible need of obtaining rock from another quarry, we find the West Slope Construction Company's bid the lowest and subject to legality, recommend its acceptance by your honorable board.

Yours very truly,

E. C. EATON,

Chief Engineer.

LOUIS C. HILL,

Consulting Engineer.

RUSH T. SILL,

Consulting Geologist.

Complete details published in our

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN DIEGO, Cal.—Until 10 A. M., Jan. 9, bids will be received by city council to construct sewer in Florida St. bet. 30 ft. north of University Ave. and 200 ft. south. The proposed work, which is under the 1911 act, involves construction of a cement concrete sewer main, connections, fittings, concrete manholes, concrete dead end and appurtenances. Allen H. Wright, city clerk, H. W. Jorgensen, city engineer.

RANNING, Riverside Co., Cal.—Until 7:30 P. M., January 13, bids will be received by city council for constructing a sewer main from a point 234 ft. east of the center line of San Geronimo Ave. to Hargrave St., to serve the office building of the Metropolitan Water District on San Ger-

gonio Ave. The proposed sewer will include:

- 2419 ft. 8-in. vitrified or cement concrete pipe including 84 wyes, tees, etc.;
- 5 manholes;
- 5 lampholes.

Plans may be seen at the Banning city hall. Certified check, 10%, must accompany the bid. John E. White, city clerk; W. H. Wood, city engi-

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—Official estimates of the quantities of the Coachella tunnels to the Colorado River Aqueduct which the board of directors of the Metropolitan Water District on Dec. 21 voted to construct by force account under the direction of the General Manager and Chief Engineer F. E. Weymouth, are shown in the tabulation listed below:

The cost of these tunnels is estimated at \$16,084,300 to which must be added administration and engineering (7½%) amounting to \$1,115,709, and contingencies, \$800,000.

The total length of the east and west tunnels is 175,053 ft. The diameter is 16 ft.

The quantities and estimate follows: 260,000 cu. yds. excavation approaches (west) \$1.25 yd.;

6,200 lin. ft. excav. adits (east) \$40 ft.; 853,000 cu. yds. excav. tunnel (west) \$5.30 yd.;

1,035,000 cu. yds. excav. tunnel (east) \$5.20 yd.;

492,000 cu. yds. concrete lining (east and west) \$7.70 yd.;

500 MBM timber, \$60 M.;

1,000 cu. yds. Gunite, \$20 yd.;

500,000 lbs. place reinf. steel, \$0.02 lb.;

The above items, \$14,336,800.

630,000 lbs. cement, \$2.75 bbl.;

500,000 lbs. reinf. steel, \$0.3 lb.;

Total cement and reinf. steel, 51,747,500.

Total for above items, \$16,084,300.

Administration and engineering, 7%, \$1,115,700.

Contingencies, \$800,000.

Total, \$18,000,000.

The engineers propose to construct the 33 miles of tunnel from 9 camps. Each of these 9 camps is to construct two tunnels driven from an adit or connected by tracks across the washes, so that each tunnel can be alternately drilled and mucked. Three drill shifts and three muck shifts cross shift each other as long as two working places are available, thereby eliminating the delay from interference which may be as much as the time working if both work in a single heading.

The crossing of gravel filled washes is made by tunneling under where rock is available and driving an adit for access. Where rock is not available, the location is made so as to cross by low head syphon and access is provided by a temporary construction track across the wash to connect the two portals facing each other across the wash.

The rock and water conditions appear unusually favorable. The camp and plant requirements are no greater for two tunnels driven by the alternating system than for a single heading driven from a portal. The direct and supporting labor is reduced by the two-tunnel operation, since the drill and muck crews do not conflict and so excavate more tunnel than if both were reduced in the same heading. Four concreting plants will be required. There is generally an economic distance to be driven from each

camp as follows:

Camp	East Ft.	West Ft.	Total Ft.
Yellow Spot	10,200	10,200	20,400
Fargo	11,350	15,000	26,350
Berdoo Canyon	15,780	13,762	29,542
West Rush, Can.	9,989	9,989	19,978
Deception Wash	15,020	9,050	24,070
Wide Canyon	8,800	8,800	17,600
Long Canyon	8,300	8,300	16,600
Blind Canyon	6,800	6,800	13,600
Whitehouse Can.	5,330	1,720	7,050
Total			175,190

STREETS AND HIGHWAYS

CLARK COUNTY, Nevada—As previously reported, until Jan. 11, 2:30 P. M., bids will be received by S. C. Durkee, State Highway Engineer, Heroes Memorial Bldg., Carson City, to construct portion of state highway, 1.607 miles on Fifth St., Las Vegas, to 1650 ft. NE of north city limits; also 1.97 miles Bard to Las Vegas; also 1650 ft. NE of north city limits, Las Vegas to six miles SW of Apex Summit, involving:

- (1) 24,150 cu. yds. rdwy. excav.;
- (2) 3580 cu. yds. struc. excav.;
- (3) 19,939 cu. yds. select borrow.;
- (4) 6881 sta. yds. overhaul.;
- (5) 57,055 sq. yds. subgrade for pave.;
- (6) 11,620 cu. yds. cem. conc. pave.;
- (7) 2 demolish culvert inlets and outlets.;
- (8) 5850 lbs. castings.;
- (9) 252 cu. yds. Class A concrete.;
- (10) 5 cu. yds. Class B concrete.;
- (11) 48 lin. ft. 15-in. corr. metal pipe.;
- (12) 184 lin. ft. 18-in. do.;
- (13) 112 lin. ft. 24-in. do.;
- (14) 42 lin. ft. 30-in. do.;
- (15) 156 lin. ft. 24-in. part circle corrugated metal pipe.;
- (16) 86 lin. ft. 30-in. do.;
- (17) 10,892 lin. ft. 6-in. tile drains.;
- (18) 4284 lin. ft. 8-in. do.;
- (19) 166 lin. ft. 10-in. do.;
- (20) 30 lin. ft. remove pipe culverts.;
- (21) 22 pipe culvert extensions.;
- (22) 259,700 lbs. reinf. steel.;
- (23) 3.91 miles finish roadway.;
- (24) 30 cu. yds. demolish concrete.;
- (25) 2600 cu. yds. gravel backfill.

Specifications obtainable from the above office or from county engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

GLENDALE, Los Angeles Co., Cal.—Southwest Paving Co., 710 Lankershim Bldg., awarded contract by city council Dec. 27 at \$2691.63, for resurfacing Chevy Chase Drive, bet. Walnut and Sinclair Sts., under cash contract, involving:

- (1) 103,100 sq. ft. 1½-in. asph. conc. wearing surface, including bringing sewer manholes to grade.
- (2) 11,750 sq. ft. asphalt conc. wearing surface, variable thickness including bringing sewer manholes to grade.
- (3) 200 tons asphalt concrete base material laid.

J. C. Albers, city engineer. The bidders were: (A) Southwest Paving Co. (B) Oswald Brothers. (C) Griffith Company.

The bids were:

	(1)	(2)	(3)	Total
(A)	\$.02	\$.0175	\$2.12	\$2691.63
(B)	.022	.017	2.10	2887.95
(C)	.024	.017	2.08	3090.15

The bids were opened Dec. 22.

YAKIMA, Wash.—Until Jan. 5, 2 P. M., bids will be received by county commissioners to grade and gravel 2.75 miles of Lateral Highway No. 24, involving: 7,470 cu. yds. excavation;

- 501 cu. yds. struc. excav.;
- 2,360 cu. yds. top course surf.;
- 1,800 cu. yds. base course surf.;
- 240 lin. ft. 6-in. concrete pipe.;
- 120 lin. ft. 8-in. concrete pipe, class 2.;
- 90 ft. 10-in. concrete pipe.;
- 1335 lin. ft. 12-in. pipe.;
- 66 ft. 15-in. pipe.;
- 2 6-in. 45-degree elbows.;
- 1 10-in. 90-degree elbow.;
- concrete pipe increasers.

Specifications obtainable from O. E. Brashears, county engineer, on deposit of \$5, returnable.

SAN MATEO COUNTY, Cal.—Until January 16, 2 P. M., bids will be received by John H. Skeggs, District Engineer, State Highway Commission, 211 State Bldg., San Francisco, to grade and surface with asphaltic concrete 0.2 mile between Lawndale and Baden, involving:

- (1) 2,750 cu. yds. imp. borrow.;
- (2) 800 tons crusher run base.;
- (3) 1,650 tons asph. concrete.;
- (4) 4 tons emulsified asph. road oil.;
- (5) 40 tons screenings.;
- (6) 40 cu. yds. struc. excav.;
- (7) 66 lin. ft. 30-in. corr. metal pipe.;
- (8) 3 cu. yds. Class A Port. cement concrete (struc.).;
- (9) 90 lbs. bar reinf. steel (struc.).;
- (10) 12 sta. finish roadway.

Specifications obtainable from above office. Certified check 10% required with bid.

ARIZONA STATE—Ralph Pleasant Construction Co., Phoenix, Ariz., awarded contract by State Highway Commission, Phoenix, Dec. 28, at \$97,608.46, for highway construction on the Benson-Vail Highway, E-18-D (A.F.E. No. 8052), E-18-E (A.F.E. No. 8019). The work, which begins at the Pima-Cochise County line and extends easterly approximately 933 miles to the west city limits of Benson, consists of grading, draining and placing of subgrade stabilizer in part and oil processing the entire length by the plant mix method, and is to be completed on or before June 15, 1933.

The other bids were: Phoenix-Tempe Stone Co., Phoenix, Arizona, \$99,905.32. Packard & Tanner, Phoenix, Ariz., \$109,864.40. Arizona Sand & Rock Co., Phoenix, \$113,392.25. Heafey-Moore Co. and J. A. Casson, Oakland, \$115,604.62.

ARIZONA STATE — R. H. Martin, Tucson, Ariz., awarded contract by State Highway Commission, Phoenix, Dec. 28, at \$96,230.27 for highway construction on the Benson-Vail Highway E-18-B (A.F.E. No. 8054). The work which begins at the north end of the Cienega Creek Bridge and extends easterly approximately 6½ miles, consists of grading, draining and placing of Subgrade Stabilizer, and is to be completed on or before June 15, 1933.

The other bids were: Skousen Bros., Mesa, Ariz., \$97,673.46. Packard & Tanner, Phoenix, Ariz., \$101,693.83. Orr & Rawls, El Paso, Texas, \$103,412.98. Hodgman & MacVicar, Pasadena, \$167,606.59.

LOS ANGELES COUNTY, Cal.—C. G. Willis & Sons, Inc., 2119 E 25th St., Los Angeles, at \$102,076.50 awarded contract by State Highway Commission to excavate slopes between Santa Ynez Canyon and Santa Monica Canyon, 1.5 miles.

SAN FRANCISCO—L. Sartorio, 2627 Lombard St., at \$736 awarded (informal) contract by Department of Public Works to construct stairway on Douglass and States Sts.

ARIZONA STATE—Until 2 P. M., Jan. 11 bids will be received by State Highway Commission, Phoenix, for highway construction on the Nevada-Utah Highway, E-92 (A.F.E. No. 1601). The work, which is located in the extreme northwestern corner of the state, approximately one mile north-west of the town of Littlefield, consists of the addition of four timber spans to the south end of Beaver Dam Creek bridge, the excavation of a portion of the upstream channel and the placing of steel jetties, and is to be completed on or before March 31, 1933. The principal items are:

- 216 lin. ft. wire mesh and steel hand-rail (C.I.P.);
- 2 squares clearing and grubbing;
- 3000 cu. yds. drainage excavation;
- 1500 cu. yds. approach fill;
- 300 cu. yds. mt. haul of approach fill;
- 27 M.B.B. treated timber (C.I.P.);
- 2 M.B.M. untreated timber (C.I.P.)
- 1010 lin. ft. treated timber piles (C.I.P.)
- 26 lin. ft. treated timber pile cutoff;
- 100 sq. yds. sand asphalt wearing surface (C.I.P. on new extension);
- 604 sq. yds. sand asphalt wearing surface (C.I.P. on old bridge);
- 2 each water barrels (C.I.P.);
- 65 units steel jetties (C.I.P.).

A proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. T. S. O'Connell, State Highway Engineer.

ALAMEDA COUNTY, Cal.—Union Paving Co., 624 Call Bldg., San Francisco, at \$338,450.15 awarded contract by the State Highway Commission for about 6.7 miles between Dublin and Castro Hill, 4.4 miles to be graded and paved with Portland cement concrete and about 2.3 miles to be graded and surfaced with bituminous treated crushed gravel or stone surfacing (plant mix).

PERSHING COUNTY, Nevada.—As previously reported, until January 11, 2 P. M., bids will be received by S. D. Durkee, state highway engineer, Heroes Memorial Bldg., Carson City, to construct a cement concrete pavement through the city of Lovelock, 1.22 mi., involving:

- (1) 11,529 cu. yds. roadway excav.;
- (2) 1,700 cu. yds. struc. excav.;
- (3) 16,081 cu. yds. select borrow;
- (4) 1,746 sta. yds. overhaul;
- (5) .77 mile subgrade, 10-ft. width;
- (6) .12 mile subgrade, 20-ft. width;
- (7) 12,930 sq. yds. subgrade for pave.
- (8) 2 acres clearing;
- (9) 2684 cu. yds. reinf. cement gravel
- (10) 1600 cu. yds. crushed gravel or crushed rock in place;
- (11) 124 cu. yds. Class A concrete;
- (12) 2 cu. yds. Class B concrete;
- (13) 30 lin. ft. 15-in. corr. metal pipe
- (14) 70 lin. ft. 36-in. do;
- (15) 86 lin. ft. 48-in. do;
- (16) 208 lin. ft. 24-in. part circle c.m.p.
- (17) 1026 lin. ft. 4-in. sewer;
- (18) 450 lin. ft. 6-in. do;
- (19) 1274 lin. ft. 8-in. do;
- (20) 1726 lin. ft. 10-in. do;
- (21) 772 lin. ft. 12-in. do;
- (22) 10 monuments;
- (23) 11,971 gals. asph. fuel oil applied to surface;
- (24) 0.77-mi. mix (10-ft. width);
- (25) 0.12-mi. mix (20-ft. width);
- (26) 1.22-mi. finish roadway;
- (27) 2 removing wooden culverts;
- (28) force account, special detours;
- (29) 42 lin. ft. remove pipe culverts;
- (30) 109,200 lbs. reinf. steel;

- (31) 8,000 lbs. castings;
- (32) 1,574 lin. ft. remove and reset fence;
- (33) 516 lin. ft. construct fence.

Specifications obtainable from the above office and the county clerk's office at Lovelock on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

WASHOE COUNTY, Nev.—As previously reported, until Jan. 11, 3 P. M., bids will be received by S. C. Durkee, State Highway Engineer, Heroes Memorial Bldg., Carson City, for 5.423 miles of grading and asphaltic concrete surface between Reno and Huffakers, involving:

- (1) 10,300 cu. yds. roadway excav.;
- (2) 1,150 cu. yds. struc. excav.;
- (3) 34,057 cu. yds. select borrow;
- (4) 1,786 sta. yds. overhaul;
- (5) 15,100 sq. yds. subgrade for pave.
- (6) 69 demolish culvert inlets and outlets;
- (7) 2,500 sq. yds. demolish conc. pave.
- (8) 14,143 lin. ft. remove fence;
- (9) 4,322 lin. ft. remove and reconstruct fence;
- (10) 14,113 lin. ft. construct fence;
- (11) 2,900 lin. ft. enlarging expansion joint;
- (12) 30,300 lbs. reinf. steel;
- (13) 243 cu. yds. Class A concrete;
- (14) 160 cu. yds. Class B concrete;
- (15) 36 lin. ft. 15-in. corr. metal pipe
- (16) 886 lin. ft. 18-in. do;
- (17) 556 lin. ft. 24-in. do;
- (18) 66 lin. ft. 30-in. do;
- (19) 50 lin. ft. 36-in. do;
- (20) 183 lin. ft. remove pipe culverts;
- (21) 806 lin. ft. remove and reset pipe culverts;
- (22) 842 lin. ft. 24-in. corr. metal siphon pipe;
- (23) 72 lin. ft. 6-in. cast iron pipe;
- (24) 49,000 sq. yd. asph. paint binder;
- (25) 54,784 lin. ft. sideforms;
- (26) 32 cu. yds. riprap;
- (27) 96 lin. ft. timber guard rail;
- (28) 30 monuments;
- (29) 3,300 tons asph. conc. base course
- (30) 7,200 do, leveling course;
- (31) 7,100 do, wearing course;
- (32) 5.42 miles construct shoulders;
- (33) 1 furnish and install posts for F. A. M.;
- (34) 5.42 miles finish roadway;
- (35) 105 tons tread course;
- (36) 4 remove trees;
- (37) 5.42 miles paint center line;
- (38) 20 wooden diversion box.

Specifications obtainable from the above office or from county engineer on deposit of \$15, of which \$10 is returnable. Certified check 5% required with bid.

LOS ANGELES, Cal.—Spencer & Holt, Ltd., awarded contract by City Purchasing Agent, A. J. Holm, Dec. 29, at an estimated total of \$83,160, for furnishing oil and mineral aggregate under Specification No. 2970. The estimate per day is \$660, and per month \$13,860.

STOCKTON, San Joaquin Co., Cal.—Until Jan. 9, 5 P. M., (to be opened at 8 P. M.) bids will be received by B. L. Trahern, city clerk, to gravel certain roads and areas in the vicinity of the turning basin for the Port of Stockton, involving:

- (1) 5,000 cu. yds. grading;
- (2) 10,000 cementing road gravel.

Certified check 10% payable to City Auditor required with bid. Specifications obtainable from City Port Commission, Col. B. C. Allin, port director.

EL DORADO COUNTY, Cal.—MacDonald and Kahn, Financial Center Building, San Francisco, at \$98,935.25 awarded contract by U. S. Bureau of Public Roads for 3.223 miles grading

Section F of Route 32, Placerville-Lake Tahoe National Forest Highway El Dorado National Forest.

ARIZONA STATE—Parkard & Tanner, Phoenix, Ariz., submitted low bid at \$54,990.63 to Arizona State Highway Commission, Phoenix, Dec. 28, for highway construction on the Benson-Vail Highway, E-18-C (A.F.E. No. 8055). The work, which begins at a point about 5 1/2 miles west of the Pima-Cochise County Line and extends easterly to the county line, consists of grading, draining and placing of subgrade stabilizer, and is to be completed on or before May 31, 1933.

ARIZONA STATE—R. H. Martin, Tucson, Ariz., submitted low bid at \$96,256.27 to Arizona State Highway Commission, Phoenix, December 28, for highway construction on the Benson-Vail Highway E-18-B (A. F. E. No. 8054). The work, which begins at the north end of Cienega Creek Bridge and extends easterly approximately six and one-third (6 1/3) miles, consists of grading, draining and placing of subgrade stabilizer, and is to be completed on or before June 15, 1933. Quantities listed in issue of December 17.

ARIZONA STATE—Ralph Pleasant Constr. Co., Phoenix, Ariz., submitted low bid at \$970,608.46 to Arizona State Highway Commission, Phoenix, Dec. 28, for highway construction on the Benson-Vail Highway, E-18-D (A. F. E. No. 8052), E-18-E (A. F. E. No. 8019). The work, which begins at the Pima-Cochise County line and extends easterly approximately 9.33 miles to the west city limits of Benson, consists of grading, draining and placing of subgrade stabilizer in part and oil processing the entire length by the plant mix method, and is to be completed on or before June 15, 1933.

WASHINGTON STATE—Until Jan. 24, 10 A. M., bids will be received by Samuel J. Humes, Director of Highways, to grade and surface 3 miles of State Road No. 4, Section 2 of Tonasket easterly E. C. H. Proj. No. E-65 and E-103 in Okanogan county, involving:

- 29 acres clearing;
- 164,780 cu. yds. excavation;
- 6,480 cu. yds. crushed stone;
- 467 cu. yds. concrete;
- 923 lin. ft. pipe culverts.

Specifications obtainable from office at Olympia on deposit of \$2, returnable. Proposal guarantee, 5%.

LOS ANGELES, Cal.—All bids for constructing about 100 miles of trails in the San Gabriel Watershed, opened Dec. 19, were rejected by the County Supervisors Dec. 27. The work will be done by the district forces.

SEATTLE, Wash.—Until Jan. 11, 10 A. M., bids will be received by Board of Public Works, G. W. Roberge, secretary, to improve Ryan St. and 56th Ave. south by constructing sewers.

Certified check 5% payable to City Comptroller required with bid. Specifications obtainable from above office or from City Engineer.

SALINAS, Monterey Co., Calif.—Until Jan. 16, 7:30 P. M., bids will be received by J. F. Iverson, city clerk, to furnish a hydro-pneumatic pressure system pump, 50-gpm., for 1000-gal. tank, to be installed in Central Park. Estimated cost, \$1500. Sam Davies, city engineer. Certified check 10% required with bid.

CHURCHES

Preliminary Plans Prepared
CHURCH Cost, \$—
MONTEREY, Monterey Co., Cal.
 One-story frame church.
 Owner—Christian Science Church.
 Architect—Swartz & Ryland, Spazier
 Building, Monterey.

FACTORIES AND WARE- HOUSES

Plans Being Prepared.
EXTENSION Cost, \$—
 Extension of wharf shed for Dock No.
 2 (150x92 feet) steel frame, five
 rolling doors, copper bearing
 monitor sash, copper gutters; out
 side walls of reinforced concrete.
 Owner—United States Government.
 Plans by Constructing Quartermaster,
 Fort Mason, San Francisco.
 Bids will be asked in about thirty
 days.

Plans Being Completed.
DISTRIBUTING PLANT Cost, \$5000
OAKLAND, Alameda Co., Cal. Vic-
 inity of 46th and Clement Sts.
 One-story wood frame and corrugated
 iron distributing plant.
 Owner—Richfield Oil Co., 248 Battery
 St., San Francisco.
 Plans by Eng. Dept. of Owner, P. L.
 Mott, engineer.
 Bids will be asked about Jan. 9.

TUCSON, Ariz.—Oliver M. Preston,
 1603 E. Sixth St., Tucson, has secured
 an option on property located on
 South 25th St., Tucson, where he pro-
 poses erecting a brewery. A 50,000-
 gallon well is located on the site. The
 plant will cost \$250,000, of which \$150,-
 000 has been subscribed, according to
 Mr. Preston.

Contract Awarded.
CANNERY Cost, \$50,000
CHICO, Butte Co., Cal.
 Wood frame and corrugated iron can-
 nery (50x400 ft.) asbestos roof,
 machinery, etc.
 Owner—Western Canning Co., Ltd.
 (George Newman, director).
 Architect—Willis Lowe, 1056 Hubert
 Road, Oakland.
 Contractor—Harry Schuster Co., Ltd.,
 354 Hobart St., Oakland.

GARAGES AND SERVICE STATIONS

Plans Being Figured—Bids Close Jan.
 12.
SERVICE STATION Cost, \$—
PALO ALTO, Santa Clara Co., Cal.
 Service station.
 Owner—Associated Oil Co., 79 New
 Montgomery St., San Francisco.
 Plans by Engineering Dept. of Owner.

GOVERNMENT WORK AND SUPPLIES

WASHINGTON, D. C.—Murch
 Bros. Construction Co., Railway Ex-
 change Bldg., St. Louis, Mo., at
 \$229,000 awarded contract by Treas-
 ury Department for the construction
 of the Federal Building to house the
 U. S. Forest Service Office to be
 erected at Ogden, Utah. Hodgson &
 McClellan, Ogden, Architects.

 H. Travers, \$2573.

POWER PLANTS

LOS ANGELES, Cal.—Schedule of
 items for the proposed transmission
 line to be constructed between Ca-
 hazon and Hayfield, for which bids
 are to be opened by the Metropolitan
 Water District, January 12 (previously
 noted), follow:

- (1) Construction of transmission line
 from Cabazon to Hayfield, also
 Lakeview to Valverde, using cop-
 per conductor;
 (a) Will commence construction
 within — days after notification
 to proceed, and will complete con-
 struction within the number of
 days after such notification set
 opposite the respective locations
 as follows:
 (b) Cabazon to Fan Hill, and
 Lakeview to Valverde, and 33 kv.
 from Fan Hill to Long and Fargo,
 within — days;
 (c) Fan Hill to Hayfield including
 33kv. to Whitehouse and Mecca
 Pass East Portal, within — days

The following allowance will be
 made for structures or poles added to
 or subtracted from those specified
 herein. Cost of guy material at angle
 corners shall be included.

- (d) Drawing C1050-1;
 (e) Drawing C1050-5;
 (f) Drawing C1050-6;
 (g) Drawing C1050-7;
 (h) Drawing C1050-11;
 (i) Drawing C1050-13;
 (j) Drawing C1050-14;
 (k) Drawing C1050-15;
 (l) Drawing C1050-39;
 (m) Drawing C1050-40;

(2) Alternative to Item 1:
 Construction of transmission line
 from Cabazon to Hayfield; also
 Lakeview to Valverde, using alumi-
 num conductor.

- (a) Will commence construction
 within — days after notification
 to proceed, and will complete con-
 struction within the number of
 days after such notification set
 opposite the respective locations
 as follows:
 (b) Cabazon to Fan Hill, and
 Lakeview to Valverde, and 33 kv.
 from Fan Hill to Long, and Fargo,
 within — days;
 (c) Fan Hill to Hayfield, including
 33 kv. to Whitehouse and Mecca
 Pass, East Portal, within — days;
 (d) Drawing C1050-1;
 (e) Drawing C1050-5;
 (f) Drawing C1050-6;
 (g) Drawing C1050-7;
 (h) Drawing C1050-11;
 (i) Drawing C1050-12;
 (j) Drawing C1050-14;
 (k) Drawing C1050-15;
 (l) Drawing C1050-39;
 (m) Drawing C1050-40;

(3) Construction of a 66,000-volt sub-
 station at Fan Hill;

- (a) Will commence construction of
 substation within — days after
 notification to proceed; and
 (b) Will commence construction
 within — days after such noti-
 fication;

(4) Construction of fourteen 33,000-
 volt substations adjacent to Val-
 verde, West Coachella and East
 Coachella tunnels;

- (a) Allowance to be made for each
 substations, not exceeding three,
 added to or omitted from the num-
 ber specified;
 (b) Will commence construction
 within — days after notification
 to proceed, and will complete con-
 struction within the number of
 days after such notification set
 opposite the respective locations
 as follows:

(c) Long, Deception, Berdoo, Far-
 go, Valverde, West Shaft, and
 Valverde East Shaft, within —
 days;

(d) Whitehouse, Blind, East Wide,
 West Pashawalla, and Yellow
 Spots, within — days;

(e) Mecca Pass W. Portal, Mecca
 Pass E. Portal and Hayfield with-
 in — days;

(5) Construction of all lines and sub-
 stations, furnishing all materials
 except, poles, conductors, insula-
 tors, insulator pins, transformers,
 condensers and oil circuit break-
 ers, using copper conductors,
 (lump sum);

(a) Will commence construction
 within — days after notification
 to proceed, and will complete con-
 struction within the number of
 days after such notification set
 opposite the respective locations
 as follows:

(b) Transmission lines from Ca-
 hazon to Fan Hill and Lakeview
 to Valverde, and 33 kv. from Fan
 Hill to Long and Fargo, within
 — days;

(c) Transmission line from Fan
 Hill to Hayfield including 33 kv. to
 Whitehouse and Mecca Pass East
 Portal, within — days;

(d) 66 kv. substation at Fan Hill
 within — days;

(e) 33 kv. substations at Long,
 Deception, Berdoo, Fargo, Val-
 verde, West Shaft and Valverde
 East Shaft, within — days;

(f) 33 kv. substations at White-
 house, Blind, East Wide, Pasha-
 walla, and Yellow Spots within
 — days;

(g) 33 kv. substations at Mecca
 Pass West Portal, Mecca Pass
 East Portal, and Hayfield within
 — days;

The following allowances will be
 made for structures or poles added to
 or subtracted from those specified
 herein. Cost of guy material at angle
 corners shall be included.

- (h) Drawing C1050-1;
 (i) Drawing C1050-5;
 (j) Drawing C1050-6;
 (k) Drawing C1050-7;
 (l) Drawing C1050-11;
 (m) Drawing C1050-13;
 (n) Drawing C1050-14;
 (o) Drawing C1050-15;
 (p) Drawing C1050-39;
 (q) Drawing C1050-40;

(6) (Alternative to Item No. 5). Con-
 struction of all lines and substations,
 furnishing all materials except
 poles, conductors, insulators,
 insulator pins, transformers, con-
 densers and oil circuit breakers,
 using aluminum conductors (lump
 sum);

(a) Will commence construction
 within — days after notification
 to proceed and will complete con-
 struction within number of days
 after such notification set opposite
 the respective locations as follows:

(b) Transmission lines from Ca-
 hazon to Fan Hill and Lakeview
 to Valverde and 33 kv. from Fan
 Hill to Long and Fargo, within
 — days;

(c) Transmission line from Fan
 Hill to Hayfield, including 33 kv.
 to Whitehouse and Mecca Pass
 East Portal, within — days;

(d) 66 kv. substation at Fan Hill,
 within — days;

(e) 33 kv. substation at Long, De-
 ception, Berdo, Fargo, Valverde
 West Shaft and Valverde East
 Shaft, within — days;

(f) 33 kv. substations at White-
 house, Blind, East Wide, Pasha-
 walla and Yellow Spots, within
 — days;

(g) 53 kv. substations at Mecca Pass West Portal, Mecca Pass East Portal and Hayfield, within — days;

The following allowance will be made for structures or poles added to or subtracted from those specified herein. Cost of guy material at angle corners shall be included:

- (h) Drawing C1050-1;
- (i) Drawing C1050-5;
- (j) Drawing C1050-6;
- (k) Drawing C1050-7;
- (l) Drawing C1050-11;
- (m) Drawing C1050-12;
- (n) Drawing C1050-14;
- (o) Drawing C1050-15;
- (p) Drawing C1050-39;
- (q) Drawing C1050-40;

(7) 211,600 circular mil (4/0) B&S) seven-strand copper;

(a) 180,000 lbs. f.o.b. Cabazon, per 100 lbs.;

(a1) 240,000 lbs. f.o.b. Garnet, per 100 lbs.;

(11) 66,564 circular mil (No. 2 B & S) seven-strand copper;

(a) 16,600 lbs. f.o.b. Mecca;

(b) 16,000 lbs. f.o.b. Rice, Calif.;

(c) Will deliver the first lot of Item 11 within — days after notification to proceed;

(d) Will deliver second lot of Item 11 within — days after notification to proceed;

Reels: Reels will be charged for at (e) \$— each and a credit of (f) \$— each will be allowed when returned to point of delivery in good condition (reasonable wear and tear excepted) within (g) — months from date of shipment.

(h) A discount of — per cent will be allowed if payment is mailed to the contractor within 10 days of receipt of material;

(12) Suspension Insulators:

(a) 12,600 insulator units at \$— per unit;

(b) 18,000 insulator units at \$— per unit;

(c) Will deliver insulators f.o.b. cars at — within the number of days after notification to proceed set opposite the respective quantities as follows:

(d) First — units — days;

(e) Next — units — days;

(13) Pin Type Insulators:

(a) 3100 insulators at \$— per insulator;

(b) 13,100 insulator at \$— per insulator;

(c) Will deliver insulators f.o.b. cars at — within the number of days after notification to proceed set opposite the respective quantities as follows:

(d) First — insulators — days

(e) Next — insulators — days

(14) Pins for Pin Type Insulators:

(a) 3100 pins at \$— each;

(b) 13,100 pins at \$— each;

(c) Will deliver pins f. o. b. cars at — within the number of days after notification to proceed set opposite the respective quantities as follows:

(d) First — pins — days;

(e) Next — pins — days;

(15) Cedar Poles Butt Treated (for copper conductor):

(a) 10 25-ft. class 4 poles at \$— per pole;

(b) 20 35-ft. class 4 poles at \$— per pole;

(c) 1170 40-ft. class 4 poles at \$— per pole;

(d) 50 45-ft. class 4 poles at \$— per pole;

(e) 1300 50-ft. class 4 poles at \$— per pole;

(f) 250 55-ft. class 4 poles at \$— per pole;

(g) The bidder guarantees that the moisture content of the poles he proposes to furnish will not be more than — per cent;

(h) Will deliver poles f.o.b. — at (i) — within (j) — days after notification to proceed;

(16) (Alternative to Item No. 15). Cedar Poles, Butt Treated (for Aluminum conductor).

(a) 10 25-ft. Class 4 poles;

(b) 25 35-ft. Class 4 poles;

(c) 1170 40-ft. Class 3 poles;

(d) 1350 45-ft. Class 2 poles;

(e) 350 50-ft. Class 3 poles;

(f) The bidder guarantees that the moisture content of the poles he proposes to furnish will not be more than — per cent;

(g) Will deliver poles f.o.b. — at (h) — within (i) — days after notification to proceed;

(17) (Alternative to Item No. 15). Cedar Poles, Butt Treated:

(a) 10 25-ft. Class 4 poles;

(b) 25 35-ft. Class 4 poles;

(c) 1170 40-ft. Class 4 poles;

(d) 1350 45-ft. Class 2 poles;

(e) 350 50-ft. Class 2 poles;

(f) The bidder guarantees that the moisture content of the poles he proposed to furnish will not be more than — per cent;

(g) Will deliver poles f.o.b. — at (h) — within (i) — days after notification to proceed.

Editorial Comment

GAS TAX RAID PERILS REFUNDS

Farmers and other users of gasoline for purposes not involving use of streets and highways, who now receive gasoline tax refunds amounting to more than \$4,000,000 a year, have a common cause with the motorists of California in preserving the gasoline tax as a special tax to be used exclusively for highway maintenance and construction.

This is pointed out by Percy E. Towne, member of the legislative committee of the California State Automobile Association. The motorists' organization is conducting a vigorous effort to have the Legislature reject proposals for diversion of approximately \$17,000,000 in gasoline tax money from the highway fund to the state general fund.

In addition to these proposals, Towne said, it has been stated that a plan is under consideration to ask the legislature to make the gasoline tax a straight sales tax so that the money now refunded to non-highway users may remain in the state general fund.

"The theory upon which the gasoline tax laws were enacted was that of a special tax for a special use," Towne said. "It was intended to tax those who used the highways in proportion to their use and to apply the revenue exclusively to highway purposes.

"With this theory in mind the legislature adopted a provision permitting refunds of the gasoline tax to all who used gasoline for purposes which do not involve use of streets and highways. In this category we find the farmer who uses gasoline in tractors, gas engines and other farm equipment; motor launches and fishing boats operated by gasoline motors; and airplanes. Refunds to such users now reach a sum of more than \$4,000,000 annually.

"If gasoline tax revenue is diverted from the highway fund to the general fund, a step will have been taken toward changing the character of the gasoline tax from a special tax to a general one. In that case not only would the highways suffer, but farmers and others now entitled to refunds might be required to pay the tax, just as they now pay the Federal one-cent tax on gasoline."

AUTO DEATHS SPUR HIGHWAY WIDENING

Deaths caused by automobile crashes during the year-end holidays, the most extensive for this period on record, have again spurred safety organizations in their demands that narrow main highways be widened. Figures just compiled by the U. S. Bureau of Public Roads show that 1008 miles of state highways with more than two traffic lanes were built in 1931, bringing the total to 3790 miles.

An economical method, perfected in the West, is to widen the old pavements and resurface them with asphalt concrete. The California Division of Highways has just advertised for bids for such a project in Tehama County, where it is proposed to reconstruct nine miles of old pavement with asphalt concrete, on the West-Side Pacific Highway north of Sacramento. The job is a part of the Division's unemployment relief program.

A recently completed northwest project of this type is the seven-mile Salem-Brooks section of the Pacific Highway in Oregon, where the old hazardous 16-foot pavement was widened with non-skid asphalt concrete to a 20-foot paved surface and 6-foot gravel shoulders.

Under the caption "Light from the Far West," Engineering News-Record comments as follows:

Though long delayed, actual start on two of the Far West's large projects is most heartening at this season. The aggressiveness displayed by the Metropolitan Water District in getting the Colorado River aqueduct under way is encouraging. With the award of the seven-million-dollar San Jacinto tunnel contract, the District started the largest R.F.C. project. And immediately afterward it announced that work would be started at once on 33 miles of additional tunneling. While the wisdom of handling this twenty-million-dollar job by day labor will be questioned by many, the intent to get as much work as possible under way at the earliest moment is commendable. Along with the start of activity on the aqueduct comes the contract award for San Gabriel Dam No. 1, closing a long chapter of mishaps and litigation. These projects, added to four great dams already under construction—San Gabriel No. 2, Pine Canyon, El Capitan and Hoover—and coupled with two record-breaking bridges soon to span San Francisco waters present a bright picture of activity in the Far West.

Research Highway Built for Testing Portland Cements in Concrete Paving

By THOS. E. STANTON

Materials and Research Engineer, California State Department of Public Works

HOW soon after construction can a Portland cement concrete pavement be safely opened to traffic and, if one of the special, high early strength cements on the market is used to expedite opening, will the strength of the concrete decrease with age and will there be greater volumetric changes with a tendency towards shorter crack intervals?

What cements, if any, are of such quality that though early strengths may be low the ultimate long time strength and durability is higher than for other cements which develop strength more rapidly?

Are any of the standard cements more resistant to the destructive action of sea, acid and alkali waters than others?

Have any cements such relatively higher plasticity and workability that it is possible to manufacture denser and consequently stronger concrete with the use of less mixing water?

To what extent, if any, will the shorter curing period in the case of high early strength cements affect the ultimate strength of the concrete?

University Aiding

In an effort to secure an answer to these and other perplexing questions which the highway engineer faces in connection with the construction of modern Portland cement concrete highway pavements and structures, an experimental section of pavement was constructed during August and September, 1932, along a portion of the Bay Shore Highway in San Mateo County just north of South San Francisco.

Even with the greatest of care field studies are difficult to control owing to unavoidable variations in weather and construction processes. For this reason the Materials and Research Department of the California Division of Highways is conducting a rather extensive laboratory test series of the cements used in the test, supplemented by a special laboratory investigation of the concrete making qualities of these cements, conducted under the direction of Professor Raymond E. Davis at the materials laboratory of the University of California, at Berkeley, in co-operation with the State Highway Department and the cement companies.

This article will not touch in detail on the special laboratory work which is being handled by Professor Davis nor will there be any extensive discussion of the numerous technical details of the field work. Any discussion of such details will be handled in supplemental or special reports which will be issued from time to time.

Intense competition for business has led to the development of numerous brands of cement for special purposes. One cement company now manufactures eight or nine special brands. There are cements which will harden rapidly and produce concrete which it is claimed can be opened to traffic in from one to three days; other cements are designed for greater workability; less volumetric changes; lower temperature at setting; greater durability and resistance to the destructive action of sea water and other active agents; special color cements to suit the fas-

Measuring strain and temperature with strain meters and temperature coil.

tidious taste of the purchaser or to be used where the architectural and aesthetic requirements demand special treatment; for this purpose we have the white, grey, tan and pink cements.

Color is not of such vital importance in pavement construction as strength, durability and volumetric change characteristics.

An ideal cement would be one from which concrete could be manufactured sufficiently strong to open to traffic in 24 hours and which, at the same time, would possess the greatest possible ultimate strength and durability and such low volumetric change characteristics as to cause none of the intermediate shrinkage cracks which tend to unsightliness and possible increased roughness of the pavement with age.

Qualities Claimed

Experienced engineers know that no cement so far manufactured possesses all of these characteristics, nor is there any evidence that such a cement can be made. To attain one desired result, it is usually necessary to sacrifice some other desirable quality.

The following superior qualities are claimed for some cements:

- 1—High early strength.
- 2—Strength increase over a longer period of time.
- 3—Greater ultimate strength.
- 4—More resistant to sea water.
- 5—Greater resistance to water permeability.
- 6—Resistance to acids and alkalis.
- 7—Greater plasticity and workability.
- 8—Greater sand carrying capacity.
- 9—More flexible in neat mortar and concrete.
- 10—Lower specific gravity.

Because there have been few, if any, practical field tests to determine the relative value of the different brands of local California cement covering all of the characteristics outlined above, and because several cement producers are manufacturing special brands of cement for which one or all of these desirable characteristics are claimed, the State Highway Commission, upon recommendation of State Highway Engineer C. H. Purcell, approved the construction of a special test section in which all of the cements

on the market in the northern part of the State for which any of these characteristics were claimed could be tried out.

Fourteen Brands Used

Inasmuch as several of these qualities, such as durability and strength with age, require time for a satisfactory determination, accompanied by the fact that high early strength, durability and volumetric change characteristics are of considerable importance, it was decided to make comparative tests of all brands on the market for which any special characteristics of the above nature are claimed, comparing these special brands with the standard cements from the same companies. Fourteen brands of cement were used in the test.

Testing beams in the field for bending strength.

In order that there might be at least three check tests of each cement at each test period, both in compression and flexure, it was necessary to cast hundreds of test specimens in the field and in the laboratory during the progress of the work.

In addition to the test specimens cast during the progress of the work, cores were likewise cut from the finished pavement for the short time tests and additional cores will be cut from year to year for the long time tests.

Very complete specifications were written for the project, setting up rigid control over all features, including quality and grading of aggregate, design of mix, water control, construction operations, etc., to the end that the concrete might be cast on each section under comparable conditions, the only variable being the cement and such modifications in the design of the mix as were necessitated by the special characteristics of the different cements.

Meters Installed

Concrete specimens were cast for breaking in bending and compression at one, three, five, seven, ten and twenty-eight days. Additional specimens were cast for modulus of elasticity determination at long periods. Cores were cut for breaking to compare at all ages with the test cylinders and beams and, as previously stated, additional cores will be cut and tested whenever occasion demands in the future.

Strain meters and temperature measuring devices were cast into the pavement so that internal stress and temperature measurements could be made. The usual atmospheric temperature and humidity records were kept.

The work is in two parts of four ten-foot lanes each, or a total pavement width of forty feet. One part adjoins the city of South San Francisco on the north, and is approximately 1200 feet long. The second part is approximately one-half mile north of the first and has a length of 1000 feet.

Each portion was divided into two sections of equal length with a two-inch expansion joint between the abut-

ting sections. The entire project was, therefore, divided into sixteen sections. As there were but fourteen brands of cement, it was possible to make a duplicate run of two of the low-temperature cements.

Sections Separated

The concrete in each lane has a cross-section with a nine-inch center thickness and an eleven-inch thickened edge and is separated from the concrete in the preceding lane by painting the edge of the older concrete with asphalt and grease so as to provide as complete separation as possible with minimum friction between the adjacent strips.

Bronze plugs for measuring overall expansion and contraction were set in the ends of each section.

The contract for the work was let on June 30, 1932. The contractor commenced laying concrete on August 5, 1932, and finished the last section on September 13, 1932.

The sections contained from 144 to 172 cubic yards of concrete, depending on the length. When there was no breakdown in equipment it was found possible to pour two sections per day. Construction difficulties were encountered on several days with the result that two of the sections unfortunately have an intermediate construction joint.

Curing Methods

No reinforcing of any kind, intermediate weakened planes or expansion joints were used except the expansion joint between the abutting sections and the two unavoidable intermediate construction joints.

The high early strength cements were cured by sprinkling and covering with burlap for three days only. All other concrete was cured with earth and water for the standard period of eight days.

A complete report is now in preparation giving all details of the work. This report will be supplemented from time to time by additional data as it becomes available.

All control and test features were handled by the Materials and Research Department.

MT. ISLIP-JACKSON LAKE HIGHWAY RECOMMENDED BY FOREST SERVICE

Forming a link in a short-cut route between Los Angeles and the Los Angeles County Park in the Angeles National Forest, the Mt. Islip-Jackson Lake road has been recommended by the Forest Service as part of the forest highway system. An early survey is urged so that consideration may be given for its construction if funds become available after July 1, 1933.

Forest highways, according to Regional Forester S. B. Show, are major roads of standard construction forming links in the State, County or Federal Aid system, or branch roads to these systems, needed for public travel and national forest administration. The Mt. Islip-Jackson Lake road is considered as a meritorious project and it is therefore logical to include it as a part of the highway system now under construction by the State and county.

The Los Angeles County Board of Supervisors is now constructing a branch road from Vincent on the Mint Canyon Highway to Barley Flats on the Angeles Crest Highway, running from the Arroyo Seco to Mt. Islip. Another branch, extending down the North Fork of the San Gabriel will connect Azusa with Mt. Islip. The proposed forest highway from Mt. Islip to Jackson Lake on the Lancaster-Cajon State Highway will form another important link of the Angeles Crest Highway and will not only give direct connection from Los Angeles to the county park but also from other valley towns to the park by way of the San Gabriel Canyon.

Supervisors Vote Wage Scale For 1933 S. F. Public Works

WAGE scales upon which contractors must figure in bidding on public works in San Francisco during 1933 were fixed by the Board of Supervisors after a series of hearings that concluded December 29.

The scale, while lower in some instances than that in effect since May, 1931, is substantially above the rates of pay fixed for building crafts in 1933 by agreement of the Impartial Wage Board.

A thirty-hour week, composed of five six-hour days, also will be enforced on public construction, the supervisors decided. The shorter week was advocated as a means of spreading employment to more workers. The wage scale, which is based on an eight-hour day, will be applied to the six-hour day by computing hourly wages and paying the hourly rate for the short day.

The prevailing wages were voted by the supervisors after lengthly consideration of the report on wages being paid on private work in San Francisco submitted by the Civil Service Commission and after hearing speakers for labor and employer groups.

Decision on the wages to be paid for public construction will release nearly three million dollars in funds set aside for San Francisco municipal work, most of which has been delayed for several months by lack of a new wage scale. Among the first of the contracts to be advertised under the new scale will be for construction of the psychopathic ward of the San Francisco Hospital, estimated at \$400,000, and for construction of the cancer institute building, also estimated at \$400,000. Plans on the new County Jail, to cost \$800,000, will be ready about February 1. The Public Utilities Commission will proceed at once with street improvements and Hetch Hetchy development approximating an expenditure of \$1,250,000.

A U S T R I A RESTRICTING CONSTRUCTION.—Although Austria's income from automobile and gasoline taxes will amount to approximately 59,500,000 schillings for 1932, no important highway construction is under way or planned. Only 18,728,000 schillings (about \$2,675,000) are being spent on highway work in 1932, and the budget proposed for all classes of roads during 1933 calls for only 18,885,000 schillings. Funds are being used for only the most essential and least expensive maintenance of the main arterial highways.

CRAFT	Scale fixed for S. F. public works in 1933....	Present Official Minimum Scale Established by		Present Actual Prevailing Scale as Stated by:	
		*Imp't'l Wage Bd.	Bldrs. Exch.	Union	S. F. Inds. Assn.

Varnisher & pol'her (shop)	7.00	7.00 a)	7.00

(x) Higher rate applies on cork and rubber.
 (a) Not included in Impartial Wage Board award but in effect by agreement in shops of Retail Furniture Association.
 (aa) Lower rate applies on sash and door work. Higher rate for bench hands.
 (*) This is the scale applying in 1932. It is reduced by approximately 20% effective January 1, 1933.

CO-OPERATIVE CONSTRUCTION CREDIT

CONSTRUCTION INDUSTRIES' CREDIT BUREAU

(A non-profit, membership owned and operated association affiliated with the National Association of Credit Men)

333 MONTGOMERY STREET, SAN FRANCISCO

F. H. Eichler, Chairman

A. J. McGarry, Mgr.

"WHY WAS I A CREDITOR"

or

"HOW MUCH CAN YOU AFFORD TO SELL"

THE following figures cover a period of the past three years, and represents petitions in bankruptcy filed by general contractors and sub-contractors operating in the San Francisco Bay area.

	Liabilities	Assets	Building Permits
1930 (100 petitions)	\$3,736,765	\$1,159,888	\$22,726,994
1931 (99 petitions)	3,168,880	1,204,786	21,372,550
1932 (58 petitions)	2,057,684	824,206	16,427,915

It is well to bear in mind other losses not included in the above figures resulting from the filing of liens and compromise settlements outside of bankruptcy courts.

F. H. EICHLER

Analysis of the figures tell a story well known among credit men that these figures originate from the bottomless pit of over-extension of credit. It seems that the prime requisites of credit—character, capacity, capital—are ignored by many credit grantors. The amount of building permits in San Francisco have decreased in the past three years, yet the aggregate amount of liabilities in *bank-*

ruptcy have increased. What is the answer? The answer is that we have caught up with the contractor on his last job and realize, too late, that the contractor is broke.

As long as the contractor had more than one job going, money was available from one job to pay the bills on the previous one. He was furnished material by his creditors on the strength of the job coming up. Those credit men who made a thorough investigation of his account, prior to insolvency, were in a position to sense the inevitable before the final crash came and had collected their money.

Alert credit men today have learned from experience the benefits derived from group meetings where they have the opportunity of discussing with their competitors their mutual accounts.

It is an old and true saying among many material men that they all have their so-called "Pet Accounts," one who has been doing business with them for years and years, and also one whom they have been carrying on their books for years. The day arrives when they have their sad awakening and realize that instead of a pet account they have been acting as his banker along with other good "Samaritans." Some of the schedules in bankruptcy filed by an average small contractor list sixty-five to seventy-five creditors.

"Why was I a creditor?" is a question asked many times by creditors, and the answer seems to be the lack of accurate credit information (or selling the job). A general or sub-contractor who is not financially responsible to warrant credit accommodations should not be sold on the strength of the job. (Circumstances alter *some* cases.) There will be just as much construction work done if your questionable contractor is left out of the picture entirely.

It would be well to recite here, as an illustration, a habit that one particular contractor has apparently learned as to the best method of liquidating his obligations (at least such a deduction appears feasible from the number of times he has filed petitions in bankruptcy).

	Liabilities	Assets
In 1915 he filed his first petition....	\$ 2,893.00	None
In 1921 he again filed a petition....	9,960.00	\$520.00
In 1930 a third petition was filed..	119,618.00	None

The construction industries should ask themselves why this is possible, and lest some conclude this a unique instance, attention is called to the record, where instances could be multiplied many times; of another contractor who filed his first petition in bankruptcy in 1926—liabilities \$190.00, no assets; and again filed a petition in 1930—liabilities \$6,916.00, no assets.

The Construction Industries Credit Bureau, in fostering sound credit fundamentals—character, capacity, capital—seeks the co-operation of alert credit men and offers them accurate, reliable, up-to-the-minute information with which to protect against bad debt waste and excessive carrying costs. Over one hundred credit men in the construction field are meeting regularly once or twice a month to discuss their mutual accounts and their credit problems, under the auspices of the Construction Industries Credit Bureau of the Credit Managers' Association of Northern and Central California.

At the end of 1933 will you be in a position to answer the question, "Why was I a creditor?"

CHINESE HIGHWAYS.—Hunan Province, China, has a highway system superior to that of any other Province in China. About 700 miles of roads have been completed and an additional 400 or 500 miles are under construction, to be completed within the next few years. Roads are well planned, indicating competent engineering supervision in both construction and maintenance. They range from 25 to 35 feet in width. The material used, all readily available in the Province, stands up under any kind of weather, especially because the roads are well graded and drained. Bridges also are well constructed, in most cases of stone masonry. Virtually no machinery is employed in highway work, as hand labor is abundant and cheap. The average construction cost per mile is between \$700 and \$800 (United States currency.)

IDAHO CHAPTER.—A chapter of Associated General Contractors has been organized in Boise, Idaho. A. G. Cornell is president, J. M. Sharp, vice-president, and Harold Quinn, secretary-treasurer.

1442 Contractors Involved In State Bureau Complaints

A TOTAL of 1,442 contractors were hailed before the registrar of contractors during the past three years on charges of misappropriation of funds, abandoning uncompleted building projects and other unethical and il-James Rolph Jr. by Registrar Carlos W. Huntington. Licenses of 273 contractors were suspended following investigation and hearings, while the licenses of 39 other builders were unconditionally revoked.

In addition, 232 contractors were found to be illegally operating without a state license as a result of investigation of formal complaints, and were barred from obtaining licenses until the complaints are satisfactorily settled. A total of 301 cases were adjudicated by arbitration after complaints were filed but prior to formal hearing, the registrar reported.

The charges filed against 373 contractors were necessarily dismissed because of lack of evidence, while 222 contractors were found not guilty of charges following a formal hearing.

Huntington, who is also director of professional and vocational standards in the governor's cabinet, asserted that hundreds of additional complaints were filed with his office and were investigated by inspectors and satisfactorily settled without the necessity of the contractor being cited to face formal charges.

"These formal complaints, Director Huntington said, "involve a total of \$614,251," adding that the Contractors' Act, passed by the 1929 Legislature, has proved an effective meaning of raising the ethics and standards within the industry and at the same time protecting the gullible public from being swindled by the irresponsible operations of fly-by-night contractors.

"The Contractors' Act," he reported to the Governor, "was enacted at a time when the state was experiencing one of the greatest building booms in its history, and at a time when the operations of the unethical, unscrupulous and fly-by-night contractor, lacking in integrity, ability or financial stability, constituted a serious menace to the public.

"The chief accomplishment of the law has been to rid the state of this type of contractor, thus rendering an invaluable protection to the public, as well as the sub-contractor and other business men in a case where a contractor would collect the full amount of the project from his patron and then disappear without finishing the project or paying his material supply bills.

"The benefits derived by the building industry and the public cannot be measured by the \$614,000 involved in these formal complaints. An analysis of the operation of the law will show that it has saved the public millions of dollars. These complaints, in the majority of cases, involve

only a small unit of a major construction project with an aggregate of several hundred thousand dollars. This is due to the fact that an unethical contractor may, for example, be awarded a half million dollar job, and before completion of the job he would be cited on a complaint involving only a hundred dollars.

"Were it not for the operation of this Act, it would be possible for him to finish the project in the same faulty manner, entailing considerable financial loss to his patron or sub-contractor, which, in many cases, would run into a large percentage of the total cost of the entire project.

"A typical case on record is case No. 55. In this case, investigation showed that 12 homes were being financed on fictitious loans and 12 owners were paying interest on money that was not available in the first place. This firm was forced into bankruptcy following investigation by our office, and the officers were sent to prison. In this same case, more than \$200,000 was involved, yet the actual complaint filed with the registrar reflected only a small amount and involved only one of the 12 homes.

"Enforcement of the Act has served a two-fold purpose inasmuch as it protected the public in cases such as this one, and has also protected the legitimate contractor and business man.

"In addition, enforcement of the Act has been instrumental in curbing the practice of many fly-by-night contractors in going from town-to-town and underbidding a reputable contractor with the intention of skinning the job by substituting cheap and inferior materials, diverting funds received for payment of labor or materials and vanishing after receiving one or more payments, leaving the owner with a partially completed project, saddled with liens for materials for which he had presumably paid," Huntington said.

The following table is a recapitulation of complaints adjudicated before the Registrar of the past three years:

	1929-30 Fiscal Year	1930-31 Fiscal Year	1931-32 Fiscal Year	Total Actions	Percentages	Amount of Complaints
Suspended	34	175	64	273	18.9	\$152,766.64
Revoked	12	10	17	39	2.7	44,707.97
Debarred	34	154	44	232	16.1	71,877.33

Some Phases of the 1932 Federal Income Tax Law

FRANK T. ANDREWS, *Certified Public Accountant; Associate Member, Associated General Contractors*

The following is the fifth of a series of eight articles outlining income tax regulations of interest to every contractor.

THE proper method of computing depreciation, for income tax purposes, is a problem which concerns all contractors. Depreciation is a loss in value resulting from physical decay or use of property or due to lack of adaptation to function. There should be excluded from the term depreciation any idea of mere reduction in market value not resulting from exhaustion, wear and tear, or obsolescence.

The basis of depreciation is the cost of property or if the property were purchased prior to March 1, 1931, the basis is the cost or the value at March 1, 1931, whichever is higher. The law provides for "a reasonable allowance" for depreciation. This reasonable allowance is determined by experience and contemplates the useful life of property and the particular conditions under which the property is used. The rate is also affected by the accounting policy followed with respect to maintenance and replacements. Since a pre-established rate of depreciation is usually estimated so as to replace the capital investment in property by the time the property becomes useless or worthless, major repairs or replacements, tending to lengthen the estimated useful life of the property, should not be charged to expense. Such renewals or replacements should be charged against previously allowed depreciation as the regulations do not permit both depreciation and cost of renewing to be deducted from income.

Except in unusual cases, the income tax regulations require that depreciation be computed at a rate for each specific item. A contractor is seldom permitted to establish a composite rate of depreciation for a group of different items such as machinery or buildings.

There are a great many ways to figure depreciation and the government will allow almost any method or plan to be used, unless it is shown by clear and convincing evidence that the resulting deduction is unreasonable.

There are some methods of figuring annual depreciation which may result in a reasonable deduction but which are cumbersome and confusing.

Many contractors take an annual inventory of machinery and equipment and value it at the market price. The difference between the value at the opening and closing of the year is then used as a deduction for depreciation. This policy may or may not result as a fair measure of depreciation sustained. However, a method having no foundation of cost is adverse to all good accounting principles. The principal argument advanced in favor of this "inventory method" is that there is no other adequate way to value certain equipment which received hard and extraordinary usage during a year. This is not true. If a predetermined rate of depreciation for any asset is found insufficient to cover the actual deterioration, income tax regulations, as well as good accounting procedure, will permit a change of the depreciation rate. When contractors make rental charges for equipment, in keeping their costs, this rental should not be used as a basis for taking depreciation and the idea should be discouraged. Rental charges for equipment have no bearing upon depreciation. Depreciation should not be com-

puted upon appreciated values. Even though a contractor purchases a new \$4,000 truck for \$1,000, depreciation must be based upon the cost price.

In order for a depreciation deduction to be allowed, it must be written off the books. This is the government's only protection against excessive depreciation being taken.

Except where equipment is being used on a long-term contract where the profit is to be reported wholly in the year of its completion, depreciation may not be accumulated. If certain equipment is not used for several years the depreciation may not be deferred and charged against some future job; it must be taken each year regardless of the income from it.

If it is known that in many instances obsolescence, rather than ordinary wear and tear, becomes an important factor in determining an allowance for depreciation. A radical change in a certain type of equipment, involving greater efficiency, may render old equipment unfit for the purpose for which it was purchased or limit it to occasional use. Accordingly, depreciation rates used for such equipment should be modified to give full effect to extraordinary obsolescence affecting its useful life.

There are two simple ways, among others, to figure depreciation that are acceptable for income tax purposes: *Fixed Percentage Method*. This is the simplest and most popular method. The difference between the cost and residual or "junk" value of an asset is divided by its estimated life and the result, expressed as a percentage, is charged off each year. The argument against this method is that as an asset becomes older the cost of repairs increases, and since the income is charged with depreciation as well as with the cost of ordinary repairs, the charges against income are heaviest in the latter years of the life of the asset. In order to overcome this objection, the following is suggested as a simple but scientific alternate: *The Weighted Year Method*. By this method the depreciation each year is decreased, thus equalizing the total charges of depreciation and repairs. The amount of depreciation for any year may be determined by multiplying the total depreciation by a fraction having the number of years the asset will still last as a numerator, and the sum of the total years of its life as a denominator. To find the denominator, use the formula for the sum of a simple arithmetic progression: if the life were 10 years, this sum would be the sum of $1+2+3+4+5+6+7+8+9+10=55$. The formula for the sum of a simple arithmetic progression is $\frac{N(A+Z)}{2}$ where N is the number of

terms, A is the first term and Z the last term. The sum of the numbers from 1 to 10 would be $\frac{10(1+10)}{2} = \frac{110}{2} = 55$. If an asset cost \$1,500 and the residual value is \$400, the total to be depreciated is \$1,100. To calculate the depreciation for the first year, simply multiply the total depreciation, \$1,100, by the fraction referred to, i.e., $\frac{10}{55} \times \$1,100 = \200 . The second year is $\frac{9}{55} \times \$1,100$ or \$180. The depreciation the third year is $\frac{8}{55} \times \$1,100$ or \$160. The tenth year the depreciation would be $\frac{1}{55} \times \$1,100$, or \$20.

After figuring the difference between the first two years' depreciation, it is unnecessary to figure further depreciation by means of the formula, as the annual decrease of each year's depreciation is constant; in the example just shown the annual decrease is \$20.

Mr. Andrews will gladly answer your income tax questions during the time these articles are appearing in the **PACIFIC CONSTRUCTOR**. Address your communications c/o F. T. Andrews & Co., Certified Public Accountants, Russ Building, San Francisco.

LeTOURNEAU LOGGING UNIT ON WOLFE CREEK HIGHWAY

Away back in the rough and heavily timbered country west of Portland, Oregon, miles from any vestige of a road, a LeTourneau Logging Power unit is helping create the new Wolfe Creek route from Portland to the Pacific. The unit, which is being used by James Groat, contractor, with a tractor, is not only being used in actual roadway operations but served an important part in getting in the contractor's supplies and equipment.

When Groat began work on his section of the road, which is in the middle of the portion where construction is now under way, there was no road or even passable track leading to the scene where he had to go to work. He loaded a quality of gasoline and oil, powder and other supplies on a heavy sledge, hooked this up to his tractor and started from the nearest base of supplies.

He had to cross streams, climb hills and traverse almost impassable country for two miles. When the going got too heavy for the tractor, he ran out the line from the logging unit, turned on the power and literally hoisted himself, the tractor and the attached sledge to where he wanted it. If he came to a large windfall across his path, he would run out a line and pull it out of the way. At almost the end of the trip he had to go up a very steep hill. This he accomplished by using the logging unit and later hauled the sledge up by running a line down from the tractor to the sledge and dragging it up.

Arrived at the scene of operations, he picked out a large and sturdy tree, set up his tackle on it and hauled up to the tree sections of logs four to five feet in diameter and twenty to thirty feet in length, piling them up around the tree. This he did with only the lines on the logging unit and a small amount of accessory tackle. Some of these logs had to be hauled up out of deep and steep-sided ravines.

Groat said that other tractors attempting to get into the country where he it at work had gotten stuck and had to be helped out by additional tractors. He expressed himself as believing the logging power unit, although rated by the makers at a higher capacity than any other power unit on the market, was actually able to exceed the claims the manufacturers made for it.

Groat said the swivelling fairleads of the unit, enabling him to pull on lines running in any direction without turning the tractor, or even to pull in two directions at once, was very valuable in his work.

INTERMOUNTAIN BRANCH.—J. B. Mullins, Salt Lake City, was named president of the Intermountain Branch, Associated General Contractors, at the annual meeting held in Ogden on January 7. He succeeds G. H. Malan. The election of Mullins was made by acclamation after H. T. Reynolds, Jr., also nominated, withdrew when each candidate received the same number of votes.

Other officers elected are Karl Nelson, vice-president and T. C. Sorenson, secretary-treasurer. Mark Tuttle is manager.

New directors elected are D. R. Wheelwright and H. B. Way, succeeding C. W. Smith and Paul Paulsen.

The election followed an all-day meeting at the Hotel Ben Lomond.

The chapter adopted resolutions as follows: favoring further appropriations for federal aid and highway construction; favoring continuation of the federal reclamation construction program; opposing diversion of gasoline taxes from highway construction and maintenance funds; favoring appropriations for needed state buildings and institutions; favoring legislation to enable Utah to obtain R. F. C. funds for construction of dormitories at the agricultural college and University of Utah; favoring legislation authorizing the creation of improvement districts in counties outside the limits of cities and towns.

A crowd of 450 persons attended the banquet and entertainment in the Ben Lomond ballroom held after the convention.

NORTHERN CALIFORNIA CHAPTER.—George G. Pollock of the Pollock Construction Company, Sacramento, was elected president of the Northern California chapter, Associated General Contractors, at the first meeting of the new board of directors held in San Francisco, January 13.

Pollock has been vice-president of the chapter for the past year and succeeds Clyde W. Wood of Stockton in the presidency. R. D. Watson of Frederickson and Watson, Oakland, was elected vice-president.

Other members of the board of directors are C. W. Wood, A. B. Ordway, K. K. Bechtel, John Phillips and J. E. Bell.

Offices of Floyd O. Booe, manager of the chapter were moved on January 15 from 206 Sansome street, San Francisco, to the Balfour Building, 351 California street.

AUSTRIA RESTRICTING CONSTRUCTION.—Although Austria's income from automobile and gasoline taxes will amount to approximately 59,500,000 schillings for 1932, no important highway construction is under way or planned. Only 18,728,000 schillings (about \$2,675,000) are being spent on highway work in 1932, and the budget proposed for all classes of roads during 1933 calls for only 18,885,000 schillings. Funds are being used for only the most essential and least expensive maintenance of the main arterial highways.

ALAMEDA CHAPTER.—All officers of the Alameda County Chapter, Associated General Contractors were re-elected by the board of directors. The officers who have entered a new term are S. G. Johnson, president; George J. Maurer, vice-president; H. J. Christensen, secretary-treasurer; William E. Hague, manager.

The board of directors is composed of H. J. Christensen, Thomas F. L. Furlong, S. G. Johnson, W. E. Lyons, George J. Maurer, David Nordstrom and W. G. Thornally.

NEW LOCATION.—Southern California Chapter, A. G. C., is now located in new quarters at 1151 South Broadway, Los Angeles, the Chamber of Commerce Building. The offices formerly were in the Pershing Square building.

Washington State Highway Budget \$14,446,740

The highway budget for the State of Washington for the 1933-35 biennium provides for expenditures of \$14,446,740, compared with approximately \$22,000,000 during the current two-year period.

Estimated gasoline tax revenues are \$11,786,740, while \$2,660,000 it is expected will be allotted the State in Federal aid funds. The budget provides for 139 miles of paving; 946 miles of grading and surfacing; 1,169 miles of oiling.

The complete program for the State is as follows:

STATE ROAD No. 1—PACIFIC HIGHWAY

British Columbia line-Seattle—Chuckanut creek fill, Clayton bay fill; Wildcat Cove hill, Blaine and Peace Arch, paving gaps, \$20,200.

Blanchard Bridge approaches, paving, \$25,000.

Fisher's Slough vicinity, paving, \$12,000.

Pilchuck River north, \$150,000.

British Columbia line to Seattle, betterment, \$27,500.

Total British Columbia line to Seattle, \$234,700.

Seattle-Pierce county line, betterment, \$10,100.

King county line to Lewis county line—Union Ave.-Lakeview, paving, \$189,500; Ponders-Fort Lewis, paving, \$235,000; King county line-Lewis county line, betterment, \$5,500; total King county line-Lewis county line, \$430,000.

Thurston county line to Oregon state line, betterment, \$30,600.

Bellingham-Austin Pass—Nugents bridge approaches, paving, \$10,000; Deming-Glacier, \$8,100; Welcome Grange hall, Warneck, \$100,000; Bellingham-Austin Pass, oiling, \$50,500; Bellingham-Austin Pass, betterment, \$34,100; Bellingham-Austin Pass, snow removal, \$17,400. Total, Bellingham-Austin Pass, \$220,100.

Lake Samish branch, Burlington-Bellingham—State fish hatchery-Lake Samish, \$75,000; end of pavement-Bellingham, \$31,500; Burlington-Bellingham, betterment, \$7600; Burlington-Bellingham, oiling, \$52,000. Total Lake Samish branch, Burlington-Bellingham, \$166,100.

Connection to State Road No. 2, near Duwamish—Dnwamish vicinity, paving, \$30,000.

Total, State Road No. 1, \$1,121,600.

STATE ROAD No. 2—SUNSET HIGHWAY

Seattle to Snoqualmie Pass—Renton to Seattle, paving, \$125,000; Snoqualmie Pass-North Bend, paving, \$700,000; Seattle-Snoqualmie Pass, betterment, \$29,600; Seattle-

Snoqualmie Pass, snow removal, \$37,400. Total Seattle to Snoqualmie Pass, \$892,000.

Bothell-Fall City—Bothell-Hollywood, \$20,700; Hollywood East revision, paving, \$10,000; Redmond-Fall City, paving gaps, \$28,000; Bothell-Fall City, betterment, \$5,300. Total, Bothell to Fall City, \$64,000.

Snoqualmie Pass to Blewett Pass—Snoqualmie Pass-Teanaway Junction, paving, \$1,006,000; Teanaway Junction-Virden, oil, \$38,000; Virden-Mountain Home, \$137,000; Snoqualmie Pass-Blewett Pass, betterment, \$23,800; Snoqualmie Pass-Blewett Pass, snow removal, \$25,500. Total Snoqualmie Pass to Blewett Pass, \$1,228,300.

Blewett Pass to Wenatchee—Wenatchee-Cashmere, paving gaps, \$84,000; end of pavement west, \$144,000; end of pavement to summit of Blewett, guard rail and oiling, \$30,900; snow removal, \$5100. Total, Blewett Pass to Wenatchee, \$264,000.

Wenatchee to Wilbur—Almira cast, \$16,500; Wilbur-Almira, \$74,000; Wenatchee to Wilbur, oiling, \$116,000; snow removal, \$5,100; Wenatchee to Wilbur, betterment, \$7,200. Total, Wenatchee to Wilbur, \$218,800.

Wilbur to Spokane—Hawk Creek-Telford, \$32,000; Hawk Creek-Creston, \$29,200; Spokane-Wilbur, betterment, \$11,400; Wilbur to Spokane, snow removal, \$7,600. Total, Wilbur to Spokane, \$80,200.

Spokane-Idaho State Line—Dishman-Liberty Lake road, pavement widening, \$132,500.

Total, State Road No. 2, \$2,879,800.

STATE ROAD No. 3—INLAND EMPIRE HIGHWAY

Junction State Road No. 2 to Columbia River—Yakima-Ahtanum Creek bridge, paving, \$162,500; Prosser-Kiona, oil, \$14,400; Columbia River bridge, sidewalk, \$3,000; Junction State Road No. 2-Columbia River, betterment, \$34,800. Total, Junction State Road No. 2 to Columbia River, \$214,700.

Pasco-Walla Walla-Oregon State Line—Wallula cut-off, oil, \$22,500; Wallula-Tonchet, oil, \$36,000; Pasco-Walla Walla-Oregon State line, betterment, \$6,400. Total, Pasco-Walla Walla-Oregon State Line, \$64,900.

Walla Walla to Asotin—East entrance to city of Walla Walla, widening, \$20,000; Dayton-Pomeroy, surfacing and oil, \$36,000; Delaney and Jackson bridges, replacement, \$22,500; Pomeroy-McKiernan grade, \$39,000; McKiernan Grade-Silcott, oil, \$8,100; Clarkston west, \$78,500; Walla Walla-Asotin, betterment,

\$26,700. Total, Walla Walla to Asotin, \$230,800.

Dodge-Central Ferry—Dodge-Central Ferry, betterment, \$5,100. Total, Dodge-Central Ferry, \$5,100.

Central Ferry to Spokane—Spokane-Junction, Eastern Division, paving gaps, \$20,000; Dusty-North, \$100,800; Dusty-Central Ferry, surfacing and oil, \$23,400; Central Ferry to Spokane, betterment, \$29,700. Total, Central Ferry to Spokane, \$173,900.

Spokane-Laurier—Deer Park-Kettle Falls, widen, ballast and oil, \$163,300; Dennison, Deer Park, oil, \$3,600; Colville-North Revisions, \$18,700; Clayton-Loon Lake, \$2,500; Meyers Falls-Barstow, \$7,500; Kettle Falls bridge-Laurier, oil, \$26,100; Spokane-Laurier, betterment, \$24,000. Total, Spokane-Laurier, \$245,700.

Colfax-Pullman—Colfax-Pullman, pavement, \$565,000,000; Colfax-Pullman, betterment, \$4,200. Total, Colfax-Pullman, \$569,200.

Total, State Road No. 3, \$1,504,300.

INLAND EMPIRE HIGHWAY—EASTERN ROUTE

Junction State Road No. 3-Idaho State Line—Junction State Road No. 3-Pullman, \$210,900; Pullman-Idaho line, surfacing and oil, \$53,100; Junction State Road No. 3-Idaho State line, betterment, \$28,600; Junction State Road No. 3-Idaho State line, snow removal, \$4,200. Total, Junction State Road No. 3-Idaho State Line, \$296,800.

Total, Inland Empire Highway, Eastern Route, \$296,800.

STATE HIGHWAY No. 4

Tonasket to Republic—Tonasket to Republic, oiling, \$41,000; Tonasket to Republic, betterment, \$6,300. Total, Tonasket to Republic, \$47,300.

Republic to Wilbur—Ferry south, guard rail, \$2,800; Republic to Wilbur, betterment, \$8,500. Total, Republic to Wilbur, \$11,300.

Total, State Road No. 4, \$58,600.

STATE ROAD No. 5—NATIONAL PARK HIGHWAY

Renton-Chinook Pass—Enumclaw-Old Park entrance, \$246,700; Old Park entrance-Chinook Pass, guard rail, \$277,000; Renton-Chinook Pass, oil, \$103,600; Renton-Chinook Pass, betterment, \$19,500; Renton-Chinook Pass, snow removal, \$40,000. Total, Renton-Chinook Pass, \$436,700.

Chinook Pass to Yakima—Nelson Bridge-Oak Flat, construction and oil, \$317,000; Oak Flat-Chinook Pass, guard rail, \$70,000; Morse Creek-Carmack bridge, surfacing and oil, \$58,500; Chinook Pass-Yakima, betterment, \$37,400; Chinook Pass-Yakima, snow removal and equipment, \$29,700. Total, Chinook Pass-Yakima, \$512,600.

Auburn to Tacoma—King county line-Sumner, \$4,500; King county line-Tacoma, betterment, \$2,700; Total, Auburn to Tacoma, \$7,200.

Tacoma-Rainier National Park—Alder-La Grande, paving, \$108,100;

Tacoma-Rainier National Park, betterment, \$8,400. Total, Tacoma-Rainier National Park, \$116,500.

Junction State Road, No. 1 to Elbe; Kosmos to Chinook Pass—Mill Creek-Riffe, oil, \$10,800; Morton, Westfork, \$110,000; Westfork-Elbe, guard rail, \$10,000; Silver Creek bridge (between Randle and Cora), \$16,000; Clearfork-South boundary Rainier National Park, \$50,000; Riffe to Kosmos, oil, \$6,800; Junction State Road No. 1 to Elbe and Kosmos to Chinook Pass, betterment and reconstruction, \$22,300. Total, Junction State Road No. 1 to Elbe, Kosmos to Chinook Pass, \$225,900.

Fairfax Branch, Enumclaw-Park Boundary—Carbonado-Park line, \$70,000; Enumclaw-Park boundary, oiling, \$3,100; Enumclaw-Park boundary, betterment, \$15,800. Total, Fairfax Branch Enumclaw-Park Boundary, \$88,900.

Auburn westerly to Junction State Road No. 1—Auburn westerly, paving, \$51,000; Auburn westerly to State Road No. 1, betterment, \$3,500. Total Auburn westerly to Junction State Road No. 1, \$54,500.

Naches River-White Pass to Clearfork Junction—Naches River-Rimrock, surfacing and oil, \$73,000; Cartwright Creek vicinity, \$100,000; Naches River-White Pass, betterment, \$3,400. Total, Naches River-White Pass to Clearfork Junction, \$176,400.

Total, State Road No. 5, \$1,618,700.

STATE ROAD No. 6—PEND OREILLE HIGHWAY

Spokane-B.C. line—End of pavement-Newport, grading, surfacing, and oiling, \$145,000; Blueside-Ione, \$63,000; Ione-South, fill widening, \$10,000; McCloud Creek-B. C. line, surfacing and oil, \$252,000; Ruby Creek, Diamond Creek and Lost Creek bridges, \$20,000; Spokane-B. C. line, betterment, \$29,000. Total, Spokane-B. C. line, \$519,000.

Total State Road No. 6, \$519,000.

STATE ROAD No. 7—NORTH CENTRAL HIGHWAY

Ellensburg to Vantage—Ellensburg-Kittitas, paving, \$180,000; Kittitas-Highline Canal, construction and oil, \$59,500; Alkali Ike's-Rock Canyon, construction and oil, \$252,500; Ellensburg-Vantage, betterment, \$7,600. Total, Ellensburg to Vantage, \$499,600.

Vantage to Lincoln County Line—Quincy to Marlin, grading, surfacing and oil, \$17,000; Vantage to Lincoln county line, betterment, \$10,200. Total, Vantage to Lincoln county line, \$27,200.

Grant County Line to Davenport—Harrington-Lamona, \$10,000; Lamona-Odessa, \$22,500; Davenport-Grant county line, \$112,500; Grant county line to Davenport, betterment, \$8,900; Davenport-Harrington snow removal, \$1,700. Total, Grant county line to Davenport, \$155,600.

Total, State Road No. 7, \$682,400.

STATE ROAD No. 8—NORTH BANK HIGHWAY

Vancouver to Yakima County Line—Cooks-Underworld, \$827,000; Washongal-Yakima county line, guard rail, \$30,600; Stevenson-Maryhill junction, oil, \$44,500; Lyle-

Columbia Hills summit, oil, \$84,500; Vancouver-Yakima county line, betterment, \$40,400; Vancouver-Yakima county line, snow removal, \$13,300. Total, Vancouver to Yakima county line, \$1,040,300.

Klickitat County Line-Junction State Road No. 3—Buena-Toppenish, construction and oil, \$129,300; Toppenish Ridge-Klickitat county line, surfacing and oil, \$22,500; Klickitat county line-Junction State Road No. 3, betterment, \$7,600. Total, Klickitat county line to Junction State Road No. 3, \$159,400.

Total, State Road No. 8, \$1,199,700.

STATE ROAD No. 9—OLYMPIC HIGHWAY

Olympia-Port Angeles-Townsend Jorsted Creek crossing, \$29,000; Duckabush north, \$190,000; Blyn to Sequim, \$95,500; Purdy Creek-Camp Talbot, surfacing and oil, \$68,100; Blyn east, surfacing and oil, \$13,900; end of pavement-East limits Sequim, paving, \$227,500; Dungeness River bridge, \$105,000; Olympia-Port Angeles-Townsend, betterment, \$38,200. Total, Olympia-Port Angeles-Townsend, \$767,200.

Port Angeles-Hoh River—East Beach Road to Fairholm, \$11,000; Port Angeles-Hoh River, surfacing and oil, \$65,400; Port Angeles-Hoh River, betterment, \$40,000. Total, Port Angeles-Hoh River, \$116,400.

Hoh River-Perry Creek—Hoh River-Hoquiam, surfacing and oil, \$79,000; Hoh River-Perry Creek, betterment, \$59,800. Total, Hoh River-Perry Creek, \$138,800.

Grand Mound-Elma—Rochester, end pavement west, paving, \$71,000; Elma-Malone, \$88,000; Elma-Oakville, surfacing and oil, \$9,800; Elma-Grand Mound, betterment, \$1,700. Total, Elma-Grand Mound, \$170,500.

Total, State Road No. 9, \$1,192,900.

STATE HIGHWAY No. 10—CHELAN-OKANOGAN HIGHWAY

Wenatchee to Quincy—Wenatchee to Quincy, betterment, \$6,800. Total, Wenatchee to Quincy, \$6,800.

Wenatchee-Okanogan County line—Chelan-Chelan Falls-county line, oil, \$21,600; Wenatchee to Okanogan county line, betterment, \$13,600. Total, Wenatchee to Okanogan county line, \$35,200.

Orondo-Chelan Falls—Orondo north, oil, \$9,000. Total, Orondo to Chelan Falls, \$9,000.

Chelan County Line to B. C. Line—Chelan county line to B. C. Line, oil, \$121,500; Chelan county line to B. C. line, guard rail, \$8,000; Chelan county line to B. C. line, betterment, \$7,600. Total, Chelan county line to B. C. line, \$137,100.

Brewster-Conlee City—Brewster-Junction State Road No. 2, betterment, \$8,500; Brewster-Bridgeport, oil, \$18,000. Total, Brewster to Coulee City, \$26,500.

Total, State Road No. 10, \$124,600.

TOTAL ROAD No. 11—COLUMBIA BASIN HIGHWAY

Junction State Road No. 2-Franklin County Line—Cheney-Tyler, \$204,700; Fishtrap-Tyler, oiling,

\$29,800; Sprague, south, \$31,500; Fishtrap-Ritzville, surfacing and oil, \$54,000; Fishtrap-Franklin county line, \$15,000; Junction State Road No. 2-Franklin county line, betterment, \$18,000. Total, Junction State Road No. 2-Franklin county line, \$353,000.

Pasco-Adams County Line—Pasco-Adams county line, betterment, \$1,600.

Total, State Road No. 11, \$357,600.

STATE ROAD No. 12—OCEAN BEACH HIGHWAY

Chehalis to Astoria Ferry—Pe Ell to Pluvius, \$180,000; Potter's Slough-Palix, \$481,500; Beam Road-Pe Ell, surfacing and oil, \$8,000; Pluvius to Ilwaco, oil, \$12,400; Chinook-Point Ellice, oil, \$8,200; Chehalis to Astoria Ferry, betterment, \$44,400. Total, Chehalis to Astoria Ferry, \$734,500.

Kelso to Johnson's Landing—Skamokawa to Gray's River, \$23,800; Cathlamet to Johnson's Landing, oil, \$12,800; Longview-Coal Creek Slough, \$132,000; Kelso to Johnson's Landing, betterment, \$27,600. Total, Kelso to Johnson's Landing, \$196,200.

Total, State Road No. 12, \$930,700.

STATE ROAD No. 13—WILLAPA GRAYS HARBOR HIGHWAY

Cosmopolis-Pacific County Line—Cosmopolis-Arctic, \$101,200; Cosmopolis-Pacific county line, surfacing and oiling, \$12,600; Cosmopolis-Pacific county line, betterment, \$13,200. Total, Cosmopolis-Pacific county line, \$127,000.

Raymond to Grays Harbor County Line—Raymond-Pacific county line, oil, \$6,700; Raymond-Grays Harbor line, betterment, \$4,900. Total, Raymond to Grays Harbor county line, \$11,600.

Total, State Road No. 13, \$133,600.

STATE ROAD No. 14—NAVY YARD HIGHWAY

Junction State Road No. 9-Gig Harbor-Harper—Port Orchard to Tidewater Creek, surfacing and oil, \$18,000; Belfair, east, surfacing and oil, \$9,900; Junction State Road No. 9-Gig Harbor-Harper, betterment and reconstruction, \$39,000.

Total, State Road No. 14, \$66,900.

STATE ROAD No. 15—STEVENS HIGHWAY

Everett-Stevens Pass—Index-Goldbar, \$10,800; Index to Summit, \$350,000; Everett-Stevens Pass, oil, \$49,140; Everett-Stevens Pass, betterment, \$62,800; Everett-Stevens Pass, snow removal, \$5,100. Total, Everett to Stevens Pass, \$477,840.

Stevens Pass to Junction State Road No. 2—Junction State Road No. 2 to Leavenworth, \$5,000; Junction State Road No. 2 to Leavenworth, oil, \$8,100; Duncan Corner, grading, surfacing and oil, \$13,150; Leavenworth to Winton, \$6,000; Wenatchee River bridge, \$22,000; Leavenworth to Merritt, surfacing and oil, \$67,500; Cascade, east, \$492,500; Berne to Merritt, \$3,000; Junction State Road No. 2 to Summit, betterment, \$30,600; guard rail, \$11,000; snow removal, \$3,400. Total, Stevens Pass to Junction State Road No. 2, \$662,250.

Total, State Road No. 15, \$1,140,090.

NEVADA PLANS ROAD BUDGET OF \$2,304,000

Highway Develop. Program Depends on Federal Aid Action

Based on the assumption that congress will appropriate at least \$75,000,000 for highway construction purposes for the fiscal year starting next July, of which Nevada would receive approximately \$750,000, the Nevada highway department will expend \$2,304,735 during the year 1933 for road construction, oiling and maintenance, according to the tentative construction and maintenance budget for the year, announced by State Highway Engineer S. C. Durkee.

Should congress fail to make the appropriation then the work will be curtailed to such an extent that there will be little or no construction after July 1.

The department now has approximately \$985,000 in unexpended federal funds to carry on the highway program until June 30. Of this sum \$800,000 is in emergency federal aid funds that must be entirely expended by June 30 or they will revert. Only \$100,000 remains in the regular federal aid fund while \$85,000 remains in the Oddie-Colton or federal land fund. This will all be used within the next few months.

The tentative budget calls for the expenditure of \$526,297 in general maintenance, \$58,703 in specific maintenance and \$15,000 for maintenance administration. The maintenance cost is borne entirely by the state without federal aid and will be continued through the year, according to present plans.

The department contemplates the expenditure of \$153,306 in Washoe county which includes the reconstruction and surfacing of the highway from Reno to Huffakers at a cost of \$115,000 and the expenditure of approximately \$38,000 in maintenance for the 88 miles of state highway in the county. According to present plans the Reno-Huffakers work will be financed from funds now available.

Lander county is allotted the largest sum for road work in the tentative budget with a total of \$462,463, of which approximately \$223,000 is for reconstruction and oiling.

Following are the contemplated expenditures distributed according to counties:

Churchill County.—Bituminous surface treatment, Leeteville to Lahontan, 12 miles, \$30,000.

Clark County.—Reconstruct and oil, Las Vegas to six miles southwest of Apex, 8.64 miles, \$73,400;

Lower Virgin River bridge to Mesquite, 10.58 miles, \$30,000;

Cement concrete paving, city of Las Vegas, 3.91 miles, \$180,000;

Douglas County.—Reconstruct and oil, Lyon county line to five miles east of Holbrook, 5.63 miles, \$45,000;

Elko County.—Between Little Salmon river and the Idaho state line, 10.13 miles, \$60,000;

Two bridges over Little Salmon river, \$30,000;

Cement concrete pavement, city of Elko, 1.21 miles, \$60,000;

Contact to 8 miles north, gravel surfacing, 7.98 miles, \$17,556;

Esmeralda County.—Bituminous surface treatment, Nye Co. line to Millers Cut-off road, 8.67 miles, \$21,675;

Eureka County.—Reconstruct and oil west Eureka county line to 14 miles west of Hay ranch, 9.68 miles, \$77,440;

Lander County.—Reconstruct and oil Campbell creek ranch to Railroad Pass 15.92 miles, \$119,400;

Twelve miles east of Austin to Eureka county line, 23.93 miles, \$203,405;

Bituminous surface treatment, Railroad Pass to Austin, 21.41 miles, \$64,230;

Austin to 12 miles east, 11.7 miles, \$35,100;

Lincoln County.—Maynard lake to Alamo, 15 miles, \$90,000;

Lyon County.—Dayton to Lahontan, 30 miles, \$150,000;

Reconstruct and oil, Hoyo to Douglas county line, 0.98 mile, \$7,840;

Bridge over West Walker river, \$15,000;

Bituminous surface treatment, Yerington, to 9½ miles east, 9.53 miles, \$23,825;

Nye County.—Bituminous surface treatment, Tonopah to the Esmeralda county line, 1.1 miles, \$2,750;

Pershing County.—Cement concrete pavement, city of Lovelock, 1.22 miles \$65,000;

Washoe County.—Reconstruction, asphaltic concrete, Reno to Huffakers, 5.42 miles, \$115,000;

White Pine County.—Gravel surfacing only, west foot of Antelope Summit to Illipah, 12.62 miles, \$27,764;

Bituminous surface treatment, Eureka-White Pine county line to Robinson Summit, 49.83 miles, \$159,490.

STATE MAY ENGAGE SPECIAL ARCHITECTS

Authority to employ practicing architects to design the new California state hospital to be located at Ventura is vested in the board of managers of the institution, according to an opinion rendered yesterday by Attorney General U. S. Webb. The hospital will cost approximately \$1,000,000, on the basis of general plans.

Webb's opinion was given to State Architect George B. McDougall. He said the board of managers was expressly empowered under Section 2151 of the Political Code, authorizing the project, to engage architects at their discretion. The hospital will be under supervision of the Department of Institutions, headed by Dr. J. M. Toner.

KELLY PROPOSES TO END \$9,000,000 GAS TAX REFUND

Levy on Exempt Gallonage Would Avoid Robbing Highway Dept.

Abolition of gas tax refunds on purchases of non-highway use has been suggested by Earl Lee Kelly, public works director, as a possible means of bolstering general fund revenues.

He said he may recommend to a senate financial fact-finding committee use of \$9,000,000 refund money each biennium to aid budget balancing. This would require statutory amendment.

Agricultural, aviation and marine users of gasoline now get refunds of the 3-cent tax. Kelly opposes this, insisting that it should be a straight sales levy on all consumption.

Finance Director Rolland Vandegrift approved the proposal which would accomplish the same end as his suggested general fund rebate of \$8,799,000 used to pay highway bond charges. Vandegrift said there are widespread abuses of the present system.

REMODELING WORK TO BE DEVELOPED

Lindgren & Swinerton, Inc., San Francisco, have inaugurated an alteration division of the company which will specialize in all types of modernization and re-construction. J. Hal Hunter, who has been identified with the building industry in Northern California for the past sixteen years, is in charge of the new division.

"The era of rejuvenation of old buildings which started some months ago has been a means of relieving some of the unemployment and since it is natural that a continuance of this type of work is to be about the first stimulus to the construction industry to be expected this firm will play a strong role in its promotion," Hunter declared.

Lindgren recently completed the modernizing of the Blake Block in Oakland. They are also low bidders on the addition to the San Francisco post office building, on which a contract will be awarded shortly.

CLINTON SUES ON FACTORY CONTRACT

Clinton Construction Company of San Francisco, has filed suit in the Federal district court to collect \$68,093 from the Ford Motor Company, claimed as a balance due on the contract for construction of the Ford assembly plant at Richmond.

The Clinton company declares the contract was completed Sept. 17, 1931. A dispute over the final payment arose thereafter and the Ford company has refused to pay the balance due.

MacDONALD NEW HEAD OF STATE LABOR DIVISION

Reardon Vacancy Given Building Trades Council Executive

Frank C. MacDonald, president of the California State Building Trades Council, has been named state labor commissioner by Gov. James Rolph to succeed Timothy A. Reardon, appointed chairman of the state industrial accident commission.

The probable shifting of Reardon to the new post was indicated in news dispatches from Sacramento last week. Reardon was formerly director of public works in San Francisco.

In his new post he succeeds Will J. French, identified with the state department of industrial relations almost continuously since 1911. Although French's term on the commission will not expire until 1934, the chairman's appointment goes to Reardon by designation of the Governor.

Reardon takes the place of Edward Allen of Berkeley whose term expired January 15.

MacDonald has long been one of the state's leading representatives of organized labor. In his new position he will have supervision of the bureau of labor statistics and the state's employment agencies and wage claim activities.

MORE DIRECTORS ON TRUCK BOARD

The directorate of the Allied Truck Owners was enlarged from seven members to 27 by a resolution adopted at the first annual convention which was held in Sacramento last week.

Frank L. Asbury of Los Angeles, president of the organization, was presented with an honorary badge in recognition of his services at the conclusion of the convention over which he presided.

The slate of directors proposed by the nominating committee will be before the membership for election at a meeting in March. The names submitted are:

Phillip E. Ling, San Francisco; George Harm, Fresno; Harry Phoenix, Bakersfield; Victor Swall, Visalia; V. J. Keyes, Fresno; Dana Wescott, Madera; Harley Highdon, Stockton; W. R. Stinnett, Merced; Sidney Epperson, Woodland; M. D. Savage, San Francisco; Ray A. Conyes, Oakland; A. L. Schneider, Sacramento.

E. H. Baker, Santa Rosa; J. E. Raymond, San Francisco; Wade Woody, Lindsay; B. W. Belyea, Los Angeles; R. E. Hazard, San Diego; L. D. Barnes, Riverside; Howard Lang, Los Angeles; C. J. Lamb, Long Beach; Frank Gularte, Santa Maria; A. M. Gross, Los Angeles; R. G. Knoll, Los Angeles; T. R. Rex, Redlands; Frank H. Asbury, Los Angeles, and C. S. Fisher, Modesto.

NEVADA URGES U. S. ROAD APPROPRIATION

Unless congress appropriates more than the \$35,000,000 now carried in the agricultural appropriation bill for federal aid highways all road building activities in Nevada will be at a standstill after July 1, according to state highway officials.

Nevada's net share of the \$35,000,000, according to Huston Mills, assistant highway engineer, would be between \$200,000 and \$250,000, or just enough to permit the state to fulfill construction commitments under appropriations authorized last year.

"Not even this work can be done," he explained, "unless the appropriation bill carries at least \$75,000,000 for federal aid highways of which Nevada would receive about \$750,000."

Telegrams to congressional leaders urging a larger appropriation, "because road construction is absolutely necessary to meet employment needs and to bring about completion of the state highway system," brought discouraging replies from Speaker Garner and Majority Leader Rainey, Mills stated.

"Garner merely promised to give 'earnest consideration' to our requests," he said, "while Rainey called attention to a federal deficit of \$100,000,000 per month and asked where the money would come from for more roads."

\$3,500,000 U. S. BUILDING BIDS OPEN FEB. 28

Excavation Starts On Civic Center Site For Big Structure

WASHINGTON, D. C., Jan. 16.—Bids for the \$3,500,000 Federal building in San Francisco will be received by the treasury department on February 28.

The federal building will be located in the civic center group on a site provided by the city at McAllister and Hyde streets. The Sibley Grading and Teaming Company which has received the excavation contract will proceed at once, officials said.

Specifications for the six-story structure include the following items: granite exterior, terra cotta court lining, promenade terrazzo and tile flooring, mastic tile floors in offices, lead roof, metal sash, quarry tile in corridors, oak trim throughout, movable metal partitions, plate glass, main stairs of marble and main entrance of aluminum.

Seven elevators are to be installed under a separate contract.

Plans for the building are by Arthur Brown, Jr., 251 Kearny street, architect; Leland and Haley, 58 Sutter street, mechanical engineers and C. H. Snyder, 251 Kearny street, structural engineer.

Rolph Message Deals With State Construction Program

Two portions of Governor Rolph's message to the 1933 legislature are of particular interest to the California construction industry. They are reprinted below:

DEPARTMENT OF PUBLIC WORKS

In our department of public works alone we have expended during the past biennium more than \$82,400,000 on projects of inestimable value to the people. We have constructed and reconstructed during the past two years some 1700 miles of highway. The diversion of highways expended \$64,208,839 in the 58 counties of the state.

We estimate that approximately 90 per cent of this tremendous sum or over \$51,000,000, has ultimately been paid to labor. This created the work that gave employment to legions of workmen whose wages have in large measure been the life-blood of business in this state. Some 9,000 citizens on an average were continuously employed on our state highway work.

In our division of architecture we expended the sum of \$7,813,921 in 29 counties on various necessary construction projects, thereby creating 422,942 man days employment.

Because of the expenditures on our buildings, greater accommodation has been afforded our citizens, superior school facilities have been given to the children, and the inmates of our institutions have been afforded more adequate modern housing.

We also expended \$351,488.75 on flood control, reclamation, river and hydraulic works. Of the cost of this work, 70.8 per cent or \$259,811 was expended for labor amounting to 54,272 man days.

These tremendous expenditures made during the world's most devastating industrial depression have made possible vast employments that have stimulated industry in every county of our state. Our splendid highway system has helped place California in the forefront as the Mecca for American tourists who annually spend millions of dollars while enjoying the accommodations, the climate and the scenery of our state.

It should be remembered also that our unsurpassed smooth, modern highways insure safe, rapid movement with transportation economy of at least 25 per cent to our farmers, growers and manufacturers as well as to the traveling public. This desirable condition could not maintain had we shortsightedly saved money by clinging to rough, unsafe antiquated highways.

DIVERSION OF GENERAL FUND MONEY

The time has come when the legislature must decide whether the diverting of general fund moneys for highway purposes shall continue.

During the past 22 years there has been diverted from the general fund for highway purposes approximately \$60,000,000 to pay redemption and interest on highway bonds.

There is no logical reason, considering the enormous sums derived for highway purposes from the gas tax, the motor vehicle fees, tax on highway transportation companies and federal aid, why the general fund should be called upon to continue to pay such a large annual amount for highway purposes.

If the general fund can be relieved of the burden of approximately \$4,350,000 a year, which decreases at the rate of approximately \$325,000 a biennium, it will go a long way toward solving the problem of making a balanced budget for the next two years.

By providing through legislative enactment that the highway funds shall carry all the cost of the highway system of the state of California, only a slight adjustment will be required in the present program of highway construction and maintenance.

I therefore recommend for your consideration the passage of an urgency measure for the reimbursing of the general fund for moneys used to pay highway bond interest and redemption, not only for the beginning of the next biennium but also for the present biennium.

If the \$8,779,750 which will have been paid for highway bond interest and redemption by the close of this biennium is returned to the general fund out of gas tax revenues, with the savings which have already been accomplished, we shall probably be able to end this biennium without a deficit in the general fund.

Opposition to this proposal has been voiced, but in my opinion, it is short-sighted. My recommendations will reserve the revenues from the gasoline taxes for highway purposes. Resistance to these fair suggestions will in the long run create a demand from the irritated taxpayers that a large portion of the enormous revenues from the gasoline tax shall be applied to the relief of the general fund.

FRESNO PLANS MODERNIZATION OF AUDITORIUM

Architect Submits Plans for Remodeling Building at \$175,000 Cost

A proposal to modernize the Fresno municipal auditorium at a cost of \$175,000 is before the city council for consideration, having been prepared in detail by Charles H. Franklin, Fresno architect and engineer.

The project entails remodeling of the interior and exterior of the building, 175 by 150 feet, and expansion of the seating capacity by 25 percent through installation of elevated balcony seats and the addition of new equipment.

Financing of the work, it is proposed, will be accomplished through a loan from the Reconstruction Finance Corporation or by borrowing from the municipal water department revenues.

The plan provides for the installation of new concrete balconies, with fixed theater seats on an elevated platform to accommodate 1,200 persons. Storage space would be provided under the balcony seats for the National Guard armory, which now occupies space on the balcony floor. An inside lobby would be a feature.

An adequate heating, cooling and ventilation system is included in the estimate and the stage would be enlarged. A ceiling of acoustical property to supplant the present steel-girder framework and improve the acoustics of the auditorium is provided in the remodeling scheme.

Provision for committee and banquet rooms under the side balconies for use during conventions is made by means of rolling partitions. A new inch and a quarter maple flooring is to be laid over both the main floor and stage, while terrazzo floors, divided into panels and brass strips, would be laid under the balconies on either side of the auditorium.

An exterior balcony is to be installed at the L Street entrance, finished in terrazzo floors in four-color unique designs. The front exterior facade consists of vertical piers, with black bases and aluminum frames at the seven lobby entrances. Provision also is made for flood lighting the front of the auditorium.

The interior finish is to be tile and texture plaster, with stainless steel columns under the balconies. There will be a new proscenium opening on the stage, new drapes and modernistic lighting arrangements. A sound motion picture projection booth is provided, as well as check rooms, lavatories, dressing rooms and a kitchen.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

5-MI. GRADE AND CONCRETE PAVE — MONTEREY COUNTY

MONTEREY COUNTY, Cal.—M. J. Bevanda, Elks Bldg., Stockton, at \$173,378.40 submitted low bid Jan. 4 to the State Highway Commission, Sacramento, to grade and pave with Portland cement concrete 5 mi., bet. 6 mi. and 1 mi. south of San Ardo, involving:

(1) 35.0 sta. clear and grub right-of-way;
 (2) 155,100 cu. yds. rdwy. excav. unclass.;
 (3) 756,200 sta. yds. overhaul;
 (4) 46,600 cu. yds. imp. borrow;
 (5) 3035 cu. yds. struc. excav.;
 (6) 52,300 sq. yds. subg. for pave.;
 (7) 12,250 cu. yds. Class "A" eem. conc. (pave.);
 (8) 353 cu. yds. Class "A" do (struc.);
 (9) 215,900 lbs. bar reinf. steel (pave and struc.);

(10) 332 lin. ft. 8-in. corr. metal pipe;
 (11) 900 lin. ft. 18-in. do;
 (12) 365 lin. ft. 24-in. do;
 (13) 164 lin. ft. 30-in. do;
 (14) 134 lin. ft. 36-in. do;
 (15) 1530 cu. yds. conc. remove from exist. pave. and struc.;
 (16) 256 sq. yds. paved gutters;
 (17) 2500 M. gals. water;
 (18) 4725 bbls. fuel oil;
 (19) 1000 lin. ft. move and reset exist. guard rail;
 (20) 1440 lin. ft. lam. timber guard rail;
 (21) 284 timber guideposts;
 (22) 58 culvert markers;
 (23) 7.25 mi. new barbed wire fence;
 (24) 1.85 mi. new hog-tight fence;
 (25) 32 fence gates;
 (26) 200 sta. finish roadway;
 (27) 65 monuments complete in place

pipe and spillway assemblies.

3.8-MI GRADING -- LOS ANGELES COUNTY

LOS ANGELES, COUNTY, Cal.—Fredrickson & Watson Co., 873 81st St., Oakland, at \$175,335.60 submitted low bid Jan. 11 to State Highway Comm., Sacramento, to grade 3.8 mi. bet. one mile east of Gorman and the northerly boundary; of which 3.5 mi. are to be paved with Portland cement concrete, involving:

- (1) 203 sta. clear and grub right-of-way;
- (2) 269,100 cu. yds. roadway excav., unclass.;
- (3) 2,500,000 sta. yds. overhaul;
- (4) 3700 cu. yds. struc. excav.;
- (5) 61,700 sq. yds. subgrade for pave.;
- (6) 13,120 cu. yds. class A cem. conc. (pave.);
- (7) 130 cu. yds. do. (struc.);
- (8) 301,000 lbs. bar reinf. steel (pave. and struc.);
- (9) 450 lin. ft. 8-in. corr. metal pipe
- (10) 500 lin. ft. 18-in. do;
- (11) 1350 lin. ft. 24-in. do;
- (12) 3500 cu. yds. exist. pave. to be removed;

- (13) 6350 M. gals. water (embank.);
 - (14) 3400 bbls fuel oil;
 - (15) 1.5 mi. new property fence;
 - (16) 4 gates complete in place;
 - (17) 200 timber guide posts;
 - (18) 60 culvert markers;
 - (19) 3000 lbs. misc. iron and steel (struc.);
 - (20) 203 sta. finish roadway;
 - (21) 50 monuments complete in place; State will furnish corr. metal pipe and spillway assemblies.
- Complete bids follow:
- (A) Fredrickson & Watson, Oakland, \$175,335.60.
 - (B) C. W. Wood, Stockton, \$184,436.50
 - (C) A. Telchert, Sacramento, \$193,291.00.
 - (D) Jahn & Bressi, Los Angeles, \$205,888.50.
 - (E) Weymouth Crowell Co. and E. P. Watson, Jr., Pasadena, \$207,475.
 - (F) Oswald Bros., Los Angeles, \$212,339.50.

BRIDGES

LOS ANGELES, Cal.—Bids for furnishing miscellaneous materials for use in the construction of a concrete bridge across San Gabriel River at Second St. in Long Beach were opened by county supervisors January 3. Bids were taken as follows:

PROFOSAL NO. 1
 (1) 1856 bbls. cement in cloth sacks, f.o.b. cars at nearest available siding to site of work.

PROPOSAL NO. 2
 Reinf. Steel, cut and bent, f. o. b. site of work.
 (1) 110,000 lbs. 1½-in. square deformed
 (2) 52,000 lbs. 1 -in. round deformed
 (3) 17,200 lbs. ¾-in. round deformed
 (4) 3,500 lbs. ½-in. round deformed
 (5) 2,350 lbs. ½-in. square deformed
 (6) 20,000 lbs. ½-in. round deformed
 (7) 7,400 lbs. ¾-in. round deformed
 (8) 100 lbs. ¼-in. round deformed
 (9) 19,900 lbs. No. 5 gauge steel wire.

PROPOSAL NO. 3
 Miscellaneous lumber f.o.b. site of work.

- (1) Treated Douglas Fir lumber:
 - (a) 1:15 M.B.M. 4-in.x10-in. rough spec. 218, in 20-ft., 22-ft., 24-ft., 28-ft., 30-ft., and 32-ft. lengths;
 - (b) 2 M.B.M., 4-in.x8-in., S1E, in 14-ft. and 16-ft. lengths;
 - (c) 170 M.B.M., 8-in.x26-in. rough, furnished in 31-ft. lengths;
 - (d) 31 M.B.M., 4-in.x26-in., rough in stock lengths;
 - (e) 1 M.B.M., 4-in.x6-in. rough, in stock lengths;
 - (f) 0.5 M.B.M. 6-in.x6-in. S1E, furnished in 18-ft. lengths;
 - (g) 85 M.B.M., 4-in. planks, rough, furnished in 8-in., 10-in., and 12-in. widths, stock lengths;
 - (h) 10.9 M.B.M. 3-in.x12-in., S-S, furnished in 16-ft., 18-ft., 20-ft., 22-ft., 24-ft. and 26-ft. lengths;
 - (i) 14.4 M.B.M. 2-in.x12-in., rough, furnished in 16-ft., 18-ft., 20-ft., 22-ft., 24-ft., and 26-ft. lengths;
 - (j) 1.6 M.B.M., 2-in.x8-in., S1S1E, furnished in 14-ft. and 16-ft. lengths;
- (2) 18 pre-moulded asph. contraction joint filler;
- (3) 75 gals. liquid asphalt;
- (4) squares 15-lb. tarred felt.

PROPOSAL NO. 4

- (1a) 6 kegs 60-d. wire nails;
- (1b) 2 kegs 40-d. wire nails;
- (1c) 2 kegs 20-d. wire nails;
- (2) 25,000 spikes, ¾-in.x8-in. bolt spikes, wrought iron;
- (3) 295 lag screws, galv., ½-in.x6-in.;
- (4) galv. machine bolts with square nuts:
 - (a) 96 bolts, ¾-in.x36-in., per C bolts;
 - (b) 285 bolts, ¾-in.x7-in.;
 - (c) 610 bolts, ½-in.x18-in.;
 - (d) 305 bolts, ½-in.x 8-in.;
 - (e) 32 bolts, ¼-in.x 6-in.;
- (5) galv. cut washers:
 - (a) 40 lbs. washers for ½-in. bolts
 - (b) 100 lbs. washers for ¾-in. bolts
 - (c) 35 lbs. washers for ¾-in. bolts
 - (d) 1 lbs. washers for ¼-in. bolts

4.1-MI. GRADE & ASPH. CONC. PAVE—L. A. COUNTY

LOS ANGELES COUNTY, Calif.—S. H. Palmer, 503 Market Street, San Francisco, and J. P. Holland, Inc., 1834 McKinnon Ave., San Francisco, bidding jointly, at \$402,667.70 submitted low bid January 4 to the State Highway Commission, Sacramento, to grade and pave with asphalt concrete 4.1 miles between Las Flores Canyon and Santa Ynez Canyon, involving:

- (1) 218 sta. clear and grub right-of-way;
- (2) 800,000 cu. yds. rdwy. excav. unclass.;
- (3) 900,000 ml. yds. overhaul;
- (4) 21,000 M. gals. water (embank.);
- (5) 6000 cu. yds. struc. excav.;
- (6) 68,200 sq. yds. subg. for pave.;
- (7) 30,000 sq. yds. asph. paint hinder.;
- (8) 32,100 tons asph. conc. (base and leveling course);
- (9) 12,700 tons asph. conc. (Type "A" surf. course);
- (10) 250 cu. yds. Class "A" cem. conc. (struc.);
- (11) 18,000 lbs. bar reinf. steel (struc.);
- (12) 2200 lbs. misc. iron and steel (struc.);
- (13) 830 lin. ft. 18-in. reinf. conc. pipe;
- (14) 1220 lin. ft. 24-in. do;

- (15) 40 lin. ft. 30-in. do;
 - (16) 320 lin. ft. 36-in. do;
 - (17) 30 lin. ft. 48-in. do;
 - (18) 18 M ft b m struc timber (retaining walls);
 - (19) 1300 lin ft. timber piles (retaining walls);
 - (20) 1250 cu. yds. conc. remove from exist. pave and dispose of;
 - (21) 1 exist. bridge removed;
 - (22) 4800 hbbs. fuel oil (shoulders and gutters);
 - (23) 821 lin. ft. solid timber guard rail;
 - (24) 84 culvert markers;
 - (25) 218 sta. finish roadway;
 - (26) 110 monumentts complete in place
- Complete bids follow:
- (A) S. H. Palmer and J. P. Holland, San Francisco, \$402,667.70.
 - (B) Von der Hellen & Pierson, Casti-lac, \$414,703.20.
 - (C) J. E. Haddock and C. O. Sparks, Pasadena, \$444,555.90.

GRADING—WASHINGTON STATE

CHELAN COUNTY, Wash.—Haller-an Bros., Seattle, at \$14,805 submitted low bid to State Highway Commission, Olympia, to grade one mile State Road No. 10, Revision 3 miles north of Entiat, involving:

- (1) clearing and grubbing;
- (2) 29,380 cu. yds. excav., including 600 ft. haul;
- (3) 20 cu. yds. struc. excav., includ. 600 ft. haul;
- (4) 19,520 cu. yds. sta. overhaul;
- (5) 3240 cu. yd. mi overhaul;
- (6) 1050 cu. yds. crushed stone surf. special top course in place;
- (7) 2320 cu. yds. crushed stone surf. base course in place on rdwy.;
- (8) 1530 cu. yds. crushed stone surf. special top course, stockpile;

- (9) 730 cu. yds. filler in place, includ-ing haul;
- (10) remove existing timber on r.r. bridge;
- (11) 21 lin. ft. plain or V. C. pipe, 12-inch;
- (12) 66 lin. ft. 18-in. stand. reinforced concrete pipe.

- Complete bids follow:
- (A) Halleran Bros., Seattle, \$14,805
 - (B) Goodfellow Bros., Wenat-chee 16,182
 - (C) Standard Asph. Paving Co. Spokane 21,390
 - (Siems - Spokane Co., Spo-kane 22,361
 - (E) Morrison - Knudsen, Spo-kane 25,759

- (6) 170 lbs. galv. malleable washers for 3/4-in. bolts;
- (7) 16 anchors galv. wrought iron joist anchors;
- (8) 8 cover plates galv. grought iron cover plates;
- (9) (a) 8 pieces galv. electric conduit, 1 1/2-in. diam., 1 ft. 8-in. long, T. B. E.;
- (b) 8 pieces 1 1/2-in. 3-ft. 6-in. long T. B. E.;
- (c) 8 conduit caps for 1 1/2-in. conduits;
- (10) 8 pieces 3/4-in. diam., 3-ft. 6-in. long, T. B. E., galv. iron pipe.

PROPOSAL NO. 5
Miscellaneous copper work f.o.b. site of work.
(1) 24 plates copper bearing plates for rail beams;
(2) 12 plaaes copper bearing plates for gutter beams;
(3) 12 plates cpper bearing plates for gutter beams;
(same as (2) except oppsite hand)
(4) 26 copper scuppers for gutter beams
E. C. Eaton, County Flood Control Engineer.

The bids were:
Consolidated Lumber Co.—Proposal No. 3: (a) \$39.75, (b) \$39.75, (c) \$46. (d) \$14.50, (e) \$39.75, (f) \$39.75, (g) \$29.75, (h) \$39.75, (i) \$39.75, (j) \$39.75, (2) 35.4c average price per piece; (3) 35.2c gal.; (4) 44.5c per square; total, \$12,635.77 net.

Chas. R. McCormick Lumber Co.— Proposal No. 3: (1) (a) \$40.50, (b) \$40.50, (c) \$46.50, (d) \$45, (e) \$49.50, (f) \$40.50, (g) \$40.50, (h) \$46.50, (i) \$40.50, (j) \$40.50; (2), (3) and (4) no bid; total, \$12,772.88 net.

California Hardware Co.—Proposal No. 4: (1) (a) \$2.75, (b) \$2.75, (c) \$2.75 (2) \$1.66 per C; (3) \$3.90 per C; (4) (a) \$35.15, (b) \$19.50, (c) \$15.81; (d) \$7.97, (e) \$2.53; (5) (a) 7c, (b) 6.85c, (c) 6.75c, (d) 11c; (6) 8.65c; (7) 50c; (8) \$1, (9) (a) 90c, (b) \$1.10; (10) 44c; total, \$728.21; net total, \$713.72.

Scale Steel Co.—Proposal No. 2: a) 2.19c, (b) 2.19c, (c) 2.19c, (d) 2.29c, (e) 2.39c, (f) 2.39c, (g) 2.59c, (h) 3.19c, (i) 3.15c; total, \$5399.50; net total, \$5351.06

L. A. Iron & Steel Co.—Proposal No. 2: (a) 2.15c, (b) 2.2725c, (c) \$2.235c, (d) 2.405c, (e) 2.35c, (f) 2.60c, (g) 2.695c, (h) 3.15c, (i) 4.93c; total, \$5799.79 net total, \$5772.79.

Concrete Ergrg. Co.—Proposal No. 2: (a) 2.575c, (b) 2.575c, (c) 2.575c, (d) 2.675c, (e) 2.775c, (f) 2.775c, (g) 2.975c, (h) 4.075c, (i) 3.15c; total, \$6204.47; net total, \$6173.45.

Blue Diamond Corp., Ltd.—Proposal No. 2: (a) 2.56c, (b) 2.56c, (c) 2.56c, (d) 2.66c, (e) 2.76c, (f) 2.76c, (g) 2.96c, (h) 3.56c, (i) 3.15c; total, \$6171.73 net total, \$6140.92.

Truscon Steel Co.—Proposal No. 2: (a) 2.28c, (b) 2.049c, (c) 2.213c, (d) 2.131c, (e) 2.12c, (f) 2.267c, (g) 2.385c, (h) 4c, (i) 3.43c; total, \$5407.74; net total \$5350.70.

Ducommun Corp.— Proposal No 4: (1) (a) \$2.75 per keg, (b) \$2.75, (c) \$3.75; (2) \$3.30 cwt.; (c) \$14.60; (4) (a) \$35.15 per C bolts, (b) \$19.59, (c) \$15.81, (d) \$7.97, (e) \$2.53; (5) (a) \$9.75 cwt., (b) \$8, (c) \$9.25, (d) \$14; (6) 12.50 cwt.; (7), (8), (9) no bids; (10) \$3.52 per piece; total, \$441.78; net total, \$329.91.

Main Cornice Works—Proposal No. 5: (1) \$4, (2) \$4.50, (3) \$4.50, (4) \$3; total, \$282 net.

6.1-MI GRADE AND SURF. — INYO COUNTY

INYO COUNTY, Cal.—Hemstreet & Bell, 501 11th St., Marysville, at \$81,672.90 submitted low bid January 11 to State Highway Commission, Sacramento, to grade and surface with bituminous treated selected surfacing material 6.1 mi. between Keough Hot Springs and Bishop, involving:

- (1) 89,700 cu. yds. roadway excav., unclass.;
- (2) 310,000 sta. yds. overhaul;
- (3) 19,150 cu. yds. imp. borrow;
- (4) 2660 cu. yds. ditch excav.;
- (5) 3550 cu. yds. struc. excav.;
- (6) 15,000 cu. yds. sel. surfacing material;
- (7) 6.1 mi. mix bituminous binder and surfacing material;
- (8) 110 cu. yds. class A cem. conc. (struc.);
- (9) 5690 lbs. bar reinf. steel (struc.)
- (10) 20 lin. ft. 12-in. corr. metal pipe
- (11) 2316 lin. ft. 18-in. do;
- (12) 1155 lin. ft. 24-in. do;
- (13) 54 lin. ft. 30-in. do;
- (14) 132 lin. ft. 36-in. do;

WATER WORKS

MADERA COUNTY, Cal.—Western Pipe & Steel Co., 444 Market Street, San Francisco, at \$1513.24 awarded contract by U. S. Bureau of Public Roads, San Francisco, to furnish corrugated metal pipe and fittings as follows:

- (1) 288 lin. ft. 24-in. 14-gauge corrugated metal pipe;
- (2) 1360 lin. ft. 18-in. 16-gauge do;
- (3) 96 lin. ft. 15-in. 16-gauge do;
- (4) 206 lin. ft. 12-in 16-gauge do;
- (5) 24-in coupling bands;
- (6) 18-in. do;
- (7) 15-in. do;
- (8) 12-in. do;

Complete bids follow:

- (A) Western Pipe & Steel Co. \$1513.24
- (B) Golden State Culv. Co. 1520.45
- (C) California Corru. Culv. Co. 1595.53

ARIZONA STATE—Parkard & Tanner, 905 West Latham St., Phoenix, Arizona, awarded contract by State Highway Commission, Phoenix, Dec. 28, at \$54,990.36, for highway construction on the Benson-Vail Highway, E-18-C (A. F. E. No. 8055). The work, which begins at a point about 5 3/4 miles west of Pima-Cochise County Line and extends easterly to the county line, consists of grading, draining and placing of subgrade stabilizer, and is to be completed on or before May 31, 1933. The principal items are:

ROADWAY

- (1) 33,227 cu. yds. roadway excav. (unclass.);
- (2) 5526 cu. yds. drainage excav. (unclass.);
- (3) 800 cu. yds. slides and overbreakage;
- (4) 12,900 lin. ft. Vee ("V") ditches;
- (5) 447 cu. yds. structural excav. (unclass.);
- (6) 20,361 cu yds. borrow excav. (unclass.);
- (7) 4736 sta. yds. earthwork overhaul;
- (8) 10,227 cu. yds. subgrade stabilizer
- (9) 44,185 cy. mi. subgrade stabilizer haul;
- (10) 121 cu. yds. class A coner. (incl. cement);
- (11) 91 cu. yds. class B coner. (incl. cement);
- (12) 9072 lbs. reinf. steel;
- (13) 380 lin. ft. 24-in. C.M.P.;
- (14) 410 lin ft. 30-in. CMP;
- (15) 576 lin ft. 36-in. C.M.P.;
- (16) 59 cu. yds. plain rip rap;
- (17) 10,930 lin. ft. cable road guard;
- (18) 60,500 lin. ft. standard link fence;
- (19) 200 lin. ft. rail bank prot. type A

STRUCTURES OVER 20 FT. CLEAR SPAN

- (21) 22 cu. yds. subgrade stabilizer;
- (22) 146 cy. mi. subgrade stabilizer, haul;
- (23) 285 cu. yds. drainage excav. (unclass.);
- (24) 493 cu. yds. structural excav. (unclass.);
- (25) 6 cu. yds. class AA coner. (incl. cement);
- (26) 381 cu. yds. class A coner. (incl. cement);
- (27) 33 cu. yds. class B coner. (incl. cement);
- (28) 37,990 lbs. reinf. steel;
- (29) 32,340 lbs. structural steel;

COLO. RIVER AQUEDUCT RDS.—MET. WATER DIST.

LOS ANGELES, Cal.—Morrison Knudson Co., 1121 Title Guaranty Bldg., Los Angeles, submitted low bid on combined schedules Nos. 1 and 2, to the Metropolitan Water District, January 12, at \$132,384.75, for constructing approximately 36 miles of roads for the Colorado River aqueduct. The roads are located north of the Coachella Valley, extending from a point north of Palm Springs to a point northeast of Indio in Riverside County, Calif., and the work to be contracted for consists of all necessary excavation and grading, and the placing of surfacing materials, culvert pipes, riprap and protection work as shown on the drawings. All materials and labor are to be furnished by the contractor with exception of road oil, which will be furnished by the District, and all bids are to be compared on the basis of the engineer's estimate of the quantities of the various classes of work and materials, as contained in the schedules.

The work has been divided into two schedules. Schedule 1 requires the construction of the Coachella Valley road from Station 190 to 500 and from Station 0 plus 00 to 426, and the Berdoo Canyon road from Station 65 plus 50 to Station 323 plus 40, a total distance of approx. 19 miles. Schedule 2 requires the construction of the Coachella Valley road from Station 426 to 1330 plus 85, or approx. 17 miles.

The total bids were:

(A) Morrison Knudson Co., schedules (1) \$80,089.75; (2) \$52,295; total of combined schedules, \$132,384.75. Deduct \$1000 if awarded both schedules.

(B) J. E. Haddock, Ltd., schedules (1) \$92,157 (2) \$64,076.75; total of combined schedules; \$156,452.15. Deduct \$10,500 if awarded both schedules.

(C) Ray Schweitzer, schedules (1) \$100,066.50 (2) \$73,752.70; total of combined schedules, \$173,819.20. No deduction for combined award.

(D) Dimmitt & Taylor and Sander Pearson, schedules (1) \$103,899.50 (2) \$74,553; total for combined schedules, \$178,452.50. Deduct \$2500 for combined award.

(E) Peter L. Ferry, schedules (1) \$103,345; (2) \$85,212; total to combined schedules, \$188,557. No deduction for combined award.

(F) Altadena Const. Co., schedule (2) only, \$67,554.80.

(G) A. Mitchell, schedule (2) only, \$69,395.55.

(H) Martin Brothers Trucking Co., schedule (1) only, \$117,313.75.

A complete list of the items follows:

SCHEDULE NO. 1

Construction of the Coachella Valley road from Sta. 190 to Sta. 500, and from Sta. 00 to 190, and the Berdoo Canyon road, of the Colorado River Aqueduct:

- (1) 108,400 cu. yds. rdwy. borrow and channel change excav.;

- (2) 35,000 sta. yds. excav. overhaul;
- (3) 2100 cu. yds. struc. excav.;
- (4) 590 cu. yds. concrete;
- (5) 15,000 lbs. reinf. steel;
- (6) 290 ft. 30-in. dia. corr. pipe culvert (furnish and place);
- (7) 650 ft. 36-in. do;
- (8) 220 ft. 42-in. do;
- (9) 20 cu. yds. hand-placed riprap;
- (10) 700 cu. yds. dumped riprap;
- (11) 250 M. gals. water embank.;
- (12) 875 M. gals. water subgrade;
- (13) 7700 cu. yds. furnish selected material for subgrade and oil treat.;
- (14) 4700 cu. yds. furnish crushed rk.;
- (15) 27,000 cu. yd. miles haul selected material and crushed rock;
- (16) 470,000 gals. road oil, haul and spread (oil furnished by dist.);
- (17) 221,000 sq. yds. prepare surface, mix, spread and finish oil-treated surface;
- (18) 221,000 sq. yds. seal coat;
- (19) 580 cu. yds. stockpile oil-treated material.

SCHEDULE NO. 2

Construction of the Coachella Valley road, from Sta. 426 to Sta. 1330 plus 38, of the Colorado River aqueduct;

- (1) 79,000 cu. yds. rdwy. borrow and channel change excav.;
- (2) 25,600 sta. yds. excav. overhaul;
- (3) 1500 cu. yds. struc. excavation;
- (4) 385 cu. yds. concrete;
- (5) 10,000 lbs. reinf. steel;
- (6) 90 ft. 30-in. dia. corr. pipe culvert (furnish and place);
- (7) 165 ft. 36-in. do;
- (8) 110 ft. 42-in. do;
- (9) 20 cu. yds. hand-placed riprap;
- (10) 420 cu. yds. dumped riprap;
- (11) 220 M. gals. water embankment;
- (12) 800 M. gals. water subgrade;
- (13) 4200 cu. yds. furnish selected material for subgrade and oil treat.;
- (14) 5300 cu. yds. furnish crush. rock;
- (15) 21,000 cu. yd. miles haul selected material and crushed rock;
- (16) 426,000 gals. road oil, haul and spread (oil furnished by dist.);
- (17) 200,000 sq. yds. prepare surface, mix, spread and finish oil-treated surface;
- (18) 200,000 sq. yds. seal coat;
- (19) 520 cu. yds. stockpile oil-treated material.

KNIGHTS LANDING BRIDGE—COMPLETE BID LISTING

WOODLAND, Yolo Co., Cal.—As previously reported, Rocca & Caletti, P. O. Box 43, San Rafael, at \$136,988.15 submitted low bid to Joint Highway District No. 12, Second and C Sts., Yuba City, to construct Knights Landing drawbridge across the Sacramento river. Bridge will be the double-leaf bascule type with a 200-ft opening. Each leaf to be 111 ft. long, 21 ft. roadway, 3½ ft. sidewalk on each side of bridge, involving:

- (1) 146,000 lbs. struc. silicon steel;
- (2) 365,000 lbs. struc. carbon steel;
- (3) 58,000 lbs. machinery;
- (4) motors and brakes;
- (5) gasoline engine units;
- (6) gates, signals, sump pumps;
- (1) Selsyn indicators;

- (8) electrical equipment;
- (9) excav.—foundations, 3950 cu. yds.
- (10) untreated timber piles, 12,500 lin. ft.;
- (11) creosoted timber piles, 5600 lin. ft.
- (12) driving piles, 446;
- (13) 4 furnish and drive test piles;
- (14) 14 MFBM creosoted timber fenders;
- (15) 1400 cu. yds. bases of bascule piers;
- (16) 1220 cu. yds. concrete-piers above bases;
- (17) 150 cu. yds. concrete in North approach;
- (18) 320 cu. yds. concrete in South approach;
- (19) 225,000 lbs. reinf. metal;
- (20) 330 cu. yds. concrete counter-

NON-FEDERAL AID

- (30) 125 cu. yds. roadway excav. (unclass.);
 - (31) 300 cu. yds. borrow excav. (unclass.);
 - (32) 400 lin. ft. Vee ("V") ditches;
 - (33) 6620 lin. ft. standard line fence.
- The total bids were:
- (A) Packard & Tanner, Phoenix, \$54,990.63.
 - (B) Skousen Bros., Mesa, Ariz., \$60,191.13.
 - (C) Orr & Rawls, El Paso, Texas, \$60,295.23.
 - (D) Hodgman & MacVicar, Pasadena, Cal., \$60,882.64.

ARIZONA STATE—R. H. Martin, 311 N. 3rd Ave., Tucson, Ariz., awarded contract by State Highway Commission, Phoenix, Dec. 28, at \$96,266.37, for highway construction on the Benson-Vail Highway E-18-B (A. F. E. No. 8054). The work, which begins at the north end of the Cienega Creek Bridge and extends easterly approximately six and one-third (6⅓) miles, consists of grading, draining and placing of Subgrade Stabilizer, and is to be completed in or before June 15, 1933.

The principal items are:

ROADWAY

- (1) 104,088 cu. yds. roadway excavation (unclass.);
- (2) 4906 cu. yds. drainage excavation (unclass.);
- (3) 4900 lin. ft. Vee ("V") ditches;
- (4) 560 cu. yds. structural excavation (unclass.);
- (5) 2099 cu. yds. slides and overbreakage;
- (6) 8575 cu. yds. borrow excavation (unclass.);
- (7) 72,790 sta. yds. earthwork overhaul;
- (8) 11,302 cu. yds. subgrade stabilizer
- (9) 27,140 cu. yd. mi. subgrade stabilizer haul;
- (10) 300 cu. yds. class A concrete (including cement);
- (11) 68 cu. yds. class B concrete (including cement);
- (12) 22,352 lbs. reinf. steel;
- (13) 312 lin. ft. 18-in. C.M.P.;
- (14) 818 lin. ft. 24-in. C.M.P.;
- (15) 33 lin. ft. 30-in. C.M.P.;
- (16) 593 lin. ft. 36-in. C.M.P.;
- (17) 26 lin. ft. reset 24-in. C.M.P.;
- (18) 550 lin. ft. rail bank protection, type P;

weights and balance blocks;
 (21) 29 MFLM timber on oasecule span
 (22) operators houses;
 (23) 620 cu. yds. (outh approach embankment);
 (24) 375 cu. yds. conc. pave. South approach;
 (27) cat basins and drain.
 Complete bids follow:
 (A) Rocca & Caletti, San Rafael, \$136,998.65.

(B) M. B. McGowan, S. F. \$159,569
 (C) Lord & Bishop, Sacramento, \$148-279.
 (D) Bodenhamer Constr. Co., Oakland, \$154,802.75.
 (E) Healy-Tibbitts, S. F., \$156,755.75.
 (F) Fredrickson & Watson, Oakland, \$157,425.50.
 (G) Ward Eng Co., S. F., \$164,573.
 (H) Engineer's Estimate, \$177,121.50.
 Unit bids follow:

(D) Orr & Rawls, El Paso, Texas, \$103,413.93.
 (E) Hodgman & MacVicar, Pasadena, \$107,606.39.

The unit bids were:

In addition to the above total and unit figures, Moore Dry Dock Co., Virginia Albridge & Iron Co., and Minneapolis Steel & Machinery Co., submitted bids on Part No. 1 only, the manufacture and delivery of structural metal, machinery and electrical equipment; as noted in issue of December

31. Bids are being held under advisement, as a suit is pending by M. B. McGowan, whose bid was originally low, when a representative of Rocca & Caletti declared that, through an error in extension, their total was \$5000 higher as submitted. Hearing will be in Sacramento, January 16.

VENTURA COUNTY, Cal.—Southwest Paving Co., Inc., 712 Lankershim Bldg., Los Angeles, at \$13,636.20 submitted low bid to State Highway Commission, Sacramento, January 11, to apply 5.6 miles bituminous surface treatment between Santa Paula and Wells Road, involving:

- (1) 4300 tons screenings;
- (2) 320 tons emulsified asph. road oil.

Complete bids follow:

- (A) Southwest Paving Co., Los Angeles, \$13,636.20.
- (B) F. W. Teschke, Hollywood, \$13,890.00.
- (C) Griffith Co., Los Angeles, \$14,259.00.
- (D) Western Motor Transfer, Inc., Santa Barbara, \$14,560.00.
- (E) F. W. Nighbert, Bakersfield, \$14,785.00.
- (F) Heavey-Moore Co., Oakland, \$15,320.00.
- (G) Kovacevich & Price, Los Angeles, \$15,740.00.
- (H) C. W. Wood, Stockton, \$20,480.00.
- (I) Oilfields Trucking Co., Taft, \$21,066.30.

Unit bids follow:

	(1)	(2)
(A)	\$1.47	\$22.56

ELEC. DIS. SYSTEM—HAMILTON FIELD—SAN RAFAEL

SAN RAFAEL, Marin Co., Calif.—Globe Electric Works, 1899 Mission St., San Francisco, at \$6769 submitted low bid to Constructing Quartermaster, Hamilton Field, San Rafael, to construct extensions to the electrical distributing and street lighting system at Hamilton Field (Marin Meadows) Bombing Base, involving:

- (1) excavation, rock, per cu. yd.;
- (2) excavation, earth, per cu. yd.;
- (3) 2 duck lines, per lin. ft.;
- (4) trenching, 24-in. deep and back-filling, per lin. ft.;
- (5) 1 conductor No. 8, 5000 volts, armored cable, laid in place, per lin. ft.;
- (6) 3 conductors, No. 0, A.W.G., 600

- volts, armored cable, in place;
 - (7) 3 conductors, No. 6 do;
 - (8) 3 lighting standards, complete installed and connected;
 - (9) 8 branch secondary distributing blocks in ground;
 - (10) 6 branch do.
- Complete bids follow:
- (A) Globe Elec. Works, S. F. \$6,769
 - (B) Matson-Seabrooke, Oakland \$6,789
 - (C) Bennett & Taylor, L. A. \$6,848
 - (D) Butte Electrical Equip. Co., San Francisco \$7,050
 - (E) W. B. Baker, S. F. \$7,158
 - (F) Scott-Buttner, S. F. \$7,316
 - (G) G. M. Gest, S. F. \$7,595
 - (H) City Imp Co., Berkeley \$7,768

Unit bids follow:

	(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)
(1)	\$ 5.00	\$ 4.00	\$ 4.00	\$ 11.00	\$ 9.50	\$ 5.50	\$ 6.50	\$ 2.00

- (19) 69 cu. yds. plain riprap;
 - (20) 20,930 lin. ft. cable road guard;
 - (21) 66,400 lin. ft. standard line fence;
- STRUCTURES OVER 20-FT. CLEAR SPAN**
- (22) 1916 cu. yds. drainage excavation (unclass.);
 - (22) 727 cu. yds. structural excav. (unclass.);
 - (24) 46 cu. yds. subgrade stabilizer;
 - (25) 71 cu. yds. ml. subgrade stabilizer haul;
 - (26) 4 cu. yds. class AA concrete (including cement);

- (27) 646 cu. yds. class A concrete (including cement);
 - (28) 19 cu. yds. class B concrete (including cement);
 - (29) 63,760 lbs. reinf. steel;
 - (30) 12 cu. yds. removal of old coner.;
- T. S. O'Connell, State Highway Engineer.

The total bids were:
 (A) R. H. Martin, Tucson, \$96,266.27.
 (B) Skousen Bros., Mesa, \$97,673.47.
 (C) Packard & Tanner, Phoenix, \$101,693.82.

SAN FRANCISCO—Department of Public Works plans to improve Kirkham St., 37th to 38th Aves., and crossing 37th and Kirkham St., involving: 2,000 cu. yds. gracing;

- 310 ft. 12-in. V.C.P. sewer;
- 40 ft. 8-in. do;
- 6 12x6-in. Y branches;
- 1 brick manhole;
- 9 brick catchbasins;
- 105 ft. 10-in. V.C.P. culvert;
- 260 ft. 6-in. V.C.P. sidesewer;
- 575 ft. unarmored concrete curb;
- 660 sq. ft. 1-course conc. sidewalk;

16,893 sq. ft. asphalt conc. pavement. Estimated cost, \$220.

ENGINEERING NEWS

BRIDGES

DOUGLAS COUNTY, Wash.—Until Feb. 7, 10 A. M., bids will be received by Samuel J. Humes, State Highway Department, to construct two 40-ft. concrete girder bridges on State Road No. 10, bet. McLean's Orchard Tracts and Entiat Ferry, E. C. 11. Proj. No. E-145-G.

Specifications obtainable from above office on deposit of \$2, returnable. Proposal guarantee, 5%.

SAN BERNARDINO COUNTY, Cal.—Hartman Const. Co., P. O. Box 1632, Bakersfield, and G. A. Graham, 613 19th St., Bakersfield, bidding jointly, at \$94,955.30 awarded contract by the State Highway Commission to construct a bridge across Mojave river at Barstow, consisting of five 100-ft. deck plate girder spans and grading and surfacing approaches with oil treated crushed gravel or stone.

WOODLAND, Yolo Co., Cal.—Joint Highway District No. 12, 2nd and C Sts., Yuba City, served with writ of mandamus by M. B. McGowan, 74 New Montgomery St., San Francisco, to be heard in Judge Shields' Court, Sacramento, on January 16, in connection with proposed construction of Knights Landing drawbridge across the Sacramento river, bids for which were opened December 30.

M. B. McGowan apparently submitted low bid at \$139,569, bid of Rocca and Caletti, San Rafael, being second at \$139,988.15. The latter firm declared that due to an error their total figure was \$3000 high, and that according to the unit prices, bid should read \$136,988.15, which the District finds is true.

The Joint Highway District No. 12 will meet Monday, January 9, to appoint an attorney on the case, and all further action will be deferred until January 16.

ORANGE COUNTY, Calif.—R. R. Bishop, 5017 E Broadway, Long Beach at \$4050 awarded contract by State Highway Commission for reconstructing fenders to a bridge across the north arm of Newport Bay near Newport Beach, and removing old bridge near the site.

OREGON STATE.—Until Jan. 25, bids will be received by State Highway Department, Portland, for highway bridge and viaduct construction as follows:

(1) One-half viaduct and large sized culvert on Hug-Point-Arch Cape Section of Oregon Coast Highway, Clatsop County.

(2) Bridge over John Day river on Columbia River highway, about four miles east of Astoria, work to include grading, embank. approaches about 1-000 ft. long.

PIERCE COUNTY, Wash.—Until Feb. 2, 10 A. M., bids will be received by U. S. Bureau of Public Roads, 316 New Postoffice Bldg., Portland, Ore., to construct one log stringer bridge over North Puyallup river, together with approaches and parking area on the West Side Highway, Proj. E-2-C-2, Mt. Rainier National Park, involving: Clearing and grubbing; 8500 cu. yds. unclass. excavation; 3 60-ft. log spans; 6200 sq. ft. log crib face;

435 cu. yds. Class A concrete; 200 cu. yds. masonry facing; 40,000 lbs. reinf. steel; 85 cu. yds. masonry walls; 60 cu. yds. masonry guard rail; 170 lin. ft. corr. galv. metal pipe.

Specifications obtainable from above office on deposit of \$10, returnable, checks payable to the Federal Reserve Bank of Portland.

DREDGING, HARBOR WORKS & EXCAVATIONS

COLUSA, Cal.—Fredrickson & Watson Co., 873 81st St., Oakland, at \$1,360 submitted low bid to U. S. Engineer Office, Sacramento, to remove 8,500 cu. yds. of material from the Colusa weir by-pass, about 1½ miles northerly from Colusa on the easterly side of the Sacramento river. Complete bids follow:

Fredrickson & Watson, \$.16 per yd., total \$1360.

Lord & Bishop, Sacramento, \$.20 per cu. yd., total \$1700.

Engineer's estimate, \$.223, total \$1,893.

SAN DIEGO, Cal.—E. Penn Watson Jr., 3492 Noell St., San Diego, submitted low bid to U. S. Engineer, Los Angeles, January 3, at \$2287.50 or \$3.05 cu. yd. for repairing the dyke diverting the San Diego River from San Diego to False Bay. Circular No. 33-9, involving 750 cu. yds. rock. The other bids were:

Walter Treppe, San Diego, \$3.50 yd.; total, \$2625.

Griffith Co., Los Angeles, \$3.90 yd.; total, \$2925.

SAN DIEGO, Capt. Jos. W. Brennan, Port Director, has announced that bids will be asked in March for dredging and the improvement of the Roseville Yacht basin, estimated to cost \$40,000. That portion of the basin north of the San Diego Yacht Club Pier will be dredged to 20 ft. A breakwater extending from the line of Fort Rosecrans, will be constructed to provide a yacht shelter. The total cost of the project will be \$200,000.

NOME, Alaska.—As previously reported, until March 1, 3 P. M., under Bid No. 33-130, bids will be received by U. S. Engineer Office, Burke Bldg., Seattle, Wash., to dredge 5,100 cu. yds. of material from Nome Harbor at the mouth of Snake River, Nome, one the south shore of Seward Peninsula, 2500 miles from Seattle and 130 miles from St. Michael, Alaska. Specifications obtainable from U. S.

Engineer Office, Seattle, and on file in office of Daily Pacific Builder, and may be inspected by those interested.

KETCHIKAN, Alaska.—Until Feb. 15, bids will be received by the U. S. Engineer Office, 602 Burke Bldg., Seattle, Wash., to construct a concrete curb wall 853-ft. long on the existing rock fill breakwater at Ketchikan.

Specifications obtainable from above office.

COLUSA, Cal.—Haas, Doughty and Jones, Merchants Exchange Bldg., San Francisco, awarded contract by U. S. Engineer Office, Sacramento, to raise and strengthen existing levee along the westerly bank of the Sacramento river northerly of Colusa, involving: (a) Colusa to Zumwalt ranch, 21,200 ft.; (b) Zumwalt ranch to Wohlfrom ranch, 21,500 ft.

ELLENSBURG, Wash.—L. Coluccio, 1638 Lane St., Seattle, awarded contract by the U. S. Bureau of Reclamation, Ellensburg, Wash., at \$17,403 (Schedule No. 1) for earthwork and structures on North Branch Canal Lateral System, Eadger Creek Wasteway, Kittitas Division, Yakima Project, located near Kittitas and Thrall. The excavation for wasteway was awarded to Felix Arcorace, 8423 48th South, Seattle at \$4624.

DENVER, Colo.—Until Jan. 30, 2 P. M., under Specifications No. 584-D bids will be received by U. S. Bureau of Reclamation, Denver, to raise about 11 miles of the Colorado river levee, Palo Verde Irrigation District, near Elythe and Ripley, Calif., involving 210,000 cu. yds. excavation for levee. Specifications obtainable from above office. Proposal guarantee, 10%.

VANCOUVER, B. C.—Pacific Engineers, Ltd., 1044 Beach Ave., at \$193,315.19 awarded contract by Vancouver Harbor Commission to construct 300 ft. square addition to Lapointe Pier, involving eight timber cribs, 51x98x58.6 ft., faced with concrete on the water side and carrying on top a mass concrete gravity retaining wall 18 ft. high and 13.6 ft. thick at the base.

SACRAMENTO, Cal.—Harbor Tug & Barge Co., Pier 16, San Francisco, at \$.98 per ton, awarded contract by U. S. Engineer Office, Sacramento, to furnish, deliver and place 30,000 tons of rip-rap stone along the Sacramento river between the mouth of Cache slough and Collinsville.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—Until Jan. 13, 5:30 P. M. (previously reported Jan. 4), bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., Oakland, to construct and furnish f. o. b. Valley Springs, Calaveras county, one slackline cableway excavator, capacity 26 cu. ft., complete with bucket and carrier blocks, track, tension and hoisting cable and hoisting engine. Specification No. 46, obtainable from above office.

CENTERVILLE, Alameda Co., Cal.—All bids to furnish bus bodies re-

CAPITAL CITY TITLE COMPANY

J. C. PALEN,
Manager

914 Seventh Street

Sacramento :: California

lected by trustees of Washington Union High School, due to change in specifications.

Bids to furnish chassis held under advisement until next meeting, Jan. 24, at which time award on chassis will probably be made, and new bids will be received to furnish two steel bus bodies, for 41- to 48-passenger school busses.

PUGET SOUND, Wash.—Harnischfeger Sales Corp., Milwaukee, Wis., at \$41,840 submitted low bid to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to furnish one gasoline-driven 10-ton traveling gantry crane. Complete bids follow:

Harnischfeger Sales Corp., Milwaukee	\$41,840
Pacific Iron & Steel, Tacoma	42,000
Lakeside Bridge & Steel Co., Milwaukee	43,796
Orton Crane & Shovel Co., Chicago	44,022
Whiting Corp., Harvey, Ill.	49,810
American Hoist & Derrick Co., St. Paul	51,118
Link Belt Co., Chicago	51,600
Drave Contr. Co., Pittsburgh	52,500
Heyl & Patterson, Inc., Pittsburgh	53,000
R. W. Kaltenbach Corp., Bedford, Ohio	54,750
Star Iron & Steel Co., Tacoma	57,900
Industrial Brownhoist Corp. Bay City, Michigan	59,870
Alliance Machine Co., Alliance, Ohio	64,108

HAWTHORNE, Nev.—As previously reported, Stone Heating & Ventilating Co., Washington, D. C., submitted low bid to Bureau of Yards and Docks on January 4, at \$8210, for 100 kw. gasoline engine driven generating set, including switchboard, gasoline tanks, piping, wiring and accessories at the Naval Ammunition Depot, Hawthorne; Spec. No. 7050.

Other bids were:

Buffalo Gas Motor Co.	\$8470
A. D. Granger Co.	8479
H. O. Bauerle	8375
Letroi Company	9447
Eastern Iron & Metal Co.	10,240
T. L. Rosenberg Co.	10,275

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Until Jan. 25, 2:30 P. M., bids will be received by S. J. Hester, secretary, Department of Public Works, for ornamental street lights on Bay Shore Blvd., Army St. to county line. Estimated cost \$6,000 (dump sum).

RESERVOIRS AND DAMS

SAN DIEGO, Cal.—The Reconstruction Finance Corp. has agreed to purchase \$2,350,000 bonds of the City of San Diego, to provide funds for the completion of the El Capitan Dam, a unit of the city's water system, and for the construction of a pipe line between the dam and the city. The project includes the dam, 25 miles of pipe line, and a filter in San Diego. The loan will be used to complete the dam and to lay six miles of 48-in. pipe and two miles of 36-in. pipe. 30

PASADENA, Los Angeles Co., Cal.—Until 11 A. M., January 31, bids will be received by city board of directors to furnish 170,900 lbs. of removable galvanized steel trash rack and appurtenances for the Pine Canyon Dam. Samuel B. Morris, Chief Engineer.

LOS ANGELES, Cal.—E. C. Eaton, County Flood Control Engineer, 202 N Broadway, has completed specifications for steel vent pipe and fitting for San Gabriel Dam No. 2. The items follow:

PROPOSAL NO. 1

- Item (1):
- 2 16x14-in. reducers;
 - 5 16-in., 45-deg. elbows;
 - 3 14-in., 90-deg. elbows;
 - 1 16x14x14-in. reducing tee;
 - 1 12-in., 45-deg. elbow;
 - 1 14x14x12-in. reducing tee;
 - 3 16x12x14-in. reducing tees.

PROPOSAL NO. 2

- 1 piece, 16-in. dia., 2-ft. 6-in. stand. steel pipe, flanged 1 end;
- 1 piece, 16-in. dia., 6-ft. 6-in. do, flanged both ends;
- 1 piece, 16-in. dia., 13-ft. do, flanged one end;
- 1 piece, 16-in. dia. 9-ft. do; flanged one end;
- 3 pieces, 16-in. dia., 12-ft. do; flanged one end;
- 2 pieces, 14-in. dia., 3-ft. 8-in. do flanged both ends;
- 2 pieces, 16-in. dia. 3 ft. 1/2-in. do flanged both ends;
- 4 pieces, 12-in. dia., 2-ft. 6-in. do flanged one end;
- 2 pieces, 12-in. dia., 5-ft. 6-in. do flanged one end;

PROPOSAL NO. 3

- 72 3/8-in. machine bolts with hex. nuts, 3 1/2-in.;

LOS ANGELES, Cal.—Bids for furnishing miscellaneous materials for San Gabriel River Outlet Unit No. 5 were opened by County Supervisors January 3. Bids were taken as follows:

PROPOSAL NO. 1

- 60 bbls. cement in cloth sacks f.o.b. site of work. (For bids see item under "Portland Cement");

PROPOSAL NO. 2

- 1650 lbs steel rein. bars, cut and bent, f.o.b. site of work.

PROPOSAL NO. 3

- 415 rolls No. 20 gaugs, 2-in. mesh galvanized poultry netting in standard rolls of 150 ft., 60-in. in width;
- 190 rolls Type 1 diamond mesh woven wire fencing in standard rolls of 20 rods, 58-in. in width;
- 2500 lbs. galvanized iron tie wire, No. 14 gauge;
- 900 lbs. galvanized iron tie wire, No. 8 gauge.

E. C. Eaton, County Flood Control Engineer.

The bids were:

Harper & Reynolds—Proposal No. 3—(1) \$2.98, (2) \$21.28, (3) 4.05c; Alt. Proposal No. 3: (1a) \$3.45, Total of (1a), (2), (3), and (4) \$7499.60; net total of these items, \$7349.61; item No. 4, 3.5c; total, \$7304.55; net total, \$7158.46

Hanmond Lumber Co. — Proposal No. 2—(1) 4.75c; total, \$49.88. Net total, \$48.99; Proposal No. 3—(1) \$2.98, (2) \$31.28, (3) 4.05c, (4) 3.5c; total, \$7304.55; net total, \$7158.46.

Union Hardware & Metal Co.—Proposal No. 3—(1) \$2.90, (2) \$31.28, (3) 4.05c, (4) \$3.50 cwt., total, \$7271.35; net total, \$7125.92.

Fucomin Corp.—Proposal No. 3—(1) \$2.98, galvanized before weaving. Alt. \$3.34 hexagon mesh; (2) \$31.28, (3) \$4.05 cwt.; (4) 3.5c; total, \$7304.55; net total, \$7158.46.

Concrete Engineering Co. — Proposal No. 2—(1) 3.2c; total, \$33.60, net total, \$33.43. Proposal No. 3—(1) \$2.98, (2) \$31.58, (3) \$4.05, (4) 3.5c; total, \$7499.60, net total, \$7349.61. Alt. bid on Prop. No. 3—item (1) \$3.45, galvanized after weaving.

Soule Steel Co.—Proposal No. 2—(1)

3.75c; total \$39.38; net total, \$39.18. Proposal No. 3—(1) \$2.98, (2) \$31.28, (3) 4.05c, (4) 3.5c; total, \$7204.55; net total, \$7158.48.

Blue Diamond Corp., Ltd.—Proposal No. 2—3.25c, total, \$34.13; net total, \$33.96. Proposal No. 2—(1) \$2.98, (2) \$31.28, (3) 4.05c, (4) 3.5c; total, \$7304.55

Columbia Steel Co.—Proposal No. 3—(1) \$2.98. Alt. \$3.45, (2) \$31.28, (3) 4.05c, (4) 3.5c; total, \$7304.55, net total, \$7158.46.

Pacific Fence Constr. Co.—Proposal No. 3—(1) \$3.45, (2) \$31.28, (3) \$4.05 per cwt.; (4) \$3.50 cwt.; total, \$7304.55 net total, \$7158.46.

L. A. Iron & Steel Co.—Proposal No. 2: (1) 3.1c, total \$32.55, net total, \$32.29.

California Hardware Co.—Proposal No. 3: (1) \$2.98, (2) \$31.28, (3) 4.05c, (4) 3.5c; total, \$7304.55; net total, \$7158.46. Alt. bid item (1) \$3.45, galvanized after weaving; total with alternate, \$7499.60; net total, \$7349.61.

LOS ANGELES, Cal.—C. G. Willis & Sons, Inc., 2119 E 25th St., awarded contract by county supervisors Jan. 3 at \$47,490, for the construction of Unit No. 5 of the San Gabriel River Outlet at Alamitos Bay, involving:

- 160,000 cu. yds. excav., complete;
- 42,000 cu. yds. placing of fill in levees;
- 6200 lin. ft. construct wire revetment complete, as specified, inc. manufacture and placing of concrete block anchors.

E. C. Eaton, 202 N Broadway, county flood control engineer. The bids were opened Dec. 12.

PIPE LINES, WELLS, ETC.

ANHEIM, Orange Co., Cal.—V. W. Hannum, Water Superintendent, has announced that city council has authorized deepening of Well No. 2, located at the power plant on S Los Angeles St., to a depth of 12 ft. and adding a new column. Improvements will also be made at Pump No. 6.

LA MESA, San Diego Co., Cal.—Until 9 A. M., February 4, bids will be received by the directors of the La Mesa, Lemon Grove and Spring Valley Irrigation District, 4769 Spring St., La Mesa, for the furnishing and laying of a centrifugal concrete pipe, varying from 36-in. to 42-in., for the replacement of the district's flume or pipe-line, located at certain points between the Diverting Dam of the La Mesa Irrigation District on the San Diego River and Eucalyptus Reservoir near La Mesa. Plans and specifications may be obtained from the office of the General Manager, C. Harritt, 44769 Spring St., La Mesa, on payment of \$15 per copy, not returnable. F. R. Beatty is president, and Ruth C. Drew, secretary of the district. The proposed work is to be financed from the proceeds of the \$500,000 loan requested from the Reconstruction Finance Corp. The district, however, reserves the right to withhold award until final action by the Reconstruction Finance Corp. making funds available.

CUT BANK, Mont.—Construction of a 300-mile natural gas pipe line from the Cut Bank fields to supply Spokane and other cities in the State of Washington, has been announced by James L. Stone, vice-president and general manager of the Spokane Gas & Fuel Co. The project, which may be constructed in the near future, is estimated to cost \$12,500,000.

VENTURA, Cal.—Lyon Bros., 1363 Carmoua St., Los Angeles, awarded contract by City Council, January 9, at \$4945.95 for drilling a 20-in. water well on property located on Front St., between Figueroa and Walnut Sts.

SEWERS AND SEWAGE DISPOSAL PLANTS

EL CERRITO, Contra Costa Co., Cal.—Plans for the reconstruction of the storm sewer on Fairmont Avenue will be submitted to the East Bay Municipal Utility District by their engineer on January 13. The estimated cost of this project is \$23,000, approximately one-half of which is to be borne by the District. The plans were prepared by H. D. Chapman, city engineer. If the project is approved by the East Bay Municipal Utility District, a protest hearing will be held.

January 13, 1933

BID OPENING EXTENDED

PANAMA CANAL ZONE.—Until January 19, 10:30 A. M. (extended from January 12) under Schedule No. 2826, bids will be received by the Office of the General Purchasing Officer, Washington, D. C., to furnish pumping equipment for new dry dock at Cristobal, involving:

- 2 main vertical pumps with motors and controllers;
- 2 do (alt.);
- 1 vertical drainage pump;
- 1 bilge pump;
- 2 suction valves;
- 2 discharge valves;
- 2 high pressure pumps;
- 1 dry dock flushing pump;
- 2 caisson pumps.

LOS ANGELES, Cal.—Until 10 A. M. January 25, bids will be received by Board of Public Works, for the construction of three intercepting sewers and two local sewers in the Ventura Blvd. and Milbank St. Sewer District, under the 1911 Act. The interceptors are: First—Van Nuys Blvd. bet. Milbank Street and Ventura Blvd., Milbank St., bet. Woodman Ave. and Van Nuys Blvd., and Woodman Ave., between north outfall sewer and Milbank; Second: Ethel Ave., between Moorpark St. and Ventura Blvd.; Third: Laurel Grove Ave., between Valleyheart Dr. and Ventura Blvd., Valleyheart Dr. and Ventura Blvd. and Laurel Grove Ave., and Laurel Canyon Blvd., between Woodbridge St. and Valleyheart Drive north. The two local sewers are: Robler Pl., between its east terminum and Tyrone Ave., and Dunbar Plave between its east terminum and South Sherman Way. The total length of the sewer is 18,331.49 lin. ft. and the estimated cost is between \$49,000 and \$50,500. The average depth of structures exclusive of clearout manholes, is 14.5 ft. The resurfacing (quantities not figures) will include both decomposed granite and rock and oil.

WATERWORKS

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$5652 (one bid) submitted low bid to East Bay Municipal Utility District, Oakland, to furnish 720 lin. ft. 1/2-in. thick, 36-in. dia., electric welded sheet steel pipe and fittings for San Pablo tunnel. Bids held under advisement.

OAKLAND, Cal.—Until January 27, 8 p. m., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., Oakland, to furnish 500 gate valves 4

to 8 in. Specifications LS-97 obtainable from above office.

OAKLAND, Cal.—Until January 27, 8 p. m., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., Oakland, to furnish 40,000 ft. cast iron pipe, 6-in. diameter. Specifications LS-98 obtainable from above office.

SAN FRANCISCO—Central Foundry Co., 100 Potrero Ave., at \$446 per ft. awarded contract by City Purchasing Department to furnish 50,000 ft. 6-in. cast iron universal pipe.

CAMARILLO, Ventura Co., Cal.—Until 2 P. M. Feb. 7, bids will be received by George B. McDougall, State Architect, Public Works Bldg., 11th and P Sts., Sacramento, to construct water storage system at the new state hospital at Camarillo, in accordance with plans which may be seen at above office. Copies obtainable on deposit of \$25. The proposed water storage system consists of one 226,500-gallon concrete tank, one 100,000-gal. concrete tank, one concrete pump house, pumps, piling, and electrical work. The contract will include all general electrical and mechanical work. Cash, bidder's bond, or certified check, 10%.

SAN FRANCISCO.—Until Jan. 20, 3 P. M., under Bid No. 958, bids will be received by T. A. Brooks, City Purchasing Agent, 270 City Hall, to furnish pipe and fittings for a term of three months. Specifications obtainable from above office.

SAN FRANCISCO—Bids will be asked about Feb. 1 to construct water supply system for the City and County Jail at the Sneath Ranch, San Mateo County. Estimated cost, \$25,000. Plans by the Bureau of Architecture.

PASADENA, Cal.—Contracts for furnishing gate outlet pipes and appurtenances for Pine Canyon Dam were awarded by City Board of Directors, Jan. 3, as follows:

Consolidated Steel Corp., Los Angeles—one 9x9 cast steel slide gate at \$5775; cast steel transition lining at \$3935; two 48-in. cast iron ball seat rings at \$60.

Joshua Hendy Iron Works, San Francisco—14 steel assemblies for the slide gate, at \$1936; 72 guide stems at \$352.80; 8 guide bearing supports at \$152.

The National Supply Co., Los Angeles—steel assembly for slide gate at \$839.13; 66 bronze anchor bolts and nuts at \$75.24; two 36-inch steel flap valves at \$436.12; 66 galvanized screen guides at \$1504.14; 242 steel anchor bolts at \$236.70.

Long Beach Iron Works—18 cast iron slide gates at \$8725.86.

Southwestern Welding & Mfg. Co., Alhambra—9 ft. welded steel pipe 135 ft. long at \$4029.25; 30-in. welded steel pipe 160 ft. long at \$959.35.

HEMET, Riverside Co., Calif.—An election will be held in March to vote on a \$121,000 bond issue for a municipal water system. Burns-McDonnell-Smith Engr. Corp., Western Pacific Bldg., Los Angeles, is consulting engineer. The water committee members are: Mayor J. C. Loomis, and Councilmen Robert G. Record and C. M. Thompson.

BOULDER CANYON, Nev.—Until January 27, 2 P. M., bids will be received by U. S. Bureau of Reclamation, Denver, Colo., to furnish eight welded plate-steel cylinder gates 32-

ft. in diameter and 10-ft. 1 5/16-in. high; also semi-steel entrance liners, welded plate-steel nose liners, and semi-steel and cast-steel throat liners; for installation in the intake towers at Hoover Dam, Boulder Canyon, Project, Arizona-California-Nevada.

Bids will be taken on each of two completed items, and will not be considered on only a part of either item. Materials to be installed by the Government. No charge for specifications to bona fide bidders; to others \$2.50, not returnable.

Specifications No. 541 on file in office of Daily Pacific Builder and may be inspected by those interested.

LA HABRA, Orange Co., Calif.—American Cast Iron Pipe Co., Los Angeles, submitted the low bid to city council December 27 for furnishing 600 ft. 4-in., 2700 ft. 6-in., 17,000 ft. 8-in., 340 ft. 10-in., and 4000 ft. 12-in. cast iron pipe.

Hercules Foundries, Inc., Los Angeles, submitted the low bid on fittings.

RIO VISTA, Solano Co., Cal.—Pacific Coast Engineering Co., foot of 14th St., Oakland, at \$6817.50 awarded contract by U. S. Engineer office, Sacramento, to furnish 270 lengths shore pipe in 16-ft. lengths.

VANCOUVER, B. C.—Dominion Bridge Co., Ltd., 275 W 1st Ave., at \$62,463 (British steel pipe) awarded contract by Great Vancouver Water District to furnish and fabricate 2350 lin. ft. of 60-in. electrically welded main, 9/16-in. thick; and 1630 lin. ft. 60-in. pipe, 3/4-in. thick.

Dawson, Wade & Co., Ltd., 500 Beatty St., at \$26,167 awarded contract to install the new main. Unit prices were: trench excavation and backfill, \$1.46; solid rock excavation, \$7.77; over excavation, \$4.46; gravel backfill, \$5.7.

LOS ANGELES, Cal.—George Rowland, 143 E 69th St., Los Angeles, at \$9,241 submitted low bid to Metropolitan Water District for Schedule 1, excavating and backfilling trench for sections 6 and 7 of the Construction Water Supply System.

Clark & Campbell, 1358 E Manchester Ave., Los Angeles, at \$12,233 was low for Schedule 8, hauling and laying gas line pipe, etc.

Schedule 3 was eliminated. Kemper Const. Co., 3701 S Overland Ave., Los Angeles, low at \$6,125 for Schedule 4, to construct two 300,000-gal. reservoirs.

LOS ANGELES, Cal.—Julian Hinds, member of the engineering staff of the Metropolitan Water District of Southern California, has been appointed assistant chief engineer of the district.

In announcing the appointment, F. E. Weymouth, chief engineer and general manager, stated that the promotion was in recognition of Mr. Hinds' excellent record and of the distinguished services which he has rendered to the district as chief designing engineer.

Mr. Hinds, who is a graduate of the University of Texas, class of 1907, was formerly with the J. G. White Co. engaged in the construction of irrigation works in Mexico. He has been with the Metropolitan Water District since 1929.

WHITTIER, Los Angeles Co., Cal.—The \$100,000 water works bond issue for water mains, reservoirs, etc., was defeated at the special election held

January 5. While the vote was 1241 "yes" and 1229 "no" the proposition required a two-third majority.

RIO VISTA, Solano Co., Cal.—Until Jan. 27, 3 P. M., under Circular Proposal No. 33-191, Spec. No. 5160, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to provide and erect a 20,000-gallon steel water tank with a 70-ft. steel tower at the U. S. Engineer Department yard at Rio Vista.

VENTURA, Los Angeles Co., Cal.—Santa Paula Pipe Works, Santa Paula awarded contract by county supervisors January 3 at \$3165, for the construction of two storm water conduits from Upper Foothill Road on lot 2, Rancho Santa Paula y Saticoy, under Cash Contract No. 827, involving:

- (1) 1500 cu. yds. excavation;
 - (2) 1090 ft. 20-in. concrete pipe;
 - (3) 488 ft. 18-in. do;
 - (4) 60 ft. 14-in. do;
 - (5) 115 cu. yds. Class A concrete;
 - (6) 5000 lbs. reinf. steel;
 - (7) 21-in. corru. metal pipe.
- Santa Paula Pipe Works. (1) \$4.0 (2) \$.80 (3) \$.60 (4) \$.40 (5) \$10 (6) \$.04 (7) \$1.65; total, \$3165.
- Silveria & Robbins, (1) \$.35 (2) \$.95 (3) \$.90 (4) \$.60 (5) \$13.50 (6) \$.04 (7) \$1.50; total \$3812.20.
- Sidney Smith Contractors, (1) \$.50 (2) \$1 (3) \$.70 (4) \$.40 (5) \$12.50 (6) \$.05 (7) \$2; total \$3925.10.
- United Concrete Pipe Corp. (1) \$.25 (2) \$1.28 (3) \$.88 (4) \$.55 (5) \$12.75 (6) \$.045 (7) \$1.50; total \$3947.89.
- Santa Maria Const. Co. (1) \$.35 (2) \$1.08 (3) \$.82 (4) \$.64 (5) \$13.60 (6) \$.05 (7) \$2.80; total \$3999.56.
- James A. Bullis, (1) \$.284 (2) \$1.45 (3) \$.96 (5) \$.60 (5) \$11.40 (6) \$.0374 (7) \$1.73; total \$4036.98.
- Fowler & Myers, (1) \$.30 (2) \$1.30 (3) \$1 (4) \$.75 (5) \$13 (6) \$.045 (7) \$1; total \$4136.
- Grancich & Grancich, (1) \$.40 (2) \$2.50 (3) \$2 (4) \$1.25 (5) \$17 (6) \$.05 (7) \$1; total, \$6610.
- L. A. Brisco, (1) \$1.10 (2) \$1.70 (3) \$1.19 (4) \$.77 (5) \$19.25 (6) \$.055 (7) \$3.30; total, 6671.47.

LOS ANGELES, Cal.—Duganmun Corp., 219 S. Central Ave., Los Angeles, awarded contract by the Metropolitan Water District at \$200,584.80 net for furnishing 5-in., 6-in., and 8-in. light weight O. D. electric resistance welded steel gas line pipe for the construction of a water supply system for the Colorado River Aqueduct. The bids were opened Dec. 27.

PASADENA, Cal.—Until 11 A. M., January 24, bids will be received by city clerk for furnishing water pipe, f.o.b. water department pipe yards on Raymond Ave. near Glenarm Street. Bids will be taken on the following items:

- (1) 20,000 ft. 6-in. c. l. water pipe for service under 150 lbs. working pressure; minimum wall thickness .37 inches;
 - (2) 20,000 ft. 8-in. do; .42 inches;
 - (3) 10,000 ft. 12-in. do; .57 inches;
 - (4) 1200 ft. 16-in. do; .68 inches;
 - (5) 600 ft. 20-in. do; .78 inches;
 - (6) 800 ft. 24-in. do; .88 inches;
 - (7) 240 ft. 10-in. do; .52 inches;
 - (8) 48 ft. 14-in. do; .62 inches;
 - (9) 408 ft. 30-in. Class B cast iron water pipe;
 - (10) 50 6x6-in. c. l. tees; 3 bells, Class D;
 - (11) 20 8x6-in. do;
 - (12) 10 12x6-in. do;
- Bessie Chamberlain, city clerk.

BEVERLY HILLS, Los Angeles Co., Cal.—Bids for furnishing chemicals, supplies, etc., for the water department opened by city council Jan. 6 follow:

- Braun Corp.—Liquid chlorine, \$7 cwt for 20 cylinders; \$6.75 cwt. for 40 cylinders. Ammonia 17½c lb.
- Stauffer Chemical Co.—Aluminum sulphate, \$30 ton.
- McKesson-Western Wholesale Drug Co.—Liquid chlorine, \$7 cwt.; ammonia, 17½c lb.
- General Chemical Co.—Aluminum sulphate, \$30 ton.
- National Ammonia Co.—Ammonia, 17½c lb.
- United States Lime Products—Hydrated lime, \$14.50; high calcium quicklime, \$18.20 ton.
- Los Angeles Chemical Co.—Aluminum sulphate, \$30 ton; chlorine, 2000-lb. cylinder, \$4.75 ckt.; ammonia, 19c lb.
- California Chemical Co.—Hydrated lime, \$12.45 tin; quicklime, \$13.95 ton.
- Great Western Electro Chemical Co.—Chloride, \$66 ton.
- Grand Canyon Lime & Cement Co. of Arizona—High calcium hydrated lime, \$11.50 ton; pulverized quicklime, \$18.20 ton.
- Lewis W. Osborne, Inc.—Hydrated lime, \$16 ton.
- Oro Grande Lime & Stone Co.—Hydrated lime, \$14.50; quicklime, \$18.20 ton.

HOQUIAM, Wash.—Until Jan. 23, 3 P. M., bids will be received by Taholah Indian Agency to furnish:

- (1) 3625 lin. ft. Class 150 b&s 6-in. c. i. water pipe;
- (2) 1700 lin. ft. 4-in. do;
- (3) 5000 lin. ft. 2-in. do.

STREETS AND HIGHWAYS

LOS ANGELES, Calif.—Until 10 A. M., January 25, bids will be received by the board of public works for improving Towne Ave. bet. Florence Ave. and 74th St., under cash contract, involving:

- (1) grading (483 cu. yds. excavation and no fill, including removal of existing improvement);
- (2) 10,609 sq. ft. 6-in. concrete pave.;
- (3) 580 ft. unplastered light curb;
- (4) 2941 sq. ft. 3-in. conc. sidewalk.

DOUGLAS COUNTY, Wash.—Until Feb. 7, 10 A. M., bids will be received by Samuel J. Humes, State Highway Department, to grade and surface 10.9 miles of State Road No. 10, McLean's Orchard Tracts to Entiat Ferry, E. C. H. Proj. No. E-145-C and E-145-G, involving:

- 200,120 cu. yds. excavation;
- 268 cu. yds. concrete;
- 33,330 cu. yds. crushed stone;
- 1,507 lin. ft. pipe culverts.

Specifications obtainable from above office on deposit of \$2, returnable. Proposal guarantee, 5%. 23

COCHISE COUNTY, Ariz.—Until Feb. 2, 10 A. M., bids will be received by C. H. Sweetser, District Engineer, U. S. Bureau of Public Roads, 802 Title & Trust Bldg., Phoenix, for 2-793 miles of grading Section C and a portion of Section B, Chiricahua National Monument Highway, involving:

- 13 acres clearing;
- 42,500 cu. yds. unclass. excav.;
- 425 cu. yds. unclass. excav., struc.;
- 27,000 sta. yds. overhaul;
- 2,793 miles finish earth graded road;
- 210 cu. yds. Class A concrete;
- 16,300 lbs. reinf. steel;
- 47 cu. yds. cement rubble masonry;
- 1586 lin. ft. corru. metal pipe;

1200 cu. yds. hand-laid rock embank.;

40 right of way monuments;

220 lin. ft. protection ditch;

1 cattle guard;

2000 lin. ft. standard line fence.

Specifications obtainable from above office on deposit of \$10, returnable, checks certified and payable to Regional Fiscal Agent, U. S. Forest Service.

CULVER CITY, Los Angeles Co., Cal.—County Supervisors appropriated \$4614 for the improvement of streets in Culver City. Nine separate street projects are specified in the list of improvements. They are: Atlantic Ave. from Washington St. to Zanja St.; Walgrove Avenue from Washington Blvd. to Zanja St.; Girard Ave. from Washington Blvd. to Venice Blvd.; Duquesne Ave. from Culver Blvd. to Ballona Creek; intersection of Culver and Sepulveda Blvds.; Culver Blvd. from Ince Blvd. to Canfield St.; Sentney Ave. from Washington Blvd. to Tract 5560; storm drain from Wesley St. to Ballona creek; Poinsettia court from Ince Blvd. to Higuera St.

STOCKTON, San Joaquin Co., Cal.—Willard, Biasotti & Lovatti, 40 W Clay St., Stockton, at \$8500 awarded contract by City Port Commission to gravel certain roads and areas in the vicinity of the turning basin for the Port of Stockton, involving:

- (1) 5,000 cu. yds. grading;
- (2) 10,000 cementing road gravel.

Complete bids follow:

(A) Willard, Biasotti, Lovatti.....	\$ 8,500
(B) C. W. Wood, Stockton.....	9,625
(C) R. E. McCarthy, Stockton.....	9,850
(D) Geo. French, Jr., Stockton.....	10,000

Unit bids follow:

- (1 alt.) 3000 ft., 25 pair, lead covered telephone cable, dielectric strength 700 volts, on reels. Cable to consist of 26 pair, 25 to be guaranteed
- (2) 17,350 ft., 25 pair, lead covered telephone cable, dielectric strength 1000 volts on reels. Cable to consist of 26 pair, 25 to be guaranteed;
- (2 alt.) 17,350 ft., 25 pair lead covered telephone cable, dielectric strength 700 volts, on reels. Cable to consist of 26 pair, 25 to be guaranteed
- (3) 4425 ft., 10 pair, lead covered telephone cable, dielectric strength 1000 volts, to be furnished on reels. Cable to consist of 11 pair, 10 to be guaranteed.
- (3 alt.) 4425 ft., 10 pair, lead covered telephone cable, dielectric strength 700 volts, on reels. Cable to consist of 11 pair, 10 to be guaranteed;
- (4) 9950 ft., 25 pair, lead covered telephone cable, dielectric strength 1000 volts, on reels. Cable to consist of 26 pair, 25 of which shall be guaranteed;
- (4 alt.) 9950 ft., 25 pair, lead covered telephone cable, dielectric strength 700 volts, to be furnished on reels. Cable to consist of 26 pair, 25 pair to be guaranteed.

The bids were as follows:

American Electrical Works (A. E. Vandercook)—(1) \$103 per M ft., (1 alt.) \$93.35 (2) \$103.50 (2 alt.) \$91.30 (3) \$64.25 (3 alt.) \$58.15 (4) \$104 (4 alt.) \$91.80. F.o.b. Phillipsdale, R. I., full freight allowed. Discount for combined award, 15% Delivery, 31 days

General Cable Co.—(1) \$101.85, (1 alt.) \$91.86, (2) \$100.40, (2 alt.) \$94.69, (3) \$64.75 (3 alt.) \$61.50 (4) \$100.55 (4 alt.) \$94.75. F.o.b. Emeryville, Calif., full freight allowed. Discount for combined award, 1.5%. Cash discount, 1/2 of 1% 10 days after date of delivery. Delivery 8 weeks from factory.

John A. Roelings Sons Co. (antimony by weight approximately .075)—(1) \$108, (1 alt.) \$95, (2) \$108, (2 alt.) \$95, (3) \$65, (3 alt.) \$58, (4) \$108, (4 alt.) \$95. F.o.b. trucks 257 E. 3rd St. No discount for combined award. Cash discount, 1/2 of 1% 10 days after date of delivery. Delivery, 28 days from factory.

Graybar Electric Co.—(1) \$159.40, (alt.) .075 sheath \$167.30; (1 alt.) \$140.80; (2) \$159, (alt.) .075 sheath \$166.50 (2 alt.) \$139.80 (3) \$99.10 (3 alt.) \$88.60; (4) \$159.20, (alt.) .075 sheath \$166.90; (4 alt.) \$140 Combined award: (1) \$154.60 (1 alt.) \$136.00 (2) \$154.20, (2 alt.) \$125.70, (3) \$95.40, (3 alt.) \$85.60 (4) \$154.40 (4 alt.) \$135.90. Alternates on .075 sheath: (1) \$162.20, (2) \$161.50, (3) no bid, (4) \$161.80. F. o. b. Davies Extension spur. Prices net. Delivery, 42 to 56 days.

LOS ANGELES, Cal.—Bids for furnishing cable and other material for use in the construction of transmission lines and substations between Cabazon and Hayfield were opened by the Metropolitan Water District, Los Angeles, Jan. 12. Bids were taken on items as follows:

- (7) 211,600 circular mil (4/0 B & S) seven-strand copper;
 - (a) 100,000 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (a1) 240,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (a2) 234,000 lbs. f.o.b. Indio, per 100 lbs.;
 - (a3) 268,000 lbs. f.o.b. Mecca, per 100 lbs.;
 - or (b) 100,000 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (b1) 240,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (b2) 234,000 lbs. f.o.b. Indio, per 100 lbs.;
 - (b3) 370,000 lbs. f.o.b. Mecca, per 100 lbs.;
 - (b4) 300,000 lbs. f.o.b. Rice, per 100 lbs.
- (8) (Alternative to Item No. 7) 336,400 circular mil steel reinforced aluminum cable with vibration dampers;
 - (a) 56,000 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (a1) 134,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (a2) 131,000 lbs. f.o.b. Indio, per 100 lbs.;
 - (a3) 150,000 lbs.; f.o.b. Mecca, per 100 lbs.;
 - or (b1) 56,000 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (b2) 134,000 lbs.; f.o.b. Garnet, per 100 lbs.;
 - (b3) 131,000 lbs. f.o.b. Indio, per 100 lbs.;
 - (b4) 270,000 lbs. f.o.b. Mecca, per 100 lbs.;
 - (b5) 168,000 lbs. f.o.b. Rice, per 100 lbs.;
- (9) 133,225 circular mil (2/0 B & S) seven-strand copper;
 - (a) 64,000 lbs. f.o.b. Valverde, per 100 lbs.;
 - (a1) 134,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (a2) 148,000 lbs. f.o.b. Indio, per 100 lbs.;
 - or (b) 64,000 lbs. f.o.b. Valverde, per 100 lbs.;
 - (b1) 54,000 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (b2) 188,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (b3) 148,000 lbs. f.o.b. Indio, per 100 lbs.;
 - (b4) 270,000 lbs. f.o.b. Mecca, per 100 lbs.;
 - (b5) 670,000 lbs. f.o.b. Rice, per 100 lbs.;
- (10) (Alternative to Item No. 9) 211,600 circular mil (4/0 B & S) steel reinforced aluminum cable, with armor rods;
 - (a) 45,600 lbs. f.o.b. Valverde, per 100 lbs.;
 - (a1) 95,500 lbs. f.o.b. Garnet, per 100 lbs.;
 - (a2) 105,000 lbs. f.o.b. Indio, per 100 lbs.;
 - or (b) 45,600 lbs. f.o.b. Valverde, per 100 lbs.;
 - (b1) 38,500 lbs. f.o.b. Cabazon, per 100 lbs.;
 - (b2) 134,000 lbs. f.o.b. Garnet, per 100 lbs.;
 - (b3) 105,500 lbs. f.o.b. Indio, per 100 lbs.;
 - (b4) 192,000 lbs. f.o.b. Mecca, per 100 lbs.;
 - (b5) 478,000 lbs. f.o.b. Rice, Calif.;
- (11) 66,564 circular mil (No. 2 B & S) seven-strand copper;
 - (a) 16,000 lbs. f.o.b. Mecca;
 - (b) 16,000 lbs. f.o.b. Rice, Calif.;

Bids (on copper cable) identical in prices were submitted by the following: General Cable Co., Anaconda Wire & Cable Co., Pacific Wire Rope Co., American Electrical Works, Phelps-Dodge Copper Products Corp., Columbia Steel Co., Graybar Electric Co., John A. Roebings Sons Co.

The prices of these bidders were:
 Item (7): (a) \$9.43, (a1) \$9.54, (a2) \$9.64, (a3) \$9.71, (b) \$9.43, (b1) \$9.54, (b2) \$9.64, (b3) \$9.71, (b4) \$9.83.
 Item (9): (a) \$9.15, (a1) \$9.54, (a2) \$9.64, (b) \$9.15, (b1) \$9.43, (b2) \$9.54, (b3) \$9.64, (b4) \$9.71.
 Item (11): (a) \$10.46, (b) \$10.58.
 The Aluminum Co. of America submitted the only bid for aluminum conductors, bidding on Items (8) and (10).
 The prices were: Item (8) all delivery points \$13.34 cwt.; Item (10) all delivery points \$11.62 per cwt.

LOS ANGELES, Cal.—Southern California Edison Company's 1933 budget includes the sum of \$3,900,000 to be used for improvements provided that new business warrants the expenditure. Most of this sum will be used for transmission and distribution line construction.

PASADENA, Cal.—Samuel B. Morris, chief engineer, Water Department has recommended to the board of city directors that the city exercise an option to purchase 1000 acres of land and the Azusa hydro-electric plant of the Southern California Edison Co. in San Gabriel Canyon. The purchase price is \$783,494. Mr. Morris states that it will be necessary for the city to sell another block of water bonds in order to finance the purchase of the Edison lands and power plant.

The city is planning to operate the Azusa power plant, according to Mr. Morris, transmitting the power to the municipal power plant until such time as the Metropolitan Water District takes over the Pine Canyon dam and reservoir for storage of Colorado river water and reimburses Pasadena for its expenditures on the project. When the Metropolitan District takes over the water impounding works it will purchase half of the power developed at the Azusa plant, and the remainder will be taken by the city. The plan has a capacity of 10,000,000 kilowatts per year.

LOS ANGELES, Cal.—Osborne and Ziebarth, Los Angeles, at \$98,780 using copper wire, and at \$105,392 using aluminum wire, submitted low bid to Metropolitan Water District January 12 for transmission line bet. Cabazon and Hayfield, also Lakeview to Valverde, including substations.

SCHOOLS

SAN JOSE, Santa Clara Co., Cal.—Following is a complete list of the bids received by San Jose Board of Education for the installation of an underground sprinkling system for the Herbert Hoover Junior High School and the M. R. Trace Elementary School.

- Herbert Hoover School: Props. 1, 2, 3.

Editorial Comment

GAS TAX RAID THREAT TO FEDERAL ROAD AID

FEDERAL aid in highway construction, of which California receives a sum amounting to millions of dollars each year, might be jeopardized to a considerable degree if pending proposals to raid the gasoline tax for the benefit of the state general fund are not defeated. This phase of the gasoline tax diversion situation is emphasized in a statement by the California State Automobile Association, which is leading a statewide effort in opposition to proposals to divert approximately \$17,000,000 in gasoline tax money from the highway fund to the general fund.

"There is danger that California's position with respect to federal aid appropriations for highway work would be seriously weakened if the state should divert its own highway money to general governmental expense instead of applying the money to its pledged purpose of highway maintenance and construction," the statement says.

"California cannot misuse its highway funds in the flagrant way now proposed and still hope to approach federal aid with clean hands."

Last year federal aid appropriations received by California amounted to \$4,100,000.

Proposals pending before the State Legislature provide for taking \$8,779,750 of gasoline tax money immediately from the highway fund and placing it in the general fund, and for a further diversion of \$8,500,000 during the 1933-35 biennium.

The plan is being fought by the Automobile Association and Automobile Club of Southern California on behalf of organized motorists. Supporting the stand of the clubs, formal resolutions opposing diversion of the gasoline tax have been adopted by a wide array of civic and commercial organizations and official bodies.

CONSTRUCTOR TO BE ISSUED EACH WEEK

Effective with the next issue, **PACIFIC CONSTRUCTOR** will be published weekly. This increase in frequency of publication is made in order to meet a demand in the construction industry for a western weekly review of building and engineering news.

The first issue on a weekly schedule will appear under date of February 11. The magazine will be delivered to subscribers thereafter each Saturday.

There will be no change in subscription price, style or editorial policy.

IS AMERICAN INITIATIVE A MYTH?

PEOPLE of the United States have a reputation for initiative and enterprise.

They start things and they finish them.

They have a chance now to demonstrate their ability as never before.

Everyone is waiting for "business to pick up." But business won't pick up of its own accord. It will pick up when the desire and the determination to do something rises again in our national consciousness.

There are about 25 or 30 million families in the United States. This means that there are some 30 million men who are actual producers.

Payrolls depend on construction activity — the building and upkeep of homes, factories and enterprises which consume every imaginable product.

Building has been going down steadily for the past several years until it has become almost stagnant. Thousands of structures are deteriorating because of lack of repairs, paint, rotting foundations, leaky plumbing, worn out heating plants, crumbling chimneys and a thousand and one other things which have been let go.

Never in years could repair work or new construction be done as cheaply as today. There are millions of individuals and industries in this country that have savings and are well able to carry on necessary improvements now. Starting a few million jobs, varying in amounts from ten dollars to a few thousand dollars each, would release an avalanche of money and start the wheels of industry. Employment would increase; our nation would take heart and commerce and industry would slowly regain in normal stride. Before long this improvement would be reflected in other nations.

No amount of legislation or political panaceas involving increased taxation and greater public burdens, can do a fraction of the good that the people can do for themselves by exercising our much prized American initiative and enterprise.

Do it now! Investment and employment are cheaper than charity!

CATERPILLAR

Announces

THREE NEW MODELS

New Seventy

(GAS ENGINE)

New Diesel Seventy

GAS ENGINE OR DIESEL ENGINE POWERED.—With a maximum of 76 DRAWBAR HORSEPOWER—87 BELT HORSEPOWER—powered by gas or Diesel engine—the newest and biggest member of the “Caterpillar” Tractor line makes its bow. Two models, identical as to chassis—“Caterpillar” Seventy Tractor (gas engine powered) and “Caterpillar” Diesel Seventy Tractor.

Big power—and more! Big power that is practically flexible—applicable to the many different needs of the big power user.

EIGHT SPEEDS—six forward and two reverse—eight speeds so arranged that each one has its definitely useful purpose—eight speeds that are really useful because the operator, through a single gear shift lever, can instantly and easily pick the speeds he needs.

From his cushioned seat, the operator, with all controls within easy reach, has a full clear view of the work, the machine and the road ahead, behind or at either side.

New Diesel Fifty

The “Caterpillar” Fifty Tractor (gas engine powered) has already spectacularly and firmly established its success. It is now offered with the choice of Diesel engine or gas engine power. Generating its power on low price fuels, the Diesel Fifty Tractor offers a compact mobile unit that effects astounding operating economies—accomplishes savings that are now more than ever a matter of important concern to every judicious buyer.

THESE ARE THE LATEST CONTRIBUTIONS OF “CATERPILLAR”

OAKLAND
1705-09 EAST TWELFTH STREET

Estimate \$500,000,000 Necessary for State-wide Grade Separation Program

SEPARATION of grades at 7,997 points where streets and highways cross railroad tracks in the state is practical, finances permitting, says a report of the California State Railroad Commission.

The number of actual grade separations in the state on January 1, 1933, was 578 which were constructed at an expenditure of approximately \$21,000,000.

The total cost of grade separation structures in all grade crossings in California where separation is practical is estimated for steam railroads at \$359,184,000 and for electric interurban railroads at \$142,240,000, a total of \$501,424,000.

The annual cost of such a grade separation program, including interest, depreciation and maintenance would be \$34,300,000.

Results of the joint study undertaken by the railroad commission and the state department of public works have been presented to the state legislature.

In conclusion the report says:

"It is apparent that we cannot hope to eliminate all the grade crossings in this state within any reasonable period which we can now forecast. However, records show that the grade crossing situation being constantly improved, as is evidenced by a decrease in the number of accidents occurring at railroad crossings; notwithstanding the fact that the total number of accidents occurring on public highways is generally increasing.

"It is apparent that the grade crossing problem is one which presents many possibilities of treatment with varied expenditures. In formulating any comprehensive plan of grade crossing improvement, the important object is to effect a plan whereby the public will receive the greatest benefits from the money to be invested. Various surveys show that many of the existing crossings could reasonably be closed for want of sufficient public necessity for their existence to justify the expense necessary to provide for their protection or separation. This is particularly true of crossings of public highways with railroads within cities.

"It is not proper to assume all grade crossings should be eliminated, as there are cases where the enormous expense of such an improvement, particularly in developed business sections, could not be justified by the benefits to be derived."

The report discusses present methods of protection at grade crossings in detail. It points out that the records of the Interstate Commerce Commission show that for Class I Steam Railroads, as of December 1, 1931, approximately 21 per cent of the grade crossings in California were provided with some form of special protection, whereas on the average throughout the United States, 13 per cent were specially protected.

The report estimates that it would cost over \$10,000,000 to provide double automatic signals at crossings not now provided with special protection, and that the total annual maintenance cost of these protective devices would be nearly \$800,000.

If a second automatic signal were added, where only

one is now maintained, the cost of such additional installation would be approximately \$900,000 and annual maintenance costs at these crossings would be increased by over \$40,000.

The report calls attention to the fact that approximately 64 per cent of the grade crossing accidents in 1931 occurred at unobstructed crossings, and 60 per cent occurred at crossings provided with special protection.

The total installation cost of all classes of protective devices now installed at grade crossings on both steam and electric railroads is given as \$2,444,859. The annual maintenance cost of these devices is \$657,322.

Distributing the now existing crossings and estimated separation costs of those practical to separate on the basis of the political units having jurisdiction over them, the report gives the following figures:

Cities: Number of crossings, 6,355; number impractical to separate or close, 2,200; number practical to close by realignment or through lack of necessity for their use, 1,127; number practical to separate, 3,028; estimated first cost of separation, \$259,133,000; total annual cost, \$17,750,000.

County Highways: Number of crossings, 5,518; impractical to separate or close, 103; practical to close, 661; practical to separate, 4,751; total estimated cost of separation, \$222,161,000; total annual cost, \$15,220,000.

State Highways: Number of crossings, 229; practical to close, 11; practical to separate, 218; total cost of separation, \$20,130,000; total annual cost, \$1,370,000.

The report states that as of January 1, 1932, there were 578 grade separations in California.

An analysis was made of the cost of 424 of these structures, showing their total cost to have been \$20,764,597. Of this cost approximately 55.31 per cent was borne by the common carrier railroads, 19.76 per cent by incorporated cities, 11.86 per cent by counties, and 13.07 per cent by the State.

An interesting fact developed in the report is that separation of grades between railroads and highways began in California in 1869 with the construction of the first continental railroad in California.

Progress in recent years in California in grade crossing separation work is reviewed as follows:

"During the seven-year period ending December 31, 1931, 161 grade separations were constructed in California at a total cost of \$8,650,000. This is an average of 23 grade separations per year, involving an expenditure of some \$1,235,000, of which approximately 41 per cent was borne by the railroads, 26 per cent by the State, 8 per cent by the counties and 25 per cent by incorporated cities. The average cost per crossing over this period amounted to \$53,700.

"In addition to the separations referred to above, 5 bridges were constructed across the Los Angeles River during this seven-year period, which involved grade separations over the adjacent tracks of The Atchison, Topeka and Santa Fe Railway Company, located on the west bank, and the Los Angeles and Salt Lake Railroad Company on the east bank. These five viaducts cost nearly \$7,000,000, or an average of \$1,400,000 per structure."

Some Phases of the 1932 Federal Income Tax Law

FRANK T. ANDREWS, *Certified Public Accountant; Associate Member, Associated General Contractors*

The following is the sixth of a series of eight articles outlining Income Tax Regulations of interest to every contractor.

THERE are a few forms that the Government requires to be filed each year in addition to ordinary income tax returns. Attention is directed to these forms principally because some changes with respect to the necessity of filing have been made and because, in some instances, a penalty attaches if the returns are not filed.

A corporation, partnership or individual making payment to another person during the year of fixed or determinable income of \$1000 or more in the case of a single person or \$2500 or more in the case of a married person, must file a return of such payments on Treasury Department Form 1099.

Payments of "fixed or determinable" income have reference, under certain conditions, to disbursements such as wages, rents, royalties, annuities, interest, commissions, etc.

A separate return on Form 1099 must be made by the employer for each employee, where a married individual was paid a salary of \$2500 a year or more and where a single individual was paid \$1000 or more.

Payments made to employees as compensation under workmen's compensation acts for personal injuries or sickness do not have to be reported.

Payments of rentals or royalties direct to property owners must be reported. Form 1099 is not required where rents or royalties are paid through an agent.

Bills paid for materials or for ordinary business expenses do not have to be reported. However, payments of interest to individuals, in excess of the exemptions, must be returned.

Payments to corporations or for professional fees or as distributions by a partnership to the individual partners need not be reported.

If the material status of the payee is unknown, the payee is considered a single person for the purpose of filing a return of information on Form 1099.

When a partnership or individual makes a donation to a person other than an organized charitable institution, a deduction against income is not permitted. At Christmas time many employers distribute "gratuities" to employees. If the distribution is considered a donation or gratuity it is not deductible. Usually, however, the distribution is made either as a fixed percentage of the employee's salary or upon some basis of merit, as additional compensation. In this event, the employer should be careful to include the so-called "gratuities" on Form 1099 along with the employee's regular salary and a deduction is permitted for the amount paid.

The completed group of Forms 1099 should be attached to transmittal Form 1096 and must be mailed direct to the Commissioner of Internal Revenue, Sorting Section, Washington, D. C., so as to arrive there not later than February 15, 1933.

These information returns are sorted by the Internal Revenue Bureau and are used to verify the income reported on income tax returns.

Under the new Revenue Act partnerships must file returns as they did under the previous Act, although partnership as such are not taxable. The term "partnership," as used under the prior Acts, has been extended in the new Act to cover groups, syndicates, pools, joint ventures and other unincorporated organizations which are not trusts or corporations. Partnership reports are merely another form of information return required as a proof against incomes reported from that source.

Some confusion has existed over the requirements of the prior Acts as to the time and manner of returning income from the operations of joint ventures, pools and similar organizations or business combinations. There was no express requirement in the old Act for the filing of a syndicate or joint venture return, and the sole responsibility of making returns of annual gains or losses was placed upon the several members. Quite frequently, however, the members of such syndicates of joint ventures overlook the necessity of reporting their shares in the annual gains and losses from operations and assume that they are required only to make returns of the ultimate gain or loss in the year when the syndicate or venture is wound up or liquidated. A strict observance of the letter of prior Acts would require each member to determine his annual share in syndicate gains or losses upon the basis of his own accounting period and according to his own method of accounting, irrespective of the accounting period or method of accounting upon which the books or records of the syndicate were kept.

The new Act eliminates all of this confusion by placing joint ventures, pools, syndicates, etc. in the category of partnerships, and the members thereof in the category of partners. The new provision has the effect of requiring the syndicate to file a partnership return showing the distributive shares of the members. The resulting annual profit or loss must, of course, be reported proportionately upon the individual returns of each member.

When two or more contractors or contracting firms join in the execution of a contract, and where the organization of a group is not an association, trust or corporation, an annual partnership return is required.

Neglect or failure to file such of these information returns as are required is considered a misdemeanor and may also subject a taxpayer to heavy penalties.

Mr. Andrews will gladly answer your income tax questions during the time these articles are appearing in the *Pacific Constructor*. Address your communications care of F. T. ANDREWS & CO., Certified Public Accountants, Russ Building, San Francisco.

TRENCH GUARDS.—Cleveland Trencher Company, manufacturer of wheel and ladder type trenches and other products, has announced the marketing of patented metal trench guards. A feature of the guards is their interconnection, eliminating open spaces found in the old style barricades. Lanterns and flags may be secured in position and thus minimize losses due to theft and breakage. Legs and flag supports are demountable, facilitating transportation.

Caterpillar Announces 3 New Models

The Caterpillar Tractor Company have just announced the addition of three new models to its line according to Robinson Tractor Company, San Francisco and Oakland dealers. These include the Seventy, gas engine powered, the Diesel Seventy, and the Diesel Fifty.

The Seventy, with gas or Diesel power, has a maximum of 76 drawbar horsepower and 87 belt horsepower.

"The many new features in these new models include eight speeds, six forward and two reverse, controlled by one handy gear shift lever, new track design, new idlers and sprockets and dust protection and oil retention developed to a degree never before achieved in large tractors," says a company announcement.

"The visibility is a feature, the operator having full clear view of the work, the machine and the road ahead, behind and at either side. These features together with weight increased to approximately 30,000 lbs. increased power and traction, make the "Caterpillar" Seventy's the ultimate in large tractors.

"The "Caterpillar" Fifty, gas engine powered, has already established an enviable reputation. This size of "Caterpillar" Tractor may now be had with either gas or Diesel power. It has a 4-speed transmission, and the horsepower and drawbar pull are approximately the same as the "Caterpillar" Fifty gas engine powered. The Diesel Fifty offers a compact, mobile unit that effects astounding operating economies and accomplishes savings that are now more than ever a matter of important concern to every buyer."

Blade Graders

The year 1932 has seen the addition to the "Caterpillar" road machinery line of the "Caterpillar" Fifty Grader, rounding out the range of sizes of leaning wheel graders to include four models, which from now on will be known as the No. 77, the No. 66, the No. 44, and the No. 33.

Power Control

Power control for the largest of the blade graders brought to the users of that machine not only a new measure of ease of operation but the important advantage of ability to do more work and better work because of complete, constant, instant control of all adjustments. Power is provided by a 5-horsepower "Caterpillar" engine—control through seven convenient clutch levers, directing 18 adjustment motions.

Auto Patrols

Following the success of the "Caterpillar" Auto Patrol No. 9, a lower-priced model—the No. 7—extended the advantages of this machine to an increased number of maintenance equipment purchasers. More recently, the "Caterpillar" Auto Patrol No. 11 has been announced—a model with larger engine, greater power and the capacity for meeting the most severe requirements of heavy maintenance and road-mix work.

Equipment

Advancement in the "Caterpillar" line has been matched by the scores of manufacturers who make machines or equipment for use with "Caterpillar" tractors. The scores of builders of bull-dozers, wagons, track-type trailers, winches, booms, trailbuilders, snow plows, scrapers and other implements and machines that are pushed, pulled or otherwise powered by "Caterpillar" tractors have made important progress. Some of these manufacturers specialize in, or build exclusively, machines used with "Caterpillar" tractors. The tractor purchaser has a wide choice of equipment, in sizes to match "Caterpillar" tractor sizes, in strength to match "Caterpillar" tractor power and traction. In designing "Caterpillar" tractors, careful consideration has been given to the arrangement of design and the provision of mounting pads, power take-offs and other details to facilitate the mounting and operation of tractor-mounted equipment.

CALIFORNIA-BUILT EQUIPMENT USED ON SAN GABRIEL GRADING

Heavy grading equipment manufactured by R. G. LeTourneau, Inc., is taking a prominent part in the construction of the new San Gabriel High-line road, north of Azusa, one of the largest grading projects now under way in the west.

This new road leads northward up San Gabriel canyon from a point near Azusa to replace an existing road at lower level, which will shortly be inundated by storage of water in Pine Canyon and San Gabriel No. 1 dams. It involves some of the heaviest and most rugged construction encountered anywhere in California, with alignment on slopes so steep, in some instances, that bridges must be constructed to get across ravines which ordinarily would be traversed on fills.

Cuts as deep as 150 feet and fills as high as 170 feet are involved in the work. Instead of the ordinary method of pioneering with a bulldozer it has been necessary in many cases to do pioneer work with a power shovel.

The Guy F. Atkinson company is the contractor on the work, which includes 1,708,000 cubic yards of roadway excavation, 10,000 yards of excavation for structures, 4,260,000 station yards of overhaul, four short reinforced concrete bridges, four drainage tunnels with an aggregate length of almost 1,500 feet and 27 retaining walls. Much riprap work to protect the grade against washing will also be necessary.

The Atkinson company won the contract with a bid of \$868,777 on July 16 and began work July 26. The work is now about one-third complete.

The new road is 7.07 miles long, but construction of an additional 2.7 miles which will connect the present contract with the existing low-level road up the west fork of the San Gabriel river is contemplated. The roadway is being graded to a width of 28 feet on fills and 30 feet in cuts, including the ditches at either side. The maximum grade is 6 per cent and the minimum radius of open curves is 200 feet. The longest haul is 3,000 feet.

Grading work is under way at nine points. The LeTourneau equipment, except for sheepfoot rollers which are used in compacting fills all along the line, is chiefly between Stations 85 and 100, where bulldozers are being used; between Stations 250 and 257, where two scrapers are employed, and between Stations 342 and 348 where four tractors and bulldozers are being used. One LeTourneau cowdozer is also in use. Explosives are being used heavily on the lower end of the job, but on the upper portion, where the LeTourneau scrapers are employed, it has not been found necessary to use so much, due to the different character of the soil. LeTourneau rooters have been used to break up some of the ground in preparation for the scrapers.

The road involves five agencies—the city of Pasadena, the Los Angeles County road department, Los Angeles County Flood Control district, state division of highway and the federal bureau of public roads.

ON THE JOB WITH

On the El Cajon Pass project, J. P. Holland, Inc., and Healy-Tibbitts Construction Company cut through the Blue Slide

CO-OPERATIVE CONSTRUCTION CREDIT

CONSTRUCTION INDUSTRIES' CREDIT BUREAU

(A non-profit, membership owned and operated association affiliated with the National Association of Credit Men)

333 MONTGOMERY STREET, SAN FRANCISCO

F. H. Eichler, Chairman

A. J. McGarry, Mgr.

IF bankers, manufacturers and wholesalers who read this bulletin would only think and *act upon* what follows under the next heading, each could save a minimum of \$1,000.00 in the next twelve months. But they will not *act*; if one does, we will be satisfied.

The Department of Commerce investigated 570 bankruptcies to find out why these 570 concerns failed, and to learn what creditors could do in the future to protect themselves. In their order of relative importance, here are some of the reasons for bankruptcy:

1. Unwise granting of credit.
2. Excessive overhead expense.
3. Dishonesty and fraud.

Careless granting of credit to the bankrupts enabled many to start and to continue a business in which failure was inevitable; 350 chief creditors admitted they did not know why their customers had failed. Think of that! But think of this: Sixty-eight per cent of these 570 bankrupts had not even completed a high school education; 51% of these 570 had no accounting records whatever; the 28% that did have accounting records had wholly inadequate records.

Add up your credit losses for the last ten years. *If you had that money now, you would be on Easy Street.* But what is a creditor to do? Manifestly, you can't inquire into the causes of all failures, for it is then too late—you have lost your money. What of it if excessive overhead, lack of education, fraud and dishonesty caused you to lose your money? You can't install accounting methods for your customers; you can't educate them; fraud is only revealed after fraud is committed. How are you to know these things when you ship goods? You can't.

Should we pass a law providing for certain educational requirements, a law to regulate excessive overhead of our customers, a law to prevent dishonesty? It wouldn't work, although this Association is attempting to revise the present Bankruptcy Act so that creditors will get more money.

Creditors extend credit unwisely; sell concerns with excessive overhead expenses, back ignorant and dishonest men and suffer ruinous losses because of the curse of habit; the habit formed in years past of using only ratings and *financial statements as the basis of extending credit.* We say in all seriousness that the average commercial credit report financial statement does *not* tell you what you really want to know.

Select any financial statement at random. Here is one showing fixed assets of plant, machinery and real estate of \$75,000.00, yet those things could not be sold today for \$10,000.00. This same statement shows receivable accounts of \$30,000.00. Nobody knows how old they are, what they are really worth. But through force of habit, because a financial statement shows a lot of frozen assets that on paper make some kind of a net worth, credit is extended and of course losses follow, because frozen assets and bad receivable accounts do not pay bills.

Is this credit problem insoluble? No. The solution is simple, plain. Shake off the curse of habit. Change your credit information methods to fit the times, as you have changed other things. When you sell on credit in these dangerous credit times, you really want to know but one

E. E. YOUNG, Chairman

Ledger Interchange Bureau Committee
Credit Manager Assn., Northern and Central California

thing—will the customer pay me? What then logically follows? Find out how he actually does pay his bills. This is done by learning if he is paying others who are selling him. This is called getting ledger experience, getting the payment record. The Association will give you no "ratings," no financial statements showing "plant, machinery, equipment and real estate," but does give you exactly what you want to know if you can overcome the curse of old habit—we give you a day-by-day record of exactly *how your customer pays his bills.*

This service is called Credit Interchange Service; costs a few pennies per report. We don't think anybody can afford to sell on credit without knowing how his customer pays his bills. This "how he pays" service is ours exclusively. Others publish ratings, distribute financial statements which the debtor prepared himself, tell you the history of the business, but we publish only "how he pays;" exactly what you want to know. Shake off habit; write us for details; stop your credit loss. Let us help you.

U. S. Committee Completes Report On Seven-Year Study Of Mechanics Lien Legislation

A more equitable basis for liens against real property by laborers, persons who furnish materials, subcontractors engaged in building construction and related work and others is claimed by the Uniform Mechanics' Lien Act just published by an Advisory Committee of the Department of Commerce, working in cooperation with the Division of Building and Housing of the Bureau of Standards. Completion of the act by the committee which was appointed in 1925 by President Hoover, while he was Secretary of Commerce, marks a forward step in legislation of this kind, according to the committee's report to the Secretary of Commerce announced by the Department.

The uniform act provides for an informal procedure, which conforms largely to modern business practice in the construction industries, in order that the parties involved may adjust any difficulties that arise without resort to the public record. A lien action is not a friendly act and its avoidance is advantageous to all parties through the saving of expense, delay and annoyance, the preserving of business reputation, and keeping titles clear of lien clouds.

In its letter to the Secretary of Commerce transmitting its report the committee states in part:

"The drafting of legislation of this character is always complex because of the numerous and diverse interests which it affects. Throughout the long course of such legislation in the United States, many types of laws have been enacted, some discarded, and all frequently amended, most of the amendments being the result of efforts by a particular group or groups seeking more thorough protection. This has inevitably resulted in acts under which undue advantages accrue to one or more groups at the expense of others.

"This committee, which included representatives of virtually all of the interested groups, with an opportunity not previously afforded to any other body, has attempted to arrive at that equitable point at which the interest of all groups, as nearly as is possible, may be equally subserved. The committee considers the agreement that has been reached upon this draft act to constitute a distinct forward step in the field of this type of legislation.

"Cooperation with a special committee appointed by the National Conference of Commissioners on Uniform State Laws, which; together with the American Bar Association, has approved and recommends the act, testifies still further to the soundness and equitableness of the procedure and to the care with which its provisions

have been drafted and subjected to the most painstaking review."

In his letter of acceptance of the committee's report the Secretary of Commerce stated: "It is evident that your task has been executed with a deep sense of the magnitude and importance of the building industry, and of the pressing need for general cooperation in establishing sounder credit relations. Among the features of the project that have especially impressed me are the following:

"1. Leaders in all groups throughout the country were awakened to the wastes and confusion arising from diversity in existing mechanics' lien laws, and to the relationship of such laws to the whole greater problem of bringing about healthier credit relations in building construction. The broad educational results of the committee's work in themselves constitute a substantial achievement.

"2. The great thoroughness with which all phases of the committee's work were undertaken. Although the great number of obstacles might well have discouraged any

group, the committee has persisted in its task until it feels that the burdens and benefits are equitably distributed."

In expressing appreciation of the public service rendered by the committee, the Secretary of Commerce stated: "Because of the technical as well as legal experience that your members have brought to bear and the outstanding legal qualifications of members of the National Conference of Commissioners on Uniform State Laws and the American Bar Association, your recommendations should command universal respect.

"Furthermore, I believe that you have made a real contribution to the movement for greater uniformity in state laws affecting the conduct of business, a movement which has been gaining pace over a period of more than forty years, and particularly during the last decade. Under our present economic system where commercial transactions, even those in the field of construction, are carried on over great distances, haphazard variations in legislation should be minimized, and the advantages of uniform legislation more generally appreciated. Business should not be hampered by having to operate under many differing state laws, where there is no substantial foundation, either in local conditions or public attitude, for the diversity. A growing recognition of this fact is undoubtedly back of much of the

widespread interest in the Uniform Mechanics' Lien Act."

Although legislation on this subject in the United States goes back to a Maryland act of 1791 which was enacted to encourage the building up of Washington, D. C., much of the legislation since that time has been the result of demands of particular groups in the construction industries which has resulted in advantages to such groups at the expense of others. Later, the positions would be reversed by further amendment to the acts.

Mechanics' lien acts are designed to provide security for laborers, materialmen, sub-contractors and contractors in connection with debts due them from the persons who employ them or with whom they enter into contract for labor performed or materials furnished in improving real property. These liens are a direct charge on the property, somewhat like a mortgage. Some of these laws give security for all unpaid debts regardless of the amount of the contract price between the owner and the contractor and despite the fact that the owner may have paid his contractor in full. Other laws give a lien only to the extent of money not paid on the contract price by the owner at the time the claim of lien is filed. Laws of the first type may result in an owner having to pay twice for the same labor or materials. Laws of the second type permit the owner to pay the contractor without inquiry as to whether the contractor is paying his bills, until a notice of formal action to enforce a lien has been served upon him.

Neither of these practices is satisfactory in the opinion of the committee which have carried on the work. They have, therefore, worked out in sections 4 and 5 of the Uniform Act a procedure whereby the burdens of the act are divided among the groups in accordance with the benefits to be derived under the act. Section 4 provides a limited period within which a materialman or subcontractor may, by an informal notice, inform the owner that he expects to look to the owner or his property for satisfaction of his bill. If they fail to give the owner notice within such limited period, they may still give this informal notice and avoid the public record but then their claims are not paid until after those of persons who do give notice within the limited period are paid. Laborers are not required to observe this procedure but may, if they are not paid, enforce liens against the property for their full amounts within the limit of the contract price.

Under section 5, the owner, after receiving these informal notices must, in making payments to the contractor, withhold money to pay those persons who have not been paid by the person who employed them. The owner, for his own protection, should so word his contract that at all times his payments will lag behind the progress of the work. This will help to insure that

he will be in a position to pay amounts claimed in notices given him by claimants. When these notices are received by the owner it is probable that such a lag in payments provided for in his contract will be sufficient to take care of the amounts then due. If not, the owner is in a position to withhold additional amounts from the next progress payment to the contractor.

The Uniform Act provides, also, that the owner may, if he wishes, require the contractor to furnish a bond providing for the payment of all liens. This bond must be for the full amount of the contract price. To recover on the bond, all claimants must bring a lien action and have the amount due them determined and a lien decreed against the contractor and his surety for the full amount. Should any of these amounts be uncollectable against the bond, the lien would stand against the property.

The act provides penalties for the diversion to other purposes of funds borrowed or paid out for construction purposes, if such diversion is made with intent to defraud lien creditors. A penalty is provided, also, against the contractor for furnishing a false statement of his obligations to the owner at the time final payment is due under the contract.

Proceeds of an insurance policy on an improvement are made liable to liens in the event of a casualty. Materials delivered but not used in the improvement may, under certain circumstances, if not paid for, be repossessed by the seller and materials delivered to a job may not be attached for the debts of the purchaser except the debt of the purchase price of the materials due from the owner.

In many other respects the Uniform Act follows the prevailing practice under existing laws of the various states.

The Advisory Committee of the Department of Commerce consists of the following men:

F. Highlands Burns, Baltimore, Md., President, Maryland Casualty Company;

William F. Chew, Baltimore, Md., former president, National Association of Builders' Exchanges;

Charles V. Imlay, Washington, D. C., former vice-president, National Conference of Commissioners on Uniform State Laws;

C. Clinton James, Washington, D. C., former president, United States Building and Loan League;

Stewart A. Jellett, Philadelphia, Pa., former president, Heating and Piping Contractors' National Assn.

Gerhardt F. Meyne, Chicago, Ill., member Advisory Board, Associated General Contractors;

Victor Mendeleff, Washington, D. C., American Institute of Architects;

Charles H. Paul, Dayton, Ohio, American Engineering Council;

William C. Roberts, Washington, D. C., Chairman, Legislative Committee, American Federation of Labor;

W. T. Rossiter, Cleveland, Ohio, former president, National Builders' Supply Association;

E. W. Shepard, New York, N. Y., National Association of Credit Men.

Frank Day Smith, Detroit, Mich., National Retail Lumber Dealers' Association;

Dan H. Wheeler, Secretary of the Committee, Division of Building and Housing, Bureau of Standards, United States Department of Commerce, Washington, D. C.

Copies of the act may be procured at nominal prices by addressing the Standard State Mechanics Lien Act Committee, Bureau of Standards, Washington, D. C.

WORKS BOARD MAY ENGAGE ARCHITECTS

Authority to employ outside architects for the designing of the proposed state hospital at Ventura is vested in the state department of public works, according to an amended opinion of Attorney General U. S. Webb to State Architect George B. McDougall.

The attorney-general had previously ruled that the board of managers of the institution was empowered to engage architects. Express authority to that board in the act establishing the hospital is superseded by the statute regulating public works, Webb has informed MacDougall.

ROLPH APPROVES HIRING ARCHITECTS

Governor James Rolph, Jr., is pledged to the policy of giving state work to private architects, according to a letter from him to C. J. Ryland, secretary of the Northern District, California State Board of Architectural Examiners.

The governor's letter said: "Mr. Glen V. Slater, assistant director of the department of professional and vocation standards, has forwarded your letter to me concerning architectural work among state colleges, etc.

"I appreciate the existing situation and will do everything within my power to see that the architects of the state are afforded an opportunity of bidding upon architectural work."

AIR-CONDITIONING CONFERENCE HERE ON FEBRUARY 9-10

Many Contractors Expected At Sessions To Study Installations

Contractors from all parts of Northern California are expected to attend the air-conditioning conference to be held in San Francisco and Berkeley February 9 and 10, under auspices of the San Francisco section, American Society of Mechanical Engineers.

Experts in all branches of the new industry will address the sessions. Everyone interested in air-conditioning is invited to attend. Dr. Baldwin M. Woods of the University of California is general chairman. W. E. Leland is vice-chairman.

The program of the first day, Thursday, February 9, will be devoted to the scientific background of air-conditioning, including a study of the physiological and psychological aspects. Sessions on the opening day will be in the Engineering Building on the University of California campus at Berkeley.

The program of the second day is devoted to the problems of design and installation from the standpoint of architect, engineer and dealer. The sessions will be held in the Civic Auditorium, San Francisco.

Following is the complete program for the conference:

THURSDAY, FEB. 9

9:00 A. M., Registration, Engineering Building, University of California.
9:30 A. M., Opening Session, B. M. Woods, presiding.

Fundamental Problems—General
Opening Remarks, B. M. Woods.
Basic Theory of Air Conditioning, L. Washington (Stanford).

The Psychometric Chart and Its Use, C. R. Dodson (U. of C.)
Physiological-Psychological Basis of Comfort, C. W. Brown (U. of C.)

What Is Comfort?, Lee Hungerford (Chief Engineer, Fox West Coast Theatres).

12:30 M., Adjourn for Luncheon at Faculty Club.

THURSDAY, Feb. 9

2:15 P. M., Engineering Building, University of California, A. B. Domonoske, presiding.

Fundamental Problems—Cooling
Analysis of Cooling Fundamentals, Walter S. Weeks (U. of C.)

Cooling with Ice in California Valley Summer Weather, H. L. Lincoln (Union Ice Co.)

Analysis of Los Angeles Weather, Lester J. Rich (Pernot & Rich, Inc.)

THURSDAY, Feb. 9

6:30 P. M., Dinner Meeting, Engineers' Club. San Francisco Members of the A.S.M.E. and cooperating societies.

Following the dinner there will be an address by Dr. Albert H. Rowe, Specialist in Respiratory Diseases and Lecturer in Medicine, U. of C. Subject: Medical Aspects of Air Conditioning.

FRIDAY, FEB. 10

9:30 A. M., Civic Auditorium, San Francisco, J. J. Donovan, presiding. Chairman, Northern California Chapter, American Institute of Architects.

1932 LUMBER SHIPMENTS EXCEED PRODUCTION BY TWENTY-FIVE PCT.

The 600 lumber mills which reported to the National Lumber Manufacturers Association through regional associations, for 1932 and 1931, show 1932 production as 41 per cent below 1931; 1932 shipments 33 per cent below those of 1931; new business 31 per cent below 1931. These mills reported production of 5,444,819,000 feet in 1932 and 9,275,809,000 feet in 1931, which was 56 per cent of the total production of the country as reported by the U. S. Census Bureau. Revised figures for the 52 weeks of 1932 also show net business 24 per cent above production and shipments 25 per cent above production.

During the holiday week ended January 7, 1933, 770 leading hardwood and softwood mills reported lumber production of 73,315,000 ft., which was about 18 per cent above the output of the previous week, also containing a holiday, when 820 mills reported. This production was 15 per cent of capacity.

New business during the week ended January 7, amounted to \$4,255,000 feet which was 5 per cent below that reported for the pre-

vious week and 17 per cent of capacity. For the previous week production was 12 per cent and new business 17 per cent of capacity.

All associations reported new business in excess of production except in the Southern pine region, where orders fell 11 per cent below output.

Comparison of identical mills for the corresponding week of last year, which was the week ended January 9 and did not include a holiday, shows production of all regions except the Southern pine as considerably below last year, all reports averaging 20 per cent below. New business this year was 31 per cent below corresponding week of last year for softwoods; 41 per cent below for hardwoods.

Lumber orders reported for the week ended January 7, 1933, by 408 softwood mills totaled 74,377,000 ft. or 11 per cent above the production of the same mills. Shipments as reported for the same week were 66,697,000 feet, or about the same as production. Production was 66,881,000 feet.

Reports from 375 hardwood mills give new business as 9,878,000 feet or 54 percent above production. Shipments as reported for the same week were 13,436,000 feet, or 109 percent above production. Production was 6,434,000 feet.

Unfilled Orders

Reports from 351 softwood mills give unfilled orders of 346,643,000 feet, on January 7, 1933, or the equivalent of 12 days' production. The 351 identical softwood mills report unfilled orders as 346,643,000 feet on January 7, 1933, or the equivalent of 12 days' average production, as compared with 424,985,000 feet, or the equivalent of 14 days' average production on similar date a year ago.

Identical Mill Reports

Last week's production of 396 identical softwood mills was 66,199,000 feet, and a year ago it was 81,548,060 feet; shipments were respectively 65,510,000 feet and 109,920,000; and orders received 73,580,000 feet and 106,887,000. In the case of hardwoods, 196 identical mills reported production last week and a year ago 5,148,000 feet and 7,913,000; shipments 10,683,000 ft., and 14,654,000; and orders 7,287,000 and 12,440,000 feet.

CONCRETE HOMES DESCRIBED

"Low Cost, Fireproof Concrete Homes" is the title of an attractive new booklet prepared for general distribution by the Portland Cement Association. The book contains various plans and estimated costs of homes built entirely of concrete and cement.

Commercial and Industrial Problems

Design Procedure for Heating and Cooling Installations, W. E. Leland; Air Filtration, F. W. Kolb (American Air Filter Co.); Control and Regulation, T. B. Hunter.

FRIDAY, FEB. 10

2:15 P. M., Civic Auditorium, San Francisco, W. M. Moody, presiding. President, San Francisco Section of the American Society of Mechanical Engineers.

Residential and Small Commercial Problems

The Architect's Problems in Heating, Cooling and Ventilation, J. J. Donovan; Air Infiltration Through Windows, L. M. K. Boelter and Virgil H. Cherry (U. of C.); Cooling Rural Homes—A Study in Progress, B. M. Woods and Associates; The Psychology of Selling, E. K. Strong (Stanford).

The Western Conference On Air Conditioning is being sponsored by the San Francisco Section, A.S.M.E. and the Engineering Department of the University of California. Co-operating with the A.I.E.F., A.S.M. M. E., A. I. A., N. A. P. R. E., A. S. H. V. E., S. R. E. and individuals interested in the subject. The general chairman is Dr. Baldwin M. Woods, University of California, who is a recognized authority and who has obtained the interest of the best men in the west for presentation of papers. The arrangements committee is headed by Carl A. Rietz of the Westco-Chippewa Pump Sales Co., in whose hands are all the plans for the conference. All matters pertaining to publicity or arrangements for displays will be handled through S. R. Dows of W. H. Picard, Inc., Oakland.

REED ELECTED GOLDEN GATE BRIDGE MGR.

**Nav. Man Succeeds M'Donald
As Construction Job
Executive**

James Reed, naval commander and construction engineer has been elected to the post of general manager of the Golden Gate Bridge and Highway District, on the recommendation of the bridge directors' policy committee. He succeeds Alan MacDonald, who resigned.

Reed was nominated by Director Keesling following his recommendation by a majority of the policy committee, which considered more than eighty applications.

Before the directors voted on Reed, the minority report of the policy committee in favor of A. W. Deuel, general manager of the San Mateo bridge, was presented and appointment of Deuel was moved by Director William Stanton. Stanton's motion failed to carry. The election of Reed was made unanimous at the request of the four directors who originally voted for Deuel.

Reed's salary as manager is "not to exceed \$12,000 a year."

Reed, at present general manager of the Schlage Lock Company, has served as a construction expert at the Mare Island, Bremerton and Brooklyn navy yards, and as shop superintendent at the Philadelphia yard.

He was graduated from the United States Naval Academy in 1902, and from the Massachusetts Institute of Technology in 1907.

Since his retirement from the Navy, he has acted as construction expert on a number of large projects.

BOARD LICENSES FIVE ARCHITECTS

At a recent meeting of the State Board of Architectural Examiners, Southern District, the following candidates were granted Provisional Certificates to practice architecture in the State of California:

Herman Adolph Spackler, 5419 Poplar Blvd., Los Angeles.

Benjamin L. Wiseman, 623 Union Oil Bldg., Los Angeles.

Harold Newton Abrams, 3503 Park Blvd., San Diego.

Edward Warren Hoak, 1721 Bushnell Ave., South Pasadena.

Christian E. Choate, 2600 South Hoover, Los Angeles.

REVOKE BID CALL FOR TWO TUNNELS

LOS ANGELES, Jan. 25.—Call for bids on the Valverde and Bernasconi tunnel construction for the Los Angeles Metropolitan Water District were ordered cancelled today. F. E. Weymouth, general manager and chief engineer of the district, said revised specifications for the tunnels would be issued at an early date.

The bids were to have been received January 30 on specifications approved January 3.

CITY ABANDONS PLAN TO BUILD HOSPITAL WARD

Lack of Money To Pay Operating Expenses Ends Projected Construction

Definite abandonment of the proposed \$470,000 psychopathic ward addition to the San Francisco Hospital has been announced by Wm. H. Worden, Director of Public Works.

Worden's action followed a decision by City Administrator A. J. Cleary that the new building was not immediately necessary.

Bids which were to have been received January 25 already had been postponed while a hearing pending on injunction proceedings against the project. The injunction was asked by William E. Hagne on the grounds that the high wage scale provided in the specifications involved a waste of city money.

Cleary indicated that either funds from the bond issue originally intended for the construction of the hospital addition would be used to build a nurses' home on the same site, or that a measure would be submitted to voters in a special election to authorize the diversion of the funds to other city purposes.

Dr. J. C. Geiger, Director of Public Health, said that psychopathic ward patients could be amply cared for in the recently constructed Health Center Building.

Geiger had previously stated that if the psychopathic ward were built his department would not have sufficient funds to equip it properly.

LAKE COUNTY FIXES ROAD WAGE SCALE

A daily wage scale for Lake county road workers has been fixed by the board of supervisors as follows: Foreman, 4.50; shovel man, \$6; jackhammer, \$3; powder man, \$3; shovel helper, \$3; tractor driver, \$4; grader man, \$3.50; truck driver, \$3.50; bridge carpenter, \$4.50; bridge helper, \$3; common labor, \$3; general utility man, \$4; 2-horse team, \$2; 4-horse team, \$4; maintenance operator, \$4.50.

\$40,000,000 BAY BRIDGE OPENINGS ARE SCHEDULED

**Principal Contracts For Span
All To Be Awarded
By May 1**

Contracts on the San Francisco-Oakland bridge totalling more than \$40,000,000 will have been awarded before the first of May, according to the schedule of bid openings adopted by the bay bridge commission.

The opening of bids on the first unit, the west bay substructure, will be in Sacramento on February 28. Four additional contracts will be advertised this week and proposals will be received in San Francisco on March 2 and March 7. These include the east bay substructure and the west bay superstructure on both sides of Yerba Buena island. Contracts for the San Francisco anchorage, the Yerba Buena island crossing and the east bay superstructure will be advertised probably early in February and bids will be opened March 7th and 8th in San Francisco. It is planned to have all of the awards made within sixty days after bids are opened.

The tentative estimates on each of these items as prepared by the bridge commission engineers follow:

Foundations	\$15,240,000
San Francisco anchorage.....	1,110,000
Yerba Buena Island crossing	2,100,000
Dredging mole construction	450,000
West bay superstructure.....	16,600,000
East bay superstructure.....	8,900,000

Approximate quantities of the major materials which will be used are estimated as follows: 170,000 tons of structural steel and wire; 20,000 tons of reinforcing steel; 200,000 gallons of paint; 40,000,000 B.M. lumber; 1,000,000 barrels of cement; 1,000,000 cubic yards of concrete aggregates.

(See engineering section of this issue for complete quantity.)

GAS SALES SHOW SMALL LOSS IN '32

California's sales of taxable gasoline in 1932 totaled 1,352,570,000 gallons compared with 1,401,545,000 in 1931, figures of the state board of equalization show. The decrease was about 3.4 per cent.

Associated Oil, Texas and Union Oil showed gains over the 1931 volume. Standard Oil Co. of California maintained its lead with 275,967,000 gallons, a loss of less than 1/2 of 1 per cent.

Centralization of the business was by figures computed by Dow Jones & Co., showing the seven largest companies sold 72.9 per cent of the gasoline. This was a hair line gain over their 1931 percentage of 72.4. The seven leading companies were Standard, Shell, Union, Associated, Richfield, General and Texas.

A.G.C. PROTESTS CHANGE OF CITY CONTRACT POLICY

Alameda Chapter To Oppose Oakland Charter Amend- ment For Day Labor Plan

A protest has been filed by the Alameda County Chapter, Associated General Contractors, against any change in the Oakland city charter that would eliminate the contract system of doing public work.

"Just now, under the guise of 'relief of unemployment', much work is being done in cities in all parts of the state," said Wm. E. Hague, secretary-manager of the chapter. "It is the belief of the contractors that all such work should be done by contract and the laborers taken from the municipal employment bureau, just as is done under the Federal aid plan, by which the contractors are required to take laborers from the county bureau.

"This work contributes effectively to the relief of unemployment, nevertheless the work is done by contract and there seems to be no reason why all city work could not be done in the same way and the cities receive far more for their money than they are now getting in many cases."

The following letter has been addressed to the Oakland committee on charter amendments by the Associated General Contractors:

We understand your Committee is considering various Charter Amendments to be presented to the City Council and later to the voters of Oakland for adoption. We have particularly noted the proposed amendment to Section No. 130, headed "Public Work To Be Done By Contract."

The clear intent of this Section as it now reads in the City Charter, is to confine all city work to the contract system, but if the proposed amendment should be adopted the door would be opened wide for city officials to do the work under the "day work" plan without even the formality of taking bids, but under the guise that "an emergency" existed. This is exactly the situation the new Charter aimed to eliminate and we therefore hope the proposed amendment will not receive favorable consideration from your Committee.

At this somewhat hysterical period there is a distinct tendency on the part of public officials to seize the opportunity to have a "state of emergency" declared under which work can be done under the day work system with little regard to cost and under the guise of "relief of unemployment." We can conceive of no emergency arising under which day work would become necessary or profitable to the city, as it has always been a loose system under which actual costs are concealed and often incorrectly reported.

We believe that Section No. 130 of our City Charter truly sets forth the wishes of the people with reference to awarding of public contracts and we recommend that the Section be left untouched.

Should you decide to consider any change whatever to this Section we would respectfully request that this Body be consulted regarding same and it would be our aim to cooperate with you in all ways possible.

\$10,000,000 BONDS FOR CALIFORNIA BLDG. PROPOSED

Rolph Gives Legislature Plan For Additions To State Institution

A state building program to be financed by a \$10,000,000 bond issue has been presented to the state legislature by Governor Rolph, including general allocations of funds as follows:

California state fair—Exhibit buildings, \$200,000.

Department of Institutions—Sufficient new construction to keep up with increasing population for the next two years, \$5,800,000.

Veterans' Home at Yonntville—Mess hall, assembly building and office building. Defer new barracks until enough money accrues from State Athletic Commission, \$345,000.

California National Guard—Armories at Fresno, San Pedro, Santa Ana and Santa Barbara, \$220,000.

State prisons—Provision only for construction of new plant and facilities for new prison for first offenders, estimated at 1000 population, \$1,000,000.

State teachers' colleges—New plant at San Francisco, and new plant at Santa Barbara after selling present site, \$1,500,000.

California School for Deaf, Berkeley—Badly needed building for younger pupils, \$100,000.

University of California—Most urgent requirements at Berkeley, Davis, Los Angeles, La Jolla, Riverside and San Francisco, \$843,000.

VETS' \$30,000,000 HOME BOND ISSUE IN LEGISLATURE

Sponsors Declare Funds Would Provide For 12,000 Applications

A proposal for another \$30,000,000 bond issue for war veterans' farm and home purchase loans has been made to the California Legislature, companion bills being introduced in each house by groups of members who are war veterans.

Sponsored by the American Legion, the new bond issue would be submitted to the people at the next general state election, if approved by the Legislature.

"This is a forward looking and progressive piece of legislation, consistent with the state's policy over a period of years," said Senator Leonard Difani of Riverside, one of the authors of the measure.

"Outstanding among the constructive features of the plan is the fact that it will provide tens of thousands of days' employment for California workers, particularly at a time when every effort should be made to stimulate employment.

"In addition, it will enable approximately 12,000 former service men, who applications to acquire home under the original veterans' farm and home purchase act, have been approved, but are now pending, due to the fact that funds voted under the three previous bond issues have been exhausted."

Senator Difani pointed out that the new bond issue, like the others, will not cost the state of California a cent, payments from the veterans to whom loans are extended being fixed at rates to pay off bond interest and redemption charges, in addition to underwriting the cost of administration by the Veterans Welfare Board.

SEATTLE A. G. C. ELECTS OFFICERS

At the twelfth annual meeting of the Seattle Chapter, Associated General Contractors, Geo. E. Teufel of the firm of Teufel and Carlson, was elected president of the chapter to succeed James Murdock who has been president for the past four years.

M. Phil Butler of the W. T. Butler Construction Co., was elected vice-president. H. V. Bogert will continue as manager.

L. A. HOME LOAN BANK READY TO ACT ON REQUESTS

State Legislation Paves Way For Release Of Federal Money

Passage of an amendment to the California building and loan act, enabling the state associations to avail themselves of the loan privileges afforded by the Federal Home Loan Bank means that the district bank in Los Angeles can begin to function effectively, according to W. F. Duffy, executive vice-president.

"Removal of obstacles preventing building and loan associations from utilizing the bank's facilities will enable these institutions to borrow on their eligible home mortgage and make available considerable sums for home repairs and other purposes thereby doing much to revive purchasing power which, in turn will, amongst its other benefits, stimulate real estate activity and building throughout California," Mr. Duffy declared.

"Already many applications for membership in the bank have been submitted and are before the bank officials for examination. These applications have been made in accordance with the rules established for all twelve Federal Home Loan Banks to follow and after approval must be forwarded to Washington. This routine is absolutely necessary and, considering the nationwide scope of the institution, requires considerable time. Patience must be exercised and confidence maintained that everything possible is being done to expedite the accomplishment of the purposes of the Federal Home Loan Bank act and to justify the hopes of the people in the good that can ultimately come from it."

SACRAMENTO BRIDGE CONTRACT APPROVED

Work on the new M street bridge in Sacramento over the Sacramento river may be started this spring it was reported recently following the completion of an agreement between the Sacramento county board of supervisors and the state highway commission for financing the structure.

The bridge will be constructed by the state and the county will pay one-third of the cost to be deducted from its allotment of the gasoline tax. The estimated cost is \$650,000.

The old M street bridge will not be wrecked, but will be moved to some other point in the county, it is proposed.

SANTA CRUZ FORCE INCREASED

Santa Cruz Portland Cement Co. has re-employed 160 men, increasing its monthly payroll by \$10,000.

The plant is filling an order for 350,000 barrels of cement for the Madden dam in the Panama Canal Zone.

ALLEN & DETTMANN COMPANY ORGANIZE

E. A. "Ted" Allen and Fritz L. Dettmann announce that they have formed the Allen & Dettmann Lbr. Co. and are now engaged in the retail lumber business on the property formerly occupied by the Chas. R. McCormick Lumber Co., at 2000 Evans Ave. The telephone number is Valencia 2700.

The personnel of the new company includes Bob Phillips, Henry Reed, Carl Muhlberger, Wendel Paquette and Bjarne Bergesen. Each member of this company received his training and experience during many years of service with the well known firm of Pope & Talbot, and more recently with the retail department of the Chas. R. McCormick Lumber Company.

Each of the above mentioned men is a stockholder in the new company, and will make it his personal business to see that their customers obtain the best of materials and prompt, dependable service.

The new company will carry a large and well assorted stock of pine and redwood lumber.

MAMMOTH ELECTRIC SIGN IS COMPLETED

The largest changeable electric sign in the world is nearing completion in South San Francisco and will be in operation as soon as power lines are completed. G. H. Thompson, the owner, has announced.

The structure is 368 feet long with letters 21 feet high that will change color and wording every 15 seconds. A series of fourteen displays will be repeated nightly that will be visible from the Bayshore highway, El Camino Real, San Bruno highway, Skyline boulevard and the San Mateo bay bridge.

Groups of fourteen mazda lights covered by lenses 16 inches in diameter will serve as light units for the sign. A total of 6000 lamps will be used, consuming about 15,000 watts.

Over ten miles of wire and 100 tons of steel and concrete were used in the structure, which was built by the South San Francisco Sign Company.

L. A. MAN TO HEAD EQUIPMENT DEALERS

Carl E. Baker, sales manager of Smith Booth Usher Company, Los Angeles, was elected president of the Associated Equipment Distributors at the 14th annual meeting of that organization, held in Detroit, Michigan, January 15 and 16. The annual meeting was held in conjunction with the Highway and Building Congress in Detroit.

The officers and directors elected were: Carl E. Baker, Los Angeles, president; R. R. Nixon, Chattanooga Tenn., vice-president; Fred Matheis, Boston, Mass., second vice-president; A. C. Blaisdell, Cincinnati, Ohio, secretary; H. W. Fletcher, New Orleans, La., treasurer.

PENALTY FIXED FOR DELAY IN S. F. CONST.

Additional Inspection Fees due to Extensions Will be Charged

Contractors who apply for extensions of time on San Francisco projects must reimburse the city for the cost of any additional inspection or engineering work made necessary by the extension, according to a ruling made by Chief Administrative Officer Alf. J. Cleary.

Cleary instructed Wm. H. Worden, Director of Public Works, to advise contractors that a certified check covering the cost of added inspection must accompany all applications for extensions.

Cleary's action was precipitated by the granting of a five-month extension to Barrett & Hilp on the Third Street Bridge, which will cost the city more than \$12,000 in inspection fees, Cleary declared.

Payment of extra inspection expenses by the contractors will save the city \$25,000 a year, it is estimated.

Bid calls issued by the city this week for \$525,000 of projects carry a clause requiring the contractor to pay liquidated damages of one hundred dollars per day on any extensions.

FLOOD DISTRICT BOND BIDS ARE INVITED

Bids have been called by the American River Flood Control District on a block of bonds amounting to \$287,000 for the financing of additional construction work. Proposals will be opened February 10. The securities are the unsold portion of an original issue of \$565,000 and bear interest of 7%.

The first unit of the work, raising a levee to protect North Sacramento from flood waters of the American river is now being completed. The second unit will be for the construction of levees on Arcade creek.

REGISTER WARRANTS ON SACRAMENTO FUNDS

Sacramento county warrants drawn against several funds, including that for roads and bridges, must be registered until there is sufficient money in the treasury to return to a cash basis, County Auditor L. P. Williams has informed the board of supervisors.

The supervisors were informed that there probably would not be money available to meet county payrolls after February 1 and that salary warrants also would be registered until after the April installment of taxes is collected. Tax delinquencies have created a deficit in the county general fund. The only cash on hand after February 1 will be that allocated to special funds and which cannot be used for general expenses, the auditor and treasurer declared.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

4.2—MI. GRADING LYLE TO SKADAT—KLUCKITAT CO., WASH.

KLUCKITAT COUNTY, Wash. — As previously reported, Morrison-Knudsen Co., 1307 Old National Bank Bldg., Spokane, at \$374,494 awarded contract by the State Highway Commission to grade 4.2 miles of State Road No. 8, Lyle to Skadat, E.C.H. Proj. No. E-174-C, involving:

(1) clear and grub;
 (2) 15,850 cu. yds. excav., Class A;
 (3) 322,720 cu. yds. do, Class B;
 (4) 12,310 cu. yds. tunnel excav.;
 (5) 264,130 cu. yds. S. R. excav.;
 (6) 1,170 cu. yds. struc. excav.;
 (7) 1,000 cu. yds. excav., Class D;
 (8) 598,230 cu. yds. (sta.) overhaul;

(9) 372,010 cu. yds. (mi.) overhaul;
 (10) 195 cu. yds. concrete, Class B;
 (11) 18,960 lbs. reinf. bars;
 (12) 5x6-in. x 4-ft. reinf. crib headers;
 (13) 5x8-in. x 6-ft. do;
 (14) 5x10-in. x 8-ft. do;
 (15) 6x6-in. x 6-ft. reinf. stretchers;
 (16) 6x8-in. x 6-ft. do;
 (17) 6x10-in. x 6-ft. do;
 (18) 196 reinf. pillow blocks;
 (19) 90 lin. ft. galv. iron pipe, 2-in.;
 (20) 18 lin. ft. conc. V. C. pipe, 12-in.;
 (21) 756 lin. ft. 18-in. reinf. pipe;
 (22) 81 lin. ft. 24-in. do;
 (23) 255 lin. ft. 36-in. do;

(24) 24-in. reinf. pipe, extra strength;
 (25) 42-in. do;

(F) Pacific Pavements 33,899.20
(G) E. J. Treacy 35,265.20
(H) Bureau of Street Repairs 35,921.75

Table with 8 columns (A-H) and 23 rows of unit bids for items 1-23.

ARIZONA STATE—H. L. Royden, 14 N 12th Ave., Phoenix, awarded the contract by State Highway Commission, Phoenix, January 16 at \$11,023.80 for highway construction on the Nevada-Utah Highway, E-92 (A.F.E. No. 1601). The work, which is located in the extreme northwestern corner of the state, approximately one mile northwest of the town of Littlefield, consists of the addition of four timber spans to the south end of Beaver Dam creek bridge, the excavation of a portion of the upstream channel and the placing of steel jetties, and is to be completed on or before March 31, 1933, involving:

- Beaver Dam Exten. and Protection
(1) 2 squares clear and grub;
(2) 3000 cu. yds. drainage excav. (un-classified);
(3) 1500 cu. yds. approach fill;
(4) 312 cu. yd. mi. approach fill haul;
(5) 26.7 M.B.M. treated timber;
(6) 1.7 M.B.M. untreated timber;
(7) 1040 lin. ft. treated timber piles;
(8) 26 lin. ft. treated timber piles cut-off for 75% of the unit price bid for item 7;
(9) 160 sq. yds. sand asph. wearing surface;
(10) 216 lin. ft. wire mesh and steel hand rail;
(11) 2 water barrels;
(12) 65 units steel jetties.

Non-Federal Aid

- (13) 604 sq. yds. sand asph. wearing surface.

The total bids were:
(A) H. L. Royden, Phoenix, \$11,023.80.
(B) Ralph Pleasant Const. Co., Phoenix, \$12,578.75.

Table with 3 columns (A-C) and 13 rows of unit bids for items 1-13.

*These bids are on an approved alternate jetty. H. L. Royden bid \$45.00 per unit on regular specified jetty.

SANTA MARIA, Santa Barbara Co., Cal.—Santa Maria Constr. Co., Santa Maria, submitted low bid to City Council, Jan. 16, at \$13,697.97 (based on ordinary type reinforcing and a mineral type composition roofing) to construct ring tension type concrete reservoir, 140 feet in diameter, and 14 ft. high, with a capacity of 1,500,000 gallons. York Peterson, city engineer, prepared the plans. Bids were taken as follows:

- (1) ordinary type reinforcing with mineral composition roofing;
(2) same with redwood roof;
(3) Hewitt type reinforcing with mineral composition roofing;
(4) same, with redwood roof.

The bids were taken under advisement until 7:30 P. M., January 19. Bidders follow:

- (A) Santa Maria Construction Co.
(B) Sidney Smith.
(C) Doane Bldg. Co., Santa Maria.
(D) H. G. Klusman.

The bids were, (A) being the first bidder, etc.:

Table with 5 columns of bid prices for items 1-5.

DRY DOCK PUMPING EQUIPMENT—CRISTOBAL, C. Z.

PANAMA CANAL ZONE.—As previously reported, Dayton Dowd Co., Quincy, Ill., at \$10,078 submitted low bid to General Purchasing Officer, Panama Canal Zone, Washington, D. C., to furnish pumping equipment for new dry dock at Cristobal, involving:

- (1) 2 main vertical pumps with motors and controllers;
- (1a) 2 main horizontal pumps with motors and controllers;
- (2) 2 main vertical pumps with motors and controllers (alt.);
- (3) 1 bilge pump;
- (4) 2 suction valves;
- (5) 2 discharge valves;
- (6) 2 high pressure pumps;

- (7) 1 dry dock flushing pump with motor and controller.
- (8) 2 calsson pumps.

Complete list of bidders follows:

- (A) Dayton-Dowd Co., Quincy, Ill.
- (B) Worthington Pump & Mch. Co., Washington, D. C., and Harrison, N. J.
- (C) Warren Steam Pump Co., Warren, Mass.
- (D) Newport News Shipbuilding and Dry Dock Co., Newport News, Va.
- (E) Ingersoll-Rand Co., New York.
- (F) Yeoman Bros. Co., Chicago.
- (G) Economy Pumping & Machinery Co., Chicago.

6.4-MI. GR. & OIL—SANTA CRUZ--SANTA CLARA CO.

SANTA CRUZ AND SANTA CLARA CO., Cal.—Union Paving Co., Call Bldg., San Francisco, at \$288,468.30 submitted low bid January 25 to State Highway Commission, Sacramento, to grade and oil about 6.4 mi. between Saratoga Gap and Black Road, involving:

- (1) 72 acres clear and grub right-of-way;
- (2) 1336 remove trees, size 1;
- (3) 300 do, size 2;
- (4) 200 do, size 3;
- (5) 28 do, size 4;
- (6) 14 do, size 5;
- (7) 70 remove stumps, 18-in. diameter and over;
- (8) 940,000 cu. yds. rdwy. excav., unclass.;
- (9) 5,536,700 sta. yds. overhaul;
- (10) 6,300 cu. yds. struc. excav.;
- (11) 105 cu. yds. Class A cem. conc. struc.;
- (12) 6,500 lbs. bar reinf. steel (struc.);
- (13) 4004 lin. ft. 8-in. perf. metal pipe underdrain;
- (14) 1224 lin. ft. 8-in. corr. metal pipe
- (15) 6320 lin. ft. 18-in. do;
- (16) 520 lin. ft. 24-in. do;
- (17) 7200 M. gals. water (embank.);
- (18) 1810 bbls. heavy fuel oil;
- (19) 200 cu. yds. rubble masonry;
- (20) 122 timber culvert markers;

- (21) 200 lin. ft. laminated timber guard rail;
 - (22) 8.4 miles new woven wire fence;
 - (23) 4.4 miles new barbed wire fence;
 - (24) 37 fence gates;
 - (25) 9000 ft. b.m. redwood timber, dense select all-heart structural grade;
 - (26) 13,000 ft. do, sel. all-heart struc. grade;
 - (27) 18 redwood covers for drop inlets;
 - (28) 338 sta. finish roadway;
 - (29) 121 monuments complete in place.
- State will furnish corrugated metal pipe, perforated metal pipe and spillway assemblies.
- Complete bids follow:
- (A) Union Paving Co., San Francisco, \$288,468.30.
 - (B) Granfield, Farrar & Carlin, \$301,559.60.
 - (C) von der Hellen & Pierson, \$343,865.50.
 - (D) Merritt-Chapman & Scott, \$355,814.90.
 - (E) C. W. Wood, Stockton, \$358,648.
 - (F) Guy F. Atkinson Co., San Francisco, \$376,432.90.
 - (G) MacDonald & Kahn, San Francisco, and D. McDonald, Sacramento, \$416,373.40.
 - (H) S. J. Groves & Sons, Los Angeles, \$460,882.10.

BAKERSFIELD, Kern Co., Cal.—F. A. Hopper, Bakersfield, at \$.47 per barrel awarded contract by the city council to furnish road oil for year ending December 31, 1933. Complete bids follow:

- F. A. Hopper, Bakersfield, \$.47.
- Associated Oil Co., San Francisco, \$.475 to June 30; \$.50 July 1 to Dec. 31, 1933.
- Standard Oil Co., San Francisco, \$.65 per barrel.

MUNI. WATER SYSTEM — SOLEDAD — BIDS OPENED

SOLEDAD Monterey Co. Cal.—Earl W. Heple, 494 Delmas Ave., San Jose, at \$21,115.75 for alternate A, and \$21,348.65 for alternate B submitted low bid to city council to construct municipal water system, consisting of wells, pumps, motors, wiring, storage reservoirs, tanks and all other equipment. C. C. Kennedy, Cal Bldg., engineer. Project involves:

Distributing System

- (1) 1950 lin. ft. 8-in. main;
- (2) 7400 lin. ft. 6-in. do;
- (3) 7610 lin. ft. 4-in. do;
- (4) 1730 lin. ft. 2-in. do;
- (5) 4 8-in. gate valve;
- (6) 40 6-in. do;
- (7) 12 4-in. do;
- (8) 4 2-in. do;
- (9) 23 hydrants;
- (10) 14,600 lbs. fittings for pipe;
- (11) 200 lin. ft. 3/4-in. copper service pipe;
- (12) 1200 lin. ft. 3/4-in. galvanized service pipe;
- (13) 100 services to be installed, including corporation cocks.

Reservoir (100,000 gal.) Under Two Alternates

Alternate A—reinforced concrete.

- (14) 1950 cu. ft. concrete;
- (15) 7000 lbs. reinf. steel;
- (16) 11,000 facing brick;

Alternate B

- Hewitt type concrete, reinf. vertically only, bands and turnbuckles.
- (17) 1680 cu. ft. concrete;
- (18) 3700 lbs. reinf. steel;
- (19) 27 bands with turnbuckles;
- (20) 1860 sq. ft. Gunite surfacing;
- (21) 120 cu. yds. excavation;
- (22) roof, complete;
- (23) inlet and outlet piping;
- (24) drainage sump;

Pump House

- (25) 35 cu. yds. excavation;
- (26) 460 cu. ft. concrete;
- (27) superstructure (steel, metal lath, plaster);

Pumping Equipment

- (28) 1 1100-g.p.m. fire pump;
- (29) 1 gasoline engine for the above pump;

- (30) 2 150-g.p.m. pumps and electric motors;
- (31) miscellaneous equipment;
- (32) 2 3-in. meters;
- (33) 1 sump pump.

Complete bids follow:

- (A) Earl W. Heple, San Jose, (A) \$21,115.75; (B) \$21,348.65.
- (B) Scott Co., San Francisco, (A) \$21,966.95; (B) \$22,169.20.
- (C) Stroud Bros. & Seabrooke, Bakersfield, (A) \$22,001.55; (B) \$21,948.95.
- (D) J. J. Ongero, San Anselmo, (A) \$23,171.20; (B) \$23,037.10.
- (E) W. J. Tobin, Oakland, (A) \$25,375.60; (B) \$25,780.49.
- (F) Contr. Engrs., Inc., Los Angeles, (A) \$26,064.10; (B) \$26,181.10.
- (G) Herman Lawson, San Francisco, (A) \$26,152.13; (B) \$26,025.53.
- (H) Hall-Johnson Co., Alhambra, (A) \$27,731.50; (B) \$27,632.90.
- (I) Robt. B. McNair, Oakland, (A) \$29,172.60; (B) \$29,219.60.

ENGINEERING NEWS

BRIDGES

SAN FRANCISCO — As previously reported, until March 7, 2 P. M., bids will be received by the Department of Public Works, Room 235, City Hall, San Francisco, to construct the Superstructure (except cables) West Bay Crossing San Francisco-Oakland Bay Bridge, and under a separate contract, the cables and attachments, West Bay Crossing, involving:

- Contract No. 6—Superstructure**
- (1) 37,000,000 lbs. silicon steel in the towers;
 - (2) 10,000,000 lbs. varbon steel do;
 - (3) 1,200,000 lbs. cast steel do;
 - (4) 700,000 lbs. heat treated eyebars;
 - (5) 510,000 lbs. carbon steel eyebars;
 - (6) 560,000 lbs. nickel steel eyebars;
 - (7) 48,000,000 silicon steel suspended structure (lbs.);
 - (8) 29,000,000 lbs. carbon steel do;
 - (9) 300,000 lbs. cast steel do;
 - (10) 600,000 manganese steel rivets, do;
 - (11) 50,000 phosphor bronze do;
 - (12) 11,600 cu. yds. conc. paving, upper deck;
 - (13) 6,300 cu. yds. do lower deck;
 - (14) 815,000 lin. ft. reinf. truss, upper deck;
 - (15) 625,000 lin. ft. do lower deck;
 - (16) 2,200,000 lbs. reinf. steel;
 - (17) 2,200 cu. yds. concrete complete.

Estimated cost, \$11,331,300.

- Contract No. 6A—Cables and Attachments**
- (18) 37,400,000 lbs. cable wire;
 - (19) 1,660,000 lbs. cable castings;
 - (20) 226,000 lin. ft. 2¼-in. suspended rope;
 - (21) 38,100 lin. ft. 1-in. handrope;
 - (22) 150,000 lbs. high tensile bolts;
 - (23) 33,000 lbs. wrought shims;
 - (24) 41,000 lbs. galv. cable fastenings.
- (San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Chas. H. Purcell, chief engineer).

SAN FRANCISCO.—Until Feb. 28, 2 P. M., bids will be received by the Department of Public Works, San Francisco-Oakland Bay Bridge, Assembly Chamber of the State Capitol, Sacramento, to construct first five piers, substructures for the West Bay Crossing from the San Francisco shoreline to Yerba Buena Island, involving:

- (1) 268,542 cu. yds. caisson work;
- (2) 10,000 cu. yds. add. caisson work;
- (3) 55,000 cu. yds. concrete seal;
- (4) 21,400 cu. yds. conc. foundations, Pier 2;
- (5) 27,000 cu. yds. conc. pier shafts and fenders, Piers 2, 3, 5, 6;
- (6) 60,500 cu. yds. superstructure for Pier 4;
- (7) 3,800,000 lbs. reinf. steel above foundations;
- (8) 300,000 lbs. struc. steel above foundations;
- (9) 1,100 MFBF timber in fenders;
- (10) 450,000 lbs. metal work in fenders
- (11) alterations to Harbor Pier 24;
- (12) 500 bbls. extra Port. cement.

(San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Chas. H. Purcell, chief engineer).

MODESTO, Stanislaus Co., Calif.—County Surveyor Geo. D. Macomber preparing plans for bridge at 19th St., Modesto, estimated cost from \$2800 for timber trestle to \$9000 for concrete span. County supervisors will discuss financing at next meeting; also type of construction.

SAN FRANCISCO — As previously reported, until March 2, 2 P. M., bids will be received by the Department of Public Works, Room 235, City Hall, San Francisco, to construct 21 piers—substructure—East Bay Crossing, San Francisco - Oakland Bay Bridge, involving:

- CONTRACT NO. 4—Piers E2 to E6 Inclusive**
- (1) 7,300 cu. yds. concrete;
 - (2) 4,960 cu. yds. concrete;
 - (3) 143,942 cu. yds. caisson work;
 - (4) 10,000 cu. yds. add. caisson work;
 - (5) 16,000 cu. yds. conc. seal piers;
 - (6) 8,780 cu. yds. concrete;
 - (7) 750,000 lbs. reinf. steel;
 - (8) 141,000 lbs. anchorage steel work;
 - (9) reconstruct Army wharf (lump sum);
 - (10) 540,000 ft. b.m. creosoted timber fenders;
 - (11) 11,000 lin. ft. creosoted fender piles;
 - (12) 165,000 lbs. metal work in fenders
 - (13) 1,000 bbls. extra Port. cement;

- CONTRACT NO. 4A—Piers E6 to E22 Inclusive**
- (14) 372,000 lin. ft. timber piles in place;
 - (15) 50,000 lin. ft. add. length do;
 - (16) 22,000 tons gravel blankets;
 - (17) 61,500 cu. yds. seal;
 - (18) 38,000 cu. yds. conc. pier shafts;
 - (19) 1,530,000 lbs. reinf. steel;
 - (20) 186,500 lbs. anchorage steel work;
 - (21) alter Key Route Pier;
 - (22) 1,000 bbls. extra Port. cement.
- Estimated cost, \$2,556,590.

(San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Chas. H. Purcell, chief engineer).
See call for bids under official proposal section in this issue.

SACRAMENTO, Cal.—A formal contract between State and County Officials signed January 25 to finance construction of proposed M St. Bridge at Sacramento. Under this agreement the State will bear approximately two-thirds of the estimated \$650,000, and the County the remainder. The State will prepare plans and supervise construction of the bridge.

WOODLAND, Yolo Co., Cal.—Rocca & Caletti, P. O. Box 243, San Rafael, at \$136,988.15 awarded contract by Joint Highway District No. 12, Second and C Sts., Yuba City, to construct Knights Landing drawbridge across the Sacramento river. Bridge will be of the double-leaf bascule type with a 200-ft. opening. Each leaf will be 111-ft. long, 24-ft. roadway, 3½-ft. sidewalk on each side of bridge.

SAN FRANCISCO—Until March 8, 2 P. M., bids will be received by State Department of Public Works, Room 235, City Hall, San Francisco, to construct Contract No. 3, San Francisco Anchorage, San Francisco - Oakland Bay Bridge, involving:

- (1) 50,000 cu. yds. excav., unclass.;
 - (2) 2,700,000 pounds anchorage steel work;
 - (3) 12,000 cu. yds. mass conc. erection block;
 - (4) 53,000 cu. yds. concrete anchorage, mass concrete;
 - (5) 3,000 cu. yds. concrete anchorage above lower deck;
 - (6) 300 cu. yds. conc. viaduct, footings; above ...Mfi etaoin vbqkqj
 - (7) 5,800 cu. yds. conc. viaduct above footings;
 - (8) 200 cu. yds. conc. railings;
 - (9) 10,000 cu. yds. concrete foundations, Piers A, B and 1;
 - (10) 9,500 cu. yds. conc. above foundations, Piers A, B and 1;
 - (11) 2,800,000 lbs. reinf. steel;
 - (12) 3,000,000 lbs. reinf. steel;
 - (13) 25,000 lbs. misc. metal work;
 - (14) elec. conduits and fittings, lump sum;
 - (15) 20,000 lbs. c. i. drain pipe and fittings;
 - (16) 10,000 lbs. castings;
 - (17) 2,000 bbls. extra Port. cement.
 - (18) lump sum, demolish buildings.
- Estimated cost, \$1,580,000. San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Charles H. Purcell, chief engineer.

SAN FRANCISCO.—Lord & Bishop, Native Sons Building, Sacramento, awarded contract by Southern Pacific Co. to construct substructure only for bridge across the San Joaquin river. Bridge is to be 235 ft. long with provision made for two 100-ft. channel spans. Will be steel swing type on creosoted pile and concrete foundations, involving:

525,000 lbs. struc. steel;
18,000 lin. ft. creosoted piling;
109 cu. yds. reinforced concrete;
30 ft. trestle;
lump sum, certain amount of center pier protection.
Cost of entire project, \$120,000.

- SAN FRANCISCO**—Until March 8, 2 P. M., bids will be received by State Department of Public Works, Room 235, City Hall, San Francisco, to construct Contract No. 7, Superstructure, East Bay Crossing, San Francisco-Oakland Bay Bridge, involving:
- (1) 6,800,000 lbs. nickel steel in spans;
 - (2) 49,000,000 lbs. silicon steel in spans
 - (3) 40,400,000 lbs. carbon steel in spans;
 - (4) 8,500,000 lbs. heat-treated eyebars
 - (5) 7,050,000 lbs. silicon steel in bents;
 - (6) 4,900,000 lbs. carbon steel in bents
 - (7) 50,000 lbs. manganese steel do;
 - (8) 25,000 lbs. phosphor bronze;
 - (9) 12,000 cu. yds. concrete paving, upper deck;
 - (10) 6500 cu. yds. concrete paving, lower deck;
 - (11) 825,000 lin. ft. reinf. trusses, upper deck;
 - (12) 653,000 lin. ft. reinf. trusses, lower deck;
 - (13) 2,116,000 lbs. reinf. steel;
 - (14) 30,500 bbls. Portland cement.
- Estimated cost, \$10,200,000. San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Charles H. Purcell, chief engineer.

OREGON STATE.—Following contractors submitted low bids to State Highway Commission, Portland, for bridge construction as follows:

Clatsop County.—F. L. Odom, Salem at \$53,733 to construct bridge over John Day river, Columbia river Highway, 4 miles east of Astoria. Gilpin Const. Co. second low at \$55,884; Barham Bros. third low at \$56,398.

A. G. Enright, Salem, at \$8,546 to construct bridge at Austin Point and culvert over Asbury creek, Oregon Coast Highway, 6 1/4 miles and 7 miles respectively south of Cannon Beach.

Jackson County.—Washburn & Hall, Portland, at \$15,977 to construct two pile trestle bridges with conc. decks over Bear creek on Pacific Highway about 1 1/2 miles north of Astland.

LOS ANGELES, Cal.—All bids, except as noted below, for furnishing materials for a bridge to be built on Second St. over the San Gabriel river, Long Beach, rejected by county supervisors Jan. 23. The bids held for further consideration were:

Cement, Prop. No. 1—Monolith Portland Cement Co.

Reinforcing Steel, Prop. No. 2—Soule Steel Co. and Truscon Steel Co. Lumber, Prop. No. 3—Consolidated Lumber Co.

Hardware, Prop. No. 4—California Hardware Co.

Miscellaneous copper work, plates, etc., Prop. No. 5, will be purchased in the open market.

SAN FRANCISCO—Until March 7, 2 P. M., bids will be received by State Department of Public Works, Room 235, City Hall, San Francisco, to construct Contract No. 5, Yerba Buena Crossing, San Francisco-Oakland Bay Bridge, involving:

- (1) 330,000 cu. yds. excav., unclass.;
- (2) anchorage tunnels, lump sum;
- (3) 3,000,000 lbs. anchorage steel work;
- (4) 2,500 cu. yds. conc. anchorage foundations;
- (5) 8,500 cu. yds. concrete anchorages above foundations;
- (6) 2,100 cu. yds. conc. viaduct and wall footings;
- (7) 9,900 cu. yds. do above footings;
- (8) 300 cu. yds. concrete railings;
- (9) tunnel construction, lump sum;
- (10) 3,500 cu. yds. concrete foundations, Piers YB-2 to YB-4 and E-1
- (11) \$100 cu. yds. conc. above foundations do;
- (12) 250 cu. yds. conc. curbs and gutters;
- (13) 375 cu. yds. crusher run base;
- (14) 280 cu. yds. crushed stone surf;
- (15) 20 bbls. fuel oil;
- (16) 22 tons cut-back asphalt;
- (17) 4,400,000 lbs. reinf. steel;
- (18) 10,000 lbs. misc. metal work;
- (19) electric conduits and fittings, lump sum;
- (20) 1,500 cu. yds. conc. pave., lower deck;
- (21) 51,000 lbs. c. i. drain pipe and fittings;
- (22) 13,000 lbs. castings;
- (23) drain tile 4- to 12-in., lump sum;
- (24) 2,000 bbls. extra Port. cement.

Estimate cost, \$2,260,000. San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Charles H. Purcell, chief engineer.

DREDGING, HARBOR WORKS & EXCAVATIONS

SACRAMENTO, Cal.—Until Feb. 10, 3 P. M., under Circular Proposal No. 33-216, Specifications No. 5196, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to furnish, deliver and place approximately 30,000 tons rlp-rap stone

along the Sacramento river between the mouth of Cache Slough and Collinsville. The specifications are obtainable from above office.

SALEM, Ore.—As previously reported, Makela Const. Co., Astoria, at \$21,651.40 submitted low bid to U. S. Engineer Office, Portland, to construct about 1623 lin. ft. of pile dikes in Willamette river at 11 different sites located 16.9 and 17.76 miles below Salem, involving:

- (1) 33,700 lin. ft. piling;
- (2) 12 M. ft. b.m. lumber;
- (3) 19,960 lbs. hardware;
- (4) 1,250 cu. yds. stone, shore rock;
- (5) 2,600 cu. yds. stone, water rock;
- (6) 1,130 pile shoes.

Complete bids follow:
Makela Const. Co., Astoria \$21,651.40
Parker-Schram, Portland 22,579.00
Gilpin Const. Co. 28,824.00
Portland Dredging Co. 29,175.00
Guthrie-McDougall Co. 30,322.00
Kern & Kibbe, Portland 30,339.00

SACRAMENTO Cal.—Until Feb. 1, 3 P. M., under Circular Proposal No. 33-211, Spec. No. 5127, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to build stretches of new levee and to raise and strengthen an existing levee along the easterly bank of the Sacramento river from Meridian downstream for 11.5 miles to Winship School, including clearing and grubbing right of way and moving, extending or reconstructing fences, road crossings, irrigation channels, drains, ditches, pipes, etc., involving 451,000 cubic yards embankment in place in levee. Specifications obtainable from above office.

IRRIGATION PROJECTS

IMPERIAL COUNTY, Cal.—The revised All-American Canal contract was approved by voters in Imperial Valley, January 12. At the time, an issue of \$14,250,000 sinking fund bonds to replace a similar amount of serial bonds now outstanding, was approved. The vote for the contract was 4240, against 672; for the bonds 4241, against 633. By the terms of the contract the Coachella Valley land owners must vote their lands into the district within thirty days after the contract has been validated by the Supreme Court. The contract, which has been approved by the Department of the Interior, provides that the Federal Government expend \$38,500,000 for the construction of a diversion dam in the Colorado River north of Yuma and various works and canals to serve Imperial and Coachella Valleys.

SACRAMENTO, Cal.—Until Feb. 10, 10 A. M., bids will be received by C. H. Merry, Secretary, American River Flood Control District, Room 410, State Office Bldg., Sacramento, for the sale of \$287,000 flood control bonds.

STREET LIGHTING SYSTEMS

LOS ANGELES, Cal.—Fritz Ziebarth, Security Bldg., Long Beach, awarded contract by Board of Public Works, January 13, at \$41,823, for constructing an ornamental lighting system in Flower St., between Washington St. and 38th St., in accordance with plan No. B-1693 and standard plan No. B-1694, involving No. 1860 Southwest street lighting standards. Cash Contract.

VERNON, Los Angeles Co., Calif.—Bids received by city council Jan. 23 for furnishing and installing an auxiliary high duty gasoline engine-driven generator unit, are as follows:

Sterling Engine Co.—(1) with Allis-Chalmers Co. equipment, at \$16,370; (2) with General Electric equipment, \$16,370; (3) with Electric Machinery Co. equipment, \$16,856.

Winton Engine Co.—(1) with Allis-Chalmers, \$21,159.50; (2) with General Electric, \$21,128; (3) with Westinghouse, \$21,004.

RESERVOIRS AND DAMS

LOS ANGELES, Cal.—Contract for the construction of San Gabriel Dam No. 1 was signed by the West Slope Construction Co. on the county board of supervisors January 16. The contract price, in the event the quantities are as estimated and all rock obtained from Quarry No. 10, is \$8,600,527. The time for completion is 66 months from Jan. 16, 1933. Bonds for faithful performance and for laborers and materialmen were in the sum of \$2,150,135 each.

SOLEDAD, Monterey Co., Calif.—Earl W. Heple, 494 Delmas Ave., San Jose, at \$21,115.75 (Alt. A. reinforced concrete reservoir) awarded contract by city council to construct municipal water system, consisting of wells, pumps, motors, wiring, storage reservoirs tanks, and other equipment. C. C. Kennedy, Call Bldg., San Francisco, prepared the plans. Start of construction will be delayed until bonds of \$37,000, which are now on sale, can be sold to finance the project.

CLARK COUNTY, Nev.—Olof Nelson, Logan, Utah, at \$159,203.01 awarded contract January 11 by State Highway Department, Carson City, for highway construction, 1.607 mile on Fifth St., Las Vegas, to 1650 ft. NE of north city limits; also 1.97 miles Bard to Las Vegas; also 1650 ft. NE of north city limits, Las Vegas, to six miles SW of Apex Summit. Quantities published in issue of Dec. 31. J. A. Casson, Hayward, second low at \$165,360.49; M. J. Bevanda, Stockton, third low at \$173,305.85.

SUNNYVALE, Santa Clara Co., Cal.—Heafey-Moore Co., 344 High Street, Oakland, at \$15,870 submitted low bid to Public Works Officer, 12th Naval District, San Francisco, to construct airplane runway and taxiway, composed of gravel, and a warming-up platform composed of cement concrete, on a gravel base course, together with tile drains along center line and sides, with a connection to the existing sewerage system. Spec. No. 715b. Complete bids follow:
Heafey-Moore, Oakland \$15,870
C. L. Wold Co., S. F. 17,666
E. W. Heple San Jose* 17,948
Union Paving Co., S. F. 19,310
A. J. Raisch, San Jose 19,540
Peninsula Paving Co., S. F. 20,603
Hutchinson Co., Oakland 21,697
E. T. Lesure Co., Oakland 24,665
*Modification of bids; deduct \$500.
Bids held under advisement.

LOS ANGELES COUNTY, Calif.—S. H. Palmer, 503 Market Street, San Francisco, and J. P. Holland, Inc., 1334 McKinnon Ave., San Francisco, bidding jointly, at \$402,667.70 awarded contract by State Highway Commission to grade and pave with asphalt

concrete 4.1 ml. bet. Las Flores Canyon and Santa Ynez Canyon.

PERSHING COUNTY, Nev.—Dodge Bros., Fallon, at \$69,293.28 submitted low bid to State Highway Department, Carson City, to construct a cement concrete pavement through the city of Lovelock, 1.22 miles. Quantities published in issue of Dec. 31. Only other bid submitted by M. J. Beveda, Stockton, at \$70,343.64. Bids taken under advisement.

SEWERS AND SEWAGE DISPOSAL PLANTS

LOS ANGELES, Cal.—A. K. Warren, Chief Engineer of the Los Angeles County Sanitation Districts, Law Bldg., 133 N Broadway, Los Angeles, has recommended to the directors of County Sanitation Districts 1, 2, 5, and 8, that the boards appropriate funds from which to pay immediately into court the amounts awarded as condemnation damages in the Whites Point Outfall right of way suit. The money must be paid within thirty days. While an appeal is expected, no information from the property owners is available.

Construction of this project will cost \$2,750,000, and will involve a tunnel 38,800 ft. in length, traversing the hills lying between Harbor City and Whites Point, the point selected for the ocean outfall. This tunnel will probably be constructed in three sections, two being heavy work in the hills and the other about 14,000 ft. located in the lower ground north of the hills near Harbor City. The latter section will probably be built by shaft and tunnel.

At the present time, Mr. Warren plans to do the work by contract. The project will be divided probably into four contracts, three for the tunnel work and one for the ocean outfall. Preliminary plans have been under way for some time but borings and other tests will have to be made before final data for bidding is compiled.

LOS ANGELES, Cal.—Merritt-Chapman & Scott Corp., 720 Wilmington Road, San Pedro, submitted low bid to board of public works January 25 at \$62,972 (based on the use of vitrified and cast iron pipe, Total I), for the construction of sewer crossing the main ship channel between Harbor Blvd. and a point north of Terminal Way, in the San Pedro District, under cash contract, involving:

- (1) 680.20 lin. ft. vit. clay pipe sewer, lump sum;
 - (2) 278.56 lin. ft. cast iron pipe sewer, lump sum;
 - (3) 1340.78 lin. ft. flexible joint cast iron pipe sewer, lump sum;
 - (4) alternate: 1340.78 lin. ft. special relnf. flexible (type "B" couplings) rubber piece sewer, lump sum.
- (1), (2) and (3) complete, lump sum.
 (1), (2) and 4, complete, lump sum.

Complete bids follow:
 (A) Merritt-Chapman & Scott Corp., Total I \$62,972.00.
 (B) Lee R. Weber, Total I, \$73,620; Total II \$69,533.

(C) Artukovich Bros., Total I, \$93,340.
 (D) Engineer's estimate, Total I, \$60,432; Total II, \$62,548.

Unit bids follow:

	(1)	(3)	(4)
(A)....	\$14,383	\$15,992	\$32,597
(B)....	21,000	19,583	33,037
(C)....	24,140	34,600	37,600
(D)....	13,800	13,222	33,410

SIGNAL HILL, Los Angeles Co., Cal.—Until 3 P. M., Feb. 13, bids will be received by city council for re-wiring of three pumping stations for the city sewer department in accordance with Spec. S-P-2-A on file in the office of the City Clerk, George H. Cooper.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—F. E. Weymouth, Chief Engineer and General Manager of the Metropolitan Water District, issued a statement Jan. 20, following the meeting of the board of directors, announcing that the time for signing of the contract for the construction of the San Jacinto Tunnel has been extended one week from January 20, the date of the second extension. The Metropolitan Engineering Corp., the successful bidder, presented to the board a letter in which the corporation offered to give to the district security for \$400,000 additional to the cash fund which the corporation had agreed to keep up to \$900,000 (including the \$150,000 paid the district in lieu of a performance bond) during the life of the contract. In addition to the offer of \$400,000, the corporation offered the personal surety of individual members of the firm to take care of the labor and material bond as required by statute. The board adjourned to executive session behind closed doors to consider the proposal. No further announcement was made.

The board of directors inducted into office three new directors as follows: D. W. Pontius, President of the Pacific Electric Railway and present comptroller of the District, representing Los Angeles.

Walter A. Ham, attorney, also representing Los Angeles, and W. A. Foster, representing Compton.

LOS ANGELES, Cal.—F. E. Weymouth, General Manager and Chief Engineer of the Metropolitan Water District, 306 W 3rd St., Los Angeles, has announced that Spec. No. 12, for the construction of the Valverde and Bernasconi tunnels of the Colorado river aqueduct, approved January 2, 1933, for which bids were to have been opened at 2 P. M., January 30, have been **withdrawn and cancelled**. Revised specifications for the construction of these tunnels will be issued at an early date.

WATERWORKS

LA HABRA, Orange Co., Cal.—City Council has announced an offer of \$65,000 for the purchase of the complete system of the American States Water Co.

The city council has also rejected bids for pipe, fittings, hydrants, etc., for which bids were received Dec. 27. The city will buy in the open market. John G. Sanks, city engineer.

COLTON, San Bernardino Co., Cal.—Until 7:30 P. M., Feb. 5 (tentative date), bids will be received by city council to furnish 14-gauge welded steel drive pipe as follows:

- (1) 4500 ft. 6-in. pipe;
- (2) 500 ft. 4-in. pipe.

The pipe is to provide extensions to water mains in alleys between F and G streets from 3rd to 5th, and portions of other streets. The work will be done by force account under the supervision of C. A. Hutchinson, city engineer. C. H. Maxwell, water superintendent.

HEMET, Calif.—City council will meet Feb. 6 to formulate definite plans for the calling of a special election to vote on a \$121,000 bond issue to finance the establishment of a municipal water system. A survey for the purpose of preparing data, estimates, and costs was prepared by Burns-McDonnell-Smith Engineering Corp., Western Pacific Bldg., Los Angeles. Mayor J. C. Loomis is chairman of the water committee. The other members are: Councilman Robert G. Record and Councilman Carl M. Thompson.

SAN FRANCISCO—Bids will be asked about February 1 by the City and County of San Francisco, to construct water supply system about 3 mi. in length from San Andreas to the site of the Sneath Ranch jail in San Mateo County. Will be of 10-in. cast iron pipe. Estimated cost, \$35,000. Plans by Bureau of Architecture.

SONOMA, Sonoma Co., Cal.—Bond election date will be set and Resolution of intention to vote bonds passed Wednesday night, February 1, by city council, City of Sonoma. Election for \$33,000 bonds for complete municipal water system. Hussey & Beheer, Syndicate Bldg., Oakland, engineers.

LOS ANGELES, Cal.—A bid of par for a \$4,032,000 block of Metropolitan Water District bonds was submitted to the board of directors Jan. 27 by the Reconstruction Finance Corporation. The bids was taken under advisement until 1 P. M., Wednesday, Feb. 1. The bonds bear interest at 5%.

OAKLAND, Cal.—United States Pipe & Foundry Co., Monadnock Bldg. San Francisco, at \$22,800 submitted low bid to East Bay Municipal Utility District, Oakland, to furnish 40,000 ft. cast iron pipe, 6-in. dia. Complete bids follow:

- U. S. Pipe & Foundry Co. (18-foot lengths), \$.50 ft.; \$22,800.
- R. D. Wood Co., by Utilities Supply Co., \$.58 ft.; \$23,200.
- Pacific States Cast Iron Pipe Co., \$.60 ft.; \$24,000.
- American Cast Iron Pipe Co. (16-ft. lengths) \$.615 ft.; \$24,600.

HOQUIAM, Wash.—Pacific States Cast Iron Pipe Co., Spalding Bldg., Portland, Ore., at \$4406 (f.o.b. Moclips Wash.) submitted low (lump sum) bid to Superintendent, Taholah Indian Agency, to furnish:

- (1) 3625 lin. ft. Class 150 b&s 6-inch cast iron water pipe;
- (2) 1700 lin. ft. 4-in. do;
- (3) 5000 lin. ft. 2-in. do;

Complete lump sum bids follow: Pacific States C. I. Pipe Co., Portland, \$4406 f.o.b. Moclips, Wash., \$3,735 f.o.b. Provo, Utah.

Olympic Foundry Co., Seattle, \$4,764.20 f.o.b. Moclips; \$3980.20 f.o.b. Ironton, Utah.

McWane Cast Iron Pipe Co., Birmingham, Ala.
 Bids held under advisement.

INGLEWOOD, Los Angeles Co., Cal.—Until 8 P. M., Feb. 6, bids will be received by city council for furnishing and installing one booster unit at the City's Well No. 16, located at the northwest corner of 10th Ave. and 80th St., Inglewood, in accordance with plans and specifications which may be obtained from the city engineer, Arthur W. Cory. Certified or cashier's check, 10%. Otto H. Duelke is city clerk.

VERNON, Los Angeles Co., Calif.—Until 8 P. M., Feb. 6, bids will be received by city council for two fuel oil storage tanks to be installed in the power house yard. Bids will be taken on 15,000 bbl. and 9500 bbl. tanks. H. S. McCurdy, city engineer. T. J. Furlong, city clerk.

FORT LEWIS, Wash.—Walsh Construction Co., 2246 First Ave. So., Seattle, at \$17,762 submitted low bid to Constructing Quartermaster, Fort Lewis, to construct cast iron water mains, involving 5500 ft. 10-in. and 4500 ft. 6-in. also several hundred feet 4-in. c. i. main. Complete bids follow: Walsh Constr. Co. \$17,762 West Coast Constr. Co. 17,772 Queen City Constr. Co. 19,500 A. DelGuzzo 19,830 L. Colluccio & Co. 21,250 Hall & Reese 21,255 Joe Colucio 21,400 Argentiery & Colorace 21,420 Universitey P. & H. Co. 21,490 Joseph Warter, Sr. 21,500 Paine & Galluci 21,566 Joe Paduano 21,644 Lee H. Johnson 21,660 A. Ioffredo 21,776 C. Rinaldo 22,721 Puget Sound Constr. Co. 22,740 Angelo Scarcelia 22,900 H. J. Alder & Co. 23,000 Sam Maeri 23,513 NePage-McKenny Co. 27,585 Bids held under advisemen't.

%LOS ANGELES, Cal.—As previously reported, Clark & Campbell and A. J. Callahan, 1358 E Manchester Ave., Los Angeles, submitted low bid to Metropolitan Water District on Jan. 12 at \$12,233, for work under Schedule No. 2 (construction of pipe line using light weight outside diameter gas line pipe) for Sections 6 and 7 of the construction water supply system for the Colorado River Aqueduct.

- The total bids follow:
- (A) Clark & Campbell and A. J. Callahan, \$12,233.00.
 - (B) Ray Schweitzer, \$14,218.65.
 - (C) Lee R. Weber, \$15,318.40.
 - (D) J. E. Haddock, \$16,883.00.
 - (E) Marko Matriek, \$18063.50.
 - (F) Kemper Const. Co. and Lang Transportation Co. \$18,761.50.
 - (G) Macco-Robertson, \$18,807.50.
 - (H) Winston Bros. Co., \$19,452.00.
 - (I) Herbert M. Baruch Corp. and Robinson Roberts Co., \$20,050.00.
 - (J) J. C. Hickey, \$21,209.72.
 - (K) Ashbury Transportation Co., \$22,328.50.
 - (L) Lindgren & Swinerton, \$22,704.00.
 - (M) Lynch-Cannon Eng. Co., \$23,243.74.
 - (N) American Concrete & Steel Pipe Co., \$25,450.00.

STREETS

WASHINGTON STATE — Tucker Bros. & Scott, Kalispell, Mont., at \$73,215 (under schedule B) awarded contract by State Highway Commission to grade and surface 3 mi. State Road No. 4, Section 2, Tonasket-San Poil Highway, Okanogan County. Low bid under Schedule A was \$73,721. American Construction & Digging Co., Spokane, second low at \$74,988 for schedule A and \$75,077 for schedule B; Kesterson Construction Co., Inc., Seattle, third low at \$77,265 for schedule A and \$77,933 for schedule B.

LOS ANGELES COUNTY, Cal.—Von der Hellen & Pierson, Castle, at \$56,678 awarded contract by State Highway Commission, to grade and pave with Portland cement concrete 1.5 ml. between Oaks and Vasquez Rock Road.

WASHINGTON STATE—Following contracts awarded by State Highway Commission for bridge construction as follows:

OKANOGAN COUNTY—West Coast Constr. Co., Lloyd Bldg., Seattle, at \$8585 to construct reinforced concrete arch bridge 113 ft. long, over Bonapart Creek on the Tonasket-San Poil Highway. Ray McCoy, Seattle, second low at \$8960; Henry Hagman, Cashmere, third low at \$9130.

OKANOGAN COUNTY — Henry & Meenan, Ellensburg, at \$5174 to construct reinforced concrete girder bridge 100 ft. long, over Griggs Canyon on State Road No. 19, between Pateros and Brewster, Chehan and Okanogan highway. Strandberg & Co., Seattle, second low at \$5566; H. C. Mallott, Seattle, third low at \$5887.

SAN FRANCISCO. — Department of Public Works plans to improve Kirkham St. bet. 33rd and 34th Avenues; 34th Ave. bet. Kirkham and Lawton; and Ortega between 39th and 41st Sts., involving: 200 ft. 6-in. V.C.P. side sewer; 205 ft. unarmored concrete curb; 32 ft. armored concrete curb; 5312 sq. ft. asph. conc. pave. Estimated cost, \$2,085.

MONTEREY, Monterey Co., Calif.—Until March 1, bids will be received by Quartermaster, Presidio of Monterey, to construct 2300 ft. of asphaltic pavement 18-ft. wide in front of officers' quarters at the post. Specifications obtainable from above on deposit of \$5, returnable.

MOUNTAIN VIEW, Santa Clara Co. Cal.—Hearing continued by Judge Syer, superior court, until Feb. 9, on injunction on hearing on Resolution to extend Moffett Blvd. from the north-easterly city limits to the Bayshore Highway. Ray Hays, city clerk. C. C. Kennedy, Call Bldg., San Francisco, city engineer.

OREGON STATE.—J. A. Tertelling & Son, 511 Sound, Spokane, at \$26,353 (both concrete and corrugated iron pipe alternates) awarded contract by State Highway Commission, Portland, to construct 0.89 miles of grading Drinkwater Pass Section, Central Oregon Highway. Clifton & Applegate second low at \$39,054 for concrete and \$39,902 for corrugated iron pipe; Interstate Const. Co. third low at \$44,820 for corrugated iron and at \$45,010 for concrete pipe.

OREGON STATE.—Following contractors submitted low bids to State Highway Commission, Portland, for highway construction as follows:

Jackson County.—Washburn & Hall, Portland, at \$62,130 (corr. iron pipe alt.) for 1.5 miles grading and concrete paving Bear creek-Ashland Section, Pacific Highway. Low bid on concrete pipe alternate was \$62,645. Jacobsen-Jensen Co. second low at \$70,681, and \$71,011; Johnson Bros. third low at \$74,171 and \$74,149.

Washington County.—Saxton and Looney, Corvallis, at \$12,449 for 0.2 mile grading and concrete paving, and 5 miles gravel shoulder construction, Forest Grove-Hillsboro Section, Tula-tin Valley Highway. Forest Grove Sand & Gravel Co. second low at \$12,452; O. N. Pierce, third low at \$13,152.

MARIPOSA COUNTY, Cal.—Nelson & Wallace, 2nd and Coley, Escalon, at \$10,359.50 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to construct the Bridal Veil Creek Bridge and approaches on Section A1 of Route 5, Wawona Road,

Glacier Point, Yosemite National Park involving:

- (1) 1000 cu. yds. unclass. excav.;
- (2) 315 cu. yds. unclass. excav., struc.
- (3) 9 cu. yds. Class A concrete;
- (4) 25 cu. yds. Class B concrete;
- (5) 6000 lbs. reinf. steel;
- (6) 335 cu. yds. masonry;
- (7) 19,000 lbs. struc. steel;
- (8) 68 lin. ft. log stringers;
- (9) 125 lin. ft. log rail.

Complete bids follow: (A) Nelson & Wallace, Escalon, \$10,359.50.

(B) E. T. Lesure, Oakland, \$12,839.60. (C) Kelly & Tipton, Yosemite, \$13,967.00.

(D) Associated Contractors, Inc., Los Angeles, \$19,167.00.

(E) Engineer's estimate, \$10,102.00.

Unit bids follow:

	(A)	(B)	(C)	(D)	(E)

OREGON STATE.—Following contracts awarded by the State Highway Commission, Portland, for highway construction as follows:

Clackamas County.—Saxton & Looney, Corvallis, at \$67,514 awarded contract to construct 1.1 miles Clackamas River-Canemah Section, Pacific Highway. Theo. Arenz, Portland, second low at \$70,005; R. L. Houck, third low at \$75,075.

Deschutes, Crook & Klamath Counties.—Griffith & Hollenbeck, Bend, at \$9,412 for Redmond-Chemult maintenance material project, north unit. Johnson Bros. second low at \$9,436. F. H. May third low at \$9,898.

A. S. Wallace, Roseburg, at \$8,875 for Redmond-Chemult maintenance material project, south unit. Johnson Bros. second low at \$9,257; Saxton & Looney, Corvallis, third low at \$9,825.

Douglas County.—F. C. Dillard, Medford, at \$22,132 for 2100 lin. ft. grading and gravel surfacing Koepke Slough and Hinsdale Slough Sections, Umpqua Highway. Liesch & Tofte second low at \$25,712; Interstate Construction Co. third low at \$26,055.

Gilliam County.—J. S. Risley, Milwaukie, at \$9,655 to furnish 9,000 cu. yds. crushed stone in stockpiles on Arlington-Rock Creek Section, John Day Highway and the Blalock-Heppner Junction Section, Columbia river highway. A. C. Greenwood second low at \$11,250; O. N. Pierce third low at \$11,700.

Tillamook County.—Berke Brothers, Portland, at \$35,695 (iron pipe alt.) for 1.25 miles grading and surfacing and furnishing 5000 cu. yds. crushed gravel in stockpiles, Honey-Ranch-Rolph Section, McMinnville-Tillamook Highway. Low bid, concrete pipe, \$36,635. Fisher Bros. second low at \$35,991 and \$37,521; Theo. Arenz, Portland, third low at \$37,700 and \$38,620.

SAN FRANCISCO.—Love & Haun, 335 Collingwood, San Francisco, at \$5,975 submitted low bid to Department of Public Works to improve Bernal Ave. slopes, Randall to Diamond, by planting, involving:

- (1) trees;
 - (2) wood slope.
- Complete bids follow: (A) Love & Haun \$5975 (B) Eaton & Smith \$2600

Unit bids follow:

	(A)	(B)
(1).....	\$5675.00	\$7900.00
(2).....	50.00	60.00

LOS ANGELES, Cal.—Morrison Knudson Co. 1121 Title Guaranty Bldg. Los Angeles, awarded contract by the Metropolitan Water District, Jan. 13, at \$131,284.75 (on combined schedules 1 and 2), for constructing approx. 36 miles roads for the Colorado River aqueduct. The roads are located north of the Coachella Valley, extending from a point north of Palm Springs to a point northeast of Indio in Riverside County, the work to be contracted for consisting of all necessary excavation and grading, and the placing of surfacing materials, culvert pipes, riprap and protection works as shown on the drawings. All materials and labor are to be furnished by the contractor with the exception of road oil, which will be furnished by the District, and all bids are to be compared on the basis of the engineer's estimate of the quantities of the various classes of work and materials, as contained in the schedules.

The work has been divided into two schedules. Schedule 1 requires the construction of the Coachella Valley Station 0 plus 00 to 426, and the Berdoo Canyon Road from Station 65 plus road from Station 190 to 500 and from 50 to Station 323 plus 40, a total distance of approx. 19 miles. Schedule 2 requires the construction of the Coachella Valley road from Station 426 to 1330 plus 85, or approx. 17 miles.

WASHINGTON STATE.—Following low bids submitted January 17 to the State Highway Commission for highway construction as follows:

Walla Walla County—Lyon & Munro 503 W 14th Ave., Spokane, at \$52,408 to surface and stockpile about 48,730 cu. yds. crushed stone 9.1 miles of State Road No. 3, Touchet to Vancycle Canyon, E.C.H. Proj. No. E-169-E. H. C. Rogers & Sons, Dayton, second low at \$53,182; J. H. Collins and Co., Spokane, third low at \$54,926.

Okanogan County.—Halleran Bros., 2352 N Broadway, Seattle, at \$48,780 for Schedule A, \$49,140 for Schedule B; to grade and surface 3 miles of State Road No. 4, Section 1 of Tonasket easterly, E.C.H. Proj. Nos. E-65 and E-103. Goodfellow Bros., Wenatchee, second low at \$49,515 for A and \$49,342 for B; Frank J. McHugh, Seattle, third low at \$51,914 for A and \$51,783 for B.

Klickitat County.—Morrison-Kundsen Co., Spokane, at \$374,494 to grade 4.2 miles of State Road No. 8, Lyle to Skadat, E.C.H. Proj. No. E-174-C. Kern & Kibbe, Portland, second low at \$390,737; Von der Hellen & Pierson, Yakima, third low at \$417,19.

Okanogan County.—Goodfellow Bros. Inc., Wenatchee, at \$74,729 to grade and surface 3.9 miles of State Road No. 10, Pateros to Brewster Flats, E. C. H. Proj. No. E-145-I. Ralph Davis, St. Johns, second low at \$77,376; Ivor Reese, Seattle, third low at \$78,147.

All bids held under advisement.

LOS ANGELES, Cal.—Until 10 A. M., Feb. 8, bids will be received by Board of Public Works for improving 64th St., between Main St. and 633.86 ft. westerly, under Cash Contract, involving:

- (1) grading (774 cu. yds. cut and 57 cu. yds. fill, incl. removal of existing improvements);
- (2) 19,368 sq. ft. 6-in. concrete paving;
- (3) 34 sq. ft. class C resurfacing;
- (4) 488 sq. ft. asph. concr. paving of variable thickness (average thickness 2-in.);
- (5) 1306 ft. unplas. light curb;
- (6) 209 sq. ft. 4-in. concr. sidewalk (driveway);
- (7) 9257 sq. ft. 3-in. concr. sidewalk (driveway);

- (8) 26 sq. ft. 8-in. concr. gutter;
- (9) storm drain and appurtenances, complete, not incl. resurfacing.

LOS ANGELES COUNTY, Calif.—I. E. Haddock, Ltd., 357 N Chester Ave., Pasadena, at \$138,119.08 recommended for award by U. S. Bureau of Public Roads, San Francisco, to grade Section C of Route 62, San Gabriel National Forest Highway, Angeles National Forest.

ALHAMBRA, Los Angeles Co., Cal.—City Commission has adopted an ordinance to improve north and south alley between Second St. and Third St., and between Ramona Blvd. and Glendon Way, involving grading and 1½-in. oil macadam pavement, Hearing 9 A. M., February 7.

LANE COUNTY, Ore.—Until Feb. 8, 10 A. M., bids will be received by U. S. Bureau of Public Roads, 316 New Post Office Bldg., Portland, to construct 3.261 miles Siusald Highway Grading Project No. E-7-G. National Forest Road Project, Siuslaw National Forest, involving:

- (1) 19 acres clearing;
- (2) 10 acres grubbing;
- (3) 115,400 cu. yds. unclass. excav.;
- (4) 515,000 sta. yds. overhaul;
- (5) 3,261 mi. finishing earth graded road;
- (6) 2500 cu. yds. loose rip-rap;
- (7) 1090 lin. ft. culverts.

Plans and specifications obtainable from above on deposit of \$10, returnable. Proposal guarantee, 5%.

CLARK COUNTY, Nevada — Bids will be called about February 20 to close March 8 (tentative date) by State Highway Department, Carson City, Nevada, S. C. Durkee, State Highway Engineer, to oil 10.67 mi. between Lower Virgin River Bridge and Mesquite.

Specifications will be available after Feb. 20 at above office; county clerk's office; U. S. Bureau of Public Roads, 461 Market St., San Francisco, and will be obtainable on deposit of \$15, of which \$10 is returnable. Proposal guarantee, 5%.

ELKO COUNTY, Nevada—Bids will be called about Feb. 20 to close Mar. 8 (tentative date) by State Highway Department, Carson City, Nevada, S. C. Durkee, State Highway Engineer, to construct 1.21-mi. Portland cement concrete pavement through the City of Elko.

Specifications will be available after Feb. 20 from above office; county clerk's office; U. S. Bureau of Public Roads, 461 Market St., San Francisco, on deposit of \$15, \$10 of which is returnable. Proposal guarantee, 5%.

MEXICO—Budget appropriations for highways in Mexico to be built during 1933 are:

Mexico City—Ministry of Communications and Public Works—8,000,000 pesos (\$2,665,500 U. S.)

Guanajuato—State Government—310,000 pesos (\$103,000 U. S.)

Durango City—Municipal Government—200,000 pesos (\$66,500 U. S.)

WOODLAND, Yolo Co., Cal.—Until Feb. 17, 2 p. m., bids will be received by Joint Highway District No. 12, Second and C Sts., Yuba City, to construct north approach to Knights Landing bridge, involving 2800 cu. yds. rough grading. Plans and specifications obtainable from Edward von Geldern, engineer for the district.

LOS ANGELES, Cal.—Ordinance of Intention No. 72,250 to improve Barrington Ave., between Dorothy St. and Darlington Ave., and between Wilshire Blvd., and Santa Monica Blvd., and portions of other streets and alleys in the Barrington Ave. and Rochester Ave. Improvement District, adopted by city council January 10. Proceedings under 1911 Act and Assessment Limitation Act of 1931. The council will contribute \$36,000 from the engineering special fund (County Aid Act). Estimated cost, \$78,155.78. Hearing February 9. The work involves:

- (1) grading, lump sum;
- (2) 12,798 sq. ft. 6-in. concr. paving;
- (3) 3786 sq. ft. 6½-in. concr. paving;
- (4) 565 sq. ft. 8-in. concr. local depressions;
- (5) 214,390 sq. ft. 6½-in. asph. concr. paving;

BRIDGE CONTRACTS RAISE S. F. PERMIT TOTAL FOR MONTH

Additional Golden Gate Awards Allotted to City In January

Additional Golden Gate Bridge contracts are included in the January valuation of San Francisco building permits, bringing the total for the month to \$14,557,555, according to the report filed by William H. Worden, director of public works.

The bridge permits account for \$12,440,700 of the total. They include portions of the steel superstructure, cable and pier contracts. The allocation of \$10,000,000 of the steel superstructure contract to San Francisco valuations is based on the fact that the San Francisco county line extends to the Marin shore and therefore, brings virtually the entire bridge structure within the county boundaries. For this reason the north pier contract, amounting to \$450,000 and an additional portion of the cable contract valued at \$1,990,700 are added to this month's permits.

United States government work accounts for \$1,798,850 of the total. This includes permits for the Fort Miley veterans hospital work, aggregating \$1,150,980 and for the post office addition, \$645,479.

Remodeling and repair work compares favorably with the volume reported in January, 1932, both in number of permits and in dollar value. For this classification 227 permits were issued last month, compared with 257 for January a year ago. The value of work represented is only about 10 percent below the value reported a year ago, being \$100,055 this year, compared with \$112,683 in January last year.

Following is a report of the month's permits, showing totals for each classification in comparison with last January:

Class	January, '33		January, '32	
	No. P'mts	Est. Cost	No. P'mts	Est. Cost
A
B	2	\$ 105,000	1	\$ 25,000

Frames	31	107,200	107	414,005
Alteration	227	100,055	257	112,683
Public	3	12,440,700	1	39,000
U.S. Govt.	5	1,798,850	1	6,936
Total	272	\$14,557,555	371	\$606,149

CITY ASKS BIDS ON HETCH HETCHY PIPE LINE LINK

Bids will be received Feb. 24 by the San Francisco Public Utilities Commission for construction of a pipe line in the Bay Crossing Division of the Hetch Hetchy aqueduct. The estimated cost is \$200,000.

Proposals will be for steel pipe line and accessories and for an alternate specification of steel cylinder reinforced concrete pipe line with short lengths of steel pipe and accessories.

Specifications are obtainable at Room 609, San Francisco Water Department, 425 Mason St.

L. A. GETS LOAN FINANCING NEW ELECTRIC LINE

Interior Department Approves \$13,000,000 Dam Contract

A loan of \$22,800,000, granted by the Reconstruction Finance Corporation to the Los Angeles Bureau of Power and Light will finance the major portion of construction of the proposed high tension power transmission line between the city and the Hoover Dam power project.

In addition to the loaned funds the municipal bureau will expend \$10,000,000 of its own money on the extension.

The power line and switching station will cost \$15,711,000; a step-down station to be located in Los Angeles, \$2,112,000; a local transmission line in the city, \$1,704,000; four receiving stations, \$3,273,000.

E. F. Scattergood, chief engineer, estimates that two years will be required to complete the project and that 2000 men will be required.

Approval has been given by the Department of the Interior to the contract for co-operative construction and operation of the \$13,000,000 diversion dam on the Colorado River at Parker, about 155 miles below Hoover Dam.

Los Angeles Metropolitan Water District will advance the money for construction which will be effected by the Federal government.

The site selected is the one known as the upper Parker site and is just below the mouth of the Bill Williams river. It will raise the water level about 70 feet and will provide a head to generate about 80,000-h.p. of electrical energy. The estimated cost is \$12,958,000. The estimated cost of works designed to pass the river flow after the Colorado river is regulated by the Hoover Dam is \$2,640,000.

The dam will be for the joint benefit of the district and of Indian and public lands in Arizona.

LACK OF LICENSE COSTS \$25 FINE

A fine of \$25 was paid by Robert Sloan of Los Angeles when he pleaded guilty before Justice of the Peace R. K. Roberts at Sunnyvale to operating as a contractor without a license. Sloan is president of the Calnevari Trucking Company, Inc., sub-contractors on a section of the Bayshore highway.

Sloan was arrested on a complaint filed by James Fellow inspector for the registrar of contractors.

Bail of \$1000 bond or \$500 cash is being required by peninsula judges on complaints involving the contractors' license act.

NOMINATIONS FOR DIRECTORS DUE

Directors of the San Francisco Builders' Exchange will be elected at the annual meeting to be held in March. Nominations of the crafts for directors and appointments of delegates and alternates to the central council will be received this month by the Exchange.

Each member of the Exchange will receive a notice to meet with his craft at a given date and hour during February in the Exchange to nominate a director.

\$15,000,000 Remodeling Created By Civic Campaign in Philadelphia

PHILADELPHIA, Feb. 9.—(Special).—Has Philadelphia found a key that can be made to unlock the door to a revival of business and employment? Can the plan which brought about more than \$15,000,000 of new business here in less than three weeks be followed on a national basis through the cooperation of other communities and thus revive business on a tremendous scale?

Leaders of the Renovize Philadelphia Campaign believe the answer to both questions is "yes." They point out that the campaign, still far from complete, has already surpassed the preliminary estimates and they assert that the final results will be an astounding demonstration of what can be accomplished when a community unites its efforts along sound lines to improve business conditions.

Spurred on by the success of the venture in Philadelphia, other cities already are considering similar campaigns. Mrs. Franklin D. Roosevelt, wife of the President-elect, is studying the Philadelphia plan with a view to its application in New York City. Business leaders in half a dozen nearby cities and towns—Harrisburg, Easton, Coatesville, Reading and Lancaster, Pa., and Ocean City, N. J.—are trying to promote the plan in their communities, and requests for information have been received from points as distant as the West Coast.

Launched with the endorsement of President Hoover, the Renovize Philadelphia Campaign is similar in many respects to home modernization plans that have been tried with varying degrees of success in other cities. Yet the whole tenor of it is something quite distinct, something clearly to be differentiated from the "made work" movement.

You won't find "renovize" in the dictionary, but any Philadelphian can tell you that it means "to repair, remodel, restore." And so thoroughly has this campaign been advertised, he might even add the rest of the slogan, "at today's bargain prices."

That is the basic idea of the Philadelphia plan—an appeal to the self-interest of the individual to help himself by making necessary repairs and improvements now and taking advantage of prices the like of which he may ever see again. That these expenditures result in work for the unemployed and in improvement of business generally throughout the community follows as a matter of course. But the appeal is essentially one to the self-interest of the individual.

Conceived by the Philadelphia Federation of the Construction Industry, the "renovize" plan was submitted to the leading business and professional men of this city. They saw its possibilities. Other civic minded persons were consulted and eventually an organization

was perfected with a general council of forty of the outstanding men and women of Philadelphia—conservative, keen-minded bankers, merchants, insurance men, labor leaders and directors of public utilities. A thousand trade, civic, community and religious organizations were induced to cooperate and seven thousand volunteer workers, grouped in teams, went out to canvass every residence and place of business in the city and its suburbs.

Not since the Liberty Loan drives of the war days, has staid old Philadelphia seen such community spirit and enthusiasm. Full-page advertisements cried out the message from every newspaper; signs and posters appeared in every street car, taxicab, subway and elevated; thousands of other posters were placed in store windows by boy scouts; flags flew from rooftops and doorways; billboards displayed the familiar emblem; pamphlets accompanied gas and electric bills; speakers spoke over the radio; an autogiro flew over the city with a gigantic sign "renovize"; and every day the newspapers carried the news of the progress of the campaign. All this cooperation was contributed, as was the services of an advertising agency that organized and conducted the publicity.

It wasn't long before the whole community began to see the possibilities of the thing. One newspaper after another appeared with columns of small classified advertisements—advertisements placed by painters, carpenters, plumbers, roofers, plasterers and others, many of them small business concerns that had not heard the ring of the cash register in months.

A heating contractor, who heretofore confined his work to installations, purchased 25 trucks, made each an individual repair unit, hired 25 mechanics, and went out after the small jobs that were inspired by the mass selling effort. A carpenter and a painter, unemployed since summer, made a canvass of their neighborhood. Two months ago they had done this with no results. This time they obtained enough work to keep them busy 16 weeks. Merchants began replenishing their stocks.

One of the reasons for the success of the campaign, according to Wm. A. Law, chairman, and H. P. Liversidge, vice-chairman, is that no effort was made to parcel out the work to the unemployed. The movement recognized that unemployment applies to the contractor and jobber as well as to the individual craftsman, that if one gets work the other will get work also. Accordingly property owners were not asked to give employment to nor to accept the services of any specified individual or concern. They were asked simply to sign a pledgecard stating the amount they

would spend during the following six months and they were encouraged to call upon their own dealers and tradesmen, preferably those in their own neighborhood. This removed all element of charity and put it up to the property owner simply as a good business proposition. Later on the pledges will be followed up to see that the work has been done.

To assist property owners in developing their renovizing plans the campaign maintained an architectural and engineering bureau, but this bureau would not furnish working drawings or specifications. It also maintained a construction bureau to give advice on estimates and the award of contracts. Seven check lists of suggestions were made available for owners of homes and various types of business buildings—the first time such lists have ever been prepared for the general public. An exposition showing rooms in need of modernization and the same rooms after renovizing was opened to the public—visual evidence of the increased comfort and value that can be obtained by a relatively small expenditure. All this awakened interest and spurred property owners to make needed improvements now without waiting for the turning of that elusive business corner.

Mr. Liversidge, the vice-chairman of the campaign, is vice-president of the Philadelphia Electric Company, which with other public utilities, has been a real leader in the movement. Authoritative studies of the Federal Reserve System, he said, show that every dollar put into circulation multiplies twenty-five times in the period of a year.

"Our Renovize Philadelphia Campaign has already brought in pledges of \$15,000,000 for work to be done in the next six months," Mr. Liversidge said. "That is equivalent to an annual volume of business of \$375,000,000. Before we have finished, our figure will be much higher than that."

"There is no magic about what has been done here. I do not see why it could not be done in any other community, large or small. If the plan were adopted throughout the country, there is no doubt but that business would be improved and unemployment would be decreased."

QUARANTINE STATION PLANS ARE COMPLETE

Plans are complete for the new \$250,000 federal quarantine station to be constructed at Hudson Point at the entrance to Townsend Harbor, Washington, it was reported yesterday in Seattle. The government is expected to ask bids soon for the contract which will include a two-story executive building, attendants' quarters, a slip for boarding launches, and miscellaneous small structures.

Buildings will be of brick construction and will be built on a pier foundation extending over the tide flats.

Eastbay Needs 5000 Single-Family Dwellings, Says Real Estate Board

A building program which will supply 5000 new single-family homes within the next three years for the accommodation of Eastbay people is justified by analysis of official data compiled by the Oakland Real Estate Board, according to a report to the members of that organization by James H. L'Hommedieu, its president.

Such a program would result in the release of more than \$10,000,000 in pay roll wages to building trades and in increasing current business activity by \$100,000,000; it would put the building trades to work again, giving employment to the largest group of wage earners now included in the local unemployment list; and it would provide adequate housing for Eastbay families, 5000 of whom now occupy homes jointly with other families, L'Hommedieu points out. He states

Program Urged

"With our local population steadily increasing by more than three per cent per year, according to United States Government data, our current building activity reduced to a negligible volume, an existing occupancy status approximating total absorption, and with the San Francisco bay bridge project promising 60,000 newcomers within a year after its completion, it is evident that a strong building program should be started immediately.

"Although the records of the realty board show that the Eastbay cities have issued permits for the erection of new single-family homes during the last twelve years at the average rate of 2700 per year and costing \$10,000,000 per year to build the building program of 1932 comprised less than 360 such structures and involved less than \$1,300,000 in construction costs. The record for 1931 was but little more than twice as great.

Occupancy Complete

"The realty board's occupancy survey of last March disclosed that of the 100,000 single-family homes of the Eastbay, 95,000 are occupied and of the latter, 5000 houses more than one family. Economists hold that a 90 per cent occupancy of such property is normal. It is expected that the survey of 1933 will show a greater percentage of occupancy and a greater volume of dual occupancy.

"Although the building program of the last several years has shown a rapid decrease in annual totals, statistics show that it has reflected the demand for new homes. In 1929 single-family homes absorbed 21.6 per cent of the total new construction cost. For 1930 the ratio was 22.4 per cent. For 1931 it was 33.6 per cent. For 1932 new single-family homes absorbed 45.4 per cent of the total.

Market for Homes

"Although there is now, and has been for some time, a dependable

market for new homes, inability to finance building operations from customary lending institutions has effectually prevented builders from carrying out their plans."

"Recently, however, there is being developed an increasing tendency on the part of private capital to lend money for this purpose. Of the \$45,000,000 loaned for Eastbay realty and building operation during 1932, nearly 40 per cent came from private parties and less than 53 per cent was supplied by banks. It is believed that the next few months will see a considerable building program begun financed by private capital."

BERKELEY ARCHITECT OPENS DISPLAY OF SMALL HOME PLANS

In a move to stimulate home building and home modernization, Architect Edwin L. Snyder of Berkeley has opened a special exhibit in quarters at 2104 Addison street, adjoining his offices.

Cooperating with Snyder are a group of hay district manufacturers and dealers. The display will be open for the month of February.

Emphasis is placed on the present low cost of building and home furnishing. In conjunction with the display the Mason-McDuffie Real Estate Company is advertising its new residential tract in the north Berkeley hills where special inducements are being offered for building small residences.

Distinctive homes designed for Berkeley sites are shown in a variety of sketches and plans by Snyder. Each drawing shows the general specifications and the estimated cost.

The exhibition of furnishings and fixtures includes living room and bedroom furniture and draperies, floor coverings, lighting fixtures, hardware, kitchen and bathroom equipment.

Firms cooperating with Snyder include L. H. Bennett Company, Standard Sanitary Mfg. Co., Rigney Tile Company, Roberts Mfg. Co., Smith Lumber Co., Allied Arts Guild, Parker-Allen Company, Mrs. Harold Keith, interior decorator, Julian Mesic, architectural modelist, and Thomas Church, landscape architect.

BAKERSFIELD PERMITS

Building permits in the city of Bakersfield totaled \$15,742.50 for the month of January, compared with \$15,296 in December, according to the report of Building Inspector R. H. Hubbard.

BRIDGE TO START BAY CONSTRUCTION ASSERTS KELLY

Cities Around Bay Will Develop Rapidly With Improved Communication

A drastic change in San Francisco's history will be made by the San Francisco-Oakland Bay Bridge, it was declared by Director Earl Lee Kelly of the State Department of Public Works, speaking before the Pacific Masonic Lodge in San Francisco.

"When Governor Rolph opens the bids on February 28th for the construction of the first unit of this bridge, San Francisco will be entering a new phase of its development," Kelly said.

"Breaking down this water barrier will work many changes, some of which traffic engineers have sought to estimate and predict. These engineers tell us that the average San Franciscan of the future will live twenty miles from his work, and we are told that San Francisco is destined to become a city of skyscrapers, giant business structures, and huge hotels and apartments, forcing out the single family dwelling.

"Oakland is expected to experience increased industrial development along the Bay shore, with residential development extending out in a radius of twenty-five miles, by reason of the improved rapid transportation, which the bridge will usher into the Bay region.

"San Francisco Harbor will be as one great dock, all of its shores filled with shipping and industry, and community rivalry unknown, as the Bay region will be just one great metropolis."

Supervisor Carl W. Miles presided.

BUREAU PUBLISHES STUDY OF PERMITS

The U. S. Bureau of Labor Statistics has compiled and published the reports of a study of elapsed time in building construction. The report covers a survey of building permits in 14 representative cities showing the time between the date of issue of a building permit and the date work is started and between the date work is started and the date of completion. A comparison for the years 1929 and 1931 is given.

Originally published in the Monthly Labor Review for January, 1933, it has been reprinted in a bulletin.

ALTERATION WORK INCREASES

More than half of Seattle's building permit value total for January is represented in alteration and remodeling work, which aggregated \$145,000. Total building permits were \$232,800. The bulk of this work other than alteration was for industrial building, including two warehouses and one wholesale structure.

Steel Institute Director Says Program Of Building Self-Liquidating Projects Handicapped by R.F.C. Interest Rates

Work must be supplied our 12,000,000 unemployed if we are to pull out of this depression, and there is no better way of supplying this work than by financing self-liquidating projects, declared Charles F. Abbott, of New York, executive director of the American Institute of Steel Construction, in a recent speech before the industrial rehabilitation committee of the Chamber of Commerce of Los Angeles.

Mr. Abbott said:

The prime essential of prosperity in this country depends upon a large and continuing program of capital investment. This is represented by the constant building and rebuilding of our cities and our industries. Construction work takes up the slack in employment caused by technological improvements in the factory and puts to work the men discharged by mass production. From 1914 to 1918 the army engaged the men who might otherwise have been unemployed. At the end of the World War we were behind in our shelter needs and that gave tremendous impetus to construction and provided work to the vast number of men turned out of uniform.

Today the United States is facing a like situation. Other than public works, we have been building nothing during the past three years. As low as automobile sales have been, we spent approximately only half as much on new homes during the past year. We are today as far behind in our shelter needs as we were at the end of the World War. With an investment of two and a half billions in projects which will pay for themselves within a reasonable time, the great bulk of our unemployed could be put back to work.

Most of these great works are not going forward today despite the fact that Congress enacted the Wagner bill authorizing the Reconstruction Finance Corporation to make loans on self-liquidating projects for the purpose of "relieving unemployment." Even the best of projects would not be undertaken if it were necessary to borrow money at seven per cent for their building. That is partly why so few self-liquidating projects have as yet been financed under the emergency act of Congress, and the fact that the restricting provisions put into the law make it much easier and cheaper for the states to borrow money from the Corporation for a "dole" instead. Direct relief money "dole," can be had at only three per cent interest.

There are indications, however, that the revivifying effects of putting these great projects into execution will be realized without the aid of the Government. As money becomes more plentiful in the banks

and the private lending institutions realize that it is essential to find use for idle funds, these self-liquidating projects will be started. It is unfortunate in the meantime that our Government did not rush into the breach sooner and thus spare the country the serious burden of the present unemployment crisis. Had these projects been financed last summer immediately after the enabling law was enacted a million of the present idle would have been working by now.

It is a pitiful sight to see thousands of men in our great cities standing around waiting for a chance blizzard to get an engagement for a few hours cleaning away the snow when they might just as well have been employed building the Tri-Borough Bridge in New York, the Golden Gate Bridge at San Francisco, or the Trans-Mississippi Bridge at New Orleans. These later will prove definite additions to our national wealth, whereas the money spent on soup kitchens is but transitory. They should have been financed last summer so that men would have been at work on them during the winter months when the need for employment was greatest.

The conservative attitude maintained by the Reconstruction Finance Corporation is not entirely to blame for this stalemate. Our states and municipalities, goaded by the popular drive for economy, have been loath to sanction these needed construction projects and ask for the financial assistance to put them through. I believe in economy, but it is not economy to stop investments in civic improvements and civic needs. Destitute men and women must be cared for even though we find it necessary to cut the salaries of civil employees. It is our duty to provide either a dole or work, and I venture to say that the vast majority of our people, both employed and unemployed, would prefer work to charity.

Worthy projects, like the Catskill Bridge over the Hudson River, the Tri-Borough Bridge in New York City, incinerator plants for Detroit, waterworks for Los Angeles, and many others, will pay for themselves over a period of years, and in the meantime they will add much needed facilities to these congested centers. It is no economy to delay these projects just because a drive is being made on all governments to eliminate wastes in public appropriations and to reduce taxation on the public. The erection of self-liquidating projects will assist greatly in lifting the present tax burden.

Some cities have appealed for funds to build incinerator plants with figures to prove that they would save the taxpayers in 4 years enough to pay for the whole invest-

ment. The Reconstruction Finance Corporation is compelled to turn the applications down because Congress added a provision that no project could be financed which depends upon taxation, and even a saving in taxation would not make the project subject to aid under the law. If that is a fact then certainly this seems an appropriate time that we look into this matter carefully and that we endeavor to persuade our legislators to take a more constructive view of the present emergency and adopt a more economical method of dealing with unemployment.

Our duty to our fellow man requires that we give either work or a dole. The American citizen prefers work to charity. As fast as we can finance these two and a half billion dollars of self-liquidating projects throughout the United States the fewer workmen there will remain who need a dole.

In the process of capital investment, the provision of the fixed structures and works required by industry, commerce and community service are a substantial factor. It is this function that we call the construction industry. Aggregating \$7, to \$9,000,000,000 per year, it exerts a profound influence upon the economic well-being of the nation. It represents the transformation of our savings into consuming power, it employs millions of men and women, uses the products of thousands of mills and factories, provides thousands of car loadings to our railroads, absorbs millions of horsepower produced by our utilities. It converts the surplus accumulated by our productive capacity into new buying and consuming power, so vitally necessary to the maintenance of our trade in consumer goods.

Heretofore, too much emphasis has been laid upon the production aspect of our industry and not enough upon its consumption aspect. We have worshipped the one and only god of production, and forgotten that without the balancing consumption we are but smothered under the produce of our own genius and industry. So we have viewed the constructive activities of our country exclusively from the standpoint of investment and production; we have not seen them as performing this peculiarly vital function of translating our surplus into buying power for the goods and services produced by our factories and utilities. It is only when this function is suspended that we are conscious of our almost devastating loss.

B. C. BUILDING TOTAL OFF BY TWO-THIRDS

Building totals in British Columbia for 1932 were approximately one-third of the figure for the previous year, according to statistics compiled by the Vancouver Journal of Commerce.

The total for 21 cities reporting is \$5,267,690, compared with \$14,516,708 in 1931.

The December total for the same cities was \$110,466.

LIEN CLAIMS MUST SPECIFY MATERIAL USED

Court Voids Action When Plaintiff Failed To Record Items

The courts as a general rule are more liberal in ruling upon the validity of mechanics' liens filed by claimants. Repeatedly the courts have held that such claimants are held versed in the niceties of the law and have not construed mechanics lien with the same rigidity as they have other pleadings. However, there is certain information which must be given by lien claimants and if such information is left out of the claim of his for any reason, the lien will be held defective, says Harry C. Westover in the current issue of the Orange County Builders' Exchange Bulletin.

"It was the intention of the original framers of the lien law, that liens could be prepared and filed by the claimants without the necessity of hiring a lawyer to prepare and file such claims. Such practice is probably all right in the event the claim is for a small amount, but where the claim represents hundreds or thousands of dollars, an expert should be called in to prepare the claim of lien, or at least to look it over after it has been prepared and pass upon it.

"In the recent case of Shafter vs. Los Serranos Company, 72 C. A. D. 10, decided Dec. 23, 1932, which involved a large sum of money, the Appellate Court held that the claim was so poorly prepared that it did not comply with the provisions of the Mechanics' Lien Law and consequently was void and of no effect.

"The lien as recorded failed to set forth the kind of materials furnished, it being merely stated in the lien that the claimant 'supplied materials.' The claim of lien also failed to state to whom the materials were furnished."

The court held that the failure of the claimant to give such information voided the entire claim. Two of the fundamental requirements of a valid claim of lien is that the lien state the kind of materials which were used, and to whom they were furnished. In other words the interested parties, or owners have a right to know what kind of materials the claim is being made for, whether it is for lumber, steel, sash and doors, flooring etc., and to whom it was furnished. A definite connection must be established between the party to whom the materials were furnished and the owner of the premises. If there is no definite connection established then of course no lien can be impressed upon the property.

The Court said: "Those requisites (statement as to kind of materials used, to whom furnished) are essential for securing and enforcing such a lien as is here involved."

SEATTLE TO REQUIRE HOME-MADE MATERIALS

Contractors on the Diablo unit of the Skagit river power development for the city of Seattle lighting department may be required to take \$1,900,000 worth of municipal bonds in payment, it is reported.

Superintendent J. D. Ross of the city light department indicated that he would recommend this provision be included in the contract and also that use of cement and steel manufactured in Washington be specified. Other materials also must be purchased in the state if obtainable, it is proposed.

It is expected that this will be called shortly.

MATTOON ACT REPEAL URGED BY LAW AUTHOR

Los Angeles Assemblymen Are Asked to Sponsor Assessment Revisions

Everett W. Mattoon, father of the famous "Mattoon Act" affecting property assessment districts, has decided there were too many abuses attributed to the special assessment laws, and has decided to work for their repeal, he announced recently.

Mattoon, county counsel of Los Angeles, has written and personally contacted the county's 30 assemblymen asking them to work for repeal of the Mattoon act and eight other acts pertaining to assessment districts.

The laws which he urges be repealed during the legislative session opening Tuesday are:

Road district improvement act of 1907; municipal improvement district act of 1915; improvement bond act of 1915; acquisition and improvement act of 1925 (the Mattoon act); municipal improvement act of 1927; Vrooman street act of 1885; street opening act of 1889; local improvement act of 1901, and boundary line act of 1911.

"The first five statutes are based upon the same theory of assessment—according to assessed valuation of the land or upon the ad valorem basis," Mattoon said. "The last four statutes are all upon the district assessment plan, which means specific assessments are levied against each particular lot.

"Repeal of the nine acts will still leave upon the statute books the opening and widening act of 1903, and the improvement act of 1911, which are ample for any requirements.

"With the debt limitation act of 1931 in force, which limits the amount of special assessments which can be imposed upon property owners, future abuses through efforts of selfish promoters cannot be made."

APPELLATE COURT ASKED TO DECIDE \$250,000 ACTION

Breach of Contract Suits Grow Out Of Plumus Power Development

Claims involving payment of more than a quarter of a million dollars on the construction contract for a Plumus county hydroelectric development have been submitted to the First District Court of Appeals for adjudication.

The action was carried to the district court after a superior court judgment of \$257,965 had been obtained by H. H. Boomer, Spokane contractor, against Muir & Storrie, San Francisco contractors, and the contractors' bond company.

Muir and Storrie sued Boomer for alleged breach of contract after it is claimed he failed to complete construction of a dam on Bucks Creek which he had undertaken on a sub-contract. Boomer sued the general contractors also for breach of contract, alleging that he was prevented from completing the work and delayed by failure of the general contractors to supply materials.

Both parties appealed from the superior court judgment in favor of Boomer, the plaintiff declaring that the sum awarded was insufficient.

Evidence before the court shows that the Bucks Creek development which was undertaken for the Feather River Power Company cost \$7,697,889 and that Boomer received \$794,459 for the work he performed between 1925 and 1927.

COLOMBIA LAUNCHES 3-YEAR RD. PROGRAM

The Colombian Government is undertaking a 3-year program of national highway construction with the main object of providing a trunk highway from Cucuta, near the Venezuelan border, to Pasto, near the Ecuadorian border, with necessary tributary roads. Funds were obtained in December, 1931, from a loan contract between the Government and the Banco de la Republica. The total appropriated from this loan for 1932, 1933, and 1934 is 4,650,000 pesos, of which (according to official reports) 1,620,000 pesos was expended in 1932. In 1933 there will be spent 1,810,000 pesos, 1,506,000 coming from the loan. For 1934 an expenditure of 1,524,000 pesos is planned. (The Colombian peso during December, 1932, was quoted at \$0.9524 United States currency).

The Government will build these roads under the supervision of its Ministry of Public Works, not letting any contracts to native or foreign firms. It has approximately 5,000,000 pesos worth of road-building machinery purchased during 1928 and 1929 and probably will not be in the market for new machinery for several years, except for spare parts and possibly a few heavy dump trucks. Hand labor is being utilized wherever possible in order to relieve unemployment.

Seek Wider Market For Lumber By Laboratory Studies To Perfect Connectors; Engineer Describes Progress In Design

G. W. Trayer, senior engineer at the U. S. Forest Products Laboratory, Madison, Wisconsin, made a comprehensive report to the West Coast Lumbermen's Association at the annual meeting in Tacoma, January 27, 1932, on research work relating to design, treatment and use of wood, which has now reached important stages at that institution.

"Twenty to thirty years ago it looked like we were facing a timber famine," said Mr. Trayer in his exposition, given at the afternoon session. "We devoted our attention almost entirely to the prevention of waste in the use of wood. But the per capita consumption of lumber has not kept pace with the increase in living standards, with the result that today we are not fearful of a timber shortage and in fact we are searching not only for improved uses of lumber but for new uses. The ultimate purpose is to create a use for land now idle because it is suitable only for the growing of timber.

"Naturally, our efforts are directed largely in that field where lumber finds its greatest market, namely construction. In normal times two-thirds of all the lumber produced gets into construction one way or another," he said.

Joints and Fastenings

Mr. Trayer pointed out that the weakest point in wood construction is in the joints and fastenings. With regard to the usual bolted joint, for example, great discrepancies among authorities were found as to the safe loads for bolts of various sizes. This naturally militated against the use of wood. Several hundred tests of bolted joints were made and as a result dependable figures are now available to engineers and architects.

The next step in this direction was to secure from Europe various styles of metal and wood connectors used extensively there to bolster up the strength of the ordinary bolted joint. These connectors, embedded partly in each of two wood members, act like dowels in transferring load directly from one member to the other. Mr. Trayer exhibited specimens of joints made with the connectors. Some had teeth which were pressed into the members, others fitted into pre-cut grooves. The use of these modern connectors will increase the efficiency of wood connections, especially in heavy construction, they offer possibilities of factory assembly of wood structure, and greatly facilitate erection. The results of this study have been put into a government bulletin which is expected to be off the press within the next month.

Laminated Construction

Laminated columns which con-

sist of several pieces of lumber spiked or bolted together have been tested. Various arrangements of the pieces were tried in a search for an assembly that would most nearly approach the solid timber in strength. No arrangement of pieces or method of nailing or bolting was found that would give the same strength as a solid piece of the same overall dimension but 70 to 90 per cent of the strength of the solid pieces was developed with either of two types of laminated columns. In one several pieces are nailed face to face with their edges tied together by cover plates. In the other four pieces are boxed around a central core.

Laminated beams with horizontal glued joints are now being tested. The object of this study is to produce a large beam from relatively small material, utilizing good quality material in the upper and lower portions where the bending stresses are the greatest and material of poorer quality in the central portions where these stresses are low. This work is in progress and it will be several months before the results are forthcoming.

Laminated wood arches are being tested at the Forest Products Laboratory. The laminations are bent around a form without any steaming or other preparatory treatment, glued and clamped. When the glue has set, the arch will retain its curvature on removal of the clamps. The principles of design of such arches are being studied with a view to their future adoption in this country for large spans. Already they are being used more and more in Europe but very little is known as to the effect of such details as the initial stress due to bending, the quality of material, and the type of splices or joints in the individual pieces. All of these factors are being studied at the moment by the laboratory.

General Details of Design

Mr. Trayer discussed certain general details of design on which there was very little information until the laboratory recently completed studies along those lines. The problem of shear in checked beams has long been a troublesome one to engineers and to the lumber industry. This problem has now been met and it has been proven that drastic reductions made by engineers in the shear allowance for such beams were unwarranted. The correct methods for calculating the shear strength of such beams are about to be published by the laboratory. The effect of notches on the strength of beams and allowable bearing stresses at any angle to the grain of wood were other problems in design that have been definitely solved.

Other Studies

After making a comprehensive report on the above design problems which relate primarily to the strength of wood structures, Mr. Trayer mentioned briefly other research projects that have a direct bearing on wood in the construction field. These latter projects include painting, fire proofing, the development of new preservatives, new methods of seasoning which are only in the experimental stage, freezing, and other treatments to lessen shrinkage difficulties, the development of plastic materials from saw dust, and the fabricated house problem.

In conclusion he stated that the Forest Products Laboratory was now preparing a handbook for engineers that would be somewhat comparable to the handbooks put out by the other industries competing for the construction field.

JUDGMENT AGAINST RENO UNION UPHOLD

Rehearing of the damage suit against the Reno Carpenters' Union which won a \$4000 judgment for Daniel Johnson, Reno carpenter, has been denied by the Nevada State Supreme Court.

Johnson sued the union following his expulsion alleging that he had been deprived from making a livelihood and that he was expelled without cause. Judgment of a superior court in his favor was upheld by the supreme court.

Move More Dirt Faster with LE TOURNEAU Equipment

Architects' Institute Will Campaign For Restriction of Treasury Bureau

The American Institute of Architects, with the support of the entire building industry and other organizations, will press for legislation in 1933 to restrict the functions of the office of the Supervising Architect of the Treasury to an administrative, fact-finding and supervisory body, according to the annual report of Louis LaBeaume of St. Louis, chairman of the Institute's Committee on Public Works, just made public.

"In the cause of better architecture and greater economy to the taxpayer," Mr. LaBeaume declared, the sixty-seven chapters of the Institute as well as the state architectural societies throughout the country will participate actively in the movement seeking to reform the system employed by the Federal government in the erection of public buildings. This system, he said, is opposed on three grounds—efficiency, economy to the taxpayer, and the ethics of the general policy of government competition with private business.

Design of all Federal buildings by huge government bureaus was condemned by Mr. LaBeaume as a costly process which "must inevitably lead to stereotyped, if not mediocre, results."

"Our Federal buildings," he continued, "should reflect the culture, the imagination and spiritual ideals of our people. In a country vast in extent, so varied in climatic and physical characteristics, these buildings can be best designed by competent architects residing in the general localities where they are to be built, and familiar with local needs and traditions, local materials and local methods of procedure. No army of civil service employees, gathered together in any governmental bureau, can be truly responsive to the varying factors entering into the design of widely separated buildings.

"The architects of America, from Massachusetts to California, have demonstrated their ability to the world. This ability should be increasingly drawn upon in the design of our Federal buildings, whether they be post offices, custom houses, hospitals, court houses or army posts. It is only by the utilization of the best ability in the country that the nation can attain the character in its public buildings to which it is entitled."

Mr. LaBeaume pointed out that the economic crisis has concentrated the attention of the American people on the high cost of government, Federal, state and municipal, and has opened their eyes to "abuses of governmental function, to which they were oblivious or complacent during the years of greater ease." He maintained that the nation is becoming more conscious of the extravagance of bureaucracy and of the trend of the

government, during the past few years, to infringe on private initiative.

Mr. LaBeaume, a witness last summer before the Shannon Committee of the House of Representatives, asserted that this committee has gathered a great mass of testimony indicating that the Federal government is competing with private business and professional initiative in many fields.

"The government bureaus, which are in effect competing with private architects throughout the country, seek to justify such competition on the grounds of economy," he explained. "They maintain that the cost of their service in the production of plans, specifications and supervision of somewhat less than the cost involved in the employment of architects outside of the bureaus.

"The differential, according to their own figures, is not great, but it may be questioned if all of the legitimate charges against this service have been taken into account in estimating the bureau's costs. It is difficult for the taxpayer to believe that the government can operate as economically as private enterprise. There is not primarily the same incentive, and secondly, there is not the same flexibility.

"Government overhead is not so susceptible to change in the volume of the load. Many governmental employees are carried on the payrolls through slack periods. The aspect of economy, however, has a far deeper significance than would be implied by the mere consideration of the cost of architectural services.

"It is in the adoption of modern methods of specification, modern use of materials and modern processes of construction that savings in the cost of the completed building would accrue. Bureaus become rigid and fixed in their methods, and are apt to be oblivious of change. They cannot easily, nor are they obliged to, take into consideration the current building economies with which the private practitioner is forced to reckon.

"Therefore the excess cost of Federal building construction, due to bureaucratic methods of design and specification must far outweigh any fancied economies attributed to such methods. The real saving in the governmental building budget is not to be made through the paring of fees, but through the use of alert, up-to-date and competent methods of design and building."

The propriety of governmental competition with private business or professional initiative cannot be justified under our present ideal of government, Mr. LaBeaume held.

"If the government of the future is to take over every function of the individual, every activity of

the professional or business man, so that we will all be but cogs in the wheels of one gigantic bureaucracy, that is another matter," he said. "Meantime, however, we as architects, protest against the discrimination.

"If it is proper for the government to design its own Federal buildings, it is not less proper and logical for the government to set up a huge construction bureau to build them; and by the same process of reasoning, to take over quarries, mills and manufacturing plants for the fabrication of building materials."

Other members of the Committee on Public Works are: Charles Butler, New York; Charles D. Maginnis, Boston; Frederick L. Ackerman, New York; G. Frederic Ashley, San Francisco; James O. Betelle, Newark; N. Max Dunning, Chicago; R. K. Fuller, Denver; Frederick G. German, Duluth; Myron Hunt, Los Angeles; Ellis F. Lawrence, Portland, Ore.; Allison Owen, New Orleans; H. I. Schenck, Dayton; Nat G. Walker, Fort Myers.

OAKLAND LICENSE FEES ARE REDUCED

City of Oakland has amended its business license ordinance to fix the fees paid by professional men on a graduated scale ranging from \$12 to \$214 a year, the minimum applicable to gross receipts not exceeding \$5000. The license fee minimum formerly was \$24 on gross receipts not exceeding \$10,000.

Including in the professions to which the license is applicable are Appraisers, Architects, Civil Engineers, Consulting Engineers, Designers and Decorators, Draftsmen, Electrical Engineers, Electrologists Insurance Adjusters and Claims Adjusters, Insurance Brokers, Landscape Gardeners, Landscape Architects, Mechanical Engineers.

NEW FOLDER

C. F. Pease Company, Chicago, has published a new folder for distribution to the trade announcing improvements in the line of Thermex globes for arc lamps.

L. A. ENGINEER NEW PRESIDENT OF BOARD

Ralph J. Reed of Los Angeles, has been elected president of the State Board of Registration for Civil Engineers, succeeding H. J. Brunner of San Francisco. Henry D. Dewell is the new vice-president and Asa G. Proctor of Woodland, succeeds Brunner as a member of the board.

NAME CHANGE VETOED

Nevada legislators defeated a proposed request to Congress that the name of Hoover dam be changed officially to Boulder dam. The vote was 20 to 19.

Reduction In Lumber Freight Rates To South And Mid-West Is Ordered

Notification has been received by the West Coast Lumbermen's Association, Seattle, of freight rate changes, both reductions and increases on West Coast lumber, which will be effective April 1 from the Pacific Northwest and the Pacific Southwest to the South and Middle West. Reductions predominate in the changes announced by Trans-Continental Freight Bureau in lumber rates from the Pacific Northwest.

The rate reductions from Pacific Northwest points on lumber as announced are, rates being per 100 lbs. of lumber):

Southeastern Kansas, new rate 62½c; reduction, 7½c; Oklahoma, northern area, new rate 62½c; reduction 7½ and 15c; Oklahoma, southeastern area, new rate, 72c; reduction, 5½c; Southeastern Missouri and Arkansas, and Memphis, Tenn., new rate 72c; reduction, 5½c; Louisiana, new rate, 72c; reduction 13c.

To the State of Texas the announcement includes both increases and decreases in the rates, made to equalize difference in the rate structure. Southeast of Amarillo, Texas, where the present rates are 62½, 70 and 77½ cents, the new rates will be 70 and 72 cents, involving reductions of 5½ cents to two-thirds of the entire state; but also an increase of 7½ cents to Fort Worth and Denver City Railway and Wichita Valley Railway points beyond Amarillo to Wichita Falls, and 9½ cents to points east of Wichita Falls to Dallas inclusive.

New rates on shingles will be 12 cents per hundred pounds more than the announced rates for lumber, as detailed, both reductions and increases as given for lumber to govern for shingles. Similarly, the rates on doors will be reduced and increased.

The changes in rates as announced, according to the West Coast Lumbermen's Association, have been pending since the early part of 1930, or just after the first conference of the West Coast lumber committee, organized by J. D. Tennant of Longview, Washington, then president of the Association, with western railway executives in Chicago during February of that year. The Association considers the reductions just granted as the first answer to the pleas of western lumbermen for freight rates more in harmony with the ability of the lumber industry to pay and market its products.

On receipt of the information, the West Coast Association wired H. G. Toll, chairman of the Trans-Continental Freight Bureau at Chicago, asking that an application be made by the Bureau to the Interstate Commerce Commission seeking authority to establish these rates on one day's notice, instead of April 1, as announced. The Association pointed out that no ele-

ment of surprise exists as the rate change has been under consideration for three years; and urged that the present bad situation of the West Coast lumber industry might be measurably improved by an immediate freight rate reduction, whereas the thirty day notice might cause some buyers to withhold purchases.

ALBANY PERMITS \$3895

Permits for new building in Albany for the month of January were valued at \$3895, according to the report of Building Inspector H. I. Dygert. Six permits were issued. The value of permits in January a year ago was \$11,295.

BRICK CONTRACTORS ADOPT \$9 WAGE IN CITIES OF EASTBAY

Leading bricklaying contractors of Oakland and other Eastbay cities have agreed to pay bricklayers \$9 a day, in accordance with the recommendations of the Impartial Wage Boards of San Francisco and the Eastbay, was reported.

A wage of \$11 a day has been demanded by the Bricklayers' Union, a wage which the contractors declare entirely out of line with present conditions and disproportionate to wages prevailing in other building crafts.

With the low price of brick, it is anticipated that by fixing a wage in keeping with other costs, brick construction will be materially stimulated and increase employment for bricklayers.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

GRANITE PASS&GROMMET-EARP RDS-MET. WAT DIST

LOS ANGELES, Cal.—As previously reported, the low bids on each of the four schedules for constructing 84 miles of roads for the Colorado river aqueduct opened by the Metropolitan Water District Feb. 1, are as follows:

A. Teichert & Son, Inc., 1068 45th St., P. O. Box 1118, Sacramento, at \$88,603.50, Schedule No. 1, for constructing the Granite Pass Road, station 0 to station 1105.

Clyde W. Wood, Box 1435, Stockton, at \$106,860, Schedule No. 2, for constructing the Granite Pass Road, station 1105 to station 2280.

George French, Jr., P. O. Box 675, Stockton, at \$67,948.30, Schedule No. 3, for constructing the Granite Pass Road, station 7280 to station 3060, and the Grommet-Earp Road from station 3060 to station 3345.

Clyde W. Wood, Box 1435, Stockton, at \$137,327.70, Schedule No. 4, for constructing the Grommet-Earp Road, station 3345 to station 4381 plus 97.

The total of these low bids is \$400,739.50.

Guy F. Atkinson Co., 925 Story Bldg. Los Angeles, submitted the low bid on Schedule No. 2 at \$101,777.50 and on Schedule No. 3 at \$65,830.20, but qualified the bid by stipulation that it would not accept an award on all four schedules. The total of the Atkinson Co. bid was \$405,701.70.

The proposed roads are located in Riverside and San Bernardino counties, and are known respectively, as the Granite Pass Road reaching 59 miles from a point on the state highway near Desert Centre to Grommet, a siding on the Santa Fe Railway about nine miles east of Rice, and the Grommet-Earp Road extending thence 25 miles to a point near the Colorado river opposite the town of Parker, Arizona. The work to be contracted for consists of all necessary excavation and grading, the placing of surfacing materials, culvert pipes, riprap, and protection work, and the construction of timber culverts and bridges. All materials are to be furnished by the contractor. The work has been divided into four schedules, each requiring the construction of approximately 20 to 22 miles of road and appurtenant works as noted below. The schedules and items follow:

SCHEDULE NO. 1

Schedule of prices for the construction of the Granite Pass Road from Station 0 to Station 1105.

Bids will be considered upon the following schedule, but no bids will be considered for less than all the items of the schedule.

- (1) 76,000 cu. yds. roadway borrow & channel change excavation;
- (2) 78,000 sta. yds. excav., overhaul;
- (3) 130 cu. yds. struc. excavation;
- (4) 350 cu. yds. concrete;
- (5) 9700 lbs. reinf. steel—furnishing, hauling and placing;
- (6) does not apply to this schedule;
- (7) do;
- (8) do;
- (9) 200 cu. yds. hand-placed riprap;
- (10) 800 cu. yds. dumped riprap;
- (11) 270 M. gals. watering embank.;
- (12) 1000 M. gals. watering subgrade;
- (13) 16,200 cu. yds. furnishing selected material for subgrade and treatment;
- (14) 4000 cu. yds. furnsh crushed rock
- (15) 82,000 cu. yds. miles haul selected material and crushed rock;
- (16) 474,200 gals. road oil—furnishing, hauling and sreading;
- (17) 253,000 sq. yds. prepare surface, mix, spread and finish oil-treated surface;
- (18) 63,200 gals. seal coat oil—furnish and haul;
- (19) 253,000 sq. yds. seal coat—apply;
- (20) 750 cu. yds. stockpiles of oil-treated material;
- (21-1) furnish all materials and construct 2 standard timber bridge culverts, each 12-ft. span;

The bids follow:

- (A) A. Teichert & Son, Inc., 1068 45th St., P. O. Box 1118, Sacramento, \$88,603.50.
- (B) Guy F. Atkinson Co., Los Angeles, \$88,485.50 (bid qualified, see introductory note).
- (C) Basich Bros. Co., Torance, \$88,658.
- (D) Winston Brothers Co., Los Angeles, \$90,884.30.
- (E) Morrison-Knudsen Co., Los Angeles, \$91,493.50.
- (F) Heafey-Moore Co. and J. A. Casson, Oakland, \$94,788.
- (G) Peter L. Ferry, Glendale, \$112,251.
- (H) S. J. Grove & Sons Co., Los Angeles, \$119,526.94.

SCHEDULE 2

Schedule of prices for the construction of the Granite Pass Road from Station 1105 to Station 2280.

Bids will be considered upon the

following schedule, but no bids will be considered for less than all the items of the schedule.

- (1) 69,000 cu. yds. rdwy., borrow and channel change excavation;

ARIZONA STATE—Ralph Pleasant Constr. Co., Phoenix, Arizona, awarded contract by State Highway Commission, Phoenix, Dec. 28, at \$97,608.46 for highway construction on the Benson-Vail Highway, E-18-D (A. F. E. No. 8052), E-18-E (A.F.E. No. 8019). The work, which begins at the Pima-Cochise County line and extends easterly approximately 9.33 miles to the west city limits of Benson, consists of grading, draining and placing of subgrade stabilizer in part and oil processing the entire length by the plant mix method, and is to be completed on or before June 15, 1933. The items are:

F. A. NO. E-18-D—ROADWAY

- (1) 21,854 cu. yds. roadway excav. (unclass.);
- (2) 1024 cu. yds. drainage excav. (unclass.);
- (3) 9150 lin. ft. Vee (V) ditches;
- (4) 729 cu. yds. structural excav. (unclass.);
- (5) 6116 cu. yds. borrow excav. (unclass.);
- (6) 23,005 sta. yds. earthwork overhaul;
- (7) 10,206 cu. yds. subgrade stabilizer;
- (8) 13,504 cu. yds. mi. subgrade stabilizer haul;
- (9) 371 cu. yds. class A concrete (including cement);
- (10) 21 cu. yds. class B concrete (including cement);
- (11) 23,472 lbs. reinf. steel;
- (12) 72 lin. ft. 24-in. C.M.P.;
- (13) 122 lin. ft. 30-in. C.M.P.;
- (14) 136 lin. ft. 36-in. C.M.P.;
- (15) 59 cu. yds. plain riprap;
- (16) 7260 lin. ft. cable road guard;
- (17) 100 lin. ft. rail bank protection, type A;
- (18) 200 lin. ft. rail bank protection, type B;
- (19) 1 special cattle guard;
- (20) 9150 lin. ft. standard line fence;
- (21) 59 cu. yds. removal of old concr.;
- (22) 200 hours rolling fills;
- (23) 123 M. gallons water applied to roadway;
- (24) 271 tons cutback asphalt cement for plant mix;
- (25) 6777 tons plant mixed oil treated surf.;
- (26) 66,881 ton mi. plant mixed oil treated surfacing haul;
- (27) 3.753 ml. spreading compacting and finishing;
- (28) 290 cu. yds. screenings for seal coat;
- (9) 23 tons cutback asphalt cement for seal coat;
- (30) 1614 cu. yds. shoulder material;
- (31) 1728 cu. yds. shoulder material haul;
- (32) 4 oil surfaced approaches;
- STRUCTURES OVER 20-FT. CLEAR SPAN
- (33) 1660 cu. yds. roadway excav. (unclass.);
- (34) 4200 cu. yds. drainage excav. (unclass.);
- (35) 300 lin. ft. Vee (V) ditches;
- (36) 350 cu. yds. structural excav. (unclass.);
- (37) 888 sta. yds. earthwork overhaul
- (38) 278 cu. yds. subgrade stabilizer;
- (39) 157 cu. yds. mi. subgrade stabilizer haul;
- (40) 273 cu. yds. class A concrete (including cement);
- (41) 25,835 lbs. reinf. steel;
- (42) 20 hours rolling fills;
- (43) 7 M. gals. water applied to rdwy;
- (44) 15 tons cutback asphalt cement for plant mix;
- (45) 370 tons plant mixed oil treated surf.;
- (46) 3298 ton mile plant mixed oil treated surf. haul;

SCHEDULE NO. 4

Schedule of prices for the construction of the Grommet-Earp Road from Station 2245 to Station 4381+97.

Bids will be considered upon the following schedule, but no bids will be considered for less than all the items of the schedule.

- (1) 255,000 cu. yds. rdwy., borrow & channel change excavation;
- (2) 260,000 sta. yds. excav. overhaul;
- (3) 2700 cu. yds. struc. excav.;
- (4) 140 cu. yds. concrete;
- (5) 2700 lbs. reinf. steel—furnishing, hauling and placing;
- (6) 1505 lin. ft. 24-in. dia. corr. pipe culvert—furnish and place;
- (7) 1135 lin. ft. 30-in. do;
- (8) 2060 lin. ft. 36-in. do;
- (9) 200 cu. yds. hand-placed riprap;
- (10) 500 cu. yds. dumped riprap;
- (11) 260 M. gals. watering embank;
- (12) 920 M. gals. watering subgrade;

- (13) 32,500 cu. yds. furnishing selected material for subgrade and treatment;
 - (14) does not apply to this schedule;
 - (15) 125,000 cu. yds. miles hauling selected material and crushed rock;
 - (16) 435,800 gals. road oil, furnishing, hauling and spreading;
 - (17) 232,500 sq. yds. prepare surface, mix, spread and finish oil-treated surface;
 - (18) 58,000 gals. seal coat oil, furnish and haul;
 - (19) 232,500 sq. yds. seal coat—apply;
 - (20) 700 cu. yds. stock piles of oil-treated material;
 - (21-4) furnish all materials and construct 1 standard timber bridge of ten 19-ft. spans.
- (A) Clyde W. Wood, Stockton, \$137,227.70.
- (B) Weymouth Crowell Co., Los Angeles, \$145,618.00.

- (C) Gny F. Atkinson Co., Los Angeles, \$149,608.50 (bid qualified four schedules or none).
- (D) Morrison-Knudsen, Los Angeles, \$149,892.50 (bid qualified, will accept No. 4 only or all four schedules, but no other combination).
- (E) Artukovich Bros., Hynes, \$155,002.75.
- (F) Winston Bros. Co., Los Angeles, \$162,187.60 (reserve the right to accept or reject any schedule other than Schedule No. 4 or all).
- (G) Basch Bros., Torrance, \$167,501.75.
- (H) Hall-Johnson Co., Alhambra \$177,892 (alternative proposal submitted by letter was not considered).
- (I) Lang Trans. Co., Los Angeles, \$178,986.25.
- (J) Oswald Bros., Los Angeles, \$187,638.80.
- (K) S. J. Groves & Son, Los Angeles, \$205,470.95.

PERSHING COUNTY, Nev.—Dodge Bros., Inc., Fallon, Nev., at \$69,293.28 awarded contract by State Highway Commission Jan. 19 (bids opened Jan. 11) to construct a cement concrete pavement through the city of Lovelock, 1.22 miles. Complete bids follow:

- (A) Dodge Bros., Fallon, \$69,293.28.
 - (B) M. J. Bevanda, Stockton, \$70,343.64.
 - (C) Engineer's estimate, \$54,547.26.
- Quantities follow:
- (1) 11,529 cu. yds. roadway excav.;
 - (2) 1,580 cu. yds. structure excav.;
 - (3) 16,081 cu. yds. select borrow;
 - (4) 1,746 sta. yds. overhaul;
 - (5) .77 mile subgrade, 10-ft. width;
 - (6) .12 mile subgrade, 20-ft. width;
 - (7) 12,930 sq. yds. subgrade for pave.
 - (8) 2 acres clearing;
 - (9) 2684 cu. yds. reinf. cement con
 - (10) 1600 cu. yds. crushed gravel or crushed rock in place;
 - (11) 122 cu. yds. Class A concrete;
 - (12) 2 cu. yds. Class B concrete;
 - (13) 30 lin. ft. 15-in. corr. metal pipe
 - (14) 70 lin. ft. 36-in. do;
 - (15) 86 lin. ft. 48-in. do;
 - (16) 208 lin. ft. 24-in. part circle c.m.p.
 - (17) 702 lin. ft. 4-in. sewer;
 - (18) 450 lin. ft. 6-in. do;
 - (19) 424 lin. ft. 8-in. do;
 - (20) 1726 lin. ft. 10-in. do;
 - (21) 772 lin. ft. 12-in. do;
 - (22) 10 monuments;
 - (23) 11,971 gals. asph. fuel oil applied to surface;
 - (24) 0.77-mi. mix (10-ft. width);
 - (25) 0.12-mi. mix (20-ft. width);
 - (26) 1.22-mi. finish roadway;
 - (27) 2 removing wooden culverts;
 - (28) 42 lin. ft. remove pipe culverts;
 - (29) 108,820 lbs. reinf. steel;

- (30) 7,100 lbs. castings;
- (31) 1,574 lin. ft. remove and reconstruct fence;
- (32) 516 lin. ft. construct fence.

WASHOE COUNTY, Nevada—As previously reported, Union Paving Co., Call Bldg., San Francisco, at \$93,769.14 awarded contract January 11 by State Highway Department, Carson City, to grade and asphaltic concrete surface 5.42 mi. between Reno and Huffakers, involving:

- (1) 10,200 cu. yds. rdwy. excav.;
- (2) 1,150 cu. yds. struc. excav.;
- (3) 24,057 cu. yds. select borrow;
- (4) 1,786 sta. yds. overhaul;
- (5) 15,100 sq. yds. subgrade for pave.

- (6) 69 demollish culvert inlets and outlets;
- (7) 2,500 sq. yds. demollish conc. pave.
- (8) 14,143 lin. ft. remove fence;
- (9) 4,322 lin. ft. remove and reconstruct fence;
- (10) 14,113 lin. ft. construct fence;
- (11) 2,900 lin. ft. enlarging expansion joint;
- (12) 30,300 lbs. reinf. steel;
- (13) 243 cu. yds. Class A concrete;
- (14) 160 cu. yds. Class B concrete;
- (15) 36 lin. ft. 15-in. corr. metal pipe
- (16) 886 lin. ft. 18-in. do;
- (17) 556 lin. ft. 24-in. do;
- (18) 66 lin. ft. 30-in. do;
- (19) 50 lin. ft. 36-in. do;
- (20) 183 lin. ft. remove pipe culverts;
- (21) 806 lin. ft. remove and reset pipe culverts;
- (22) 842 lin. ft. 24-in. corr. metal siphon pipe;
- (23) 72 lin. ft. 6-in. cast iron pipe;
- (24) 49,000 sq. yd. asph. paint blinder;
- (25) 54,784 lin. ft. sideforms;
- (26) 32 cu. yds. riprap;
- (27) 96 lin. ft. timber guard rail;
- (28) 30 monuments;
- (29) 3,300 tons asph. conc. base course
- (30) 7,200 do. leveling course;
- (31) 7,100 do. wearing course;
- (32) 1 furnish and install posts for F. A. M.;
- (34) 5.42 miles finish roadway;
- (35) 105 tons tread course;
- (36) 157 remove trees;
- (37) 5.42 miles paint center line;
- (38) 20 wooden diversion box.
- (39) miscellaneous items.

Complete bids follow:
 (A) Union Paving Co., San Francisco, \$93,769.14.
 (B) Jones & King, Hayward, \$98,561.89.
 (C) Clark & Henry Constr. Co., San Francisco, \$99,867.82.
 (D) A. Teichert & Son, Sacramento, \$111,516.88.
 (E) Engineer's Estimate, \$103,119.66.

C. I. PIPE AND FITTINGS—PASADENA—BIDS OPENED

PASADENA, Los Angeles Co., Cal.—Bids for furnishing cast iron pipe and fittings f.o.b. water department pipe yards on Raymond Avenue near Glenarm St., opened by city directors Jan. 24. Bids were taken on items as follows:
 (1) 20,000 ft. of 6-in. cast iron water pipe for service under 150 pounds working pressure. Minimum wall thickness, .37 inches.
 (2) 20,000 ft. of 8-in. do; minimum wall thickness, .42 inches.
 (3) 10,000 ft. of 12-in. do for service under 200 lbs. working pressure; minimum wall thickness .57 in.
 (4) 1200 ft. of 16-in. do; minimum wall thickness .68 in.
 (5) 600 ft. of 20-in. do; minimum wall thickness .78 in.
 (6) 800 ft. of 24-in. do; minimum wall thickness .88 in.

(7a) 240 ft. of 10-in. do; minimum wall thickness .52 in.
 (7b) 48 ft. of 14-in. do; minimum wall thickness .62 in.
 (8) 408 ft. of 18-in. Class B cast iron water pipe.
 (9a) 50 6x6-in. cast iron tees, 3 bells, Class D;
 (9b) 20 8x6-in. do;
 (9c) 10 12x6-in. do.
 Bidders follow:
 (A) U. S. Pipe & Foundry Co.
 (B) Utilities Supply Co.
 (C) American Cast Iron Pipe Co.
 (D) National Cast Iron Pipe Co.
 (E) Alhambra Foundry Co.
 (F) Enterprise Foundry Co.
 (G) Vernon Foundry Co.
 (H) Southwest Welding & Mfg. Co.
 (I) Relibale Iron Foundry.

LONG BEACH, Los Angeles Co., Cal.—City Council has adopted a preliminary resolution (No. C-5338) determining the nature, extent and location of the proposed improvement of Loma Ave., between Ocean Blvd. and Second St., between Second St. and Broadway, and between Broadway and Third St., in accordance with the provisions of the Assessment Limitation Act of 1931. The proceedings are under the 1911 Improvement Act. The work involves grading and surfacing the roadway with oil and screenings.

ENGINEERING NEWS

BRIDGES

HUMBOLDT COUNTY, Cal.—Daniel G. Longtin, 621 DeYoung Bldg., San Francisco, at \$17,939.55 awarded contract by U. S. Bureau of Public Roads, to construct the Mill Creek and Hosler Creek bridges, Unit 2-D of California Federal Lands Pro. No. 1, Hoopa Valley Indian Reservation.

MARICOPA, Kern Co., Cal.—Plans and specifications for a timber bridge, 400 ft. in length, to be built across the Cuyama River on the route of the Maricopa-Ventura Highway were ordered by the directors of Joint Highway Dist. No. 6 at the meeting Jan. 28. The estimated cost is \$10,000. No action was taken on the proposed call for bids for the Coyote Creek bridge or the tunnel lining. C. W. Petit is the engineer.

LOS ANGELES, Cal.—Concrete Engineering Co., 1450 Mirasol St., submitted low bid to County Supervisors January 30 at \$873.92, for furnishing reinforcing steel for the construction of a concrete culvert on Burbank Blvd. at Victory Blvd., as follows:

- (1) 4,650 lbs. 7/8-in. round deformed;
 - (2) 17,800 lbs. 3/4-in. do;
 - (3) 8,400 lbs. 1/2-in. square deformed;
 - (4) 10,000 lbs. 1/2-in. round deformed;
 - (5) 150 lbs. 3/8-in. do.
- Complete bids follow:
- (A) Concrete Engineering Co., Total (1), \$878.31; total (2)* \$873.92.
 - (B) Los Angeles Iron & Steel Co., (1) \$889.88; (2)* \$885.43.
 - (C) Blue Diamond Corp., Ltd., (1) \$949.54; (2)* \$944.79.
 - (D) Soule Steel Co., (1) \$946.00 (2)* \$959.18.

*Total is with discount deducted. Unit bids follows, (A) being the first line, etc.

SAN FRANCISCO—Ariss-Knapp Co., 961 41st St., Oakland, approved by directors of the Golden Gate Bridge District as sub-contractors for Barrett & Hilp for the San Francisco anchorage.

STOCKTON, San Joaquin Co., Cal.—Moore Drydock Co., Foot of Adeline St., Oakland, awarded sub-contract by Lord & Bishop, Sacramento, to furnish and fabricate 240 tons structural steel for Southern Pacific Bridge over the San Joaquin River.

SANTA BARBARA, Calif.—E. B. Brown, City Engineer, has been authorized to prepare estimates for a bridge to be built on Valerio Street across Mission Creek.

PIERCE COUNTY, Wash.—As previously reported, Carl Bjork, 2437 W 63rd, Seattle, at \$32,687 submitted low bid Feb. 2 to U. S. Bureau of Public Roads, Portland, to construct one log stringer bridge over North Puyallup river, together with approaches and parking area on the West Side Highway Proj. E-2-C2, Mt. Rainier National Park, involving: clearing and grubbing; 8500 cu. yds. unclass. excav.; 3 60-ft. log spans; 6200 sq. ft. log crib face; 435 cu. yds. Class A concrete; 200 cu. yds. masonry facing; 40,000 lbs. reinf. steel; 85 cu. yds. masonry walls; 60 cu. yds. masonry guard rails;

170 lin. ft. corr. galv. metal pipe. Complete bids follow:

- Carl Bjork, Seattle, \$32,687
 - Elich & Co., Seattle, 37,086
 - Chris Yanlick, Seattle, 37,279
 - Myers & Goulter, Seattle, 37,620
 - Western Const. Co., Seattle, 38,553
 - Butler Const. Co., Seattle, 39,229
 - A. Del Guzzo, Seattle, 41,857
 - J. F. Johnson, Newberg, 41,403
 - Stoner & Kunney, Seattle, 43,900
 - General Const. Co., 44,220
 - Newton Const. Co., Seattle, 45,870
 - P. C. MacRae, Seattle, 45,887
 - A. C. Greenwood, Portland, 46,565
 - Kuckenber-Wittman, Portland 48,440
- Bids held under advisement.

DREDGING, HARBOR WORKS & EXCAVATIONS

PORTLAND, Ore.—Hauser Const. Co., Multnomah Hotel, Portland, at \$498,754, total bid for north and south jetties, awarded contract by U. S. Engineer Office to reconstruct the north and south rubble mound jetties at the entrance to Yaquina Bay, Lincoln County, Ore.

SACRAMENTO, Cal.—Baker & Taylor, Chester, at \$27,898 submitted low bid to U. S. Engineer Office, Sacramento, to construct a levee, approximately three miles long, along the embankment of the Western Pacific Railroad which runs along westerly outskirts of North Sacramento, and along the southerly bank of Arcade creek, along the northerly edge of North Sacramento, involving 377,000 cu. yds. embankment in place.

Complete bids follow: Baker & Taylor, Chester, \$074; \$27,898.

Guy Bros., Stockton, \$.087; \$32,799. Morrison-Knudsen, L. A., \$.088; \$33-176.

Willard-Biasotti-Lovatti, Stockton, \$.0948; \$35,739.

R. L. Oakley, Palo Alto, \$.103; \$38,-831.

Ajax Dredging Co., S. F., \$.1073.

Haas, Doughty & Jones, S. F. \$1,075 \$40,527.

Porter Bros., S. F., \$.112; \$42,334.

Milton A. Purdy, Oakland, \$.1275; \$48,067.

A. Teichert, Sacramento, \$.133; \$50-141.

J. R. Reeves, Sacramento, \$.134; \$50-518.

John Phillips, S. F., \$.14; \$52,780.

Bids held under advisement.

SAN DIEGO, Cal.—Maj. W. H. Langan, U. S. Engineer at Los Angeles,

recommended to the San Diego harbor department that the city co-operate with the federal government in raising funds to provide for dredging the "middle ground," a shoal lying near the Benson Lumber Wharf, in order that the channel may accommodate U. S. Navy ships. The harbor department has the matter under consideration. Total cost of the dredging would be between \$200,000 and \$300,000. The channel would be widened to 500 ft. and deepened from its present depth of 14 ft. minimum and 18 ft. maximum depth to 26 ft. The length is 3000 ft.

SACRAMENTO, Cal.—State Reclamation Board authorized condemnation proceedings to complete rights-of-way for construction of the west levee of the Sacramento River from Colusa to Wohlfrom's Bend. The balance of the rights-of-way necessary have been secured by Reclamation District No. 2047, Colusa.

PORTLAND, Ore.—As previously reported, General Const. Co., 3840 Iowa St., Seattle, at \$174 cu. yds. (approximately \$77,000) submitted low bid to U. S. Engineer Office, 321 Customhouse, Portland, for dredging approx. 435,711 cu. yds. of material from a channel and for constructing a dike with about 41,600 cu. yds. of the dredged material, in Willamette river between points about one mile and 2 1/2 miles downstream from Oregon City.

Complete bids follow: Tacoma Dredging Co., Tacoma, \$1,1885.

Pacific Bldg. Material Co., Portland, \$1,938.

Oakland, \$47.

Oregon Bldg. & Dredging Co., \$488. Engineer's estimate.

Bids held under advisement.

STOCKTON, San Joaquin Co., Cal.—San Francisco Bridge Co., 503 Market St., San Francisco, at \$1,235 submitted low bid to U. S. Engineer Office, Sacramento, to dredge 309,000 cu. yds. of material from the 26-ft. channel between the mouth of Mormon Channel and Edison St., Stockton. Complete bids follow:

S. F. Bridge Co., \$1,235

Hydraulic Dredging Co., 1471

American Dredging Co., 157

Engineer's estimate 1615

Bids held under advisement.

SACRAMENTO, Cal.—Ajax Dredging Co., 249 1st St., San Francisco, at \$6.45 per hour awarded contract by U. S. Engineer Office, Sacramento, to furnish and operate a dragline for 80 hours.

PORTLAND, Ore.—U. S. Engineer Office, 321 Customhouse, Portland, will ask bids shortly to construct wharf, dolphins, trestle, land track-
age, dikes, etc., at Sand Island in Columbia River 3 mi. from Astoria, Oregon, involving:

- 131,700 lin. ft. piling;
- 664 M ft. lumber;
- 141 M. ft. ties;
- 56,400 lbs. tie rods;
- 15,700 lbs. bolts;
- 15,400 lbs. ship spikes;
- 15,200 lbs. track spikes;
- 180 tons steel rails;
- 9 sets frogs and switches;
- 17,000 cu. yds. stone;
- 45,000 cu. yds. stone.

Specifications not yet complete.

CAPITAL CITY TITLE COMPANY

▼

J. C. PALEN,
Manager

▼

914 Seventh Street
Sacramento :: California

PORTLAND, Ore.—U. S. Engineer office, 321 Customhouse, Portland, will ask bids shortly to repair south jetty at mouth of Columbia River, involving:

221,000 lin. ft. piling;
64,000 lbs. drift bolts;
122,000 lbs. machine bolts;
153,000 lbs. spikes;
650 tons steel rails;
91,000 lin. ft. wire rope;
52,000 lbs. steel straps;
1,600,000 tons stone.

Specifications not yet complete.

SEATTLE, Wash.—Dredging channel 10-ft. deep and 200-ft. wide in Bakers Bay, Washington, through the eastern passage at Sand Island to the port of Ilwaco recommended to Congress. Estimated cost, \$54,000; annual maintenance, \$6000.

DENVER, Colo.—George Herz Co., Platt Bldg., San Bernardino, submitted low bid to U. S. Bureau of Reclamation, Department of the Interior, Yuma, Ariz., Jan. 30 at a total of \$17,430 or \$.883 per cu. yd., for furnishing labor and materials and performing all work for raising about 11 miles of the Colorado river levee, Palo Verde Irrigation District, Calif. The work is located near Blythe and Ripley, Calif. The principal item and the estimated quantity involved is as follows:

210,000 cu. yds. excav. for levee.

The bids were referred to the Denver office of the Bureau for award.

PEARL HARBOR, T. H.—Hawaiian Dredging Co., Honolulu, T. H., awarded contract by the Bureau of Yards and Docks, Washington, D. C., at \$100,000 for dredging at the Middle Lock Shoal, Pearl Harbor.

SACRAMENTO, Cal. — Olympian Dredging Co., 249 First St., San Francisco, at \$66,748 submitted low bid to U. S. Engineer Office, Sacramento, to build stretches of new levee and to raise and strengthen an existing levee along the easterly bank of the Sacramento river from Meridan downstream for 11.5 mi. to Winship School, including clearing and grubbing right-of-way and moving, extending or reconstructing fences, road ditches, pipes, etc., involving 451,000 cu. yds. embankment in place in levee.

Complete bids follow:

Olympian Dredging Co., \$148, \$66,748.
Franks Contracting Co., San Francisco, \$156, \$70,356.

Bids held under advisement.

IRRIGATION PROJECTS

SHORT CREEK, Ariz.—The Silverlake Project Company has been organized with J. M. Lauritzen, Sr., president, and Charles Hanson, secretary-treasurer, for the purpose of developing a cooperative irrigation project. The promoters plan to impound 10,000 acre feet of flood and high waters from Short Creek canyons in Silverlake, a natural reservoir near Short Creek. This would be used to irrigate 3000 or more acres below the reservoir. As the construction consists entirely of movement of dirt by team and scraper, it is planned to allow early members of the project to work out their shares. Later, shares will be sold for cash to buy equipment.

CALIFORNIA.—Following is a list of Permits granted by the State Department of Public Works, Division of Water Resources, Sacramento, during the month of January, 1933, to appropriate water:

Permit 4049, Application 7307 (Sacramento Co.) issued to R. W. Spencer, et al, 3429 Folsom Blvd., Sacramento, for 800 gals. per day from un-

named spring, for domestic purposes. Est. cost, \$500.

Per. 4050, App. 7348 (Sierra Co.) C. E. Brewer, 503 Southwest Bldg., Los Angeles, for 3 second feet from Newhouse Creek, for mining purposes. Estimated cost, \$500.

Per. 4051, App. 7349 (Mono Co.) Mrs. Frankie M. Beatty, Bishop, 200 gals. per day from unnamed stream, for domestic purposes. Est. cost, \$50.

Per. 4052, App. 5992 (San Francisco Co.) Ednah M. Black, care Jos. A. Bien, atty., 209 Post St., San Francisco, for 670 ac. ft. from Burney creek for irrigation and domestic use on 866 acres. Est. cost, \$10,000.

Per. 4053, App. 7376 (Siskiyou Co.) Murty Brickley, care J. D. Fairchild, atty., Yreka, for 2.5 c.f.s. from Walker Creek, for irrigation and domestic use on 79 acres. Est. cost, \$25.

Per. 4054, App. 7377 (Siskiyou Co.) M. J. Brickley, care J. D. Fairchild, atty., Yreka, for 2.5 c.f.s. from Walker Creek, for irrigation and domestic use on 65 acres. Est. cost, \$100.

Per. 4055, App. 7366 (San Diego Co.) Julius Wieden, care Delemere Thurber, atty., Fallbrook, for 0.21 sec. ft. from unnamed creek, for irrigation and domestic use on 10 acres. Est. cost, \$1000.

Per. 4056, App. 7261 (Humboldt Co.) C. O. Rothermund, Dyerville, for five sec. ft. from Bull creek, for industrial purposes for fish ponds. Est. cost \$500.

Per. 4057, App. 7423 (Siskiyou Co.) H. A. Cook, Hapy Camp, 3 sec. ft. from Twin Gulch for mining purposes. Est. cost, \$500.

Per. 4058, App. 7420 (Trinity Co.) N. R. Ferguson, Junction City, for 0.1 of a second foot from unnamed stream for irrigation of 3 acres. Est. cost, \$200.

Per. 4059, App. 7450 (Trinity Co.) N. R. Ferguson, Junction City, for 0.1 of a second foot from unnamed stream for mining purposes. Est. cost, \$75.

BURLINGAME, San Mateo Co., Cal.—Committee is studying problem of area in North Burlingame flooded at intervals, and work may start later in the spring. Project involves drainage ditches, pipe and drainage pumps. Estimated cost, \$3500. F. A. Bloom, city purchasing agent.

IMPERIAL COUNTY, Cal.—The Board of Directors of the Imperial Irrigation District has filed in the Imperial County Superior Court a suit to validate the All-American Canal contract with the Federal government as approved by voters in the district January 12. The validation is one of the requirements of the Federal government before money can be expended on construction of this unit of the Boulder Canyon Project.

At the same time announcement was made that M. W. Conkling of San Diego has filed suit at El Centro to enjoin the Imperial Irrigation District from expending any money to further the All-American Canal contract. The action names the Imperial Irrigation District, Coachella Valley County Water District and the individual directors of the Imperial District, defendants. After formal allegations, the complaint asks:

First: That the said directors of the said Imperial Irrigation District be prohibited and enjoined from expending any moneys in the furtherance of said contract, or its completion, or in endeavoring to get the same ratified, or completed, or executed, or in getting anything done for the purpose of having the said contract carried out, and that the said directors be likewise enjoined from signing the said contract, or executing the same, or making any attempt to cause the same to be binding upon the said Irrigation district.

Second: That the court by its judg-

ment herein declare the contract and the whole thereof to be invalid and not a binding obligation of said district.

Third: That until the hearing and final determination of this cause, the court enjoin and restrain the said directors of the said irrigation district from expending any moneys in the furtherance of said contract, or its completion, or in endeavoring to get the same ratified, or completed, or executed, or in getting anything done for the purpose of having the said contract carried out, and that the said directors be likewise enjoined from signing the said contract, or executing the same, or making any attempt to cause the same to be binding upon the said irrigation district, and for such other and further relief as may be equitable and for costs.

CALIFORNIA.—Following is a list of APPLICATIONS led by the State Department of Public Works, Division of Water Resources, Sacramento, during the month of January, 1933, to appropriate water:

App. 7478 (Eldorado Co.) C. T. Oeste, % E. O. Anderson, Youngs, Calif., 0.25 c. f. s. from Middle Fork Consumnes River tributary to Consumnes River, thence Sacramento River for irrigation and domestic purposes. (20 acres). Est. cost, \$2000.

App. 7479 (Eldorado Co.) C. M. Carter, R. D. Nicol and W. P. Austin, % R. D. Nicol, 1733 Jefferson Street, Oakland, Calif., for 100,000 acre feet per annum from South Fork American River tributary to American River for municipal purposes. Est. cost \$3,000,000.

App. 7480 (Eldorado Co.) B. W. Stone, 161 Ellis St., San Francisco, Calif., for 500 c. f. s. and 125,000 acre feet per annum from Rubicon River, Pilot Creek, Gerle Creek, Loon Lake, Buck Island Lake, Rockbound Lake, Little South Fork Rubicon River tributary to American River Drainage area, for municipal purposes.

App. 7481 (Kern Co.) Laurel Development Company, 527 Roosevelt Bldg., Los Angeles, Calif., for 0.083 c. f. s. from Erskine Creek tributary to Kern River for mining purposes. Est. cost \$2500.

App. 7482 (Imperial Co.) Imperial Irrigation District, El Centro, Calif., for 10,000 c. f. s. from Colorado River tributary to Gulf of California for irrigation and domestic purposes.

App. 7483 (Imperial Co.) Coachella Valley County Water District, % Stewart, Shaw & Murphey, Atty., 835 Rowan Bldg., 5th and Spring Sts., Los Angeles Calif., for 2000 c. f. s. from Colorado River tributary to Gulf of Lower California, for irrigation and domestic purposes. (150,000 acres) Est. cost \$11,000,000.

App. 7484 (Los Angeles Co.) R. E. Rule, 706 Maltman Ave., Los Angeles, Calif., for 50 c. f. s. from San Gabriel River tributary to Pacific Ocean for irrigation and domestic purposes. (18,000 acres).

App. 7485 (Siskiyou Co.) Geo. R. Vause, 7354 17th Ave., N. W., Seattle, Wash., for 10 c. f. s. from Rock Creek tributary to Klamath River for mining purposes.

App. 7486 (Eldorado Co.) Thomas M. Prior, % J. P. Donovan, 3176 27th St., San Francisco, Calif., for 75 c. f. s. from Pilot Creek tributary to Rubicon River, thence American River for Mining and domestic purposes. Est. cost, \$15,000.

App. 7487 (Riverside Co.) Allen Foster Davis, Box 35, Star Route, Redlands, Calif., for 1 miners inch from unnamed spring tributary to whitewater River Watershed for irrigation and domestic purposes. (2 acres). Est. cost \$2000.

App. 7488 (Placer Co.) J. E. Faustina, 2714 E. 14th St., Oakland, Calif.,

for 10,000 gallons per day from Lake Tahoe for domestic purposes. Est. cost \$500.

App. 7489 (Eldorado Co.) W. P. Frick, 212 Easton Bldg., Oakland, Calif., for (1) 20 c. f. s., (2) 5 c. f. s., total 25 c. f. s., from (1) Middle Fork of Cosumnes River, tributary to Consumnes River, (2) Sopiago Creek (also known as Clear Creek) tributary to Middle Fork Cosumnes River for mining and domestic purposes.

App. 7490 (Siskiyou Co.) J. H. Terrett, Central Point, Oregon, for 3 c. f. s. from Butte Fork Creek tributary to Middle Fork of Applegate River for mining purposes.

App. 7491 (Mono Co.) George W. Kemper, 3701 Overland Ave., Los Angeles, Calif., for 200 gallons per day from unnamed stream tributary to Mammoth Creek and Owens River for domestic purposes. Est. cost, \$100.

App. 7492 (Plumas Co.) State of California, Department of Public Works, Division of Highways, % C. H. Purcell, State Highway Engineer, Public Works Bldg., Sacramento, Calif., for 0.025 c. f. s. from unnamed stream tributary to East Branch of North Fork of Feather River for domestic purposes. Est. cost, \$100.

App. 7493 (Plumas Co.) State of California, Department of Public Works, Division of Highways, % C. H. Purcell, State Highway Engineer, Public Works Bldg., Sacramento, Calif., for 0.025 c. f. s. from unnamed stream tributary to East Branch of North Fork of Feather River for domestic purposes. Est. cost \$50.

22

LA MESA, Imperial Co., Cal.—American Concrete & Steel Pipe Co., 4635 Firestone Blvd., South Gate, submitted low bid to La Mesa, Lemon Grove and Spring Valley Irrigation District, Feb. 4, on all five schedules at total bids shown below, for furnishing and laying of a centrifugal concrete pipe involving 60,000 ft. of 36-in., 39-in., 42-in. and 48-in. centrifugal concrete pipe-line complete with fittings and miscellaneous structures for the replacement of the district's flume or pipe-line, located at certain points between the Diverting Dam of the La Mesa Irrigation District on the San Diego River and Eucalyptus Reservoir near La Mesa. The total length is about 60,000 feet. C. Harritt, 4769 Spring St., La Mesa, General Mgr. The award of contract is contingent upon obtaining a loan of \$500,000 from the Reconstruction Finance Corp. The bids were:

American Concrete & Steel Pipe Co.—(1) Main line Proposal No. 1, \$423,690.46; (2) Main line with alt. "A" Prop. No. 2, \$413,795.40; (3) Main line with Alt. "B" Prop. No. 3, \$424,372.30; (4) Main line with Alt. "C" Prop. No. 4, \$424,917.45; (5) Main line with Alt. "D" Prop. No. 5, \$419,834.25.
United Concrete Pipe Co.—(1) \$444,888; (2) \$433,789; (3) \$451,000; (4) \$444,288; (5) \$438,888.
Bonna Pipe Co.—(1) \$470,536.50; (2) \$460,249.45; (3) \$473,642.25; (4) \$469,319.35; (5) \$468,915.50.

MACHINERY AND EQUIPMENT

SOUTH GATE, Los Angeles Co., Cal.—Until 7:30 P. M., Feb. 21, bids will be received by city council to furnish, for the use of the police department, two new, light, 8-cylinder automobiles, coach type body, etc., f.o.b. South Gate. Specifications may be obtained from H. C. Peiffer, city clerk. Certified check or cash, 5%.

WENATCHEE, Wash.—Until Feb. 20, 2 P. M., bids will be received by L. L. Mathews, city clerk, to furnish gasoline pump, equipped with totaliz-

ing meter and individual load meter. Specifications obtainable from above.

MODESTO, Stanislaus Co., Calif.—Following bids received by city council January 25 to furnish one tree spraying machine and engine mounted on skids:

John Bean Mfg. Co., San Jose, at \$1355 less 2% 30 days, Bean Spraying Machine, gas engine driven, 500-gal. tank. Deduct \$20 for 400-gal. tank.

Friend Mfg. Co., Gasport, N. Y. (30 Channing Road, Burlingame) at \$1091 less 5% 30 days, "Friend" Sprayer, LeROI Motor driven pump, 600-gallon tank.

Stanislaus Imp. & Hdwe. Co., Modesto, at \$1558 net, Hardie Twin Park Special Power Sprayer, Model A Ford motor engine driven pumps, 400-gal. tank. For 600-gal. tank add \$33.25 net.

Fitzhenry Guptill Co., East Cambridge, Mass., at \$1794 net for Model V-Special Power Sprayer, Waukesha Model V engine, 400-gal. tank. Add \$25 for each 100-gal. tank capacity. Also at \$1285 net for Model XA - Power Sprayer, Waukesha XA engine, 400-gal. tank. Add \$25 for each 100-gal. tank capacity.

All bids f.o.b. Modesto.

Bids held under advisement until February, 7:30 P. M.

PETALUMA, Sonoma Co., Cal.—Until Feb. 11, to be opened Feb. 14, 2 P. M., bids will be received by R. K. Forrest, Maintenance Superintendent, State Highway Department, P. O. Box 151, Petaluma, to rent one or two pneumatic tired low bed dump trucks not over 4 years old, 1½ cu. yd. capacity dump body for 100 days equipment to be used in Marin, Sonoma and Napa counties.

LOS ANGELES, Cal.—Mano Construction Co., 1427 N. Sycamore Ave., awarded contract by A. J. Holm, city purchasing agent, at an estimated total of \$2030 for furnishing one 1¾-cu. yd. gas shovel without operator on rental basis for a period of approximately 70 days, under Specifications No. 3007. The rental is \$29 per day.

SAN FRANCISCO—Main Engineering Co., 110 Hooper St., at \$70 submitted low bid (informal) to Department of Public Works to furnish new liners for asphalt plant. Complete bids follow:

Main Engineering Co. \$70.00
N. K. Davis (extra \$22) 75.00
S. F. Mill Furniture Co. 81.85
Bids held under advisement.

NORTH HOLLYWOOD, Los Angeles Co., Cal.—Bids for furnishing one ½-sack tilting type concrete mixer mounted on 2-wheel pneumatic tired trailer, f.o.b. North Hollywood via freight, under Req. No. 5776, were opened by the State Purchasing Agent Jan. 28. The bids were:

California Equip. Co.—Rex—\$180; above with roller bearing wheels, solid tires, \$160. Delivery, 2 days on pneumatic tires, at once on solid tires.

Concrete Machinery & Supply Co.—Rex—\$208. Delivery at once. Terms 3% 30 days.

Essick Machinery Co.—Essick Big Boy—\$225. Delivery at once. Terms, 2% 15 days.

W. A. Bremer—\$225. Delivery, five days. Terms, 5% 15 days.

Smith Booth Usher Co.—Jaeger 3½ C T \$235; Jaeger 3½ H R \$195. Delivery at once. Terms 3% 30 days.

Brown-Bevis Co.—3½ S Wonder—\$240; 3½ S Lakewood \$210. Delivery, 1 day. Terms, 2% 30 days.

Garlinghouse Bros.—Knickerbocker 3½ S \$269; with cushion type rubber tired wheels, \$249. Delivery, 1 day. Terms, 4% 30 days.

Harron, Rickard & McCone—3½ S

Smith 2-hp., \$283; 3-hp. with cushion tired wheels \$310. Delivery, 10 days. Terms, 3% 10 days.

LOS ANGELES, Cal.—Bids for furnishing three concrete mixers under Specifications No. 2988 were opened by A. J. Holm, City Purchasing Agent, Jan. 27. Bids were taken as follows:

(1) 3 power driven concrete mixers, equipped with shaking skips.

(Alt. 1) 3 power driven concrete mixers, but without shaking skips.

The bids were:

Harron, Rickard & McCone Co.—(1) \$4236, (1 alt.) no bid. Allowances, (a) P-8713, \$367, (b) P-7823, \$367; (c) P-8701, \$367. Terms, net. No. 10 S. Dandy.

Consolidated Machinery & Supply Co. (1) no bid, (2) \$2285. Allowances: (a) \$75, (b) \$50, (c) \$100. Terms, 5% 20 days. Republic 10-S L. C.

Garlinghouse Bros.—(1) no bid, (2) \$3588, Spring Mount Ransom 10-S, \$3869. Allowances: \$100 each. Terms, 4% 30 days. Ransom 10-S H. & D. or Ransom Spring Mount "S."

Brown-Bevis Co.—(1) \$3750, (2) \$3675. Allowances: \$350 each. Terms 2% 30 days. Master 10-s.

W. A. Bremer Co.—(1) no bid, (2) \$3825. Allowances: (a) \$140, (b) \$200, (c) \$200. Terms: 2% 20 days. Bremer new type 2-bag mixer.

Concrete Machinery & Supply Co.—(1) \$4885, (2) no bid. Allowances: \$150 each. Terms: 3% 30 days. Rex 10-S. If all three purchased, deduct \$50 on each machine.

Harry C. Collins Machinery Co.—(1) \$3235.50, (2) \$3070.50. Allowances: \$100 each. Terms: 3% 30 days. Leach 10-S.

Smith Booth Usher Co.—(1) \$3975, (2) no bid. Allowances: \$285 each. Terms: net. Jaeger 10 D L 4 R.

CENTERVILLE, Alameda Co., Cal.—Patchett & Crstenson, Newman, at \$2200 awarded contract by Washington Union High School to furnish two school bus bodies, 41 to 48 passenger capacity.

SAN FRANCISCO.—Link Belt Co., 400 Paul Ave., at \$113.16 submitted low bid to Department of Public Works to repair sand bucket elevator at the municipal asphalt plant. Only other bid submitted by Chain Belt Co. at \$132.91. Bids held under advisement.

FIRE ALARM SYSTEMS

SAN DIEGO, Cal.—Public Safety Commission has approved the recommendations of A. V. Goeddel, City Purchasing Agent, for the replacement of six fire engines. The proposed fire equipment program, which involves an estimated cost of \$180,000, includes the rebuilding or repair of ten stations and the building of three new stations, besides the purchase of new equipment.

PORTLAND, Ore.—Until Feb. 10, 2 P. M., bids will be received by Lee A. Baumhover, City Purchasing Agent, Room 208, City Hall, to furnish fire hydrants. Specifications are obtainable from above office. Certified check 10% payable to City of Portland, required with bid.

RESERVOIRS AND DAMS

LOS ANGELES, Cal.—Construction approved by Department of the Interior of Parker Dam on the Colorado River, a co-operative project of the Government and the Metropolitan Water District; estimated cost \$18,000,000. Project calls for construction of a dam on the Colorado River just below the mouth of the Bill Williams River.

RENO, Nev.—Sierra Pacific Power Co. plans to construct one or more reservoirs on the Truckee River between Boca and Floriston, capacity 280 acre feet; estimated cost \$150,000.

PASADENA, Los Angeles Co., Cal.—Bids for furnishing removable galvanized steel trash racks and appurtenances for the Pine Canyon Dam, approximately 170,000 lbs., opened by city board of directors January 31. The bids which were taken under advisement until 4:30 P. M. Feb. 1, were as follows:

Pacific Iron & Steel Co.—3.95c lb.; total, \$6715.

Emil Brown Co.—3.96c lb.; total, \$6732.

Emsco Derrick & Equip. Co.—riveted, 4.3c; total, \$7310; welded, 4.2c; total, \$7140.

Alhambra Foundry Co.—4.429c; total, \$7546.30.

Soule Steel Co.—4.54c; total, \$7718.

Southwest Welding & Mfg. Co.—4.75c; total, \$8975.

Consolidated Steel Corp.—4.8c; total, \$8160.

Truscon Steel Co.—4.85c; total, \$8245.

Western Pipe & Steel Co.—5c; total, \$8500.

National Supply Co. of Calif.—5½c; total, \$9066.67.

Apex Steel Corp.—riveted, 5.58c; total, \$9486; welded, 5.18c; total, \$8806.

Standard Steel Works—5.8c; total, \$9860.

Lee & Tallman—welded, 5.83c; total, \$9911.

National Tank & Mfg. Co.—6.05c; total, \$10,285 (delivered at dam).

LOS ANGELES, Cal.—Bids for furnishing steel vent pipe and fittings for San Gabriel Dam No. 2 opened by County Supervisors Jan. 30. Nine bids were identical, the tenth bid being for item (1) only, and the eleventh varying only in the addition of the extensions. The bids were taken as follows:

PROPOSAL NO. 1

Item (1):

- (a) 2, 16x14-in. reducers;
- (b) 5, 16-in., 45° elbows;
- (c) 3, 14-in., 90° elbows;
- (d) 1, 16x14x14-in. reducing tee;
- (e) 1, 12-in., 45° elbow;
- (f) 1, 14x14x12-in. reducing tee;
- (g) 3, 16x12x14-in. reducing tees.

Item (2):

- (a) 1 piece, 16-in. dia., 2-ft. 6-in. standard steel pipe, flanged one end;
- (b) 1 piece, 16-in. dia., 6-ft. 6-in. standard steel pipe, flanged both ends;
- (c) 1 piece, 16-in. dia., 13-ft. standard steel pipe, flanged one end;
- (d) 1 piece, 16-in. dia., 9-ft. standard steel pipe, flanged one end;
- (e) 3 pieces, 16-in. dia., 12-ft. standard steel pipe, flanged one end;
- (f) 2 pieces 14-in. dia., 3-ft. 8-in. standard steel pipe, flanged both ends;
- (g) 2 pieces, 16-in. dia., 3-ft. ½-in. standard steel pipe, flanged both ends;
- (h) 4 pieces, 12-in. dia., 2-ft. 6-in. standard steel pipe, flanged one end;
- (i) 2 pieces, 12-in. dia., 5-ft. 6-in. standard steel pipe, flanged one end;

Item (3):

- (a) 72 ¾-in. machine bolts with hex. nuts, 3½-in.;
- (b) 348 1-in. machine bolts with hex. nuts, 4-in.

E. C. Eaton, 202 N. Broadway, County Flood Control Engineer.

Identical bids were submitted by the following: Crane Co., Ducommun Corp., Southwest Welding & Mfg. Co., Grinnell Co., Santa Fe Pipe & Supply Co., Alhambra Foundry Co., Ltd., Ilacker Pipe & Supply Co., Vernon Foundry, Inc., and Commercial Iron

Works. The prices were: (1) (a) \$64.40 each, (b) \$42.84, (c) \$32.58, (d) \$70.92, (e) \$23.40, (f) \$53.64, (g) \$70.92; (2) (a) \$22.33, (b) \$50.12, (c) \$60.45, (d) \$45.93, (e) \$56.82, (f) \$27.49, (g) \$25.40, (h) \$14.58, (i) \$23.53; (3) (a) \$9.32 per C or \$,0932 each, (b) \$12.12 per C or \$,1212 each; total, \$1418.77; with discount, \$1390.39.

Long Beach Iron Works bid on item (1) only at prices as shown in preceding bids.

Midwest Piping & Supply Co., Inc.—itemized prices identical—totals, \$1,418.79; with discount, \$1390.41.

LOS ANGELES, Cal.—The contract for the co-operative construction and operation of the \$13,000,000 diversion dam on the Colorado River at Parker, by the Metropolitan Water District and the Federal Government, has been approved by the Department of the Interior, according to an announcement by Ray Lyman Wilbur, Secretary. The dam is designed to stabilize the flow of the Colorado River subject to the provisions of the Colorado River Compact. The site selected is the upper of the two Parker sites. The plan now adopted by the Bureau of Reclamation will substitute the upper site and employ power generated there for the pumping of water to the Parker area and the Gila lands as separate projects, in lieu of a 130-mile canal to the Gila area under the alternative plan.

The proposed dam will be located in the Colorado River just below the mouth of Bill Williams River. It will raise the water level about 70 ft. and will provide a head to generate about \$0,000 H. P. of electrical energy. The estimated cost is \$12,958,000. The estimated cost of river diversion is \$2,640,000 for works designed to pass the river flow after the Colorado River is regulated by the Hoover Dam.

According to previous estimates prepared by James Munn, Chief of Construction of the Metropolitan Water District, the unit price of the tunnel excavation is \$7.50 cu. yd., the concrete lining, \$20, open cut excavation, 75c for each work, \$3 for rock work, \$1 for earth fill, and \$2.50 for excavation is estimated at \$2,603,000 for 1,271,000 cu. yds. or at an average of about \$2.05 per cu. yd. Deepest bedrock is about 200 ft. below water level. Borings indicate a class of material which should not be particularly hard to move. According to Mr. Munn, to move the quantity in the available time will require a carefully planned program with adequate equipment. With this and favorable river conditions fairly well assured the estimated price is believed to be sufficient.

Mass concrete in the dam is estimated at \$8 per cu. yd. for 280,000 cu. yds. Concrete in piers, at \$25; operating platform, parapets, and outlet tower at \$27; tower foundations at \$15, and concrete lining at \$20. Instead of the usual addition of 25 per cent for engineering, general expense and contingencies, an addition of 30 per cent has been made to the construction costs. This is to offset the extra chance that the diversion works may not control the flow if the Bill Williams River undergoes a flood at an inopportune time.

All the money will be advanced by the Metropolitan Water District and construction will be effected by the United States, which will retain ownership of the dam. The dam will be for the joint benefit of the district and of Indian and public lands in Arizona.

In return for its service, the United States will retain one-half the power privileges. About 40,000 horsepower will thus be acquired for use in Arizona without capital investment, thereby advancing by many years the feasibility of reclamation of large

areas in the Colorado River Indian reservation and the proposed Gila project in Arizona. Statutory authority already exists for the construction of the dam in aid of reclamation of the Colorado Indian reservation.

Among other privileges which the United States will reserve under the contract will be the right to control all water passing the dam and to utilize the top ten feet of storage capacity for their regulation in connection with Hoover Dam power operations and flood control. The district will transmit Arizona's share of Hoover Dam power, 117,000 horsepower, over its lines from Hoover Dam to Parker Dam at cost to the extent of the available capacity of the district's lines.

LOS ANGELES, Cal.—West Slope Construction Co., Financial Center Bldg., Los Angeles, contractor for San Gabriel Dam No. 1, has filed with County Board of Supervisors a formal request for the Board's approval of wishes to sub-let as follows:

Diversion tunnels and all appurtenances to Morrison-Knudsen Co., 1121 Title Guarantee Bldg., Los Angeles.

Boarding of men and operating of commissary store to Holmes Supply Co., 4th St. and Santa Fe Ave., Los Angeles.

The West Slope Construction Co. has completed cleaning and preparing of the camp and will have the building ready for occupancy within the next few days. Shovel work will probably start about Feb. 6.

SEWERS AND SEWAGE DISPOSAL PLANTS

LOS ANGELES, Calif.—Artukovich Bros., 912 S Atlantic Blvd., Hynes, submitted low bid to board of public works Feb. 1 at \$34,958 to construct Wilmington intercepting sewer in Fries Ave. and a private right of way in Fries Ave. bet. Water St. and a pt. 734 ft. southerly therefrom, and in a portion of Water Street, and another right of way, under cash contract.

This is a readvertisement. The other bids were:

John Topich	\$36,000
Martin Const. Co., Inc., Ltd.	36,444
Chutuk, Kordich & Vukojevich	39,563
Mike Radich	43,800
Mlagenovich & Gillespie	48,900
Culjak & Zelko	49,000
Leo Miletech	61,890

The previous low bid, Dec. 21, was submitted by Simunovich & Plich at \$31,400. The engineer's estimate was \$41,225.

LOS ANGELES, Cal.—J. C. Hickey, 320 S Palm Ave., Alhambra, awarded the contract by the board of public works February 1, at \$63,413.04 for the construction of three intercepting sewers and two local sewers in the Ventura Blvd. and Milbank St. Sewer District, under the 1911 Act. The interceptors are: First, Van Nuys Blvd. between Milbank St. produced and Ventura Blvd., Milbank St. bet. Woodman Ave. and Van Nuys Blvd., and Woodman Ave. bet. north outfall sewer and Milbank; second, Ethel Ave. bet. Moorpark St. and Ventura Blvd.; third, Laurel Grove Ave. bet. Valleyheart Drive and Ventura Blvd., Valleyheart Dr. bet. Laurel Canyon Blvd. and Laurel Grove Ave., and Laurel Canyon Blvd. bet. Woodbridge Street and Valleyheart Drive north. The two local sewers are: Robler Place, bet. its east terminus and Tyrone Ave., and Dunbar Place bet. its east terminus and South Sherman Way. The total length of the sewer is 18,321.49 lin. ft. and the average depth of the structures, exclusive of cleanout manholes, is 14.5 ft. The resurfacing will include both decomposed granite and rock and oil.

MISCELLANEOUS CONSTRUCTION

LOS ANGELES, Cal.—Wenzel & Henoch Construction Co. of Milwaukee, Wis., the contracting firm which has been re-instated as the low bidder on the San Jacinto Tunnel following the rescission of the tentative contract with the Metropolitan Engineering Corp. last Friday, is a Wisconsin corporation organized with a capital stock of 1500 shares of no par value. All of the stock is owned by the three directors and officers, viz.:

- R. G. Wenzel, President.
- O. P. Seefeld, Vice-president.
- E. F. Henoch, Secretary.

The company's Milwaukee address is 1524 North 27th St., Milwaukee. E. F. Henoch is representing the company in Los Angeles. His present address is the Los Angeles Biltmore Hotel.

The Wenzel and Henoch Construction Co. lists in its statement of experience nine completed tunnel projects and one now being completed. These are exclusive of approximately \$10,000,000 in sewer and tunnel contracts in Milwaukee County, Wisconsin, since 1924. The list of recent projects follows:

- Sewer Department, Milwaukee, 26th St. Tunnel, 1927, \$1,157,912.16.
- Sewer Department Milwaukee, Morgan Ave. Tunnel, 1929, \$598,318.91.
- Sewer Department, 4th and Brown Tunnel, 1931, \$303,005.
- Sewer Department, Beecher St. Tunnel, 1930, \$429,935.
- Sewerage Commission, Milwaukee, First Ave. Tunnel, 1927, \$296,570.
- Sewerage Commission, River Hills Tunnel, 1932, \$426,146.93.

Quarters will be housed in one building which will be a U-shaped structure, extreme dimensions, 171x 225 feet; 16 suites each.

ICE AND COLD STORAGE PLANTS

Plans Being Prepared.
ADDITION Cost, \$70,000
SAN FRANCISCO. Channel Street. Extend refrigeration terminal (200,000 cu. yds. floor space); new machinery, piping, etc.
Owner—State of California (Harbor Board).
Engineer—Frank G. White, Ferry Bldg., San Francisco.

POWER PLANTS

Preparing Plans.
SUBSTATION Cost, \$175,000 including equipment
PALMS, Los Angeles Co., Cal. Kincaidine Ave. near Durenga Ave. One-story brick power substation (130 by 50) steel roof trusses, and columns, concrete roof and floor, ruff brick facing, art. stone trim, steel sash, hollow metal doors, etc.
Owner—Los Angeles Bureau of Power and Light.
Plans by Eng. Dept. of Owner.

LOS ANGELES, Cal.—E. F. Scattergood, Chief Engineer, Bureau of Power and Light, has prepared a list of approximate amounts of materials that will be used in the construction of the 271 miles of transmission line from the power plant at Hoover Dam to Los Angeles. In addition to the loan of \$22,800,000, made by the Reconstruction Finance Corp., the Bureau will expend probably \$11,000,000 of its own funds. Including extensions and betterments to be made within the next two years the cost will probably reach \$41,300,000 according to a conservative estimate made by the department.

The proposed transmission line will involve the construction of a double circuit transmission line with a capacity of 215,000 kilowatts at 275,000 volts pressure. Orders for electrical power equipment of special design, costing \$11,500,000, will be ordered as soon as the loan has been approved by the California Supreme Court. The equipment and materials required total about 61,910 tons. Among the items of equipment are:

13,500 tons copper transmission conductor;

1,090 tons copper-steel ground wire; 28,000 tons struc. steel, principally in towers;

1,540 tons insulators; 2,310 tons oil-circuit breakers; 2,150 tons transformers; 1,090 tons synchronous condensers; 2,500 tons underground cable;

The Boulder Canyon power plant will require:

2,450 tons hydraulic turbines, gate valves, etc.;

2,750 tons electric generators; 1,320 tons transformers; 660 tons oil circuit breakers.

The project will necessitate 12,000 carloads of freight handled.

CHIHUAHUA CITY, Mexico.—The Chihuahua state government is considering plans for the construction of an electric light and power plant and water works system at the town of Escandon, Chihuahua. The reported cost of the projects, which would be taken care of by the state, is 250,000 pesos (approx. \$85,000).

LOS ANGELES, Cal.—The proposed \$22,000,000 self liquidating loan to finance the construction of a transmission line from the Hoover Dam to Los Angeles has been approved by engineers for the Reconstruction Finance Corp. Construction of the proposed lines will require two and a half years and require new equipment costing \$14,000,000.

MEYER BROS. BID \$104,442 ON MARIN FIELD QUARTERS

Eastern Firms Submit Low
Figures on Visalia
Postoffice

Thirteen proposals were received on the contract for construction of 12 sets of officers' quarters at Hamilton Field, Meyer Bros., San Francisco, being low at \$104,442.

The second and third low figures were submitted by Robert E. McKee, Los Angeles, at \$109,900, and Leo Epp, San Francisco, at \$114,353.

Two eastern contracting firms presented the first and second low bids on the Visalia postoffice. The low bid was \$105,700 by Murch Bros. Const. Co., St. Louis. North Moller Company of Jackson, Mich., was second at \$109,989, and Bannister-Field, Los Angeles, third at \$110,500.

Bids for grading and paving 2.9 miles of state highway north of Bakersfield were opened yesterday in Sacramento, the low figure submitted by Gogo and Rados, Los Angeles, at \$118,547. Fredrickson and Watson and Jones and King, Oakland, were second low at \$137,341.

BRICKLAYERS TO GET \$11 ON U. S. CONTRACT

Thirty bricklayers employed on the Government Island building project will continue to receive \$11 a day, the Department of Labor has ruled.

Protests were entered by brick contractors against the \$11 wage scale which it is contended is higher than the prevailing rate in this vicinity. The controversy was settled by appealing to Secretary of Labor Wm. N. Doak. His decision was received yesterday, upholding the union.

Bricklayers in the Eastbay recently made an agreement to pay \$9 a day for all labor, conforming to the scale fixed by the Impartial Wage Board.

THE WEEK'S NEWS Highlights

SAN FRANCISCO BAY BRIDGE: Official bid calls were issued for three additional contracts on the San Francisco-Oakland Bay Bridge, bringing the total work authorized to date to approximately \$40,000,000. The first bids will be received February 28 at Sacramento, and others in San Francisco, March 2, 7 and 8.

BUILDING PERMITS: San Francisco's January building permit total, including \$12,440,700 in work on the Golden Gate Bridge, were the equivalent of all the building permits reported by the ten largest cities in the United States during December. The city's total was \$14,557,555.

AIR-CONDITIONING: Engineers, architects and contractors held a two-day conference in San Francisco and Berkeley devoted to the engineering and commercial aspects of the air-conditioning industry. Speakers predicted air-conditioning would be part of all new building specifications in the near future.

AQUEDUCT ROAD CONTRACTS: Los Angeles Metropolitan Water District awarded contracts for 84 miles of roads in the Colorado aqueduct system. The awards aggregated \$400,739 under four schedules.

LUMBER ORDERS: New orders showed a consistent gain over production at western lumber mills during January and the early part of February, according to the West Coast Lumbermen's Association.

IMPORTANT OPENINGS: Include proposals on the construction of 12 sets of officers' quarters at Hamilton Field (Meyer Bros. low at \$104,442); Visalia post office (Murch Bros. low at \$105,700).

EXPECT TEN TO BID ON BAY BRIDGE

Sixty Sets Of Specifications
Out From Commission
Office

Ten of the largest contractors in the United States are studying plans and specifications for the construction of the West Bay Foundations of the San Francisco-Oakland Bay Bridge, bids on which will be opened February 28, it was reported yesterday by Chief Engineer C. H. Purcell.

Director of Public Works Earl Lee Kelly requested an estimate of the number of bidders anticipated and was informed by Purcell no estimate could be made but that the largest contractors in the United States including firms in New York City, Pittsburgh, Philadelphia, Chicago, St. Paul, Kansas City and Los Angeles had requested and received sets of plans and specifications and were making extensive investigations of the contract.

"The Bridge engineers are gratified by the interest shown by the largest contractors of the United States in our first contract, No. 2, which provides for the building of the substructures in the West Bay" Chief Engineer Purcell said.

"More than sixty sets of plans and specifications have been issued. Of course, the larger number goes to those interested in materials, and probably some to firms incapable of bidding. There are, however, more than ten of the largest contractors in the United States showing an active interest in this first contract for the San Francisco-Oakland Bay Bridge."

Contract No. 2 calls for the construction of five deep water piers between San Francisco and Yerba Buena Island at an estimated cost of nine million dollars.

MOVE BRANCH OFFICES

Branch offices of Allis Chalmers Manufacturing Company, tractor division, have been moved from Spokane to Portland, A. E. Mills is branch manager. Clyde Equipment company will continue as dealers, it is announced.

Modern gymnasium just opened at University of California, Berkeley, replaces antiquated plant in use more than fifty years. The new building and equipment represents the most modern development in an institution dedicated to physical training and protection of student health. The building was designed by Architect George W. Kelham; H. J. Brunner, structural engineer, and Hunter & Hudson, mechanical engineers.

Pacific Coast Dealers' Installations. Make Berkeley Athletic Plant Model Center Of Student Physical Training

University of California men students now have the advantage of a gymnasium equal to that of any institution in the world in construction and facilities. With the opening of classes in 1933 athletic activities at the Berkeley campus were transferred from the ancient Harmon gymnasium to the new plant, built and equipped at a cost of approximately \$1,000,000.

The building was designed by Architect George W. Kelham of San Francisco in collaboration with H. J. Brunner, structural engineer, and the firm of Hunter and Hudson, mechanical engineers.

Leading Pacific Coast manufacturers and dealers participated in furnishing the variety of up-to-date equipment specified by university athletic directors and physicians who made their recommendations after a survey of gymnasia throughout the nation. The complete plant brings into one institution for the first time a combination of all up-to-date devices for the care of student health and promotion of indoor sports.

The gymnasium is in fact a group of gymnasia, including a main basketball court and auditorium that will seat 7000 persons, three specially equipped rooms 40 by 60 ft. each for boxing, wrestling and apparatus work, and a fencing room, 21 by 59 feet. There are five squash courts, convertible to handball singles courts.

Armories for the military and naval officers' training units are located in separate quarters.

Two rooms are equipped with sunlamps under which students ailing from colds and minor respiratory diseases will receive ultra-violet treatments.

Four thousand lockers provide individual storage space for clothing and gym suits for all physical training students. There are 225 heads in the shower rooms.

The main hall can accommodate 7000 spectators for a basketball game or three simultaneous boxing or wrestling matches or will allow three practice basketball games to be played at the same time. The hall measures 160 feet by 210 feet with a 52-foot ceiling. Clear floor dimensions are 100 by 150 feet.

Five thousand spectators may be seated in the balcony, while an additional 2000 are accommodated in portable bleachers extending from the balcony to the main floor.

Two swimming pools are located outdoors at the southern end of the building. The general pool is 60 by 100 feet with a depth varying from 4 to 9 feet. It is supplemented by a special pool for diving practice ranging in depth from 9 to 12 feet and measuring 40 by 75 feet. Diving equipment includes six 1-meter boards, two 3-meter boards, two sand-pit boards and a 5-meter diving tower.

The building itself is 395 feet in length, 205 feet in width, and 60 feet in height, including 3,450,000 cubic feet of space and 119,000 square feet of useful floor space. Outdoor pools and decks which are enclosed by a concrete wall add another 49,000 feet of space.

Materials used in construction included 10,800 cubic yards of concrete; 14,500 barrels of cement; 360 tons of reinforcing steel; 1,010 tons of structural steel; 550,000 board feet of form lumber.

FRESNO BUILDERS ELECT MARCH 24

Officers of the Fresno Builders' Exchange will be elected at the annual meeting of the directors March 24.

Eugene O. Thompson, head of Thompson Bros. and vice president and acting president of the exchange since the recent death of A. M. Goedel, is slated to be elevated to the presidency.

Other officers are J. M. Brown, treasurer; Harry Cayford, secretary-manager, and Thompson, Brown, F. M. Low, A. M. Healey, M. W. Hancock, H. G. Rohr, L. G. Jeffrey, R. E. Jolly and T. A. Osborn, directors.

Delegates to the semi-annual convention of the California State Builders' Exchange in Los Angeles, March 17 and 18, are soon to be named by the directors.

U. C. ENGINEERS' DAY CELEBRATION MAR. 10

Engineers' Day will be observed on the University of California campus, March 10, it is announced by a committee of the engineering college in charge of the day's program.

Open house will be held in the departments of electrical, civil, mining, mechanical and chemical engineering from 1 o'clock to 6 o'clock. Among the demonstrations and exhibits will be a symposium on welding, models of the Golden Gate and San Francisco Bay bridges, television, modulated light beam communication, kerosene, hot air and Diesel engines, tesla coil high frequency, fatigue tests, aircraft construction, Pelton water wheel and liquid air.

The public is invited to visit all the college departments.

SAN ANSELMO PERMITS

Permits for two new residences were issued in San Anselmo during January, according to the report of Chas. H. Cartwright, building inspector. The total value of new construction for the month was \$12,300.

\$4150 IN NEW STATE LABOR LAW PENALTIES

MacDonald Drive To Enforce Wage Scale on Public Works Is Launched

Frank C. MacDonald, State Labor Commissioner, announced yesterday that, in a drive to enforce the Prevailing Wage Rate Law on Public Works, he has notified the California Highway Division and Division of Architecture that investigations made by his office disclosed 415 violations of this law by contractors and subcontractors doing public work and that he has asked penalties totaling \$4150 be assessed and held out of the payments due on the three jobs involved. These new penalties are in addition to the \$4220 announced by Mr. MacDonald on Feb. 4, 1933, and are as follows:

1. Against Rocca & Caletti of San Rafael, contractors on the Livingston Bridge, Merced County, being erected for the State Highway Division, for failure in 121 instances to pay steelmen, carpenters, trouble shooters and piledriver men the prevailing rate as set forth in the contract covering the job at \$10 per day for each violation, \$1210.00.

2. Against Wm. G. & A. Gilmour of San Francisco, plastering subcontractors under R. W. Littlefield, contractor erecting Veterans Home at Yountville, Napa County, for failure in 200 instances to pay plasterers employed on the job the prevailing scale set forth in the contract covering the job, at \$10.00 per day for each violation, \$2000.

3. Against D. McDonald and N. M. Ball of Sacramento, contractors engaged in widening the Yolo Causeway in Yolo County for the State Highway Division, for failure in 94 instances to pay pile driver men engaged in capping piles the prevailing scale set forth in the contract covering the job, at \$10.00 per day for each violation, \$940.00.

Penalties announced Feb. 4 were as follows:

1.—On State Armory job at Salinas, Guth & Fox of Sacramento, contractors, total penalty \$830.00 against the following subcontractors:

1.—P. H. Donnelly of Oakland, plastering subcontractor, 52 violations, \$520.00.

2.—W. A. Dontanville, Salinas, excavating subcontractor, 19 violations, \$190.00.

3.—Tynan Roofing & Tile Co., Salinas, roofing subcontractors, 12 violations, \$120.00.

II.—On State Teachers' College job at Arcata, Humboldt County, Andy Sordal, contractor, total penalty \$3390.00, against the following subcontractors:

1.—Leon R. Smart, Los Angeles, lathing subcontractor, 145 violations, \$1450.00.

2.—Estate of W. H. Robinson, Los Angeles, steamfitting subcontractor, 195 violations, \$1940.00.

General Electric Engineer Says U. S. Homes And Offices To Spend Billions For Air-Conditioning Installations

NOTE: Following is a portion of a paper by Elliott Harrington, Engineer in the Air-Conditioning Department of the General Electric Company.

Back in 1915, Dr. Steinmetz wrote as follows:

"When heating is done electrically, if I want 70 degrees in my home, I shall set the thermostat at 70 and the temperature will not rise above that point. This temperature will be maintained uniformly without regard to the temperature outside.

"If it is very cold, electric heaters will hold the temperature at 70. If it should be 90, or 100 degrees outside, the same electrical apparatus will cool the air inside. In this way, we shall have a uniform temperature in our homes throughout the year.

"Besides temperatures, we have to suffer from humidity, or from dryness of the air. This is especially true with the present-day furnace. With electric equipment, we shall be able to control this and have humidity normal at all times. This electric equipment will have an absolute automatic control of both temperature and humidity.

"Ventilation doesn't exist in the average home today. At present, we have to depend upon the windows and doorways, or we turn on an electric fan to blow the bad air out. When electricity is developed, we shall have apparatus that will destroy the bad air, bring fresh air into the home, and when the air outside is not sufficiently invigorating, automatically arrange a distribution of ozone. We shall constantly have good, fresh, pure air indoors."

A substantial portion of this prophecy, made 17 years ago, has come true and the balance of Dr. Steinmetz' prediction, with the possible exception of the proposed use of ozone, is destined to be realized.

Some of the further developments in the field of air conditioning will be as follows:

It is recognized that the best mechanical treatment of air which is known today does not reproduce the buoyant and exhilarating air conditions of a spring morning in the open country. In other words, one or more fundamental requirements must be added to the definition of air conditioning for comfort and health, as given previously in this paper. Ionization of the air has been suggested as one essential factor but it has not yet been identified. Perhaps there are other missing elements. Some day they will be fully recognized.

The effect of air conditioning on comfort is well established but its full effect on health is not entirely proven. The A.S.H.V.E. is carrying on an investigation, aiming to fully identify the benefits of air conditioning to health.

A more definite measure of comfort is needed than that given on the Comfort Chart referred to previously. In other words, a comfort meter is essential to the accurate handling of air conditioning problems. Perhaps a very exact measure of skin surface temperature will lead to the development of such a meter.

Adequate as our present heating systems are, they are susceptible to fundamental improvement. In this regard, the following quotation from a paper by Professor C. P. Yaglou of the Harvard School of Public Health is pertinent:

"It is now beginning to be recognized that our present heating methods are crude and much less healthful than Nature's method. There seems to be a great difference between the sensations of warmth, comfort, and well being, produced by solar radiation falling upon the human body on a pleasant cool day, and those which arise in rooms heated by the usual convection methods. The assertion is often made that the 'common cold' and other more serious respiratory diseases begin with the heating season, and there are good reasons to suspect that the effect may be due, at least in part, to the source and nature of radiation employed in modern heating systems."

Professor Yaglou then goes on to show that the most obvious difference between heat from the sun and the heat given off by our accepted systems of heating, is the form of the heat ray. Generally speaking, our artificial heat sources emit only the 'long infra-red' rays, whereas the "short infra-red," the "visible" and the still shorter "ultra violet" rays which go to make up sunshine, are almost entirely absent. It is now believed that rays from this portion of the spectrum are essential to life and health and that many of the common winter ailments are due to the absence of the visible and ultra-violet rays of the sun.

Leonard Hill recently reported some very interesting observations to the Royal Institute of Public Health in London. Hill said that he was very sensitive to the depressing stuffy effect produced by the "long infra-red" rays and that the direct heat from an ordinary radiator deflected the septum of his nose closing up the left side. A dull electric fire under a well ventilated chimney produced the same effect, but when the source of radiant heat was screened from his face, the stuffiness disappeared and his nose reopened. Carrying his observations further, Hill is reported to have cut a hole in a piece of cardboard and, using this to screen his face he breathed the warm air thru the hole. In this case, the nose remained open until the screen was removed, when it closed again.

The same results were obtained

from the heat radiated by coal stoves and panel heated walls, but gas or electric incandescent heaters did not produce these results. It seems fair to assume that this was because these sources of heat give off "short infra-red" rays as well as a small percentage of "visible" and "ultra-violet" rays.

Summing up the above, it seems obvious that man-made heating systems now in general use do not equal the characteristics of nature's heating system. The increasing use of sun lamps in the home is at least in the direction of overcoming this probable deficiency.

It is difficult to determine the extent of the future market for Air Conditioning apparatus because of the rapid development which is now taking place. It has been estimated that in the present state of the art, the potential market is at least five billion dollars. This does not seem excessive when one thinks of the thirty million homes in this country, over twenty million of which are electrically wired. Added to this there are twenty five hundred large theatres, one thousand large department stores, fifteen hundred banks, not to mention the office buildings, chain stores, restaurants, hotels, specialty shops, railway trains and motor buses. It is certainly safe to say that the market possibilities are tremendous and the resultant benefits to health and comfort are well worth the investment.

On every hand, there is evidence of a growing interest in better housing. With thirty million homes in this country, a great majority of them are either obsolete or deficient in one or more major respects. In fact, probably not one per cent of these homes, fine as many of them are, approach the readily possible standard of comfort, convenience, cleanliness and health.

Perhaps the greatest economic force in this country is represented by the two hundred and forty eight billion dollars of assessed real estate valuation in the United States. Isn't it perfectly conceivable that some day we may see a substantial improvement in the home building industry? The forces are already at work. There are separate programs under way, all dedicated to the production of a moderate sized home erected from factory-made sections in a few days instead of three to six months, embodying equipment for comfort and health undreamed of a few years ago; all at a cost of less than the corresponding cost with present accepted methods. All of this is well into the future, but it is on the way.

The unit kitchen, with every conceivable convenience built in, is already a reality. So is the unit laundry. It remains to amplify these and other unit principles, reduce them to practice and then obtain the distribution which will permit quantity manufacture. And what is more necessary to the health and comfort of the families who will abide in these homes, than the proper air conditions within? Air Conditioning will certainly

be part and parcel of them all; inconspicuously built into the units, standardized completely and provided at a cost absurdly low when the resultant benefits are considered.

The would-be prophet is often a dangerous person to have around but, nevertheless, it does seem in order to make the following rather conservative and entirely justified prediction:

The day is coming when the air conditioning of the enclosures in which we live and work will be the generally accepted standard and apparatus for conditioning air will be installed, even in small homes, with the same nonchalance that electric lighting and modern plumbing are now specified. The air conditioner for the home will be a single unit installed much as a boiler is now placed in the basement. It will be a perfectly standardized article, manufactured in large quantity, relatively light in weight and purchasable at a reasonable price. It will not only provide the four essential elements of air conditioning as now understood but will take care of additional factors yet to be discovered, to produce in the home a degree of comfort and health as yet unknown. The Air Conditioning contractor will be skilled in application engineering as well as in the merchandising of his product.

Air Conditioning is not a great new industry which has sprung into being over night and which, alone and unaided, will carry the country out of present economic difficulties. However, it is an industry which has been gradually growing for years, and which will continue to grow, rich in achievement and full of promise for greater health, happiness and prosperity to all mankind.

\$140,000 R. F. C. FUNDS FOR STATE RELIEF

First funds from the Reconstruction Finance Corporation for relief work in California have been deposited with the state treasurer, according to S. Resford Black, director of the labor camp committee.

The R. F. C. has forwarded a check for \$140,000 and this will be supplemented with an equal amount to be delivered in February. An additional \$250,000 may be obtained later in the spring, Black said.

Machinery was put in motion immediately to enlarge the state labor camp program for care of unemployed transients. The number to be housed in the camps will be increased from 5,000 to 15,000.

"This means there will no longer be any occasion for further 'panhandling' on the streets of California cities by jobless men," said Black.

"If any one stops you on the street and asks you for a dime to buy coffee and doughnuts, you will be justified in telling him that good food, warm clothes and shelter are now available at the state labor camps, and all he needs to do is to apply."

L. A. HAS THIRD OF STATE TRUCKS

There was 106,233 trucks registered in the state of California during 1932, according to a report of the state department of motor vehicles. More than one-third of this number were in Los Angeles county. In the same period licenses were issued for 61,860 trailers.

The division of pneumatic tired trucks and solid tired trucks was as follows: Pneumatic, 93,244; solid, 8,039; trailers, pneumatic, 54,752; solid, 7,118.

Complaints To State Contractors' Bureau Average 42 Monthly; 113 Suspended

The Bureau of Contractors' Registration has been exceedingly active during recent months in stamping out the unethical and illegal practices of the irresponsible contractor and builder, and the work of this unit of the Department is meeting with an increasing degree of success, reports Glen V. Slater, assistant registrar of contractors.

The number of cases brought before this bureau is on the upward trend, and in ratio to the decline in general building operations of two years ago, the number of complaints handled is vastly larger, even though the number of complaint cases does not show an increase in round figures, according to Slater.

During the 12-month period ending December 31, approximately 500 contractors were hailed before the Registrar upon complaints of their patrons charging fraudulent substitution of cheaper and inferior materials, departure from plans and specifications, violations of labor and safety laws, abandoning projects illegally, or leaving labor and material liens from claims for which the owner had issued funds.

This is an average of almost 42 complaints per month of a serious nature, and the monthly inflow of cases is on an even keel with the average during the two and a half year period from the time the Bureau was created by the 1929 legislature until June 30, 1932.

Investigations and formal hearings held upon the charges against the 495 contractors resulted in the suspension of the licenses of 113 builders to operate in California, while 20 licenses were unconditionally revoked during the past year when the contractor was found guilty of charges lodged against him. Of the 362 cases where suspension or revocation orders were not given, a substantial number were dismissed either at the hearing or prior thereto because of satisfactory adjustments made.

"A total of 635 former hearings were held by the Registrar during the year," the report states. "These figures, however, do not include the large number of informal cases handled by inspectors in the field and settled to the satisfaction of all concerned by arbitration following the filing of formal charges, but prior to and without the neces-

LARSEN BROS. GET LEVEE CONTRACT

Larsen Brothers, of Galt, Sacramento county, have been awarded a contract to complete 366,000 cu. yds. of fill for the American River Flood Control District. The district is constructing a levee to protect North Sacramento from floods and originally awarded a contract for the work to T. S. Atkins of Berkeley at \$.0719 per yard.

Atkins abandoned the contract after moving 224,000 yards. His bondsmen, the Hartford Accident and Indemnity Company, employed Larsen Brothers to complete the work at \$.085 per cubic yard.

sity and expense of a formal hearing. An average of more than 50 such cases are adjudicated monthly.

"The recently inaugurated policy of settling as many of the cases as possible in an informal manner and by arbitration in the field has greatly expedited the work of the Registrar and eliminated the necessity of many prolonged actions of a quasi-judicial nature.

"While we have been singularly successful in weeding out the incompetent and irresponsible contractor, thus averting heavy losses to property owners, we have similarly endeavored to exercise a policy of tolerance and leniency and have avoided ruling a man out of the right to engage in his chosen field of endeavor when and wherever possible.

"Consequently, 27 of the contractors whose licenses had been suspended were able to obtain reinstatement upon making satisfactory restitution to the complainant for damages suffered and upon presentation of evidence that he would re-engage in his business in a law-abiding manner and live up to the standards and ethics within the industry, which must be maintained for public safety.

"However, it was necessary to resort to criminal action in many cases where persons engaged in the building industry without a license and in defiance of the State Registration Law. A total of 81 prosecutions were instituted during the 12 months, resulting in convictions being obtained in 74 cases, approximately 92 per cent of the court cases ending in guilty verdicts.

"In view of the surplus accumulated by the Registrar's office, formal recommendation was made that the fee be reduced from \$10.00 to \$5.00 per year by the legislature.

"Strange enough, this proposed reduction is being opposed by substantial groups within the industry, the first to go on record being the California Council of Master Painters and Decorators, who at a recent convention in San Jose, passed resolutions urging the legislature to not lower the fee, and advocated the expenditure of the full revenue for the employment of additional inspectors in order to permit greater stringency in the enforcement of the act."

ALTA ELECTRIC WILL SUE ON SCHOOL AWARD

Sacramento District Bid Rejection To Be Taken To Court

Suit will be instituted to contest the validity of a contract awarded for the electrical, plumbing and heating work on the new Kit Carson junior high school the Sacramento board of education has been notified by the Alta Electric and Mechanical Company of San Francisco.

Walter A. Dold, attorney for the company, notified the board his firm would take the award into court unless the directors rescinded their action in awarding the contract to the second low bidder.

The combined bid of the Alta company was rejected although it was low by approximately \$1800 because the firm failed to submit its proposal on the bid form furnished by Architect Chas. F. Dean.

The three contracts were awarded to three Sacramento firms, Hatley & Hatley, Carpenter & Mendenhall and George C. Foss.

Dold claimed in his letter to the board that no provision was made in the architect's bid form for a combination bid on the segregated contracts and therefore the Alta company was forced to use its own bid form.

A letter from the Sacramento Chamber of Commerce commended the board for rejecting the San Francisco bid and keeping the contract in the hands of Sacramento firms.

Superintendent of School Chas. C. Hughes was instructed to confer with the district attorney as to legality of the award.

RECOMMEND AGAINST CONTRACT RELEASE

In a letter to William H. Worden, Director of Public Works, City Engineer John J. Casey recommended that the application of his contract on a city paving job be denied.

Treacy won a contract in February, 1932 for the improvement of Rutledge Street, Alabama Street to Peralta Avenue. While public proceedings were in progress, the State of California acquired a lot fronting on this portion of Rutledge Street. Treacy asks release on the ground that he cannot collect for work done in front of State property.

Imperial Granite Company, 414 S bond he retained, and the project readvertised.

Installation of mechanical stokers totaled 1,287 units in 1932 compared with 2,463 in 1931. A significant feature of the manufacturers' report to the Department of Commerce is in the installations in residences which totaled 6783 units in 1932 compared with 6915 for the preceding year.

NEW SPECIFICATIONS READY SOON FOR AQUEDUCT TUNNELS

LOS ANGELES, Feb. 11— Revised specifications for the Valverde and Bernasconi tunnels of the Colorado River aqueduct will be completed shortly and the contracts will be readvertised, F. E. Weymouth, general manager and chief engineer, informed the board of directors of the Los Angeles Metropolitan Water District today.

Weymouth said he would recommend that bids be taken on both full and half-capacity tunnels. The alternative proposal will provide for a reduction in diameter of from 16 feet to 12 feet, probably.

The original call for bids on the two tunnels was cancelled when the directors decided to revise the specifications.

DISTRICT AGENT MOVES OFFICES

C. F. Henderson, manufacturers' representative in this district for a group of companies, announces a change of address to 420 Market street, San Francisco. His office formerly was in the Call Building. Henderson represents the following companies: Cleveland Worm & Gear Co.; Electric Controller and Mfg. Co.; Electric Furnace Co.; Electric Machinery Mfg. Co.; Esterline-Angus Co.; General Control Corp.; Griscom-Russell Co.; Jewell Electrical Inst. Co.; Kuhlman Elec. Co.; Marshall Electric Co.; Terry Steam Turbine Co.; Western Electro-Mechanical Co.; Weston Electrical Inst. Corp.

CATTON CONVICTED ON GRAND THEFT

Francis J. Catton, whose operations as self-styled architect in Northern California brought him under the scrutiny of the board of architectural examiners, has been found guilty of grand theft in the San Francisco court of Superior Judge Conlan. Catton has asked for probation and his plea will be heard on February 15.

SET PROGRAM FOR BAY BRIDGE BID OPENING FEB. 28

Elaborate Ceremonies Arranged By Kelly at State Capitol

Program for opening of the bids for the seventy-eight million dollar San Francisco-Oakland Bay Bridge has been announced by State Director of Public Works Earl Lee Kelly, Executive Chairman of Governor Rolph's Committee in charge of this history making event in Sacramento February 28.

Under the program outlined, the governor's committee will assemble at Director Kelly's office in the Department of Public Works Building at one thirty o'clock Tuesday afternoon, February 28. A police and military escort in automobiles, marshalled by Adjutant General Seth Howard, will escort Director Kelly and the committee, consisting of the mayors of all interested cities as well as officials and leading citizens from all cities in the bay region, from the State Department of Public Works to the State Capitol. The automobile escort for the bids, sealed in the locked box, will move through the business district of Sacramento on its way to the State Capitol.

At two o'clock in the Assembly Chambers, Director Kelly will announce the bidding closed. Mayor Fred N. Morcom of Oakland will speak, followed by Mayor Angelo J. Rossi of San Francisco. Governor James Rolph Jr., will then make the principal address, and will order the bids read, which will signalize construction of the first unit of the bridge. This unit calls for the construction of foundations for the western half of the bridge and involves work estimated at nine million dollars. The contract provides for the building of five piers founded on rock beneath the bay between San Francisco and Yerba Buena Island. One of these huge piers will extend two hundred feet below and three hundred feet above the water's surface. In plan it will be 92 x 197 feet, exceeding both in height and volume of materials required the Russ Building in San Francisco.

Move More Dirt Faster with LE TOURNEAU Equipment

IRON INDUSTRY WILL CAMPAIGN FOR NEW MARKET

Traditional Attitude Is Reversed As Manufacturers Seek Volume

Business management has learned its lesson from the depression and has perfected plans for fighting back, according to Charles F. Abbott of New York, executive director of the American Institute of Steel Construction, who addressed the joint meeting of the Builders' Exchange and Construction Industries Committee of the Chamber of Commerce of Los Angeles. Mr. Abbott reviewed the experience of the past three years as a sales executive and pointed out that it has clearly been demonstrated that when selling stops, buying stops. That is exactly what happened in 1932, and accounts for the smallest sales turnover in the United States since 1913.

"We went through the low trough of the depression last summer," said Mr. Abbott, "only because our business executives were hamstrung by the financiers who claimed the last ounce of liquidation blood. They discontinued selling through a mistaken notion that there were no more consumers with a cash surplus. Salesmen were taken off the road, advertising was withheld, and all because fear, instilled by liquidationists, had chilled our blood.

"Not only must we renew our advertising and selling efforts to regain our business," said the speaker, "but we must go about the recovery in a scientific way. We have discovered," he said, "that un-economic, wasteful avenues of selling and distribution are a dead weight upon the prosperity of all business. But with the lessons learned from the depression well in mind the business of the United States is prepared to soar ahead to new heights of prosperity.

"The steel industry, of which ours is an important part, is going through a great change. It is one that cannot be effected overnight because of the deep-seated heritages and the vastness of the industry's ramifications. But it is none the less obvious and proves my thesis.

"It is a huge undertaking to transform the steel industry from a production attitude of mind to one wherein distribution becomes the chief incentive. That represents a radical change that calls for a complete revolution in thinking and planning. Ultimately the change will occur as future progress will depend upon the market and not upon the plant. In fact, it has already begun.

"Steel cannot be produced unless it can be sold. It cannot be sold unless a demand exists or is created. Obviously production depends upon sales, therefore, the market should invite the major part of business thinking and planning.

"There is a tremendous opportunity to develop new uses for all kinds of steel products. There are

also possibilities to extend present markets beyond the existing normal rate of consumption. Technical research to reduce costs, improve quality and develop new applications represents a need if these ends are to be accomplished.

"More efficiency in selling, with an aggressive militant approach to market possibilities would then find a way necessary for greater and more profitable results.

"We hear the claim that structural steel is not sold, but that it is bought. That may be the custom, but that it should be sold is evidenced by the fact that profits are a logical conclusion of selling and they disappear whenever the buyer dictates the price.

"We must develop selling on a new basis. Under this new method all compensating rewards must be based upon the amount of net profits that a salesman produces. A profit is the only excuse for any business and without profits there should be no cause for any compensation. Salesmen must become profit-conscious, and they will as soon as they become creative business builders.

"What is profit? It is the amount received for the sale of a commodity in excess of its cost. If there is no excess above its cost the article is given away. If it is sold for a price less than its total cost, then the seller pays for the privilege of giving it away. What is cost? It is the sum total that includes cost of material, labor, insurance, taxes, depreciation, and all overhead burdens that include the selling costs.

"Only a few years we were proud of our thousand-ton furnaces. We marveled at our new mills that would roll our hoops at a speed of thirty-two miles an hour. Mechanical puddling, and all technological improvements were considered as a means of salvation. As important as these engineering improvements undoubtedly are, they failed to solve the marketing problem of the industry. I sometimes wonder if they did not hasten the day of accounting, the day when we were brought face to face with our marketing difficulties?

"Only a few years ago the bulk of sales of this industry was a tonnage product. Today new alloyed steels are being turned out and other specialties in a vaster quantity than was ever dreamed possible. A larger percentage of the ingot capacity of the steel industry is now being consumed in these specialties. In demonstrating technical research it has been discovered that the market and its needs are of greater importance than was credited in those dark days of the past.

"We should not forget that research, new uses and new markets, will fail completely unless the public are acquainted with the product and educated to all of its advantages. Their approval must first be attained before a demand can exist. Orders never happen, they must be stimulated and obtained by conviction, and this calls for intelligent advertising, sales promotion and aggressive salesmanship. The financing of such an undertaking

should be based upon the volume of business that it is possible to obtain and appropriations made in sufficient yearly amounts that would justify a constantly increasing business.

"There is a tendency on the part of too many of our business men to hesitate or postpone the investment of money for the purpose of developing their markets. If it were a problem of production they would be dealing with plants or equipment which are tangible results that they can see following completion. This is not true when it comes to markets. Here we must deal with the intangible represented by a fickle public mind that is always subject to whims and fancies. And yet it is just that public psychology that is encountered and it is responsible for every order that is obtained.

"We should not forget that it was but fifty years ago that a temperature was commercially produced that would melt a steel ingot and which made possible an economical use of steel. Since that time civilization has made greater progress than during all the previous two thousand years.

"All of our electricity, transportation, machinery, tools, agricultural implements, were made possible by this single discovery. Without steel we would return to the Stone Age. Automobiles, radio, motion pictures, aviation, our great steel bridges and skyscrapers and other accomplishments have been made possible by scientific research and invention.

"With the tremendous increase in our educational facilities we are graduating each year greater numbers of students prepared to go forward with advanced knowledge. Laboratories and scientific data accumulated during the past generations are now at the disposal of these students who in turn will add still greater intelligence to the field of science and invention.

"Who would admit that the troublesome times experienced during the present depression have brought an end to scientific progress and invention? No, that is not the American spirit. In the past we have always profited by our adversities and we will do so again.

"Scientific research and invention will bring into being many new industries that will surpass any that we have as yet developed. This progress will be vast and magnificent. It will mark a period of greater opportunities and those who have the will to conquer will benefit the most.

"Just as the master word of yesterday was initiative, so the word of today is cooperation, and the word of tomorrow will be intelligent coordination. Our immediate task is to understand coordination of effort and be prepared to put it into practice."

Oil burner manufacturers reported orders for 67,543 units in 1932, compared with 83,003 in the previous year. Unfilled orders at the end of December were for 607 units compared with 378 in December, 1931.

42 CENTS SHARE NET REPORTED BY PARAFFINE COS.

Substantial Gain Is Shown In Second Period Of 1932

Paraffine Companies Inc., reports net earnings for the second half of 1932, after full charges for depreciation, reserves and Federal taxes, were \$199,567, or approximately 42 cents a share on the outstanding stock.

The second half of the year profits compare with a net loss of \$127,059, or 25 cents per share deficit, in the first six months of 1932.

This upturn in earnings results from the introduction of important economies in operation plus improvement in sales for some of the company's products.

Of the \$199,567 net earnings \$110,940 were added to surplus, the balance being used to write down the price of shares formerly sold to employees to book value at the date of such sale. The company's surplus now totals \$5,156,867.

While the company's second half earnings were below the \$1.09 per share reported for the corresponding period in 1931 nevertheless it was possible to increase the earned surplus account as against a heavy surplus reduction made a year ago. This is due to the fact that the company is now paying no dividends while in the last half of 1931 dividend disbursements exceeded earnings by 66 cents a share.

R. S. Shainwald, president, reports that the plant for manufacture of inlaid linoleums is nearing completion and will be in operation next month.

"This will round out our line of hard surfaced floor covering and should have a very favorable effect upon the operations and earnings of the company," he says.

Paraffine's December 31 balance sheet discloses that the company materially improved its liquid position during the last six months of the year. Net working capital now totals \$2,356,410 as against \$2,152,836 at mid-year. This was effected by reducing notes payable from \$480,000 to \$215,000 and by cutting down accounts receivable. Inventories, notes and accounts receivable were also reduced.

During the period the company's funded debt was cut down \$15,000 to \$1,487,000.

UNION FLAGSTONE EXTENDS AGENCIES

Union Flagstone Company of San Mateo, has established agencies throughout California for Yosemite Slate and San Joaquin sandstone, which it obtains from exclusively owned quarries.

The stones are finding wide acceptance for flagging, roofing, steps and interior and exterior floors and numerous architectural and building uses.

Headquarters of the company are at 1635 El Camino Real, San Ma-

TO RECEIVE BIDS ON \$675,000 PHOENIX POST OFFICE MAR. 21

WASHINGTON, D. C., Feb. 14.—The treasury department today announced March 21 as the date for opening bids on the Phoenix, Arizona, post office building.

The contract is for construction of a six-story, steel frame building with granite and tufa exterior, tile roof. Specifications call for steel sash, bronze doors, marble, tile and terrazzo work, vaults, air-conditioning system, heating plant and elevators.

The appropriation for the building is \$675,560.

Plans are by Architects Lescher and Mahoney, Title and Trust Building, Phoenix.

STATE PLASTERERS TO MEET IN FRESNO

The California State Conference of the Master Plasterers' Association will hold its annual convention in Fresno on February 24 and 25. The program includes a business session Saturday. An informal dinner will be held Friday night.

M. E. Summers of Fresno is president and Harry R. Cayford of Fresno secretary. Other officers are: W. B. Scollan, Sacramento, first vice president; S. L. Ford, Long Beach, second vice president, and William A. Keen, Glendale, third vice president. Members of the executive committee are: R. L. Flinch, Glendale; Lew Hughes, Pasadena; Wm. Makin, Oakland; Jos. Masi, Fresno; Sydney James Los Angeles; George Pedgrift, Los Angeles; Joe Provenzano, San Jose; C. G. Walker, Long Beach,

DETROIT CONGRESS ADOPTS PROGRAM TO AID BUILDING

Resolutions Outline Industry's Policies For Recovery

Resolutions adopted by the Highway and Building Congress — in which twenty-one national organizations participated at Detroit during the week of January 16 — urge public works for employment, liberalization of the relief act, charging of improvements to capital account, continuation of federal aid for highways, elimination of gas tax diversion, low cost housing, and a federal department of public works.

This program which sets forth an aggressive course for re-employment and business recovery is expressed in 23 resolution planks which follow:

"Recognizing the gravity of the existing business emergency and desiring to assist in relieving it we the Construction Industry of the United States as represented by 21 national organizations meeting in joint session in Detroit, January 16-21, 1933, hereby adopt this platform of policies and measures for employment and business recovery:

"Construction is among the nation's largest industries and revival of its activities will determine in large measure the revival of general business. We confidently believe that general conditions are now favorable to a resumption of business in its normal channels if prompt and effective action is taken.

"1. We are unalterably opposed to the dole system and strongly advocate in lieu thereof first, an immediate constructive program of sound and needed public and semi-public improvements; and second, the adoption of such measures as will hasten the resumption of private construction in industry. Among the public and semi-public projects are highways, waterways, and other forms of transportation; flood control, water works, sewage and refuse disposal, public buildings, and other similar projects.

"2. We demand maximum economy in the current administrative and operating expenses of government as well as an increased program of public works financed out of capital account. To further this end we urge that wherever possible the investment of the national government, states, cities, and other governmental subdivisions in permanent improvements be charged into capital account, as is the practice of private industry, and that only the carrying charges and amortization be included in current operating budgets.

"3. In view of the ineffectiveness of the construction loan operations that have been carried on under the Emergency and Construction Act, we advocate liberalization of self liquidating requirements and reduction of interest rates by suitable amendments of that Act.

"4. We appeal to states and municipalities to enact immediate legislation that will place upon a self-sustaining and self-liquidating basis through service charges such public services as sewage and sewage disposal.

"5. We urge that all public agencies engaged in distributing relief funds adopt the policy of applying these funds wherever possible through planned useful work instead of through welfare doles.

"6. We urge the extension of the date of completion of current emergency federal highway work from July 1 to October 1, 1933.

"7. We deplore the proposal that federal aid to state highway improvement be curtailed or suspended at this time, and we urge Congress to continue the federal aid policy by appropriating during the present emergency a sum equal to that appropriated last year, and in any event not less than the revenues from federal taxes on gasoline and tires.

"8. We demand that the revenues raised from motor and vehicle fuel taxes and license fees be used exclusively for highway construction and maintenance, and we oppose the diversion of these fees and taxes to other purposes.

"9. We advocate the extension of federal aid to these organizations of state and federal aid highway systems within city limits, and we recommend such allocation as will give a fair proportion of the highway funds to municipalities for streets and roads within their corporate limits.

"10. We endorse the proper and reasonable regulation of highway transportation, such regulation to be premised on sound economics and not on a desire to establish parity of cost with other forms of transportation.

"11. We urge that all necessary measures be undertaken to promote the construction of adequate low rental housing and that the various states enact legislation to grant the power of eminent domain for this purpose.

"12. Believing that the heavy interest charges of fixed obligations are a serious obstacle to early credit restoration, we urge as an essential of economic recovery that interest rates on such fixed obligations be reduced and adjusted to conform to the general price level.

"13. We recommend that the federal government and the several states amend their bankruptcy and related statutes to simplify the process of reorganizing public and private financial structures by providing that approval of a substantial majority of bond or other certificate holders shall be sufficient to authorize such reorganization.

"14. We urge that state laws and municipal charters be amended to permit deferring payment for at least two years of the initial installments of special installments without penalty and at moderate interest.

"15. We endorse the uniform mechanics' lien account prepared by the Standard State Mechanics Lien Account Committee of the United States Department of Commerce

and the National Conference of Engineers on Uniform State Laws, and urge the enactment of this legislation by state legislatures.

"16. We urge that the government cease engaging in any form of business and service not clearly necessary to the administration of governmental functions.

"17. We urge that the United States Congress establish a National Department of Public Works.

"18. In view of the vital relation of construction to public welfare, we urge that standing committees on construction be set up in both branches of the Congress of the United States similar to those of agriculture, finance, and so forth, so that Congress may be enabled to act with greater knowledge and broader judgment on construction matters.

"19. Believing that public and semi-public works can be carried out efficiently and economically only under a coordinated and balanced program of national, state, and municipal works, we urge comprehensive advanced planning of public improvements, accompanied by long-term financial planning as the soundest policy of conducting public works, and we recommend that legislation to carry out such policies be enacted.

"20. We favor the enactment of an emergency general sales tax as a means of reducing other forms of taxation and furthering the program of public and semi-public improvements that we advocate.

"21. We recommend that if further financial measures are found necessary to restore employment and value, consideration be given by Congress to the establishment of a rigidly controlled increase of circulation by issue of currency based on labor and materials actually expended in useful construction, such currency to be issued only as compensation for work completed.

"22. To give more immediate aid to the unemployed we urge all communities to plan and put into effect an intensive campaign of rehabilitation and repair.

"23. While recognizing the urgency of reducing unemployment we demand that public work be performed by the most modern and efficient methods and we oppose the indiscriminate substitution of hand labor therefor."

MAY MOVE BUREAU TO LOS ANGELES

Removal of the United States reclamation bureau headquarters from Denver to Los Angeles is being considered, according to reports in Denver.

The change is contemplated, it is said, in order to bring the bureau nearer to the Hoover Dam project where reclamation activities will center in the next few years.

Approximately two hundred persons, most of them engineers, are employed by the bureau which has a payroll of \$600,000 a year. Hundreds of thousands of dollars worth of supplies and equipment are purchased by the bureau every year.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

9.1 MILES HIGHWAY—WALLA WALLA CO., WASH.

WALLA WALLA COUNTY, Wash.—As previously reported, Lyon & Munro, 503 W. 14th Ave., Spokane, at \$52, 408, awarded contract by the State Department for 9.1-mi. State Road No. 3, Touchet to Vancycle Canyon, involving:

- (1) 3860 yds. cru. stone top.
- (2) 9540 cu. yd. cru. stone base.
- (3) 21,620 cu. yds. cru. stone subbase
- (4) 11,050 cu. yds. cru. rock rain. aggr. stock.
- (5) 830 cu. yds. cru. rock fine aggr. stock.
- (6) 1830 cu. yds. cru. rock coarse aggr. stock.
- (7) 3190 cu. yds. filler.
- (8) 735 M gallons water.
- (9) 520 cu. yds. shouldered.

Bids held under advisement.

SAN FRANCISCO.—L. DeCew, 53 Frederick St., at \$102 submitted low (informal) bid to Department of Public Works to construct sidewalks on west 18th Ave. between Ulloa and Vicente Sts. Complete bids follow:

- L. DeCew, 3 days.....\$102.00
- J. D. O'Hara, 5 days.....105.00
- L. Sartorio, 2 days.....114.00
- D. C. McCabe, 1 day.....115.00
- M. Bertolino, 10 days.....120.00
- U. Peira & Son.....144.00
- E. J. Treacy, 10 days.....147.50

Bids held under advisement.

ENGINEERING NEWS

BRIDGES

HANFORD, Kings Co., Cal.—Valley Lumber Co., Hanford, at \$4467.83 awarded contract by County Purchasing Agent to furnish lumber for the construction of the Cooper bridge over Kings River in the Riverbend district. Work will be done by day labor as an unemployment relief project. Roy May, county Surveyor.

MARTINEZ, Contra Costa County, Calif.—One year's extension of time granted the Richmond-San Rafael Ferry Company by county supervisors to construct proposed toll bridge from Point San Pablo, Contra Costa Co., to Point San Quentin, Marin County. Estimated cost \$15,000,000.

DOUGLAS COUNTY, Wash.—Western Construction Co., Textile Tower, Seattle, at \$7980 awarded contract by State Highway Department to construct two 40-ft. concr. girder bridges on State Road No. 10 between McLean's Orchard Tracts and Entiat Ferry, E. C. H. Proj. No. E-145-G. Strandberg & Co., Seattle, second low at \$8346; D. Nygren, Seattle, third low at \$8571.

MARIPOSA COUNTY, Cal.—Nelson & Wallace, 2nd and Coley, Escalon, at \$10,359.50 awarded contract by U. S. Bureau of Public Roads, to construct the Bridal Veil Creek Bridge and approaches on Section A1 of Route 5, Wawona Road, Glacier Point, Yosemite National Park.

SAN FRANCISCO—Pacific Coast Aggregates, Inc., 85 Second St., San Francisco, approved by directors of the Golden Gate Bridge District as sub-contractors for Barrett & Hilp, for construction of a cement mixing plant near Fort Point in connection with construction of anchorages.

LOS ANGELES, Calif.—Geo. W. Jones, county road commissioner, has completed plans for a reinforced concrete culvert to be constructed on Citrus Ave. over Little Dalton Wash, in the County of Los Angeles. The plans were filed with the board of supervisors Feb. 10. A date for bids will probably be set within the next few days. The culvert will have an inside width of 13 ft., a height of 11 ft. 6 in. with 20-in. foundations, and 27.15 ft. in length.

LONG BEACH, Cal.—City council has authorized A. H. Adams, director of public service, to prepare estimates of the cost of constructing a pedestrian subway under Ocean Blvd., from Bixby Park to the beach. According to the plan, the tunnel is to be constructed under 16th Place and will be 15 to 20 feet wide and designated as a ramp.

DREDGING, HARBOR WORKS & EXCAVATIONS

LOS ANGELES, Cal.—Pacific Tank & Pipe Co. has been awarded the contract by H. E. Russell, county Purchasing Agent, at \$3880.00 for furnishing circular yokes for pier forms under Spec. No. 5115.

SAN DIEGO, Cal.—W. E. Kier Construction Co., 813 First National Bank Bldg., San Diego, submitted low bid to A. Ray Sauer Jr., Purchasing Agent, February 6, at \$17,963 for furnishing all materials, labor and equipment (except the necessary treated

wood piles and fourteen concrete bearing piles), moving, and reinstalling float service complete, and constructing the shore boat landing, substructure deck and building, at the San Diego Waterfront. The other bids were: Gunnar Johnson, \$18,000; J. A. Hunt, \$19,044.78; Walter Trepke, \$19,576.

SAN FRANCISCO—M. B. McGowan, 74 New Montgomery St., San Francisco, at \$7933 awarded contract by U. S. Coast Guard Service for repairs to wharf and construction of launchway at Point Bonita Station.

DENVER, Colo.—Geo. Herz Co., Platt Bldg., San Bernardino, at \$17,430 awarded contract by U. S. Bureau of Reclamation to construct 11-mi. Colorado River Levee, Palo Verde Irrigation District near Blythe and Ripley California. Unit bid, \$.083 per cu. yd.

SACRAMENTO, Cal.—Larsen Bros., Galt, at \$.085 per cubic yard awarded contract by Hartford Accident & Indemnity Co., bonding company for T. S. Atkins, Berkeley, to complete construction of levee on the north bank of the American River, for which contract was awarded T. S. Atkins by U. S. Engineer Office Aug. 20 at \$.0719 per cu. yd.; less than the engineer's estimated on the job. Approximately 366,000 cu. yds. remain uncompleted.

PORTLAND, Oregon.—Gilpin Const. Co., Henry Bldg., Portland, at \$6804 submitted low bid to city council to replace tide (flood) gate and shear-boom at entrance to Columbia Slough Channel. Complete bids follow:
 Gilpin Const. Co. \$6504
 Parker-Schram Co. 7639
 Jacobsen Const. Co. 7655
 F. J. Gregorie 8844
 Bids held under advisement.

SACRAMENTO, Cal.—Baker & Taylor, Chester, at \$27,898, awarded contract by U. S. Engineer Office, Sacramento, to construct a levee approximately 3 miles long along the embankment of the Western Pacific Railroad which runs along westerly outskirts of North Sacramento, and along the southerly bank of Arcade Creek, along the northerly edge of North Sacramento, involving 377,000 cu. yds. embankment in place.

RIO VISTA, Solano Co., Cal.—Chicago Bridge & Iron Co., Rialto Bldg., San Francisco, at \$2450 awarded contract by U. S. Engineer Office, Sacramento, to provide and erect a 20,000-gal. steel water tank with a 70-ft. steel tower at the U. S. Engineer Department yard at Rio Vista.

SACRAMENTO, Calif.—Olympian Dredging Co., 249 First St., San Francisco, at \$66,748 awarded contract by U. S. Engineer Office, Sacramento, to build stretches of new levee and to raise and strengthen an existing levee along the easterly bank of the Sacramento river from Meridian downstream for 11.5-mi. to Winship School, including clearing and grubbing the right-of-way and moving, extending or reconstructing fences, road ditches, pipes, etc., involving 451,000 cu. yds. embankment in place of levee.

SACRAMENTO, Calif.—Basalt Rock Co., Napa, at \$26,400 submitted low bid to U. S. Engineer's Office, Sacramento, to furnish, deliver and place approximately 30,000 tons of rip-rap stone along the Sacramento river between the mouth of Cache Slough and Collinsville. Complete bids follow:
 Basalt Rock Co., 140 lbs., \$.88, \$26,400
 Daniel Constr. Co., 162 lbs., .88, 26,400
 Hutchinson Co., 165 lbs., .887, 26,610
 Healy Tibbitts Co., 160 lbs., .927, 27,862
 Blake Bros., 167 lbs., .95, 28,500
 Engineer's Estimate, \$1.10, 32,996
 Bids held under advisement.

SAN FRANCISCO—Union Machinery Co., 934 Brannan St., San Francisco, at \$674 submitted low bid to U. S. Engineer's Office, San Francisco, to furnish one 26-in. gate valve for the U. S. Dredge "Marshall." Complete bids follow:
 Union Machine Co. \$674.00
 Bethlehem Shlpbuilding 795.00
 General Eng. & Drydock Co. 827.00
 Pelton Waterwheel Co. 845.00
 Golden State Miners 937.50
 Bids held under advisement.

STOCKTON, San Joaquin Co., Cal.—San Francisco Bridge Co., 503 Market St., San Francisco, at \$1235, awarded contract by U. S. Engineer Office, Sacramento, to dredge 309,000 cu. yds. of material from the 26-ft. channel between the mouth of Mormon Channel and Edison St., Stockton.

PORTLAND, Ore.—General Constr. Co., 3840 Iowa St., Seattle, at \$174 cu. yd. (approximately \$77000) recommended for award by U. S. Engineer Office, Portland, for dredging approximately 435,711 cu. yds. of material from a channel and for constructing a dike with about 41,600 cu. yds. of the dredged material, in Willamette river between points about 1 mi. and 2½ mi. downstream from Oregon City. Complete bids published in issue of February 3.

BELLINGHAM, Wash.—Until Feb. 20, 2 P. M., bids will be received by City Port Commission to furnish 1200 cu. yds. of rock for crib protection in Squaleum Creek Basin. Crib is 325 ft. long by 15 ft. wide. Estimated cost, \$2500.

PEARL HARBOR, T. H.—Hawaiian Dredging Co., Honolulu, T. H., at \$6,500 for item (1) submitted low bid to Bureau of Yards and Docks, Navy Department, Pearl Harbor, for pulling and driving piles at the Submarine Base, Pearl Harbor, under Spec. No. 7200. Complete bids follow:
 Hawaiian Dredging Co., Ltd., 854 Kaahumanu St., Honolulu (1) \$6500
 (2) \$3552 (3) \$4026.
 Kalihi Contracting Co., Honolulu (1) \$13,300 (2) \$6600 (3) \$7100.

CAPITAL CITY TITLE COMPANY

▼

J. C. PALEN,
Manager

▼

914 Seventh Street
Sacramento :: California

LOS ANGELES, Cal.—E. C. Eaton, County Flood Control Engineer, 202 N. Broadway, has announced that fifteen county flood control projects may be included in the list of work which is to be undertaken by the aid of unemployment funds received from the Reconstruction Finance Corp. Mr. Eaton estimates that a total of 237,000 man labor days would be available in the work which he recommends. The list comprises about 51,000 lin. ft. of river channels to be improved. The chief engineer also recommends starting work on the Eaton Canyon Dam east of Pasadena. The suggested program is now in the hands of Hugh A. Thatcher, supervisor, and his flood control committee for further study. The list follows:

Los Angeles River Wilbur Ave. to Van Owen Blvd., excavation of channel, three and one-half miles. This project involves draining the Reseda area in upper San Fernando Valley, 18,000 feet.

Los Angeles River, Fifty-second St. to Wilmington St. in Long Beach, training channel, 1500 feet.

Los Angeles River, near Firestone Blvd., training channel, 6000 feet.

Los Angeles River, below Sewart and Grady road, widen new training channel, 3500 feet.

San Gabriel River, Beverly Blvd., remove island in channel and widen training channel down-stream, 2500 feet.

Rio Hondo River, one-fourth mile below Garvey Ave., training.

Compton Creek, Alameda St. to existing channel, excavation of new channel, 1200 feet.

Los Angeles River, Ethel St. to Diaz St., excavation of new channel and pipe and wire levees, near studio City, 1500 feet.

Alhambra Wash, Main St. of Alhambra to Mission Road, excavation and pipe and wire, 3200 feet.

Thompson Creek, Pomona city limits to Santa Fe Railroad, 2100 feet, excavation, pipe and wire.

Rubio Wash, Southern Pacific Railroad to Mission Road, excavation and pipe and wire, 2000 feet.

Ballona Creek, below Inglewood Blvd., widen channel and place pipe and wire, 4500 feet.

Eaton Canyon Dam, excavation and backfill for proposed gravel debris dam, including stripping, excavating and filling of embankment. Bond funds are sufficient for estimated construction of physical works. Additional financing to relieve bond funds of part of the physical costs might result in releasing sufficient funds to complete project. Project urgently needed for flood protection and conservation. Estimated yardage, 325,000; estimated man days of labor, 105,000.

IRRIGATION PROJECTS

MODESTO, Stanislaus Co., Calif.—Valley Construction Co., Modesto, at \$1938 awarded contract by Modesto Irrigation District to construct new spillway on Lateral No. 2, emptying into Dry Creek near Modesto. District will pay \$750; balance of cost to be paid by the owner, T. H. Kewin.

SACRAMENTO, Calif. — American River Flood Control District board accepted bid of State Department of Finance to purchase \$78,000 of the district's bonus for work on the levee project. Bonds for \$25,000 will be purchased at once, a second block of \$25,000 and a third of \$25,000 to be bought shortly.

LA MESA, Imperial County, Cal.—American Concrete & Steel Pipe Co., 635 Firestone Blvd., South Gate, tentatively awarded contract by the La Mesa, Lemon Grove and Spring Val-

ley Irrigation District, at \$419,834.25 (alternate Proposal D) to furnish and lay centrifugal concrete pipe involving 60,000 ft. of 36-39-42- and 48-in. centrifugal concrete pipeline complete with fittings and miscellaneous structures for the replacement of the district's flume or pipe line, located at certain points between the Diverting Dam of the La Mesa Irrigation District on the San Diego river and Eucalyptus reservoir near La Mesa. The total length is about 60,000 feet. C. Harritt, 4769 Spring St., La Mesa, general manager. The award of contract is contingent upon obtaining a loan of \$500,000 from the Reconstruction Finance Corporation.

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Severin Electric Co., 172 Clara St., at \$6382 awarded contract by the Department of Public Works for ornamental street lights on Bayshore Blvd., Army St. to county line.

MACHINERY AND EQUIPMENT

EL CENTRO, Imperial Co., Cal.—Brown-Revis Co., 4900 Santa Fe Ave., Los Angeles, has been awarded contract by the county supervisors for furnishing on a rental basis one Adams 12-ft. grader with scarifier, pneu-

SAN FRANCISCO—Until Feb 20, 3 p. m., under Bid No. 968, bids will be received by T. A. Brooks, City Purchasing Agent, 270 City Hall, to furnish ½-ton auto truck chassis and cab. Specifications obtainable from above office.

SAN RAFAEL, Marin County, Cal.—Until Feb. 20, 11 A. M., under Circ. Pro. 6754-33-14, bids will be received by Constructing Quartermaster, Hamilton Field (Marin Meadows) Bombing Base, San Rafael, to furnish one standard automatic grader, similar to Eversman Std. Automatic Grader.

OAKLAND, Cal.—G. F. Bishop Co., 1950 San Bruno Ave., San Francisco, at \$725 submitted low bid to Board of Playground Directors, Oakland, to furnish one tractor, light golf course, 4-cylinder, short wheel base, weight not over 1100 lbs. Complete bids follow (including allowance for old tractor):

G. F. Bishop Co.—Toro—\$725 less \$225.

H. V. Carter, Worthington, \$725, less \$100.

Allis-Chalmers Co., A-C, \$800, less \$50.

J. D. Adams Co., McCormick-Deering, \$908, less \$40.

MODESTO, Stanislaus Co., Calif.—City Council decides to reject low bid submitted January 25 to furnish one tree spraying machine at \$1091 by Friend Mfg. Co. Demonstrations to be furnished by John Bean Mfg. Co., who bid \$1355, also by Stanislaus Imp. & Hdwe. Co., Fitz-Henry Cuptill Co.

LOS ANGELES, Cal.—Smith Booth Usher Co., 2001 Santa Fe Ave., was awarded the contract by the Metropolitan Water District, Feb. 10, at \$1465 each for furnishing two portable air compressors.

DENVER, Colo.—Until March 3, 2 P. M., under Specifications No. 586-D, bids will be received by Chief Engineer, U. S. Bureau of Reclamation, Denver, Colo., to furnish one ditch-cleaning machine, caterpillar crawler traction type for cleaning canals and laterals. Specifications obtainable from above office.

LOS ANGELES, Cal.—F. E. Weymouth, General Manager and Chief Engineer of the Metropolitan Water District, reported to the board of directors at the meeting February 10 that revised specifications for the Valverde and Bernasconi Tunnels will be completed shortly and that he will recommend that bids be taken on both full and half-capacity tunnels. The alternative proposal will provide for a reduction in diameter of from 16-ft. to probably 12-ft.

FIRE ALARM SYSTEMS

DALLIES CITY, Ore.—All proposals received by city council for fire equipment bonds were returned unopened, and new bids will be received until March 3, 7:30 P. M., by Judd S. Fish, recorder, for \$15,000 General Obligation Fire Equipment bonds, 6% interest.

RESERVOIRS AND DAMS

PASADENA, Cal.—Pacific Iron and Steel Co., 241 W. Ave. 26, Los Angeles, awarded contract by city directors, Feb. 7, at \$6715 for furnishing removable galvanized steel trash racks and appurtenances for the Pine Canyon Dam, approx. 170,000 lbs. Bids were opened Jan. 31.

LOS ANGELES, Cal.—The contract for the construction of the Parker Dam on the Colorado River as a flow stabilizing unit in the Colorado River Aqueduct, between the Department of the Interior and the Metropolitan Water District, was approved by the board of directors of the district at the meeting in Los Angeles, February 10. The district will pay for the work and construction will be done by the government.

PIPE LINES, WELLS, ETC.

FARMERSVILLE Tulare Co., Cal. H. Z. Griffith, Exeter, awarded contract by Planters Packing Corp., New York, to drill 12-in. well in connection with dehydrating plant being erected at Farmersville.

SEWERS AND SEWAGE DISPOSAL PLANTS

MONTEREY PARK, Los Angeles Co., Cal.—Chutuk and Vukojevich, 4935 West Blvd., Los Angeles, have been awarded the contract by O. A. Gierlich, consulting engineer, 308 Citizens National Bank Bldg., Monrovia, at about \$3500 for all labor and material (except pipe) for constructing a sanitary sewer in a subdivision in Monterey Park for P. N. Snyder, owner.

Gladding, McBean & Co., Los Angeles, have been awarded the contract for furnishing vitrified sewer pipe.

LOS ANGELES, Cal.—The sanitation and finance committees of city council have under consideration a proposal of Councilman Clarence E. Coe to expend the balance of the Venice sewer bond fund and unexpended balances of allocations from the 1922 sewer bond fund for installing outlets for local sewers in the Venice-Mar Vista area. Construction of the proposed connecting sewers will cost \$61,385.

LONG BEACH, Los Angeles County, Cal.—City council has voted to apply to the Reconstruction Finance Corp. for a loan of \$600,000 for the construction of main trunk lines for the North Long Beach sewer system and for the Northeast Storm Drain System. The proposed projects are to be under the 1911 Improvement act.

SIGNAL HILL, Los Angeles Co., Cal.—G. H. Cooper, city clerk, has been authorized to advertise for bids for vitrified clay pipe as follows:
 (1) 1000 to 2000 ft. 12-in. pipe with fittings;
 (2) 100 to 2000 ft. 10-in. do;
 (3) 1 to 400 ft. 8-in. do;
 (4) 100 to 2000 ft. 6-in. do.
 Bids will probably be opened Feb. 28.

MONTEREY PARK, Los Angeles Co., Cal.—Chnutuk, Kordich & Vukojevich, 4935 West Blvd., Los Angeles; John Topich, 988 Everett St., Los Angeles, and Rich Bros. Co., 3724 Brooklyn Ave., Los Angeles, submitted the three low bids to O. A. Gierlich, consulting engineer, 308 Citizens National Bank Bldg., Monrovia, for constructing a sanitary sewer system in a subdivision in Monterey Park for P. N. Snyder. The contract will be for all labor and material, except pipe, which will be furnished by the owner. The type of pipe has not been selected. The successful bidder will be announced within a few days. The proposed system will involve:
 8000 ft. 6- to 10-in. sewer pipe, cement or vitrified;
 165 wye branches.

SIGNAL HILL, Los Angeles County, Cal.—Until 3 p. m., Feb. 21, bids will be received by the Signal Hill city council for vitrified clay pipe, as follows:
 (1) 1000 to 2000 ft. 12-in. pipe with fittings;
 (2) 1000 to 2000 ft. 10-in. pipe with fittings;
 (3) 1 to 400 ft. 8-in. pipe with fittings;
 (4) 100 to 2000 ft. 6-in. pipe with fittings.
 Geo. H. Cooper, city clerk.

MONTEREY PARK, Los Angeles Co., Cal.—City council has authorized C. H. Ellison, city engineer, to start proceedings for an outfall sewer from the east boundary of the city to the proposed reduction plant. A resolution of intention was adopted. The city proposes to procure from the county \$20,000 to provide for labor and to draw on the general fund for \$10,000, with which to purchase materials. Plans and specifications will be prepared by Ellison. The proposed reduction plant is to be located on a 10-acre tract in the Rancho Potrero Grande upon which the city has an option.

Plans and specifications available from above office upon deposit of \$5.00.

ROCKWELL FIELD, Calif.—Griffith Co., 502 Los Angeles Railway Bldg., Los Angeles, at \$4,999.93 awarded contract by Army Department for grading and oiling landing field at Rockwell Field, Coronado.

LONG BEACH, Calif.—City council has made application to county board of supervisors for an allocation of \$120,000 of Reconstruction Finance Corporation to provide labor for the clearing and excavating of a site on a portion of the present location of the city dump. It will furnish labor for about 500 men or 37,000 man days. Work will probably start next week.

PIERCE COUNTY, Wash.—Until Feb. 23, 10 A. M., bids will be received by W. H. Lynch, District Engineer, U. S. Bureau of Public Roads, 316 New Postoffice Bldg., Portland, for 3,732-miles of grading N. P. H. Proj. E-12-A1, Rainier National Forest, involving:

- (1) 28 acres clearing;
- (2) 11 acres grubbing;
- (3) 110,700 cu. yds. unclass. excav.;
- (4) 125,000 sta. yds. overhaul;
- (5) 3.732 miles finishing;
- (6) 257 cu. yds. Class A concrete;
- (7) 28 cu. yds. Class B concrete;
- (8) 181 cu. yds. Class D concrete;
- (9) 60,500 lbs. reinf. steel;
- (10) 155 cu. yds. cement rubble masonry;
- (11) 1911 lin. ft. concrete pipe;
- (12) 3500 cu. yds. gravel borrow for subgrade reinf.;
- (13) 6000 lin. ft. flattening and rounding slopes;

and other items. Specifications obtainable from above office on deposit of \$10, returnable, check payable to Federal Reserve Bank, Portland.

LONG BEACH, Calif.—City council has adopted a list of street improvement projects for which Reconstruction Finance Corp. funds are to be provided. The money will pay for labor only. The jobs listed are:

Grading Temple Ave. from Willow to Spring St., \$4480.

Grading Loma Avenue from Ocean Blvd. to Anaheim St., \$7104.

Grading Spring St. from the U. P. Ry. tracks to Orange Ave., \$9600.

Grading Newport Ave. at 11th St., \$480.

COMPTON, Los Angeles Co., Cal.—The Long Beach Boulevard Association has recommended that the cities

of Compton and Long Beach construct 600 ft. of cement aprons on Long Beach Blvd., adjoining the dog racing track and 190 ft. at the motorcycle arena.

SAN FRANCISCO—Until March 1, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Department of Public Works, to construct wall on Chestnut St., from Kearny to 110 ft. east, estimated cost, \$1900.

SAN FRANCISCO—Union Iaving Co., Call Bldg., San Francisco, at \$39,494.70 awarded contract by Department of Public Works to improve Bayshore Blvd., Section A, Marlin to Army Streets.

LOS ANGELES, Cal.—Until 10 A. M. March 1, bids will be received by the board of public works for the improvement of the alley south of 30th St. bet. 11th Ave. and Edgell Drive, under the 1911 act, involving:

- (1) grading (151 cu. yds. cut, no fill);
- (2) 4575 sq. ft. 6-in. conc. paving;
- (3) 350 sq. ft. rock and oil surface.

Engineer's estimate, \$1050.

LOS ANGELES, Calif.—Hearing on the proposed improvement of Barrington Ave. bet. Barrington Place and Montana Ave., in accordance with the provisions of the 1931 Assessment Limitation Act, will be held by the Public Works Committee of the city council April 4. The improvement is to be done under the 1911 act. The project involves 6-in. asphaltic concrete paving. The estimated cost is \$44,941.

SAN FRANCISCO—M. E. Vukicevich, 1442 Taraval St., at \$757 awarded (informal) contract by Department of Public Works to construct Market and Ord Street steps.

Moore & Roberts, low bidders, at \$651.50 did not comply with specifications, and contract was awarded to second low bidder.

SAN FRANCISCO—Until Feb. 24, 10:30 to 11:30 A. M., bids will be received by S. J. Hester, secretary, Department of Public Works, to improve Rutledge St. from Alabama to Peralta, involving:

- (1) 150 ft. armored concrete curbs;
- (2) 40 ft. VCP side sewer;
- (3) 1125 sq. ft. Class E conc. pave.

Specifications obtainable from office of John J. Casey, city engineer, third floor, City Hall. Estimated cost, \$700.

This contract was awarded in February 1932 to E. J. Treacy, who asked to be released from his contract on the grounds that he cannot collect for work done in front of State property (the State of California having acquired a lot fronting on this portion of Rutledge St.)

SAN MATEO, San Mateo Co., Cal.—No bids received February 6 by city council for \$8,785.80 improvement bonds, 7% interest, under 1903 Street Opening Act. Certified check 10% payable to City of San Mateo required with bid. Date of opening bids was put off for two weeks, until Feb. 20, 8 P. M.

LOS ANGELES, Cal.—Triangle Oil & Refining Co. has been awarded the contract by H. E. Russell, County Purchasing Agent, for furnishing road oil as follows:

- (1) 600 bbls. 40-45 road oil delivered and spread, at 99c.
- (2) 500 bbls. 60% road oil delivered and spread, various points in county, at \$1.04.

Spec. No. 5094.

MOUNTAIN VIEW, Santa Clara County, Cal.—Hearing continued by Judge Syer, superior court, until Feb. 23, on injunction on hearing on Reso-

lution to extend Moffett Blvd. from the north-easterly city limits to the Bayshore Highway. Ray Hays, city clerk. C. C. Kennedy, Cali Bldg., San Francisco, city engineer.

ARIZONA STATE—Until 2 p. m., Feb. 21 bids will be received by State Highway Commission, Phoenix, for highway construction on the Ashfork-Kingman Highway, E-80-F (A. F. E. No. 6655). The work, which is located about 30 miles northeast of the town of Kingman, consists of the grading and draining of approximately three miles of roadway, and is to be completed on or before June 15, 1933. The principal items are:

- 29,000 cu. yds. roadway excavation;
- 4,700 cu. yds. drainage excavation;
- 3,600 lin. ft. grader ditches;
- 2,600 cu. yds. slides and overbreakage;
- 740 cu. yds. structural excavation;
- 13,000 cu. yds. borrow excavation;
- 139,000 sta. yds. earthwork overhaul;
- 328 cu. yds. concrete;
- 22,500 lbs. reinforcing steel;
- 760 lin. ft. C. M. P. (various sizes);
- 5,500 lin. ft. cable road guard;
- and other incidental items

A proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. Plans and specifications may be obtained from T. S. O'Connell, State Highway Engineer.

LONG BEACH, Los Angeles Co., Cal.—County will contribute \$10,000 toward the cost of extending Hathaway Drive from Anaheim St. to State St. The total cost is estimated at \$40,000, of which the state will pay \$30,000. The project involves a concrete pavement 40 ft. wide.

LOS ANGELES, Cal.—City council has allocated \$25,000 toward the cost of paving and improving a 30-ft. roadway in Santa Barbara Ave., from Third Ave. to Crenshaw Blvd. The project includes a storm drain and ornamental lighting system.

ARIZONA STATE—Until 2 p. m., Feb. 21, bids will be received by State Highway Commission, Phoenix, for highway construction on the Phoenix-Prescott Highway, E-84-B (A. F. E. No. 8954), and E-84-C (A. F. E. No. 8920). The work, which extends from the Wickenburg bridge northerly about 15 3/4 miles to the town of Congress Junction, consists of the placing of sub-grade stabilizer and the oil processing by either the plant or road mix method, and is to be completed on or before June 15, 1933. The principal items are:

- E-84-B and E-84-C
- PLANT MIX**
- 2,600 cu. yds. subgrade stabilizer;
- 9,800 cu. yd. mi. subgrade stabilizer haul;
- 370 M. gallons water applied to roadway;
- 28,300 tons plant mix;
- 282,600 gallons asphaltic road oil for plant mix;
- 23,100 gallons asphalt road oil for seal coat;
- 6,200 cu. yds. shoulder material;
- 25 500 cu. yd. mi. shoulder material haul;
- 15.7 miles spreading, compacting and finishing;
- 1,200 cu. yds. screenings;
- 300 cu. yds. special mineral aggregate for stockpile.

ALTERNATE—ROAD MIX

- 20,500 cu. yds. mineral aggregate;
- 129,000 cu. yd. mi. mineral aggregate haul;
- 369,500 gallons asphalt road oil (exclusive of seal coat);
- 15 7 miles mixing, laying and finishing.

A proposal guarantee in cash or certified check of not less than 5% of

the gross amount of the bid is required. Plans may be obtained from T. S. O'Connell, State Highway Engineer.

CLARK COUNTY, Nev.—Until March 29 (approximate date) bids will be received by S. C. Durkee, State Highway Engineer, Heroes Memorial Bldg., Carson City, for 8.31-mi. grading and gravel surfacing between Las Vegas and 6-mi. southwest of Apex.

Specifications obtainable from above office after March 13; also from the County Clerk's Office at Las Vegas, and from U. S. Bureau of Public Roads, 461 Market St., San Francisco. Deposit of \$15, of which \$10 is returnable, required for plans. Certified check 5% required with bid. 28

DOUGLAS COUNTY, Wash.—Columbia Power & Investment Co., Stevenson, at \$102,317 under schedule B submitted low bid to State Highway Department to grade and surface 10.9-mi. State Road No. 10, McLean's Orchard Tracts to Entiat Ferry, E. C. H. Project No. E-145-C and E-145-G; low bid under schedule A, \$103,317. Kesterson Contracting Co., Seattle, second low at \$103,644 under A and \$103,653 under B; Myers-Goulter, Seattle, third low at \$106,754 for A and \$106,668 for B. Bids held under advisement.

SEATTLE, King Co., Wash.—Until March 6, 10 A. M., bids will be received by King County Commissioners for highway construction as follows:

- 1 mile paving Pridgeon road between Renton and Three Tree Point;
- North extension of the Kummer Cut-Off;
- 1 mile paving near Maple Valley. Thos. Hunt, County Engineer.

SAN FRANCISCO.—All bids rejected by Department of Public Works and new bids will be received by S. J. Hester, secretary, until March 1, 2:30 P. M., to improve Bernal Ave. slopes, Randall to Diamond, by planting, involving:

- (1) trees; (2) wood slope.
- Love & Haun submitted low bid at \$5975 on January 25, but asked to be released from their contract, due to mistake of sub-bidder.

SOLANO, Yolo and San Joaquin Counties, Cal.—Until Feb. 20, 3 P. M., bids will be received by R. E. Pierce, district engineer, State Highway Commission, Room 502, State Office Bldg., Sacramento, to apply Diesel oil to roadside vegetation over 108.8 roadside miles in Solano, Yolo and San Joaquin counties. Specifications obtainable from above office. Certified check 10% required with bid.

PORTLAND, Oregon—Until Feb. 15, 9:30 A. M., bids will be received by Geo. R. Funk, City Auditor, to improve by paving, SE 39th Ave., et al; specifications obtainable from above office. Certified check 19% payable to City of Portland required with bid.

MENDOCINO, Sonoma, Marin, Solano and Napa Counties, Cal.—Until Feb. 27, 2 P. M., bids will be received by John H. Skeggs, District Engineer, State Highway Commission, Room 211, State Bldg., San Francisco, to apply Diesel oil to roadside vegetation over 135-roadside miles. Specifications obtainable from above office. 28

LOS ANGELES, Calif.—Contracts awarded Feb. 10 by Metropolitan Water District under four schedules for constructing 84-mi. roads for the Colorado River Aqueduct, follow:

A. Telechert & Son, Inc., 1068 45th St., P. O. Box 1118, Sacramento, at

\$88,603.50 Schedule No. 1, for constructing the Granite Pass Road, Sta. 0 to Sta. 1105.

Clyde W. Wood, Box 1435, Stockton, at \$106,860 Schedule No. 2, for constructing the Granite Pass Road, Sta. 1105 to Sta. 2230.

Geo. French, Jr., P. O. Box 675, Stockton, at \$67,948.30 Schedule No. 3, for constructing the Granite Pass Road Sta. 7280 to Sta. 3060 and the Grommet-Earp Road from Sta. 3060 to Sta. 3345.

Clyde W. Wood, Box 1435, Stockton, at \$137,327.70 Schedule No. 4, for constructing the Grommet-Earp Road, Sta. 3345 to Sta. 4331 plus 97.

LOS ANGELES & VENTURA COS., Cal.—Until Feb. 21, 2 P. M., bids will be received by S. V. Cortelyou, District Engineer, State Highway Commission, Room 808, California State Office Bldg., Los Angeles, to apply Diesel oil to roadside vegetation over 110.2 roadside miles. Specifications obtainable from above office. Certified check 10% required with bid.

LOS ANGELES, Orange, San Diego and Imperial Counties, Calif.—Until Feb. 23, 2 P. M., bids will be received by S. V. Cortelyou, District Engineer, State Highway Commission, Room 808 California State Office Bldg., Los Angeles, to apply Diesel oil to roadside vegetation over 79.4 roadside miles. Specifications obtainable from above office. Certified check 10% required with bid.

ALAMEDA, Santa Clara and Merced Counties, Cal.—Until Feb. 20, 2 P. M., bids will be received by John H. Skeggs, District Engineer, State Highway Commission, 211 State Bldg., San Francisco, to apply Diesel oil to roadside vegetation over 45 roadside miles. Specifications obtainable from above office.  Contractor—Gay Engineering Co., 2650 Santa Fe Ave., Los Angeles.

POWER PLANTS

LOS ANGELES, Cal.—A loan of \$22-800,000 to the Los Angeles Bureau of Power and Light for the construction of a high tension power transmission line between Los Angeles and Hoover Dam power project at Boulder Canyon was approved by the Reconstruction Finance Corp. Feb. 2. The first installment of the loan will be available as soon as the formal contract has been approved by the California Supreme Court.

According to E. F. Scattergood, Chief Engineer of the Bureau of Power and Light, the department will expend a total of \$33,000,000 and employ 2000 men over a period of two years. The power line and switching station will cost \$15,711,000; a step-down station to be located in Los Angeles for reducing the voltage, \$2,112,000; a local transmission line to the west side of the city, \$1,704,000; and four receiving stations costing \$3,273,000. In addition to the funds to be obtained from the Reconstruction Finance Corp. the Bureau will expend between \$10,000,000 and \$11,000,000 of its own funds to complete the project.

Preparing Plans.
SUBSTATION Cost, \$25,000
LAMANDA PARK, Los Angeles Co., Cal.
 Reinforced concrete substation.
 Owner—City of Pasadena.
 Architect—Robert H. Ainsworth, Central Bldg., Pasadena.
 The electrical equipment will cost \$350,000.

LOS ANGELES, Cal.—Graybar Elec. Co., Inc., at \$24,192.50 awarded contract by Metropolitan Water District to furnish 2900 butt-treated cedar poles, f.o.b. cars Los Angeles Harbor or Long Beach, for transmission lines to be built near Colton, on the route of the Colorado River Aqueduct, under item (6) Class 4, as follows:

10 25-ft. Class 4 poles;

25 35-ft.	do;
1150 40-ft.	do;
100 45-ft.	do;
1300 50-ft.	do;
250 55-ft.	do;
50 60-ft.	do.

LOS ANGELES, Cal.—Osborn Co., 450 California Terrace, Pasadena, and Fritz Ziebarth, Security Bldg., Long Beach, at \$98,780 awarded contract by Metropolitan Water District to construct all lines and substations, furnish all materials except poles, conductors, insulators, for the construction of transmission line between Cabazon and Hayfield. Contract on the basis of copper conductor.

LOS ANGELES, Cal.—Contracts awarded Feb. 10 by Metropolitan Water District for copper cable, approximately 2,700,000 lbs., under Speci-

fications No. M-2008, follow:
 Pacific Wire Rope Co., \$113,088 (all bids were identical).
 Anaconda Wire & Cable Co. of California, \$87,400.
 Graybar Electric Co., Inc., \$30,522.
 American Electrical Works Phillipsdale, \$2672.

LOS ANGELES, Cal.—Bids for furnishing and delivering 14 oil circuit breakers under Specifications No. 2982 opened by A. J. Holm, City Purchasing Agent, February 1. The bids were taken as follows:

- (1) 14 138,000-volt, 3-pole, single-throw oil circuit breakers, equipped with track mountings, train couplings, etc., incl., necessary oil.
- (a) breakers and oil, f.o.b. cars bidder's shipping point (lump sum);
- (b) breakers and oil, f.o.b. cars Power Spur No. 1, A. T. & S. F. Ry. delivery, or trucks, 1630 N. Main St., Los Angeles (lump sum);
- (c) breakers and oil, f.o.b. cars bidder's shipping point with full freight allowed to Power Spur No. 1, A. T. & S. F. Ry. delivery, Los Angeles.

Alt. No. 1—Same as (1) except to be furnished without oil—(a), (b), and (c) as above.
 Alt. No. 2—Same as (1) except to be furnished with standard floor mountings without trucks, incl. necessary oil, (a), (b) and (c) as above.
 Alt. No. 3—Same as (Alt. 2) except to be furnished without oil, (a), (b) and (c) as above.

The bids were:
 Kellman Electric Mfg. Co., — (1a) \$169,720, (1b) \$169,720, (1c) \$169,720. (Alt. 1a) \$148,720, (Alt. 1b) \$148,720, (Alt. 1c) \$148,720, (Alt. 2a) \$151,660, (Alt. 2b) \$151,660, (Alt. 2c) \$151,660, (Alt. 3a) \$180,660, (Alt. 3b) \$130,660, (Alt. 3c) \$130,660. Delivery start 60 days, compl. 120 days.

Westinghouse Electric Mfg. Co.— (1a) \$277,962, (1b) \$287,690, (1c) \$287,690. (Alt. 1a) \$264,657, (Alt. 1b) \$272,167, (Alt. 1c) \$272,167. (Alt. 2a) \$265,454, (Alt. 2b) \$274,772, (Alt. 2c) \$274,772, (Alt. 3a) \$252,148 (Alt. 3b) \$259,248, (Alt. 3c) \$259,248. Del. 65 days from East Pittsburg.

Pacific Electric & Mfg. Co. — (1a) \$177,277, (1b) no bid, (1c) \$179,877, (Alt. 1a) \$163,669 (Alt. 1b) no bid, (Alt. 1c) \$166,269, (Alt. 2a) \$168,005, (Alt. 2b) no bid, (Alt. 2c) \$170,427, (Alt. 3a) \$154,297, (Alt. 3b) no bid, (Alt. 3c) \$156,819. L. A. DISTRICT REVIEWS FORCE ACCOUNT POLICY

Protests Follow Proposal To Let Coachella Tunnels To Day Labor

Contractors will be given an opportunity to bid on approximately nine miles of the Coachella tunnels of the Colorado River Aqueduct, it has been indicated by the Los Angeles Metropolitan Water District.

It was reported originally that the entire 33 miles of tunnels would be constructed under force account day labor.

Protests were forwarded to the board from numerous public agencies on the ground that such procedure would increase costs of the construction project. F. J. Connolly, manager of Southern California Chapter, Associated General Contractors, called attention to the costly experience of day labor methods in construction of the Hetch Hetchy water supply for the city of San Francisco compared with the speed and economy with which the Eastbay Municipal Utilities District completed the Mokelumne project under competitive bid and contract.

The city of San Marino, a member of the water district, asked the directors not to resort to day labor until contractors had been allowed to bid in open competition with the engineers' estimate, thereby placing a "price tag" on the work as a check against waste and inefficiency should the day labor plan be selected ultimately.

BRIDGE FRANCHISE EXTENSION GRANTED

One year's extension of time to complete the construction of a proposed toll bridge between Point San Pablo, Contra Costa county, and Point San Quentin, Marin county, has been granted by the Contra Costa board of supervisors to the Richmond-San Rafael Ferry Company. The franchise is extended to February 15, 1934.

THE WEEK'S NEWS Highlights

SAN JOSE POSTOFFICE—W. J. Ochs, San Jose contractors, submitted the low bid of \$268,517 on construction of the San Jose post-office building.

NEVADA ROAD AWARDS—Three contracts, totalling \$161,795, for highway improvement were awarded by the Nevada State Highway Department.

PROTEST DAY LABOR—Los Angeles Metropolitan Water District directors are reconsidering their recent decision to construct 33 miles of aqueduct tunnels under force account following many protests against the plan as uneconomical.

BRIDGE GROUND BREAKING—Ceremonies to mark the formal groundbreaking on the Golden Gate Bridge construction call for an elaborate program Sunday, February 26, including a civic banquet, parade and colorful spectacle at the site of the south approach.

HOUSING SHORTAGE—A report by the Allied Eastbay Realty Boards discloses an estimated shortage of more than 1000 homes in Eastbay communities if families now doubled up in singlefamily dwellings were to seek separate residences.

NEW BUILDING ACT—An ordinance to require plastering over metal lath in all ceilings and walls of buildings over two stories in height, except private dwellings, has been recommended to the San Francisco Board of Supervisors by the Department of Public Works.

AIR STATION GARAGES—H. C. Miller, Santa Clara, bid \$10,609, the low figure on construction of three concrete garages at Sunnyvale Naval Air Station. Second and third low: Theodore Johanns, San Francisco, at \$10,647; George Petersen, San Leandro, \$11,390.

CITY CELEBRATES START OF BRIDGE WORK SUNDAY

Mammoth Parade To Mark Formal Groundbreaking For Gate Span

Ceremonies marking the formal groundbreaking exercises for the Golden Gate bridge next Sunday will bring visitors to San Francisco from a score of Northern California counties to participate in the celebration.

The program will start with a parade of fraternal and military organizations and bands from Van Ness avenue and Lombard street to Crissy Field. The parade will bring together 50 drum corps and 36 bands, the largest assemblage of musical units ever engaged in a San Francisco parade, it is claimed by the organizers.

Uniformed drill teams from patriotic societies, lodges, navy and army corps will compose the marchers. Thirty-six hundred men from the ships now in San Francisco harbor will march. Army and navy planes will form an aerial escort.

At the site of the bridge approach William Filmer, president of the bridge directors, will turn the first spadefull of earth and Joseph B. Strauss, chief engineer, the second. The golden spade they use will then be presented to Mayor Rossi to be placed in deYoung Museum.

Following the formalities navy airplanes will make a spectacular flight across the Golden Gate, tracing in smoke the lines of the projected bridge. Smoke bombs at both anchorages will be set off simultaneously.

As a preliminary feature of the Sunday celebration there will be a public banquet at the Hotel Fairmont Saturday night. Supervisor Warren Shannon is chairman of the banquet committee.

Guests of honor will include visiting foreign dignitaries and officers of the army and navy, state, city and county officials.

INSPECTION ADOPTED

Visalia city council has adopted an ordinance providing for inspection of all electric wiring installations in the city.

10 LABOR BILLS TO BE SUPPORTED BY COMMISSION

MacDonald Announces Measures Administration Will Advocate

Four legislative measures affecting the construction industry are among the ten bills in the California state legislature which will receive the support of the state labor commission, Commissioner F. C. MacDonald has announced.

Among the changes advocated is establishment of a public works penalty fund which would divert all penalties collected for violation of the prevailing wage law, alien law and eight-hour law into a fund for their enforcement. (Assembly Bill 716, introduced by Assemblyman Charles W. Dempster, Los Angeles; Senate Bill 260 by Chris N. Jespersen, Atascadero).

Three other bills supported by the commission are:

(1) An act amending the title and Sections 3 and 5 of the prevailing rate law on public works by requiring all contractors and sub-contractors doing public work to pay their employes and workmen by negotiable checks without refund, abatement of reduction except by a reasonable charge for board, to furnish certified, accurate duplicate copies of their payroll records to the inspector on the job on the day following each pay day and to post and keep posted in a conspicuous place at the site of the work an accurate and legible copy of the schedule of wages required by the contract to be paid to all workers employed on the job, providing penalties for failure to do so and making it clear that piece workers and working sub-contractors are to be classed as workmen when doing work on the job. (Assembly Bill 696, introduced by Assemblyman Thomas A. Maloney, San Francisco.)

(2) An act amending Section 653d of the Penal Code, making it a felony to receive a rebate of wages on public work, so as to specifically include within its terms any person who accepts or conspires to accept a rebate from those performing services under contractors and subcontractors doing public work. (Assembly Bill 585, introduced by Assemblyman Joseph P. Gilmore of San Francisco.)

(3) An act making labor claims preferred to material and other claims on public works to expedite payment of claims for labor in the event of abandonment of the contract due to insolvency. (Assembly Bill 947 introduced by Assemblyman Charles W. Dempster, Los Angeles.)

In a statement accompanying the endorsed list, MacDonald said:

"In the main, our labor laws are in fine shape and are being used as models for similar legislation in many other states, as is evident from the correspondence coming in to my office from labor commissioners throughout the country following the numerous recent deci-

SAN JOSE BUILDER SUBMITS LOW BID ON NEW POST OFFICE

WASHINGTON, D. C., Feb. 17.—W. J. Ochs, San Jose, submitted the low bid of \$268,517 on specifications providing for construction of the San Jose post office with terra cotta finish. The low bid on alternate specifications for cement plaster was submitted by Rosen & Fischel, Chicago, at \$257,300. Ochs' bid on the second alternate was \$258,017.

Rosen & Fischel bid \$268,800 on terra cotta specifications.

The structure is to be two stories and basement. Ralph Wyckoff, First National Bank Bldg., San Jose, is architect.

CAPITOLA FIRE LOSS \$150,000

Virtually the entire Capitola business district was destroyed by fire of unknown origin Wednesday morning, the conflagration threatening to wipe out the entire seaside town and causing \$150,000 damage.

The Hawaiian Gardens, dance pavilion owned by Mrs. Stella I. Wilson of San Jose, accounted for the greatest loss, amounting to \$50,000.

Other places burned included the Chinese Gardens, \$10,000; Case's restaurant, \$4000; Carl Sneath grocery, \$10,000 to \$15,000; Cuneo grocery, \$5000; Pacific Loan Investment Co., \$10,000; Blue and White restaurant, \$5000; Pertoculini building, \$10,000; Mug, Cox & McClintic pool room, \$4000, and Blue Bell restaurant, \$5000.

sions of the State Supreme Court upholding our Wage Law, Wage Collection Law, Prevailing Rate Law on Public Works and Law Prohibiting the Employment of Aliens by contractors and subcontractors on public works.

"However, certain changes have been found necessary in our efforts to make these laws as self-enforcing as possible so as to place the cost of administering them on those who violate them rather than on the tax-paying public. To this end we have offered to the legislature ten measures proposing changes in existing laws, which changes will be of great assistance to us in our efforts to secure a uniform compliance with the fifty-four labor laws delegated to our office for enforcement. We are offering no new regulatory legislation as we feel that the legislature already has its hands full with important problems confronting it but feel that existing legislation should be made as effective as possible as a matter of economy of administration and in fairness to the vast majority of employers who are complying with the laws as they now exist."

U. S. MORTGAGE LOANS URGED BY REALTY BOARDS

National Association Petitions For Modification of R.F.C. Authority

Reconstruction Finance Corporation action, under new authority, to ease the mortgage situation and aid in interest adjustment is asked by the National Association of Real Estate Boards in a resolution adopted by the delegate body of the association at its recent annual meeting in Washington, D. C.

Authorization is asked for direct R.F.C. purchase of first mortgages under proper safeguard, as well as for loans on mortgage collateral.

Extension of mortgages as well as interest adjustment is asked as a condition precedent to such purchases or advances in order to insure relief both to mortgage and to mortgagor.

The text of the resolution, as transmitted to the Reconstruction Finance Corporation and the finance committees of Congress this week, is as follows:

WHEREAS, we are now in an extraordinarily difficult financial crisis in this country, and,

WHEREAS, relief has been given to other industries by the Reconstruction Finance Corporation, and

WHEREAS, relief to the real estate industry and help in solving its financial problems is equally important to the welfare of this country,

NOW, THEREFORE, BE IT RESOLVED, that we recommend to the President and the Congress of the United States that the R.F.C. Act be amended to permit loans on and purchases of first mortgages subject to the following conditions:

A. That the R.F.C. be permitted to loan on or purchase first real estate mortgages subject to appropriate conditions and safeguards, such mortgages to be, or to be extended, for a term of not less than five years, and not more than fifteen years.

B. That the R.F.C. be empowered to require as a condition precedent to such loan or purchase, a reduction in the rate of interest on such mortgages of not less than one-third of that heretofore prevailing on such mortgages, so as to adjust the rate to the present prevailing values and earning capacities, and so as to insure relief and interest rate adjustment will be passed on to the mortgagor.

TO ORGANIZE TRADES COUNCIL IN MONTEREY

Plans for the establishment of a central labor council in Monterey county are being considered by representatives of organized labor Joseph M. Casey of San Francisco was the speaker at an initial meeting in Monterey Thursday night. The convention of the California State Federation of Labor will be held in Monterey in September.

REALTY SURVEY SHOWS EASTBAY HOME SHORTAGE

District Lacks 1000 Dwellings for Adequate Housing, Board Finds

The shortage of housing that has accumulated since building operations began to decline is shown graphically in a survey just completed by the Allied Eastbay Realty Boards.

A recent occupancy survey indicates approximately 101,900 single-family homes in the Eastbay cities between the Contra Costa line and the southern boundary of San Leandro. Of these more than 96,100 are occupied and 6780 house more than one family.

It is estimated that because of the small amount of new construction and repairs to existing structures in the last four years, more than five percent of the single-family homes now standing in the Eastbay are obsolete and undesirable. The conclusion of the realtors is that if families now doubling up in single-family dwellings were to separate there would be a shortage of 1000 homes.

Detailed analysis of the reports from each of the twenty general geographical areas into which the Eastbay is divided for the purposes of survey, is being made and will be published by the realty boards. Preliminary figures disclose the following:

	per cent of homes occupied	per cent by more than one occupied family
San Leandro	95.2	5.2
Elmhurst	83.0	5.8
Fruitvale	94.7	8.0
Brooklyn	96.0	7.7
North of the Lake	96.7	2.7
Piedmont	95.9	6.0
North Oakland	96.8	10.8
Emeryville	95.0	7.0
West Oakland	91.1	14.1
S. Central Oakland	92.1	40.0
N. Central Oakland	92.9	28.0
South Berkeley	95.6	8.0
Elmwood	96.8	8.1
North Berkeley	95.0	2.3
Albany	94.1	4.9
West Berkeley	94.8	5.2
East Alameda	96.5	5.0
Park Street	97.7	4.5
Central Alameda	93.0	2.0
West Alameda	93.8	6.0

Tabulation of the data for 1933 in comparison with that of 1932 and 1931 is now being made by the Oakland Real Estate Board for distribution to Eastbay realtors and builders. It will show for each year and for each of the twenty districts the total number of single-family homes, the number occupied and the number of homes occupied by more than one family.

APPOINT MANAGER

Frank L. Robinson has been placed in charge of the Oakland branch of L. H. Bennett Company, Ltd. He succeeds W. D. Robers who will become sales manager in Sacramento.

FIRST CARLOAD OF CEMENT STARTED TO GATE BRIDGE SITE

Marking the start of quantity delivery of materials to the site of the Golden Gate bridge, the Pacific Portland Cement Co. shipped a carload of Golden Gate cement from its Redwood City plant to bridge contractors Saturday.

Approximately 1,800,000 sacks of cement will be used in construction of the bridge, according to quantity estimates.

\$50,000 WILLED FOR MONTEREY CITY HALL

A fund of \$50,000 is available for construction of a memorial hall of records for the city of Monterey, the city council has been informed by administrators of a bequest to the community to finance the structure.

Architects W. O. Raiguel and C. J. Ryland have been engaged to design the hall. W. G. Hudson, administrator of the estate, said. The building is being provided under the will of the late Agatha M. Few, who directed that a city hall of records be built as a memorial to her husband, the late Chas. R. Few.

The building is to be in mission style of architecture. It probably will be arranged to house the offices of city manager, city clerk and assessor, city engineer and city auditor.

LeTOURNEAU MARKETS NEW LOGGING UNIT

R. G. Le Tourneau, Inc., have just placed on the market a new logging type cable power unit, which, beside providing the operator with a high-speed power drum for handling cable-controlled machinery such as a bulldozer, cow-dozor or rooter, affords him a heavy drum for tough pulls, pulling stumps, bunching logs, logging short shows, etc. The new unit fits all large tractors.

The two drums can be operated independently, either while the tractor is in motion or standing, and both lines run through fairleads which enable them to pull in any direction regardless of how the tractor is headed. The large drum handles 580 feet of 3/4-inch cable; the small drum 920 feet of half-inch cable.

All shafts are heat-treated nickel steel; gears are case-hardened nickel-steel and run in oil, bearings are high duty Hyatt and Timken. The brake has a patented feature which permits the drum to spin absolutely free when the lever is thrown to release position but automatically grips when the clutch is released.

CERTIFICATE ISSUED

The Board of Architectural Examiners, Northern District, has announced the issuance of a provisional certificate to Donnell E. Jaekle, 714 Call Bldg., San Francisco.

HIGHWAY ASSN. URGES FEDERAL AID CONTINUE

Construction Most Effective To Employment Officials Declare

"Highway construction is the most effective job creator among public works. For that reason federal aid for roads assumes an importance warranting immediate action by Congress."

This is the view expressed in a statement received by the California State Automobile Association from C. H. Moorefield, president of the American Association of State Highway Officials, discussing the relation of highway construction programs to the unemployment situation. The statement continues:

"Highway work offers a distribution of labor perhaps unequalled by any other large industry. The United States Bureau of Public Roads learned in a thorough study that ninety cents of the road dollar goes to labor.

"State highway programs, aided by federal appropriations, in 1932 provided employment for more than 333,000 men directly on roads. This figure is taken from contractors' payrolls. Another 660,000 men were kept busy supplying materials and equipment. With dependents, state road building gave a means of livelihood to at least 4,000,000 people.

"Highway building brings to the people the country over something they need and something which does not have to be sold before used. For these reasons, highways have been given first rank as a provider of jobs.

"Immediate action should be taken by Congress on Federal Aid authorizations for the next two fiscal years, as the current authorization ends July 1. This done, the states can lay plans to proceed with their full 1933 programs and men can resume their jobs. Then the country will have at least one large industry proceeding in its normal course."

Commenting on this statement, the Automobile Association declares that the employment phase of highway construction applies with equal force an argument against attempts pending in this state to divert gasoline tax revenues from the highway fund.

CITY MAY ACCEPT FIREHOUSE LOAN

Legality of the contract whereby the Sacramento Firemen's Benefit Association will lend \$12,500 to the city of Sacramento for construction of a firehouse has been upheld by a decision of Superior Judge Peter J. Shields.

No further steps toward construction may be taken under the contract, however, for sixty days, during which period an appeal from the court's decision might be filed, according to City Manager James S. Dean.

Steel Executive At Del Monte Meeting Predicts Expanded Demand For Metal In Future U. S. Building Construction

Steel piers, steel foundations, steel walls, steel floors, steel residences are ready for the market. They will be cheaper and will make for better construction, declared Charles F. Abbott of New York, executive director of the American Institute of Steel Construction, in an address before the Ninth Annual Conference of the Iron, Steel and Allied Industries of California at Del Monte, Feb. 9. Mr. Abbott said that these improvements in steel construction, developed from the intensive research of the past years of the depression, represent the industry's program to bring its business back to a prosperous basis.

"Human nature is weak and human beings require the spur of hard times to force them to improved positions," said Mr. Abbott. "It is for that reason that the greatest industrial improvements are designed and planned during periods of business depression. Through a greater knowledge of the nature of our raw materials and by means of improved knowledge of the methods of utilizing them we can make structural steel render a greater service than ever before. We can remake or rebuild our entire world.

"Scientific research and invention will bring into existence new industries that will surpass any that we have as yet promoted. This development will be vast and magnificent. It will be a period of far greater opportunities and those who have the will to conquer will benefit the most.

"The development of air-conditioning is bringing into view a new industry of great possibilities. It will not be long before we shall be able to inhabit homes, offices and hotels with rooms of even temperature throughout the year and with better and more healthy ventilation.

"The largest air-conditioning system in the world, involving more than a million dollars, will be installed in the broadcasting studios and the lower floors of the new 69-story RCA Building in Rockefeller Center, New York. It will maintain an average temperature of 70 degrees Fahrenheit in winter and a maximum of 85 degrees Fahrenheit in summer. Humidity is to be varied between 40 per cent in winter and 50 per cent in summer. Carrier Engineering Corporation has the contract.

ces in the remainder of the building. "Maxim-Campbell silencers and air filters will be installed in offices in the remainder of the building.

"Here in the West you have the opportunity to erect buildings with complete systems of air-conditioning. In the thickly populated East we have, unfortunately, inherited

many obsolete structures which must be replaced, and in which the need for air-conditioning will manifest itself.

"Engineers have gained valuable experience in this field. It is much cheaper to install air-conditioning than ever before. We are demonstrating that residential units are quite economical and can be sold to home owners in the relatively low income brackets.

"The steel construction industry represents a good example of a planned future. It is an industry that presented many difficulties to any program of readjustment. It produced steel for the erection of buildings and bridges. In the past it waited until the customer presented plans and specifications. There was little or no application of creative selling. Its destiny rested with those who wanted to use steel.

"On the Pacific Coast you have already started to use H-columns for piling. During the past year some interesting tests have been made and considerable technical data has been assembled. The industry will soon be prepared to issue to the engineering profession the essential tables to enable them to design H-column footings for buildings and bridges. That will make for great savings and result in greater security for future structures. The day will come when steel will be the foundation, superstructure and roadway of bridges and buildings.

"Ten years ago the total requirements of fabricated structural steel consumed about one-third of the total capacity of the industry. The American Institute of Steel Construction was organized to promote a program of research and market development and to coordinate technical and industrial standards. In 1929, seven years later, the shipments accounted for over two-thirds of the industry's facilities and had it not been for the depression it is possible that demand would have equalled the full capacity. That would have been an ideal condition for any industry.

"Under the auspices of the Institute a yearly bridge competition was inaugurated with awards for the most beautiful steel bridges erected during each year. This competition inspired the design of more beautiful steel bridges to adorn our highways. They caught the eyes of an appreciative public with the result that more steel bridges were needed to supply this newly created demand. More steel was used as a result of this simple but effective method of expanding an existing market.

"A new system of fireproofing the steel used in our buildings will greatly reduce the cost of struc-

tures and this means lower rentals and lower service charges for the public. As we reduce our costs we automatically extend our markets.

Three years ago the Institute began a study of steel floor construction. A design of steel plates welded to I-beams was proposed. Before the necessary engineering data was even completed some 50,000 tons of plates had been used for garages, warehouses and office buildings. Tests have been made for strength, fireproofing and sound-conductivity, under the auspices of the U. S. Bureau of Standards, and they have exceeded all expectations.

"The steel floor today is an established reality. Its widespread use would be an incident to business recovery. So promising is this technical improvement to the building industry that a number of patented types of steel floors are now being promoted.

"The Carnegie Steel Company is offering the T-Tri-Lock floor. Its use is adaptable to bridge floors and approaches which are subjected to heavy usage. Engineers of the Belmont Iron Works of Philadelphia, have designed a floor of interlocking channels. It has been successfully used in the rebuilding of a number of bridges necessary to withstand an increased traffic load. It has been incorporated in pier floors and warehouse storage sheds.

"The H. H. Robertson Company of Pittsburgh, is putting on the market a cellular steel floor, which it is claimed, is ideal for buildings for human occupancy.

"It is possible that there will be others on the market. Sufficient has already been developed to demonstrate the great improvement in floor construction that is now possible. They will permit of unit construction in the shop and rapid assembly in the field. The lighter construction will represent a considerable saving both in the dead weight of the completed building and in ultimate cost.

"Buildings with steel outer walls displacing the heavy and costly masonry have been perfected. This new type of construction will add further cost reductions and when used for apartment houses the public should be able to obtain reduced rentals.

"The development of steel floors for buildings and residences represents a new market that could call for more than 5,000,000 tons of steel. Better floors at lower costs would add greatly to superior and more economical structures.

"Steel highway roadguards have been perfected and they are the only type that will keep automobiles and trucks from going off the road. When the public become acquainted with these life-saving inventions they will undoubtedly be installed to guard the dangerous places on all of our highways.

"These and other accomplishments demonstrate the possibilities of a constantly increasing business which should eliminate the in-

tense competition and price-cutting that we always experience whenever the supply exceeds the demand.

"The estimated potential market for the new uses of steel as so far developed and found to be practical, would undoubtedly exceed 20,000,000 tons if these new markets were fully developed.

"This represents a volume five times the present combined production of the steel construction industry.

"We must not forget, however, that research, new uses and new markets will fail completely unless the public are first acquainted with and educated to all of the advantages. Their acceptance must first be obtained before a demand can exist. Orders never happen, they must be stimulated by conviction and this calls for intelligent advertising, promotion and aggressive salesmanship.

"The financing of such an undertaking should be based upon the volume of business that it is possible to obtain and with appropriations made in sufficient yearly amounts to insure continuity.

"The progress of all business will depend as never before upon more intensive studies of markets with practical plans to meet new requirements. The cultivation of new markets and the expansion of existing markets, will be the aim of management."

BOSTON ARCHITECT GETS MEDAL IN HOMES CONTEST

San Franciscan Wins First Honorable Mention In 2-story Class

Royal Barry Wills, Boston architect, has been awarded the gold medal for the prize-winning design in the Small House Architectural Competition for 1932, it is announced by the American Institute of Architects.

President Hoover, the honorary chairman of better Homes in America, which sponsored the contest, will present the medal to Mr. Wills at the White House at 12:30 P. M., on Wednesday, February 15. Mr. Wills won the medal for designing the home of Maurice A. Dunlavy at Brookline, Mass. Seven architects, among them Miss Elisabeth Coit of New York, were given honorable mention by the Jury of Award, of which Dwight James Baum of New York was chairman.

"The house submitted by Mr. Wills," the jury said, "shows great charm, expresses the spirit of the locality in which it is built, has a fine scale and composition and shows a good use of materials. It has an air of domesticity and shows great care in the manner in which

all detail has been brought together.

"There is a good, frank use of chimneys and a fine handling of the entrance terrace. The plan is compact and well arranged. There is a fine relation of rooms, combining with economical and efficient circulation. The library is arranged with real privacy. The service portions are well arranged. The second floor hall occupies the minimum amount of space and yet this small house has ample sized rooms. The award is in the one and a half story class."

Honorable mention in the same class went to Charles S. Keefe, New York architect, for his design of the house owned by John J. Farrell of Darien, Conn.

"The house," the jury commented, "is a fine handling of a small structure and shows good proportions and simple mass. The house will be easy to take care of through its simple, straightforward layout. The materials are of the simplest and well used."

In the one story class honorable mention was placed first for the residence of Leland F. Fuller of Santa Monica, Calif., who is both the owner and the architect. Honorable mention also was awarded in the one-story class for the house of Dr. Seeley G. Mudd in Sandyland Cove, Santa Barbara County, Calif., by Ralph C. Flewelling, architect of Beverly Hills, Calif.

Honorable mention placed first in the two story class went to the home of Dr. Alister Mackenzie, near Santa Cruz, Calif., which was designed by William Wilson Wurster, architect of San Francisco.

"This design," the jury declared, "shows a freshness that is noteworthy and most distinguished. This is a fine solution of a special problem. A house of this quality and size would still look well if placed amid larger dwellings."

Honorable mentions in the two story class also were given to the home in Newtown, Conn., designed by William Webb Sunderland, architect of Danbury, Conn.; to the home of Rollin C. Chapin, owner and architect, of Minneapolis, and to the home of Miss Anna B. Van Nort of Croton Heights, N. Y., designed by Miss Elisabeth Coit of New York.

"This home," the jury said of Miss Coit's design, "shows domesticity and real charm and fits its rugged country site very well. It is another simple, straightforward plan, except for the different floor levels on the first story."

The jury noted that only one design of radical modern architecture was submitted, indicating that the traditions of our country's domestic architecture are being continued and improved yearly by the contributions of architects in all part of the country."

Besides Mr. Baum, winner of the gold medal last year, members of the Jury of Award, all of the American Institute of Architects, were Edward Livingston Palmer, Jr., of Baltimore; Horace W. Peaslee of Washington, D. C.; Philip N. Stern of Fredericksburg, Va.; and Waddy B. Wood of Washington, D. C.

University Laboratory Completes Study Of Concrete Wall Panels In Building

Information is greatly needed at the present time as to the relations between the physical properties of walls and those of the building units and mortar used, particularly as a basis for specifications for concrete building units. The investigation reported in Bulletin No. 251 of the Engineering Experiment Station of the University of Illinois was designed to determine what factors influence masonry strength, and to give further information as to the essential properties to be specified for hollow concrete building units.

The major part of the investigation was carried on from January to May, 1931, at the Materials Testing Laboratory of the University, in cooperation with the Portland Cement Association, Chicago, Illinois, and the Concrete Masonry Association, Milwaukee, Wisconsin. A second group of tests of walls made with concrete tile units was conducted in May and June, 1931, in cooperation with the Western Brick Company, Danville, Ill.

The tests were planned primarily to furnish information on the behavior under load of wall panels of sufficient size to represent story-height building construction; with this in view a panel 6 ft. long and about 9 ft. 6 in. high was chosen. Small panels, or wallettes, 32 in. long and 48 in. high, were also used to determine whether or not they could be established as representa-

tive test specimens for masonry walls, and, if so, to determine the correction factor to be used with wallette strengths to make them directly comparable with the values from the large panels. The main group of test panels was planned for a compression test with a uniformly applied axial load; four lots of walls were also tested to furnish information on the strength of walls eccentrically loaded; and to secure data on the flexural strength of the various types of walls a large panel of each lot was subjected to a bending test.

Among the conclusions drawn from the results of these tests are the following:

(1) The compressive strengths of the large wall panels were dependent mainly on the strength of the concrete building units, and were little affected by variations in the quality of the mortar used.

(2) The ratio of the compressive strength of large walls to that of the three-core units used was found to be quite well defined, with an average value of 0.53, when full mortar beds were used.

(3) The ratio of the compressive strength of large walls to that of corresponding wallettes was fairly constant, with an average value of 0.91.

Copies of Bulletin No. 251 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

Industrial Association Publication Charges Prevailing Wage Legislation Encouraging Unscrupulous Practices

Wholesale evasion of the California state law and local ordinances regulating wages paid on public works contracts is charged in an article appearing in the current issue of "The American Plan" distributed yesterday. This is the official organ of the San Francisco Industrial Association.

That practices of unscrupulous contractors in successfully escaping the prevailing wage law are notorious, the article asserts.

After reviewing the history of wage legislation in the state and city of San Francisco, the article continues:

Hardly had the ink dried on signatures approving the final form of these laws before it became evident that the purposes for which the legislation had passed would not be achieved for the legitimate contractor and the decent workmen, it provided rather a cloak behind which the unscrupulous contractor could hide his practices. In spite of the sincere efforts of various enforcement authorities to secure the observance of the law, it is safe to say that in many communities and in many instances it has become a dead letter, that the only contractors who are scrupulously following it are those who would scrupulously observe any conditions laid down whether there were a prevailing wage law or not, and that the occasional contractor against whom the penalties imposed under the act are set—and these penalties may be heavy, running as high as \$10.00 per man per day in case of non-observance of the provisions—is rather the exception than the rule.

"When effort is made, however, to carry the operation of the law into work performed in shops it has, without exception, either tended to deny entirely to the legitimate manufacturer an opportunity to participate in local undertaking or has, in too many instances, driven him to resort to circuitous practices in order to circumvent the law.

"One example will suffice to illustrate the complete unfairness of the prevailing wage laws as applied to shop operations. In one craft San Francisco manufacturers, with large local investment and pay rolls and paying heavy taxes to the city, hid against an Eastern competitor for important material for one of the recent jobs completed in the Civic Center. The local manufacturers were held to the wage rates established in the prevailing wage act for their shop operations. The Eastern competitor, however, who were notorious for the payment of extremely low wages in his plant operations and who was neither a local employer of labor nor a local taxpayer, was able to secure the contract for the manufacture of this material, in spite of an adverse freight rate, at

a price considerably below that for which local manufacturers could possibly take the work. In this instance the only result of the prevailing wage law was to deny to local workmen the right to secure an opportunity to obtain a living from money supplied by the taxpayers of San Francisco and to prevent local manufacturers from securing some recognition for the heavy investment which they had made in this community.

"Had the prevailing wage law merely had an adverse effect upon the operations of manufacturers, that would have been serious enough, but unfortunately the prevailing wage statutes have tended to tempt some contractors employing men on the job itself to resort to devious practices in order to escape the plain provisions of the law and to avoid the obligations they assumed when taking the contract. Under the conditions prevailing at the present time, with employment difficult to obtain, workmen, of course, are loath to complain against conditions that they find on the job, and while they may be willing and ready privately to discuss and describe the methods employed by contractors in evading the prevailing wage act, they will, all too frequently, refuse to testify against a contractor for fear of prejudicing their own future economic status.

"It is a matter of common knowledge, however, both among those who favor and those who oppose the act, that contractors engaged on public works operations have, in many instances, resorted to a variety of crooked and illegal devices in order to avoid paying the prevailing scale on public works. One of the favorite methods employed is that of the labor contract. Under this arrangement a contractor agrees with a group of men that they will perform the work called for at a stipulated total sum, the contractor himself providing

the necessary materials, heavy tools, and equipment.

"Jobs taken on such a basis almost without exception are contracted for at a rate, which, when divided among the workers at the end of the job, produces a daily wage far below that paid to men employed at the regular per diem basis. Because of the vulnerable position of the mechanic on a labor job the employer invariably profits on any extra work called for, as he is usually able to force mechanics to include the extra work in the lump sum price at which they agreed to perform the labor operations on the job.

"Other devices which have been employed by contractors in order to evade the prevailing wage law include outright rebating by the men to the contractor; the organization of special clubs with exorbitant dues, membership in which is required before employment on the job can be obtained; and the sale by the contractor to the workmen of necessities on the job at a price far in excess of their true value, thus securing the equivalent of a rebate.

"On one large public job operated under the prevailing wage law in the Bay area it is a matter of common knowledge that a sub-contractor on the job required his workmen to join what he was pleased to call a "Service" club, the dues for which were \$5.00 per day. As these men were among the highest-paid mechanics on the job, they were still receiving more than half of their weekly wages after they had paid club dues each Monday morning. But the final result of the prevailing wage law as it operated on this job was to permit an unscrupulous contractor to take this work from the best of his competitors and to secure the job as the result of his ability to force those working for him to take out memberships in his fictitious club arrangement.

"Another favorite device employed by the unscrupulous contractor under the prevailing wage act is to sell box lunches to workmen at exorbitant prices, charging anywhere from eight to twelve times the going rate. Refusal to purchase one of these box lunches is, of course, the equivalent of securing one's immediate discharge. It

is in connection with the determination of prevailing wages, however, that a still different aspect of the situation enters the picture.

"Almost without exception prevailing wage rates are determined by legislative bodies, and since legislative bodies are subject to political influence, pressure of every conceivable sort is brought to bear upon city councils, school trustees, boards of supervisors, and similar groups in an effort to force them to set a scale of wages higher than the actual prevailing wage in effect. Since the purpose of the act was to insure to workmen employed on public projects that they would not be paid less than the generally recognized prevailing scale of wages in private work, it could ordinarily be assumed that the rates prevailing on private work and generally accepted and observed would constitute the guide from which public bodies would find the prevailing rates for the same crafts on public employment. This, however, is anything but the actual case.

"As a matter of fact, almost without exception, public authorities are requested, threatened, urged and cajoled to set a scale of wages for employment on public projects materially higher than those generally recognized and prevailing on private work. All too frequently, therefore, the wage rates as set by public agencies are not in any literal or factual sense the prevailing scale of wage in the political subdivision where the work is to be performed in accordance with the provisions of the statutes, but are, instead, a political or fictitious wage which complaisant public authorities are willing to establish for fear of political reprisals should they find otherwise.

Further than this the most dubious logic is employed in urging the setting of such higher rates. Since most of the prevailing wage enactments were passed in 1931 and since in most jurisdictions wages at that time had not reflected the general decline in prices, the wage scales as originally established usually carried over the peak scales for all crafts. When subsequent determinations were to be made, these scales were pointed to as the prevailing scale, since they were the scales actually being paid on other public jobs which had been let under the original determination. For example, it is argued that because in 1931 the wages for Craft A on public work were set at \$10.00 per day, even though since that time they have been reduced by twenty per cent, the fact remains that public jobs are still operating under the original determination, and it is argued therefore that \$10.00 should be set forth as the prevailing scale of wages under a new determination. Logically and practically, of course, this leads to the absurdity that irrespective of the subsequent course of wages a wage scale once established is established in perpetuity. Only the Federal Government has avoided this dilemma by refusing to set forth the scale of wages to be paid in its specifications and contracts, permitting the contractor to take advantage of re-

ductions during the period of operations or requiring him to pay increases should any take place.

"The only result, of course, which the establishment of these excessive rates has achieved is to force upon the alreaday overburdened taxpayer the burden of the load of excessive and artificial labor costs on such public undertakings as may be launched. Such excessive rates have an adverse effect which is all too frequently overlooked. Through payment of excessive costs on some undertakings, a lesser total volume of work can be launched and only those workmen who are fortunate enough to secure employment at the highest rate—provided they are also fortunate enough to work for an honest contractor—secure the benefits, while other workers who might be employed on other projects are denied employment and to that extent may fall upon the emergency relief rolls of the community. The taxpayer, then, not only is required to put up more money than normally would be required to complete a particular project, but, in addition, has to carry the excess burden of caring for some of those who might otherwise be employed, through his contributions to the support of relief funds.

"Offered with the best of intentions and designed primarily to serve a commendable purpose, prevailing wage statutes as a whole have failed entirely to meet the purpose for which they were drawn, have tended to increase materially the cost of public works, have required taxpayers to pay out excessive sums at a time when tax payments are the most burdensome and have served as a standing invitation to crookedness, chicanery, graft, collusion, and exploitation, have operated adversely against the interests of local manufacturers, have favored unscrupulous and illegitimate contractors as against contractors more reputable in their employment relations, have placed a premium on the discovery of circuitous devices for cutting wage scales, and have, if anything, increased the burden of unemployment and thus thrown a still heavier load on the taxpayer.

"Those who originally introduced this legislation are, however, still pointing with pride to its success and in many instances propose to go still further in the application of the law. It is reported, for example, that efforts will be made at the present session of the California Legislature to secure amendments to the act which will secure its application not only to employment on the job but to all shop employments as well, and it is probable that other amendments will also be offered which would tend still further to magnify the inequalities and unfairness which the present act has created. California contractors and California manufacturers would do well to give serious consideration to whether they wish to be placed in a still more unfavorable position in the present unstable and profitless market through additional and more onerous amendments to the prevailing wage law and might well give serious consideration to the question of complete repeal."

SPECIAL MEETING OF A.G.C. CALLED

Members of the Associated General Contractors, Northern California Chapter, have been called to a special meeting in San Francisco on March 3, George Pollock, president, has announced.

A campaign for members will be climaxed with the gathering.

"In view of the importance that the Bay region has assumed because of the proposed construction of the San Francisco-Oakland Bay Bridge and other projects under way, this seems a very opportune time to point out to a number of firms that are not now affiliated with the chapter the desirability of such affiliation not only for the purpose of supporting the work that the chapter is carrying on, but in addition to furnish a channel through which negotiations regarding such important construction projects may be carried on in behalf of all contractors," said Pollock.

According to Floyd O. Booe, Secretary-Manager of the Northern California Chapter, the work of this group will be coordinated with the aggressive campaign which is now being carried on by the Southern California Chapter at Los Angeles in opposition to the spread of the day labor movement in public works construction and to the education of the public to the important position occupied by the contractor in the business world.

BIDS ASKED FEB. 28 ON MACHINERY FOR COLORADO AQUEDUCT

Bids will be received by the Los Angeles Metropolitan Water District, February 28, on machinery for use in construction of the Colorado river aqueduct.

Items to be purchased include air compressors, storage battery locomotives, motor generator sets, mucking machines, power shovels, dump cars and air receivers. Alternate prices will be taken on various quantities and for furnishing within specified date.

A charge of \$2 per set, not returnable, is made for specifications which are available at the district offices, Room 1004, 306 West Third street, Los Angeles.

GENERAL PAINT LOSS \$291,129

General Paint Corporation has reported a loss of \$291,129 after all charges for 1932, compared with a loss of \$214,132 in the preceding year.

Sales during the year totaled \$2,266,463 as compared with \$3,972,972 in the previous year, C. H. Jones, president, reported.

Twenty-one electric trucks and tractors were shipped by the ten leading manufacturers during January, according to reports to the Bureau of the Census. This compares with 19 units shipped in December and 29 in January, 1932.

FARM MARKET FOR LUMBER IS ANALYZED

Forest Industries Estimate Repair Requirements On Rural Buildings

That the farm field is providing one of the best lumber markets is emphasized in a comprehensive report of the American Forest Products Industries, Inc., made recently by its Agricultural Engineer, C. F. Miller. This report points out that

(a) On some 6,000,000 farm units there are \$12,000,000,000 worth of buildings annually needing ordinary repair and replacement work.

(b) The "Back to the Soil Movement" is creating additional demand for new farm construction and repair and replacement work.

(c) All farms are not "broke." Fifty-eight percent of the owner operated farms in the United States are free from mortgage indebtedness.

It shows how much lumber the farmer needs per year, the type of work being done by Federal, State and other agencies which influence from construction and discusses in detail the use of lumber, concrete, brick and other materials in farm construction. It gives evidence of new construction on farms, particularly in the Middle West. It discusses costs of farm building at the present time. It speaks in some detail of plans for farm structures and gives briefly the high spots of recent farm lumber promotion activities. It closes with a small but valuable list of outstanding farm buildings bulletins and plans available from other than commercial companies.

"To house 32,000,000 rural people," says the report, "to shelter 200,000,000 farm animals; to protect 700,000,000 fowls from changing temperatures; to have storage space for hay, grain and other feeds to be used in caring for this livestock and poultry; to provide storage space for fruits, vegetables and other foods grown and consumed on the farm; to protect an enormous investment in machinery and equipment; and to provide temporary and permanent storage or handling facilities for practically all foods to be ultimately consumed in the United States, with from 8 to 10 percent surplus for exportation, is a housing and storing problem of the first magnitude."

SALINAS COMBINATION BID IS CONTEMPLATED

A combination of Salinas contractors has been proposed to enter a joint bid for construction of the postoffice in that city.

Postmaster Wm. J. Martin suggested that local interests organize to bid on the general contract. An appropriation of \$123,000 is allocated for the building. The architect has not been selected as yet, although City Engineer Donald Davies, Jr., has been asked to furnish the treasury department with a topographical survey of the site.

FEDERAL BUILDING PROGRAM OUTLAY NOW \$493,000,000

According to American Forest Products Industries, the government building program now covers a total of \$493,000,000 out of a total authorization of \$700,000,000.

The projects that have been completed total \$98,000,000 and 281 different buildings. Under contract are 419 projects representing expenditures of \$330,000,000. In addition, sites have been purchased in the District of Columbia aggregating \$28,000,000 and sites have been selected elsewhere and various degrees of progress have been made toward the consummation of 72 projects at a cost of \$21,000,000. In addition some progress has been made toward the realization of approximately 50 projects, totalling about \$16,000,000.

TARRANT GIVEN STOCKTON POST

Julian W. Tarrant, city planning engineer, who has been with the firm of Harlan Bartholomew and Associates, has been appointed assistant city engineer for the Stockton City Planning Commission. Tarrant has been in Stockton for the past three years working on the city plan which Bartholomew contracted to prepare for Stockton.

CONSTRUCTION LEADER HEADS L. A. CHAMBER

William A. Simpson, a leader in the construction industry of the southwest, has been elected president of the Los Angeles Chamber of Commerce. The William Simpson Const. Co., of which he is president, has built many of the principal structures in Los Angeles and San Diego. Simpson is a former president of the Southern California A.G.C.

COLO. RIVER AQUEDUCT WATER SYSTEM—MET. WATER DIST.

LOS ANGELES, Cal.—As previously reported, the lowest figure submitted to the Metropolitan Water District Feb. 15, for constructing a water supply system and reservoirs for the Colorado River Aqueduct was a combination of the bids of Clark & Campbell and A. J. Callahan, 3416 W Slauson Ave., bidding jointly, on Schedule No. 1 at \$12,392.50, and Ray Schweitzer, 2415 E 9th St. on Schedule No. 2, at \$27,183. The total of these two bids is \$39,575.50.

These were the only two bids which stipulated the bids on the separate schedules could be considered singly. Neither firm bid on Schedule No. 3.

Macco - Robertson, Ltd., 815 Paramount Blvd., Clearwater, submitted the lowest bid on Schedule No. 3 (the reservoirs) at \$17,384.

The complete bids were:

(A) Clark & Campbell and A. J. Callahan—Schedule No. 1 \$12,392.50; Schedule No. 2, \$33,724.90; Schedule No. 3, no bid. No stipulations.

(B) Ray Schweitzer—Schedule No. 1, \$15,108; Schedule No. 2, \$27,189; Schedule No. 3, no bid. In the event the bid on combination of Schedules 1 and 2 is the lowest bid of any other such combinations, bidder requests that such bid be used as a combined bid only, and in the event bidder's combination bid is not lowest, the bid on either Schedule 1 and 2 may be used individually to form a combination with any other competitive bids submitted.

(C) Macco-Robertson, Ltd.—Schedule No. 1, \$13,610; Schedule No. 2, \$30,944; Schedule No. 3, \$17,384.

(D) Winston Bros. Co., 418 S Pecan St.—Schedule No. 1, \$13,610; Schedule No. 2, \$26,365.70; Schedule No. 3, \$23,640. Will accept a combination of 1 and 2 only, or 1, 2 and 3. Will not accept schedules singly or in other combinations.

(E) Kemper Const. Co., 3701 Overland Ave. and Lang Transportation Co., 5501 Santa Fe Ave.—Schedule No. 1, \$14,619; Schedule No. 2, \$26,545.18; Schedule No. 3, no bid. Will only accept Schedules 1 and 2 together.

(F) Lynch-Cannon Engr. Co., 5658 Wilshire Blvd.—Schedule No. 1, \$14,577.70; Schedule No. 2, \$36,539.75; Schedule No. 3, \$20,826. No stipulations.

(G) Max Winter, Jr., 2404 W 7th St., and A. D. Chalmers, 2925 Knox Ave.—Schedule No. 3 only, \$18,000.

(H) Gibbons & Spicer, 805 Edwards-Wildley Bldg.—Schedule No. 1, \$20,165; Schedule No. 2, \$28,728.40; Schedule No. 3, \$18,060. Will accept combinations of Schedule 1, or 1 and 2, or 1, 2 and 3, or 1 and 3. Will not accept Schedule 2 or 3 singly, or 2 and 3.

(I) American Concrete & Steel Pipe Co., South Gate—Schedule No. 1, \$16,981; Schedule No. 2, \$31,543.50; Schedule No. 3, \$20,120. Will only accept 1 and 2 together, or 3 singly.

(J) Marko Mattick, 1436 W 51st St.—Schedule No. 1, \$25,627.50; Schedule No. 2, \$32,439; Schedule No. 3, no bid. Will accept only combination of 1 and 2.

(K) Guy F. Atkinson Co., 925 Story Bldg.—Schedule No. 3 only, \$29,212.

(L) Geo. Rowland, 143 E 69th St.—Schedule No. 1 only, \$21,276.

(M) Lindgren & Swinerton, Inc., 529 Pacific Mutual Bldg.—Schedule No. 1, \$27,087; Schedule No. 2 \$33,096; Schedule No. 3, \$22,332. Will accept only 1 and 2 in combination; 3 only if awarded 1 and 2.

The schedules and items follow:

SCHEDULE NO. 1

Excavating and backfilling trench for Sections 3, 4 and 5 of the construction water supply system.

- (1) 437,000 lin. ft. trench excav. and backfill not in excess of 30-in. depth;
- (2) 500 cu. yds. trench excav. deeper than 30-in.;

SCHEDULE NO. 2

Hauling and stringing gas line pipe, welding joints, testing and lowering pipe and for connecting valves and fittings for Sections 3, 4 and 5 of the construction water supply system.

- (3) 51,000 ton-miles haul and string pipe;
- (4) 260 joints welded joints in 13.23 lb. 8-in. pipe;

- (5) 80 joints welded joints in 14.64 lb. 6-in. pipe;
- (6) 2400 joints welded joints in 8.6 lb. 6-in. pipe;
- (7) 8300 joints welded joints in 6.96 lb. 5-in. pipe;
- (8) 446,000 lin. ft. test and lower pipe
- (9) 2 8-in. line valves, to be installed
- (10) 8 6-in. do;
- (11) 22 5-in. do;
- (12) 6 4-in. branch outlets, to be installed;
- (13) 38 3-in. do;
- (14) 7 1-in. outlets, to be installed;
- (15) 120 timber A-frames, furnish and erect;
- (16) 15 rock anchors, furnish and erect
- (17) 10 m. sq. ft. of pipe, to be painted

SCHEDULE NO. 3

Constructing six 300,000-gallon reservoirs for Sections 3, 4 and 5 of the construction water supply system.

- (18) 6000 cu. yds. reservoir excav.;
- (19) 5800 cu. ft. Gunite lining in reservoirs;
- (20) 6 roofs for reservoirs.

The proposed work is located in San Bernardino and Riverside Counties, Calif., along the line of the aqueduct and with the exception of one reservoir, is located between a point in Sec. 13, Twp. 1 S., R. 18 E., which point is approximately 12 miles west from Rice Station on the Phoenix branch of the A. T. & S. F. Railway, and a point in Sec. 28, Twp. 5 S., R. 9 E., S. B. B. & M., the latter point being approximately ten miles east of Indio. The one reservoir is located in Section 7, Twp. 3 S., R. 6 E. The work to be contracted for consists of excavating a trench, hauling and stringing pipe, welding joints, testing and lowering line of pipe, backfilling the trench, connecting valves and fittings, and performing appurtenant work for the construction of 85 miles of 5- 6- and 8-in. pipe line, together with the construction of six 300,000-gal. Gunited reservoirs. All materials with the exception of the pipe, valves, and fittings, are to be furnished by the contractor.

1.4 MI. GRADE & ASPH. CONC. PAVE—L. A. COUNTY

LOS ANGELES COUNTY, Calif.—Griffith Co., 502 Los Angeles Railway Bldg., Los Angeles, at \$51,705 submitted low bid Feb. 15 to State Highway Commission, Sacramento, to grade and pave with asphalt concrete 1.4 miles in the City of Redondo Beach, involving:

- (1) 13,000 cu. yds. rdwy. excav., unclass.;
(2) 4000 cu. yds. struc. excav.;
(3) 37,000 sq. yds. subgrade for pave.
(4) 11,800 tons asph. concrete;
(5) 2350 tons pre-mix rock and oil wearing surface;
(6) 60 cu. yds. Class A cem. concrete (struc.);
(7) 675 cu. yds. Class A cem. conc. (curbs, gutters, sidewalks and driveways);
(8) 1800 lbs. bar reinf. steel (struc.);
(9) 13,000 lbs. misc. iron and steel (struc.);
(10) 4 M. common brick;
(11) 280 lin. ft. 12-in. corru. metal pipe do;
(12) 1770 lin. ft. 18-in. do;

- (13) 800 cu. yds. concrete remove from existing struc. and dispose of;
(14) 2 move and reset electrolrollers;
(15) 75 sta. finish roadway.

State will furnish corrugated metal pipe.

- Complete bids follow:
(A) Griffith Co., Los Angeles, \$51,705.00.
(B) Gogo & Rados, Los Angeles, \$53,052.90.
(C) Hall Johnson, Alhambra, \$53,260.
(D) Oswald Bros., Los Angeles, \$53,712.50.

IMP. FIFTY-THIRD ST.—LOS ANGELES

LOS ANGELES, Cal.—A. E. Pearson, 2225 Glencoe Ave., Venice, submitted the low bid to city council Feb. 15, at \$3758.55 for improving 53rd St. between Long Beach Ave. and Fortuna St., under cash contract, involving:

- (1) grading (7109 cu. yds. excavation, and 2 cu. yds. fill, inc. removal of existing improvements);
(2) 21,729 sq. ft. 6-in. conc. pave.;
(3) 38 sq. ft. asph. conc. wearing surface, variable thickness (average thickness 2-in.);
(4) 386 sq. ft. rock and oil roadway;
(5) 592 ft. unplastered light curb;
(6) 2494 sq. ft. 3-in. concrete walk;

- (7) 46 sq. ft. 4-in. conc. walk (driveways);
(8) one manhole to be reset.

- Complete bids follow:
(A) Arthur E. Pearson.....\$3758.55
(B) Kreisch Bros.\$3760.04
(C) George Nelson 3797.25
(D) John Topich\$3919.85

ENGINEERING NEWS

BRIDGES

SAN JOSE, Santa Clara Co., Cal.—City Engineer W. L. Popp completes plans for a bridge over Coyote Creek on Julian St., estimated cost, \$30,000; quantities will be available shortly.

SANTA CRUZ, Cal.—City council plans to construct footbridge over San Lorenzo River on Felker Street.

LOS ANGELES, Cal.—G. W. Jones, county road commissioner, has announced that bids for the construction of a railroad grade separation structure in Arcadia will be called probably within 30 days. The estimated cost is \$82,660. The project calls for a highway subway under the Santa Fe tracks, connecting Orange Ave. and Colorado St. The total length of the subway will be about 900 ft., with a steel superstructure 80 ft. in length. The width of the street will be 40 ft. Two contracts will be let, viz., the steel superstructure by the Santa Fe Railway and the subway portion by the county. The county work is estimated at about \$26,169. The total cost will be paid as follows: \$4000 by the City of Arcadia; \$16,532 by the railroad and \$62,128 by the county. The approximate quantities are:

15,407 cu. yds. excavation;
15,872 sq. ft. hand shaping slopes;
1,907 ft. 6x9x15-in. curb;
136 sq. ft. 8-in. concrete aprons;
2 No. 6 catchbasins;
42 ft. 18-in. heavy reinf. concrete pipe in place;
138 ft. 2-in. stand. pipe (weepers);
5 concrete junction chambers;
46 ft. 22-in. O. D. steel pipe in place;
concrete headwall outlet, complete;
250 lbs. reinf. steel;
3,335 lbs. steel wire mesh for paved slopes;
7,282 sq. ft. forms for abutments;
280 ft. 21-in. D-1800 const. spun concrete pipe in place;
224 ft. 21-in. D-2200 do;
352 ft. 21-in. D-2500 do;
536 ft. 21-in. D-2700 do;
483 cu. yds. Class A concrete in paved slopes for placing;
15,872 sq. ft. paved slopes for finishing;
756 cu. yds. concrete in abutments for placing;
4 flood lights, complete with conduits, meter and time clock;
1,630 bbls. cement, delivered;
664 tons sand;
1,600 tons rock.

The pavement is a separate contract and is not included in the above list.

PIERCE CO., Wash.—Carl Bjork, 2437 W 63rd, Seattle, at \$32,687 awarded contract by U. S. Bureau of Public Roads to construct one log stringer bridge over North Puyallup river, together with approaches and parking area on the West Side Highway, Proj. E-2-02, Mt. Rainier National Park.

MODESTO, Stanislaus Co., Calif.—County supervisors will set protest hearing date Feb. 27, on 19th Street bridge over Dry Creek. Structure will be of wood; estimated cost, \$2500; no quantities, lump sum bids will be taken. Geo. Macomber, county surveyor.

SEATTLE, Wash.—Bids will be asked in May or June to construct 1-rol. concrete paving and bridge over ravine in State Park, 2 mi. south of Des Moines. Bridge will be over 400 ft. long and 100 ft. high at the center of the gulch. Will have 24-ft. roadway and sidewalk. Bids will be taken

on alternate proposal, concrete and steel. Thos. D. Hunt, county engineer.

MARICOPA-VENTURA CO., Cal.—Stanley Abeel, a supervisor of Kern County and a member of the board of directors of Joint Highway District No. 6, has refused to agree to the letting of the contract for the construction of the Coyote Creek bridge, estimated at \$19,000. He also refused to accept plans for lining the tunnels on the Maricopa Highway. He opposes any expenditures at this time.

VISALIA Tulare Co., Cal.—County supervisors order county surveyor to prepare plans for a bridge over Cottonwood Creek.

SANDPOINT, Idaho.—Until March 8, 2 P. M., bids will be received by County Commissioners, Sandpoint, to construct concrete piers, steel superstructures, and timber deck of the 102-ft. bascule span under Section 3, Sandpoint Bridge on the North and South Highway, Bonner County, Ida., involving:

- (1) 400 cu. yds. struc. excav.;
- (2) 110 pieces drive foundation piling;
- (3) 20 cu. yds. Class A concrete;
- (4) 484 cu. yds. Class B concrete;
- (5) 150 cu. yds. seal concrete;
- (6) 25,000 lbs. reinf. steel;
- (7) 30,000 ft. b.m. untreated timber (place and paint only);
- (8) 152,000 lbs. struc. steel;
- (9) operating equipment;
- (10) 5 tons scrap iron.

Specifications obtainable from the County Clerk on deposit of \$5. Certified check 5% payable to Bonner County required with bid.

LOS ANGELES, Cal.—Until 2 P. M., March 13, bids will be received by the County Supervisors to construct reinforced concrete culvert on Citrus Ave. over Little Dalton Wash. Will have an inside width of 13 ft., a height of 11 ft. 6 in. with 20-in. foundations, and 27.15 ft. in length. Geo. W. Jones, County Road Commissioner. Mame B. Beatty, 501 Hall of Records, Clerk of the Board.

DREDGING, HARBOR WORKS & EXCAVATIONS

SAN DIEGO, Cal.—Harbor commission has under consideration a \$200,000 bond issue to provide funds for dredging in the vicinity of the foot of 22nd St. to provide anchorage space for navy vessels and for interest and sinking fund to be paid from harbor revenues.

PORTLAND, Ore.—Pacific Spruce Corporation awarded sub-contract by Hauser Const. Co. to furnish rock and

timber for reconstruction of the Yaquina Jetty, contract for which was recently awarded Hauser by the Portland U. S. Engineer Office.

SACRAMENTO, Cal.—Basalt Rock Co., Napa, at \$26,400 awarded contract by U. S. Engineering Office, Sacramento, to furnish deliver and place approximately 30000 tons of rip-rap stone along the Sacramento river between the mouth of Cache Slough and Collinsville.

IRRIGATION PROJECTS

BLYTHE, Riverside Co., Cal.—The Palo Verde Irrigation District board of directors has authorized the signing of a contract with the Secretary of the Interior whereby the district will be granted free storage at Hoover Dam for water to irrigate 104,000 acres.

SAN DIEGO, Cal.—Ernest R. Childs, County Surveyor, has been authorized by the Board of Supervisors to prepare plans and specifications and to figure an estimate of cost for a drainage district in the Carlsbad District. A petition was presented to the Board February 10.

STREET LIGHTING SYSTEMS

SANTA CLARA, Cal.—Until March 6, 8 P. M., bids will be received by A. J. Cronin, City Clerk, to install conduit and set lamp pedestals for lighting system in Franklin St. from Grant to Lincoln Sts. Specifications will be obtainable from above office about February 24.

MACHINERY AND EQUIPMENT

VERNON, Los Angeles Co., Calif.—Until 8 P. M., Feb. 28, bids will be received by city council to furnish f.o.b. warehouse, 4305 Santa Fe Ave., one 4-wheel trailer with body and one 2-wheel cable reel carrier under Spec. No. 62. Howard S. McCurdy, city en-

LOS ANGELES, Cal.—Cochise Rock Drill Mfg. Co. awarded contract by A. J. Holm, City Purchasing Agent, at \$21,000 for furnishing twelve 1½ hex. x 15-in. solid peg points for paving breakers. Bid No. 3406.

EUREKA, Humboldt Co., Cal.—Following bids received by U. S. Indian Agency, Hoopa Valley, Federal Bldg., Eureka, to furnish one leaning wheel grader, 10-ft. blade, weighing not less than 6400 lbs., without scarifier.

Allis-Chalmers Mfg. Co.
J. D. Adams Company.
Crown Machine Works.
Jenison Machinery Company.
Austin-Western Road Machinery Co.

SAN RAFAEL, Marin Co., Cal.—Constructing Quartermaster, Hamilton Field, (Marin Meadows) Bombing Base, San Rafael, rejects all bids to furnish one standard automatic grader, and will purchase same from the Eversman Mfg. Co., Denver, Colo.

JACKSON, Amador Co., Cal.—Until March 6, 10:30 P. M., bids will be received by Leotta M. Huberty, county clerk, to furnish one leaning wheel grader. Specifications obtainable from above office.

CAPITAL CITY TITLE COMPANY

J. C. PALEN,
Manager

914 Seventh Street
Sacramento :: California

LOS ANGELES, Cal.—Erown-Bevis Co. awarded contract February 20 by A. J. Holm, City Purchasing Agent, at \$2700 for furnishing 3 power-driven concrete mixers, equipped with shaking skips under Specification No. 2988. The bid of \$2700 is based upon a total of \$3750 less an allowance of \$1050 for 3 used mixers.

SAN MATEO, Cal.—G. F. Bishop Co. 1950 San Bruno Ave., San Francisco, at \$2363 awarded contract by city council to furnish one tractor mower for municipal golf course.

LOS ANGELES, Cal.—Until 10 A. M. Feb. 28, bids will be received by the Metropolitan Water District of Southern California, 306 West Third St., Los Angeles, for furnishing air compressors, storage battery locomotives, motor generator sets, mucking machines, power shovels, dump cars and air receivers, in accordance with Specifications No. 17, which may be obtained at room 1004, 306 West Third St., upon payment of \$2 per set, not returnable. Certified or cashier's check for 10% of the maximum contract price must accompany each bid. F. E. Weymouth, General Manager and Chief Engineer. The equipment to be purchased is as follows:

AIR COMPRESSORS

- (1) 860 c.f.m. displacement, direct connected compressor units, each consisting of compressor, 1150-h. p. synchronous motor and exciter.
 - (a) price of two units;
 - (b) (alternative) price of 4 units;
 - (c) (alternative) price of 6 units;
 - (d) (alternative) price of 8 units;
 - (e) (alternative) price of 10 units;
 - (f) (alternative) price of 12 units;
 - (g) (alternative) price of 14 units;
 - (h) (alternative) price of 16 units.

TIME of shipment after notice to proceed. Items (1) (a) to (1) (h), inclusive to be stated in days, as follows:

- (1) first two units;
- (2) next two units;
- (3) next two units;
- (4) next two units;
- (5) next two units;
- (6) next two units;
- (7) next two units;
- (8) last two units.

(i) (alternative) unit price for furnishing as ordered within 12 months after the date of the contract not to exceed 16 units.

Bidder to state number of days after order within which he will ship lots of two units as ordered.

Approximately shipping weight of each unit in pounds to be stated.

Delivery point f.o.b. cars to be stated

Discount allowed if payment is mailed within 10 days to be started.

STORAGE BATTERY LOCOMOTIVE

- (2) 16 8-ton battery type locomotives, each with extra battery and battery box, using lead batteries.
 - (a) price of two locomotives;
 - (b) (alt) price of 4 locomotives;
 - (c) (alt) price of 6 locomotives;
 - (d) (alt) price of 8 locomotives;
 - (e) (alt) price of 10 locomotives;
 - (f) (alt) price of 12 locomotives;
 - (g) (alt) price of 14 locomotives;
 - (h) (alt) price of 16 locomotives;
- (i) (alt) furnishing at a unit price ordered within 12 months after the date of the contract not to exceed 16 locomotives.
- (3) (alternate to item 2); 16 8-ton battery type locomotives, each with extra battery and battery box, using steel batteries.
 - (a) price of two locomotives;
 - (b) (alt) price of 4 locomotives;
 - (c) (alt) price of 6 locomotives;
 - (d) (alt) price of 8 locomotives;
 - (e) (alt) price of 10 locomotives;
 - (f) (alt) price of 12 locomotives;
 - (g) (alt) price of 14 locomotives;
 - (h) (alt) price of 16 locomotives;
- (i) (alt) unit price for furnishing as ordered within 12 months after

the date of the contract not to exceed 16 locomotives.

MOTOR GENERATOR SETS

- (4) 8 motor-generator sets for charging batteries.
 - (a) price of one set;
 - (b) (alt) price of 2 sets;
 - (c) (alt) price of 3 sets;
 - (d) (alt) price of 4 sets;
 - (e) (alt) price of 5 sets;
 - (f) (alt) price of 6 sets;
 - (g) (alt) price of 7 sets;
 - (h) (alt) price of 8 sets.
- (i) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 8 sets.

ELECTRIC TUNNEL SHOVELS

- (5) 8 power shovels, 1 cu. yd. capacity, railroad type or crawler type mounting.

Railroad Type Mounting

- (a) price of one power shovel;
- (b) (alt) price of 2 shovels;
- (c) (alt) price of 3 shovels;
- (d) (alt) price of 4 shovels;
- (e) (alt) price of 5 shovels;
- (f) (alt) price of 6 shovels;
- (g) (alt) price of 7 shovels;
- (h) (alt) price of 8 shovels;

Crawler Type Mounting

- (i) price of one power shovel;
- (j) (alt) price of 2 shovels;
- (k) (alt) price of 3 shovels;
- (l) (alt) price of 4 shovels;
- (m) (alt) price of 5 shovels;
- (n) (alt) price of 6 shovels;
- (o) (alt) price of 7 shovels;
- (p) (alt) price of 8 shovels.

(q) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 8 shovels with railroad type mountings;

(r) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 8 shovels with crawler type mounting.

- (6) 8 power shovels, 1 1/4 cu. yd. capacity, railroad type or crawler type mounting.

Railroad Type Mounting

- (a) price of one power shovel;
- (b) (alt) price of 2 shovels;
- (c) (alt) price of 3 shovels;
- (d) (alt) price of 4 shovels;
- (e) (alt) price of 5 shovels;
- (f) (alt) price of 6 shovels;
- (g) (alt) price of 7 shovels;
- (h) (alt) price of 8 shovels;

Crawler Type Mounting

- (i) price of one power shovel;
- (j) (alt) price of 2 shovels;
- (k) (alt) price of 3 shovels;
- (l) (alt) price of 4 shovels;
- (m) (alt) price of 5 shovels;
- (n) (alt) price of 6 shovels;
- (o) (alt) price of 7 shovels;
- (p) (alt) price of 8 shovels.

(q) (alt) unit price for furnishing as ordered within 12 months after the date of the contract not to exceed 8 shovels with railroad mounting;

(r) (alt) unit price for furnishing as ordered within 12 months after date of the contract not to exceed 8 shovels with crawler type mounting.

- (7) 8 power shovels, 1 1/2 cu. yd. capacity, railroad type or crawler type mounting.

Railroad Type Mounting

- (a) price of one power shovel;
- (b) (alt) price of 2 shovels;
- (c) (alt) price of 3 shovels;
- (d) (alt) price of 4 shovels;
- (e) (alt) price of 5 shovels;
- (f) (alt) price of 6 shovels;
- (g) (alt) price of 7 shovels;
- (h) (alt) price of 8 shovels.

Crawler Type Mounting

- (i) price of one power shovel;
- (j) (alt) price of 2 shovels;
- (k) (alt) price of 3 shovels;
- (l) (alt) price of 4 shovels;
- (m) (alt) price of 5 shovels;
- (n) (alt) price of 6 shovels;
- (o) (alt) price of 7 shovels;

- (p) (alt) price of 8 shovels.
- (q) (alt) unit price for furnishing as ordered within 12 months after the date of the contract not to exceed 8 shovels with railroad type mounting;
- (r) (alt) unit price for furnishing as ordered within 12 months after the date of the contract not to exceed 8 shovels with crawler type mounting.

TUNNEL MUCKING MACHINES

- (8) 16 mucking machines with a capacity of 50 cu. yds. per hour each.
 - (a) price of two machines;
 - (b) (alt) price of 4 machines;
 - (c) (alt) price of 6 machines;
 - (d) (alt) price of 8 machines;
 - (e) (alt) price of 10 machines;
 - (f) (alt) price of 12 machines;
 - (g) (alt) price of 14 machines;
 - (h) (alt) price of 16 machines.
- (i) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 16 machines.

WOOD BODY DUMP CARS

- (9) 136 5 cu. yd. dump cars with wooden bodies.
 - (a) price of 17 cars;
 - (b) (alt) price of 34 cars;
 - (c) (alt) price of 51 cars;
 - (d) (alt) price of 68 cars;
 - (e) (alt) price of 85 cars;
 - (f) (alt) price of 102 cars;
 - (g) (alt) price of 119 cars;
 - (h) (alt) price of 136 cars;
- (i) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 136 cars.

STEEL BODY DUMP CARS

- (10) (Alternative to Item 9) 136 5 cu. yd. dump cars with steel bodies, in accordance with the specifications.
 - (a) price of 17 cars;
 - (b) (alt) price of 34 cars;
 - (c) (alt) price of 51 cars;
 - (d) (alt) price of 68 cars;
 - (e) (alt) price of 85 cars;
 - (f) (alt) price of 102 cars;
 - (g) (alt) price of 119 cars;
 - (h) (alt) price of 136 cars.
- (i) (alt) unit price for furnishing as ordered within 12 months after date of contract, not to exceed 136 cars.

FLAT CARS

- (11) 16 flat cars, in accordance with the specifications.
 - (a) price of two cars;
 - (b) (alt) price of 4 cars;
 - (c) (alt) price of 6 cars;
 - (d) (alt) price of 8 cars;
 - (e) (alt) price of 10 cars;
 - (f) (alt) price of 12 cars;
 - (g) (alt) price of 14 cars;
 - (h) (alt) price of 16 cars;
- (i) (alt) unit price for furnishing as ordered within 12 months after date of contract not to exceed 16 cars.

AIR RECEIVERS

- (12) 16 200 cu. ft. air receivers, in accordance with the specifications.
 - (a) price of two receivers;
 - (b) (alt) price of 6 receivers;
 - (c) (alt) price of 8 receivers;
 - (d) (alt) price of 10 receivers;
 - (e) (alt) price of 12 receivers;
 - (f) (alt) price of 14 receivers;
 - (g) (alt) price of 16 receivers.
- (i) (alt) unit price for furnishing as ordered within 12 months after the date of the contract not to exceed 16 receivers.

SERVICES OF ERECTING ENGINEERS

- (13) the services of an erecting engineer will be furnished at the following rate:
 - (a) for compressor installation, — dollars per day;
 - (b) for locomotive installation, — dollars per day;
 - (c) for mucking machine installation, — dollars per day;
 - (d) for power shovel installation, — dollars per day.

FIRE ALARM SYSTEMS

SAN FRANCISCO.—M. B. McGowan 74 New Montgomery St., awarded the contract by Pacific Bridge Co. to drive piles for construction of a wharf in connection with the construction of the main piers of the Golden Gate Bridge.

FIRE EQUIPMENT

FRESNO, Cal.—City council will expend \$4000 in the purchase of a chassis, motor and material for a chemical fire apparatus. The equipment will be assembled in the fire department shop. W. Ralph Williams is the fire chief.

RENO, Nevada.—Bids received by city council for \$38,000 improvement bonds from First Security Co., Salt Lake City, rejected and bids will be re-advertised. Issue is to finance purchase of fire engine, etc.

RESERVOIRS AND DAMS

RIVERSIDE, Cal.—The directors of the Valley of Enchantment Mutual Water Co., 4344 Market St., Riverside, authorized the construction of a 100,000-gallon reservoir. Work is to start in May. A. C. Fulmer, County Surveyor of Riverside County, is vice-president of the company.

LOS ANGELES, Cal.—Westinghouse Electric Supply Co. awarded contract by County Supervisors, Feb. 14, at \$1113 20 to furnish floor lights for the Puddingstone, San Dimas and Thompson Creek Dam. The bids were opened February 6.

LOS ANGELES, Cal.—Application of J. J. Lieberman, as taxpayer and citizen, for an injunction to restrain County Flood Control District from proceeding with the construction of the San Gabriel Dam No. 1, was denied by Superior Court Judge J. T. E. Warne, Feb. 15. Lieberman had charged irregularities in the awarding of the contract to the West Slope Construction Co.

LOS ANGELES, Calif.—Macco-Robertson, Ltd., 815 Paramount Blvd., Clearwater, awarded contract by the Metropolitan Water District Feb. 16, at \$17,384 for constructing six 300,000 gallon reservoirs for Sections 3, 4 and 5 of the construction water supply system, Schedule No. 3. The bids were opened Feb. 15.

LOS ANGELES, Cal.—Commercial Iron Works, 2424 Porter St., awarded contract by county supervisors Feb. 14, at \$1390.39 net to furnish steel vent pipe and fittings for San Gabriel Dam No. 2.

SAN CLEMENTE, Orange Co., Cal.—Dan Mulherron, 267 W. Marquita St., San Clemente, awarded contract by City Council, February 17, at \$4962, for the construction of a 500,000-gallon capacity reservoir on a site near the municipal golf course. The estimated cost is \$5000. W. A. Ayer is the city engineer. The proposed reservoir will be 120x50 feet at the top, 90x20 feet at the bottom and 20 feet in depth. It will be of gunite construction throughout.

The other bids were: John C. Blystone, \$5287; Wigg Constr. Co., \$6380; W. J. Hunter, \$7636.

PIPE LINES, WELLS, ETC.

LIVERMORE, Alameda Co., Cal.—Until March 9, 2:30 P. M., bids will be received by Supervising Superintendent of Construction, Veterans Administration Hospital, Palo Alto, for

the construction of a pipe line, etc., on the water system of the Veterans Administration Hospital, Livermore. Work includes construction of one eight inch class 150 cast iron pipe line, provision of automatic control for existing pump, corrugated iron housing around pump, etc. An alternate bid will be received for installing pipe composed of asbestos fiber and cement in lieu of cast iron specified.

Plans and specifications available from above office.

LOS ANGELES, Cal.—Ray Schweitzer, 2475 E 9th St., Los Angeles, at \$12,392.50 for Schedule 1 (excavating and backfilling trench for Sections 3, 4 and 5 of the construction water supply system); Clark & Campbell, 1358 E Manchester Ave., and A. J. Callahan, 926 S Rimpau, Los Angeles, bidding jointly, at \$27,189 for Schedule 2 (hauling and stringing gas line pipe, welding joints, testing and lowering pipe, and for connecting valves and fittings for above); and Macco-Robertson, Ltd., 815 Paramount Ave., Clearwater, at \$17,384 for Schedule 3 (constructing six 300,000-gal. reservoirs for above) submitted low bids Feb. 15 to Metropolitan Water District, Los Angeles, to construct pipe lines and gunited reservoirs for sections 3, 4 and 5 of the construction water supply system for the Colorado River Aqueduct. The work is located in San Bernardino and Riverside counties, along the line of aqueduct and with the exception of one reservoir, is located between a point in Sec. 13, Twp. 1S, R 18 E, which point is approximately 12 miles west from Rice Station on the Phoenix branch of the A. T. & S. F. Railway, and a point in Sec. 2S, Twp. 5 S, R 9 E, S. B. B. & M., the latter point being approximately 10 miles east of Indio. The one reservoir is located in Section 7, Twp. 3 S, R 6 E.

Winston Bros. Co., Minneapolis, Minn., bid \$13,610 on Schedule 1 and \$26,365.70 on 2, but would accept only 1 and 2 together, the total being \$39,975.50, against bids of Schweitzer, Clark & Campbell and Callahan which total \$39,581.50. All other bids contained stipulations. No recommendations have been made as yet.

SEWERS AND SEWAGE DISPOSAL PLANTS

MONTEREY PARK, Los Angeles Co., Calif.—City council has made a formal application to the state department of health for a permit to erect the proposed sewage treatment plant. Application has been made to county supervisors for a loan of \$25,000 to be used pending receipt of funds from the Reconstruction Finance Corp.

SAN LEANDRO, Alameda Co., Cal.—Bids will be asked shortly by city council, A. E. Pelton, city manager, to furnish:

- (1) 11,000 ft. 12-in. vit. sewer pipe;
- (2) 11,000 ft. 14-in. do.

To be used for construction of sewer in bay; an unemployment relief project.

MISCELLANEOUS CONSTRUCTION

DENVER, Colo.—The Denver-Golden Metropolitan Mutual Water Assn., Denver, proposes to construct a diversion tunnel, canals and roads at an estimated cost of \$1,804,000. The work will involve construction of five miles of tunnel, 13.2 miles canals, and 18 miles of roads.

LOS ANGELES, Cal.—Metropolitan Water District, Los Angeles decides to withdraw approximately 9 mi. of

the Coachella Tunnel construction from force account and will probably call bids on this portion of the work.

WATERWORKS

SAN FRANCISCO.—Until Feb. 27, 3 P. M., under Bid No. 971, bids will be received by T. A. Brooks, City Purchasing Agent, 270 City Hall, to furnish 12-in. and 16-in. class 150 and 250 cast iron water pipe for S. F. Water Department, involving:

- (1) 18,000 ft. 16-in. class 150;
- (2) 3,000 ft. 16-in. class 250;
- (3) 2,750 ft. 12-in. class 150.

Specifications obtainable from above

TACOMA, Wash.—City water department plans a \$1,335,420 program of construction including 8 projects. Construction will be contingent on a \$1,000,000 loan from the Reconstruction Finance Corporation, or a bond issue. Ira S. Dacisson, Commissioner Dept. of Public Utilities; W. A. Kunnigk, Superintendent of Water Division.

SANTA ANA, Orange Co., Cal.—All bids for constructing a 45,000-gallon steel water tank, opened Jan. 30, were rejected by city council Feb. 14. National Tank & Mfg. Co. was the low bidder at \$1063.

SIGNAL HILL, Los Angeles Co., Cal.—Bids to furnish and install one chlorinating machine for city water department opened by city council Feb. 14 follow:

Bardce Engineering Co.—Item (2) \$605. (3) \$980, (4) \$1950.

Chemical Equipment Corp. of Calif.—Items (A) \$350, (B) \$750.

Wallace Engineering Co.—(A) \$335, (B) \$840.

George H. Cooper, City Clerk.

SAN CLEMENTE, Orange Co., Cal.—Until 7 P. M., Feb 17, bids will be received by city council to furnish 2000 ft. to 3000 ft. of class "150" 10-in. cast iron pipe, f.o.b. trench elde. W. A. Ayer, City Engineer.

LOS ANGELES, Cal.—Mel O. Halde-man Corp., awarded contract by A. J. Holm, City Purchasing Agent, for standard galvanized wrought steel pipe. Bid No. 3490, as follows:

50 lengths $\frac{1}{2}$ -in. (1000 ft.) at \$5.85 C. ft.;

15 lengths $\frac{1}{2}$ -in. (300 ft.) at \$16.55 C. ft.;

100 $\frac{1}{2}$ -in. 90-degree elbows at \$3.40 C.

100 $\frac{1}{2}$ -in. street elbows at \$4.20 c.

PASADENA, Los Angeles Co., Cal.—Contracts for furnishing cast iron pipe awarded by city directors, Feb. 14, follow:

U. S. Pipe & Foundry Co.—Items 1, 3 and 8 of bids opened Jan. 24 as follows: 20,000 ft. 6-in. C. I. pipe at 53c ft.; 10,000 ft. 12-in. at 81 $\frac{3}{4}$ c ft.; 408 ft. 30-in. class E at \$6.85 ft.

National Cast Iron Pipe Co.—Item 2, 20,000 ft. 8-in. at 80c ft.

American Cast Iron Pipe Co.—Items 4, 5, 6 and 7 as follows: 1200 ft. 16-in. at \$2.59 ft.; 600 ft. 20-in. at \$3.72 ft.; 800 ft. 24-in. at \$5 ft.; 240 ft. 10-in. at \$1.18 ft.; and 48 ft. 14-in. at \$2.10 ft.

SAN FRANCISCO.—Until March 8, 2:30 P. M., bids will be received by Department of Public Works, S. J. Hester, secretary, to construct water system about three miles in length from San Andreas to the site of the Sneath Ranch jail in San Mateo Co. Will be of 10-in. cast iron pipe. Estimated cost, \$35,000. Plans by the Bureau of Architecture. Time limit, 90 days from award of contract.

LEWISTON, Ida.—Included in plans for 1933 of the municipal water department are: pumping and filtration plant, \$26,700; replacement of distribu-

tion lines and services, \$10,000; new distribution lines and services, \$1,000; maintenance of distribution lines and services, \$6400; sewer maintenance, \$2500.

LOS ANGELES, Cal.—C. C. Moore & Co., Engineers, Inc., Edison Bldg., 601 W. 5th St. submitted low bid to County Supervisors Feb. 20, at \$36,564 for Proposal "A," and at \$36,444 for Proposal "B," for furnishing and installing 500 H. P. water tube boilers for the power plant at the Los Angeles General Hospital, 1100 Mission Road. Wm. Davidson, Chief Mechanical Engineer, 10th Floor, Hall of Records, prepared the plans and specifications. The proposed boilers will be of the bent tube type. Each boiler shall have an effective heating surface of not less than 5000 sq. ft. and the tubes shall be 3¼-in. seamless steel of not less than No. 10 gauge. The work embraced in the specifications includes excavation, reinforced concrete foundations, boilers complete with masonry settings, covering of breeching within power house, painting of exposed equipment after completing, and testing of equipment. The new boiler room will be 37 ft. 10 in. by 42 ft. 10½ in. with a height of 30 ft. The bids follow:

C. C. Moore & Co., Engineers, Inc., bidding on Babcock & Wilcox Sterling boilers: "A" based on furnishing Diamond Automatic valve-in-head soot blowers, \$36,564; "B" based on furnishing Diamond G-2 independently valved soot blowers, \$36,444. If awarded contract, bidder will employ subcontractors as follows: Brick Work: J. T. Thorpe & Son, 941 E. 2nd St.; Structural Steel: McClintic-Marshall Co., 11,100 S. Central Ave.; Excavation and Concrete: J. T. Thorpe & Sons, or Weymouth Crowell Co., 2104 E. 15th St. or L. A. Cline, 1013 N. Sycamore Ave.; Burners: Leahy Mfg. Co., 1804 E. 8th St.; Regulators: Leahy Mfg. Co., 1804 E. 8th St.; Bidder offers substitutions as follows: Brown Elec. flor metre and Cochrane mechanical flow metre.

Consolidated Steel Corp., Ltd.—Foster-Wheeler boilers, \$36,900.

The Wickes Boiler Co., Saginaw, Mich. (represented by Parsons Engineering Co., 453 S. Spring St., Los Angeles), \$38,073.

Howe Bros.—Wm. Bros. Boiler & Mfg. Co., boilers, \$41,740. Alt. bid: if Wm. Bros. Co. super-heaters are used in lieu of those specified, deduct \$615.

R. G. Meyler Corp.—Badenhausen boilers, \$43,731.

The Fluor Corp., Ltd.—Edge Moor Iron Co., boilers, \$43,860.

Lohman Bros., 232 S. Spring St.—Puget Sound Machinery Depot boilers \$47,000.

SAN MATEO, Cal.—Until March 6, 8 P. M., bids will be received by E. W. Foster, City Clerk, to furnish one deep well turbine pump, capacity 350 to 400 G.P.M. Specifications obtainable from above office. E. P. Wilsey, city manager.

SACRAMENTO, Cal.—City Council will award contract to Stauffer Chemical Company, 624 California St., San Francisco, at \$3015 to furnish 150 tons sulphuric acid for the filtration plant.

SAN DIEGO, Cal.—City and county officials have signed a provisional contract with the Department of the Interior for the delivery of 100,000,000 gallons of water per diem from the Colorado river.

SIGNAL HILL, Los Angeles Co., Calif.—Wallace & Tiernan Co., Inc., 3923 W 6th St., Los Angeles, awarded contract by city council at \$1339 to

furnish and install a chlorinating machine for the city water department.

YUBA CITY, Sutter Co., Cal.—State Reclamation Board, District No. 1500, Sutter County, plans to install a 10-in. centrifugal pump with a 14-in. 10-gauge riveted steel pipe on the left bank of the Sacramento River. Protest hearing March 15 10 A. M.

UKIAH, Mendocino Co., Cal.—Until March 2, 7:30 P. M., bids will be received by Fred L. Bosworth, city clerk, to furnish f.o.b. cars, Ukiah: (1) 1900 ft. 6-in. b&s stand. cl. pipe, 150 lbs. test, 12-ft. lengths; (2) 8 6x4-in. c.i. tees, hub ends; (3) 2 6-in. iron body gate valves, hub ends, 150 lbs. test.

Also enough lead or leadite or equal caulking material to install the pipe.

ALTERNATE BID

- (1) 1900 ft. 6-in. National, or equal, American manufacture, stand. full weight black wrought steel pipe dipped in California hot asphaltum with ends beveled for welding, thickness of pipe .280-inch;
- (2) 2 6-in. stand. flanged gate valves with square nuts, flanged faced and drilled;
- (3) 4 flanges to fit above gates.

Certified check 10% payable to City of Ukiah required with bid.

SAN FRANCISCO—Moore & Roberts 461 Market St., desire sub-bids on all portions of the work in connection with the water supply system to be constructed at Sneath Ranch, San Mateo County, in connection with the jail building for the City and County of San Francisco for which bids will be opened March 8.

STREETS AND HIGHWAYS

LOS ANGELES, Orange, San Diego and Imperial Counties, Calif.—Until March 6 2 P. M., (postponed from Feb. 23), bids will be received by S. V. Cortelyou, District Engineer, State Highway Commission, Room 808, California State Office Bldg., Los Angeles, to apply Diesel oil to roadside vegetation over 79.4 roadside miles, involving 1350 bbls. Diesel oil. Specifications obtainable from above office. Certified check 10% required with bid.

COCHISE COUNTY, Ariz.—H. J. Hagen, Globe, Ariz., at \$57,416.60 awarded contract by U. S. Bureau of Public Roads to grade 2.793 ml. Section C and a portion of Section B Chiricahua National Mounment Highway.

LOS ANGELES, Calif.—Until 10 A. M., March 15 (postponed from Mar. 8) bids will be received by board of public works for the improvement of the alleys in block south of 6th St. bet. Mesa St. and Pacific Ave., under the 1911 act. The work will involve: (1) grading (311 cu. yds. cut, 9 cu. yds. fill); (2) 9593 sq. ft. 6-in. conc. pave.; remove: 845 sq. ft. pave., 36 ft. board walk. Engineer's estimate, \$2064.70.

FAIRFAX, Marin Co., Cal.—City council postpones action until Mar. 3, 8 P. M., on new bid call to improve streets in the Manor Hill Section, including paving, curb and gutters. No bids received Jan. 10. Project involves:

- (1) 15,104 cu. yds. gradng;
- (2) 10,380 lin. ft. conc. curb and gutter;
- (3) 63,437 sq. ft. asph. pavement;
- (4) 206 ft. 10-in. metal pipe culvert;
- (5) 356 ft. 12-in. do;
- (6) 192 ft. 18-in. do;
- (7) 46 ft. 48-in. do;

- (8) 22 concrete catchbasins, c.i. grating;
 - (9) 33 cu. yds. reinf. concrete retaining wall;
 - (10) 250 lin. ft. 6-in. sanitary sewer;
 - (11) 1 lampole.
- Estimated cost, \$30,000. J. C. Ogleslesby, city engineer.

SEATTLE, Wash. — As previously reported, until March 6, 10 A. M., bids will be received by King County Commissioners for highway construction as follows:

- (1) 1-mi. paving Pridgeon road between Renton and Three Tree Point, involving:
 - 13,922 sq. yds. concrete paving;
 - 500 ft. culvert pipe;
 - 29,632 lbs. reinf. steel;
 - 7,500 cu. yds. excav.
 - (2) North extension of the Kummer Cut-Off, involving:
 - 38,000 cu. yds. excav.;
 - 4,800 cu. yds. solid rock excav.;
 - 275,000 sta. yds. overhaul;
 - 1,165 cu. yds. gravel;
 - 190 lin. ft. culvert pipe;
 - move 8 buildings on right-of-way.
 - (3) 1-mi. paving near Maple Valley, involving:
 - 11,850 sq. yds. concrete pavement;
 - 3,310 lbs. reinf. steel;
 - 4,300 cu. yds. excav.;
 - 357 ft. culvert pipe.
- Thos. Hunt, County Engineer.

ALHAMBRA, Los Angeles Co., Cal.—City commission has announced that application will be made to the Reconstruction Finance Corp. for a loan of \$60,000 to finance the paving of Alhambra Road from the east Alhambra city limits to the Los Angeles city boundary.

SAN FRANCISCO.—Department of Public Works, S. J. Hester, Secretary, plans to improve crossing of Revere Ave. and Newhall, involving:

- (1) 100 cu. yds. grading;
 - (2) 60 ft. 10-in. V.C.P. sewer;
 - (3) 2 brick manholes;
 - (4) 3 brick catchbasins;
 - (5) 80 ft. 10-in. V.C.P. culvert;
 - (6) 94 ft. armored concrete curb;
 - (7) 950 sq. ft. 1-course conc. sidewalk;
 - (8) 4114 sq. ft. asph. conc. pave.
- Specifications on this project obtainable at office of John J. Casey, City Engineer, 3rd floor, City Hall.

OREGON STATE.—Until March 1, 2 P. M., bids will be received by State Highway Commission, Multnomah Hotel, Portland, for the sale of \$1,500,000 of State of Oregon short term state highway bonds, interest at 6% payable semi-annually. Certified check 5% required with bids.

LOS ANGELES, Cal.—Ordinance of intention No. 72,322 for the improvement of the second alley west of Cabrillo Ave., between 17th St. and 18th St., under the 1911 Act, has been adopted by city council Feb. 6. Hearing has been set for March 13. The engineer's Assessment Limitation Act report shows quantities, estimates, etc., as follows: (1) grading (168 cu. yds. cut, 2 cu. yds. fill); (2) 5401 sq. ft. 5-in. concrete paving; (3) 6 ft. unplastered light curb; (4) 10 sq. ft. one-course walk. Remove: 6 ft. curb, 10 sq. ft. walk. Engineer's estimate, \$948.94.

MENLO PARK, Santa Clara Co., Calif.—Property owners request City Engineer Bert J. Mehl to prepare estimate of cost on 16-ft. pavement, emulsified asphalt wearing surface on macadam base, on city streets. Estimated cost, \$4200.

IDAHO STATE—Triangle Const. Co. Spokane, Wash., at \$44,823.30 awarded contract by State Department of Pub-

lic Works, Boise, for 5.693 miles Palouse Highway bet. Mud Bay School and Mica Bay, Kootenai County.

IDAHO STATE—Triangle Const. Co. Spokane, Wash., at \$85,555.50 awarded contract by State Department of Public Works, Boise, for 4.136 miles Palouse Highway bet. Mud Bay School and Mica Bay, Kootenai County.

FRESNO, Fresno Co., Cal.—M. Madsen, 247 Maple Ave., Fresno, at \$714.83 awarded contract by city council to improve Palm Ave. from the south line of Olive Ave. to the center line of Alhambra Ave., involving concrete curbs, sidewalk and driveway approaches, involving:

- (1) 2305 sq. ft. concrete walk at \$.15;
- (2) 521 lin. ft. conc. curb at \$.42;
- (3) 683 sq. ft. driveway approach, \$.22.

Complete bids follow:
M. Madsen\$714.83
Russo & Volanti..... 769.13
Lee Sullenger..... 773.63

SACRAMENTO, Calif.—Until March 15, 2 P. M., bids will be received by State Highway Commission, Sacramento, to grade and pave with asphalt about 4.5 miles between Mills and Nimbus, involving:

- (1) 95 sta. clear and grub right of way;
 - (2) 16,000 cu. yds. rdwy. excavation, unclass.;
 - (3) 5,600 sta. yds. overhaul;
 - (4) 64,000 cu. yds. imp. borrow;
 - (5) 1000 cu. yds. struc. excav.;
 - (6) 7250 cu. yds. salvage macadam (borders and surfacing);
 - (7) 52,100 sq. yds. subgrade for pave.
 - (8) 22,500 tons asph. concrete;
 - (9) 190 cu. yds. Class A Portland cement concrete (struc.);
 - (10) 15,100 lbs. bar reinf. steel (struc.)
 - (11) 548 lin. ft. 12-in. corr. metal pipe
 - (12) 558 lin. ft. 18-in. do;
 - (13) 24 lin. ft. 24-in. do;
 - (14) 1.6 miles new property fence;
 - (15) 30 drive gates complete in place;
 - (16) 3 walk gates complete in place;
 - (17) 50 cu. yds. light rip-rap;
 - (18) 130 cu. yds. Portland cem. conc. remove from existing struc.;
 - (19) 1350 M. gals. water;
 - (20) 140 bbls. light fuel oil;
 - (21) 25 tons asph. road oil;
 - (22) 300 tons screenings;
 - (23) 150 lin. ft. special timber header;
 - (24) 235 sta. finish roadway;
 - (25) 26 monuments complete in place.
- State will furnish corrugated metal pipe.

LYON COUNTY, Nev.—Dodge Construction, Inc., Fallon, at \$68,577.66 awarded contract by State Highway Department to grade and improve with gravel surfacing between 12 and 2 miles west of Lahontan, ten miles. Nevada Rock & Sand Co., Reno, second low at \$69,581.86; Union Paving Co., San Francisco, third low at \$72,533.43.

ARIZONA STATE—Until 2 P. M., March 3, bids will be received by State Highway Commission, Phoenix, for highway construction under E-95-D and (A.F.E. No. 8915) and F.L.H.P. E-4-A (AFE No 8951). The work, on E-95-D and F.L.H. E-4-A, begins at the northwest end of the Grand Canyon bridge near Lee's Ferry and extends southwest approximately nine miles and consists of the grading and draining and placing of subgrade stabilizer. The work on these projects is to be completed as follows: E-95-D, June 15, 1933; F.L.H.P. E-4-A, August 31, 1933. The attention of the contractor is especially directed to the date of completion for E-95-D, and the provisions covering right of highway commission to terminate contract. The quantities are:

E-95-D
(These Quantities Include One Bridge

Structure)
26,000 cu. yds. roadway excavation;
1,500 lin. ft. grader ditch;
1,250 cu. yds. drainage and structural excavation;
5,200 cu. yds. borrow excavation;
4,600 sta. yds. earthwork overhaul;
7,000 cu. yds. subgrade stabilizer;
7,400 cu. yd. mi. subgrade stabilizer haul;
400 cu. yds. concrete;
40,500 lbs. reinforcing steel;
992 lin. ft. C.M.P., various diam.;2,750 lin. ft. cable road guard

ALTERNATE

The use of large diameter and sectional C.M.P. in lieu of concrete boxes (see bidding schedule).

F.L.H. E-4-A

(These Quantities Include 4 bridge Structures)

39,000 cu. yds. roadway excavation;
8,300 cu. yds. drainage and structural excavation;
2,850 lin. ft. grader ditches;
21,000 cu. yds. borrow excavation;
2,600 sta. yds. earthwork overhaul;
13,000 cu. yds. subgrade stabilizer;
26,600 cu. yds. mi. subgrade stabilizer haul;
970 cu. yds. concrete;
80,000 lbs. reinforcing steel;
1,422 lin. ft. C.M.P., various dia.;10,000 lin. ft. cable guard fence;
100 cu yds. riprap;
133,700 lbs. structural steel.

ALTERNATE

The use of large diameter and sectional C.M.P. in lieu of concrete boxes (see bidding schedule).

Proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. T. S. O'Connell, State Highway Engineer.

LOS ANGELES, Cal.—J. V. Morrison, 8801 S. Crocker St., Los Angeles, awarded contract by county supervisors, February 20, at \$15,993.44, for improving Avalon Blvd. from Riverside-Redondo Blvd. southerly to Olive St., a distance of 3300 ft. or 0.64 mile, under Cash Contract No. 499.

LYON COUNTY, Nevada.—Nevada Rock & Sand Co., Reno, at \$57,756.28 awarded contract by State Highway Department to grade and gravel surface between Dayton and 9 miles northeast, Route 2A, 9.28 miles. Jack Casson, Hayward, second low at \$58,453.04; Union Paving Co., San Francisco, third low at \$58,353.82.

DOUGLAS COUNTY, Nev.—Isbell Const. Co., Carson City, at \$35,462.44 awarded contract by State Highway Department to grade and gravel 5.62 miles between 5 miles east of Holbrook and the East county line, Route 3, Section A1. Only other bid submitted by Dodge Const. Co., Inc., Fallon, at \$37,038.19.

LOS ANGELES, Cal.—Geo. Nelson, 174 Savona Walk, Long Beach, awarded contract by Board of Public Works, February 20 at \$2070.18 for improving Towne Ave., between Florence Ave. and 74th St., under Cash Contract.

SAN MATEO, Cal.—No bids received Feb. 20, by city council for \$8,785.80 improvement bonds, 7% interest, under 1903 Street Opening Act. Certified check 10% payable to City of San Mateo required with bid. Date of opening bids was put off for two weeks, until March 6, 8 P. M.

MENLO PARK, Santa Clara Co., Cal.—Until Feb. 28, 8 P. M., bids will be received by Fannie I. Kurtz, city clerk, for the sale of ten Street Improvement Bonds, interest at 7%; bonds for \$62.48 each.

LOS ANGELES, Calif.—Until 10 A. M., March 8, bids will be received by

board of public works to improve 76th St. bet. 8th Ave. and 10th Ave., and portions of 77th St., 75th St., 8th Ave., 10th Ave. and the alley west of 8th Ave., under the 1911 act. The proposed work involves:

- (1) grading (1371 cu. yds. cut);
 - (2) 44,288 sq. ft. 6-in. conc. paving;
 - (3) 4411 sq. ft. 6-in. asph. conc. pav.;
 - (4) 150 sq. ft. 4-in. asph. conc. wearing surf.;
 - (5) 230 sq. ft. 6-in. conc. gutter;
 - (6) 47 sq. ft. 4-in. conc. walk (drives)
 - (7) 6 ft. integral curb (no reinf. steel)
 - (8) 18 ft. light unplas. curb;
 - (9) water system complete;
 - (10) 22 water service connections;
 - (11) light conduit comp., lump sum.
- remove 24 ft. curb, 47 sq. ft. driveway. Engineer's estimate, \$9768.11.

SAN FRANCISCO—L. Sartorio, 2627 Lombard St., at \$92 awarded (informal) contract by Department of Public Works to construct about 900 sq. ft. sidewalk in 31st Ave. from Irving to Judah St.

LOS ANGELES, Calif.—Until 10 A. M., March 8, bids will be received by Board of Public Works (previously reported County Supervisors, which was in error) for grading, paving and otherwise improving San Pedro St. between Vernon Avenue and Flaxson Avenue, under cash contract, involving

- (1) grading (4630 cu. yds. excav.);
- (2) 217,118 sq. ft. 6-in. compressed concrete pavement;
- (3) 3365 sq. ft. 6-in. conc. pavement (Class E concrete);
- (4) 831 sq. ft. 8-in. concrete pavement (local depressions);
- (5) 577 sq. ft. 8-in. asph. conc. pave. (2-in. asph. conc. wearing surf. on 6-in. concrete base);
- (6) 480 sq. ft. asph. conc. wearing surface of variable thickness (average thickness 2-in.);
- (7) 12,729 sq. ft. rock and oil rdwy.;
- (8) 154 ft. curb armor;
- (9) 1935 ft. unplas. light curb;
- (10) 3838 sq. ft. 3-in. conc. sidewalk;
- (11) 406 sq. ft. 4-in. conc. sidewalk (driveways);
- (12) 253 sq. ft. 6-in. conc. sidewalk (driveways);
- (13) 23 sq. ft. 6-in. concrete gutter;
- (14) 64 sq. ft. 8-in. do;
- (15) storm drain and appurtenances, complete not inc. local depressions;
- (16) sanitary sewers, not inc. house connections;
- (17) 160 ft. 6-in. vit. house sewers;
- (18) ornamental lighting installation, complete;

(19) 21 manholes to be reset.
STANISLAUS, SAN JOAQUIN, Calaveras, Sacramento and Amador Co., Cal.—Until March 6, 3 P. M., bids will be received by R. E. Pierce, District Engineer, State Highway Commission, to apply Diesel oil to roadside vegetation over 110.7 roadside miles. Specifications obtainable from above office. Certified check 10% required with bid.

MONTEREY, SAN LUIS OBISPO and Santa Barbara Co., Cal.—L. A. Briscoe, Arroyo Grande, at \$2850 submitted low bid to District Engineer, State Highway Commission, San Luis Obispo, to apply Diesel oil to roadside vegetation over 120 roadside miles, involving 1500 barrels. Complete bids follow:

L. A. Briscoe, Arroyo Grande, \$1.90;
\$2850.
W. B. Roselip, San Luis, \$2.075;
\$3112.50.

Western Motors Transfer Co., Santa Barbara, \$2.17; \$3255.
Oilfields Trucking Co., Bakersfield, \$2.21; \$3315.

Peninsula Paving Co., \$2.30; \$3450.
Bids held under advisement.

VALLEJO, Cal.—Board of Education requests county supervisors to provide sidewalk along Nebraska St. from the high school to the Napa Road

BAKERSFIELD, Kern Co., Cal.—An \$86,000 loan approved by Reconstruction Finance Corporation for public improvements in Kern County.

WENATCHEE, Wash. — Chelan County Commissioners reject all bids for \$200,000 general obligation bonds; to refund a road bond issue; also for relief fund.

LOS ANGELES, Cal.—The total estimated cost of the proposed improvement of Santa Barbara Ave., between Third Ave. and Crenshaw Blvd., is \$65,000. Of the cost, the county will contribute \$43,043 and the city \$25,000. The proposed improvement calls for paving 30 ft. in width, a 24-in. storm drain between Sutro Ave. and Crenshaw Blvd. Rights-of-way have been conditionally promised by the Clara Baldwin Estate principally upon condition that no expense be attached to property involved.

TORRANCE, Los Angeles Co., Cal.—City Engineer Frank Leonard has announced that \$40,000 of Reconstruction Finance Corporation funds has been allotted to the city for street improvement for unemployment relief work. Among the streets to be improved are: Santa Fe Ave., Cabrillo Ave., and Lincoln Ave., three streets surrounding the new city park; Fern and Elm Sts., from Sonoma to Eldorado, near the Elm St. school; Torrance Blvd., between Cravens and Cedar; Sepulveda Blvd. east of Hawthorne.

PREDICT EARLY EASTBAY REVIVAL OF CONSTRUCTION

Realtors Expect Federal Bank Aid in Financing Building

With more than \$1,000,000 of new building construction for East Bay cities definitely projected and with various lending agencies moving toward early release of funds for the financing of such operations, a revival of building activity is anticipated for the immediate future, probably dating from April 1, according to a report to the Oakland Real Estate board by Fred T. Wood, new chairman of its home building committee.

Most of the projected building is residence construction, Wood said.

Although emergency legislation recently passed by the legislature and signed by Governor Rolph has been in effect but a few days, it is reported that the California Home Loan bank has already received applications for membership from many mortgage companies, building loan concerns and savings banks.

Final plans for the release of a large amount of credit to California lending institutions by the Home Loan bank will be adopted at a meeting of the directors of that institution to be held in Los Angeles February 21.

Details of the method of operation of the Home Loan bank in California will be the subject of an address before members of the Oakland, Alameda and Berkeley realty boards at Berkeley in the near future by Perry T. Tompkins, one of the directors of the bank.

Fred T. Wood yesterday was named chairman of the home building committee of the Oakland realty board by James H. L'Hommedieu president. One the committee with him are Harold C. Austin, Harry E. Leimert and Milton V. Stoakes.

SUPERINTENDENT NAMED

Wm. F. Quinton has been named superintendent of construction for the new Kit Carson Junior High School being built by the Sacramento board of education. He will act as assistant to Henry Peterson, chief superintendent for the district.

THE WEEK'S NEWS Highlights

BAY BRIDGE BIDS—A syndicate of Pacific Coast contractors submitted the low bid of \$6,957,100.68 on the initial contract for the San Francisco-Oakland bridge. Their bid was submitted under the name of Transbay Construction Company, Financial Center Building, San Francisco. The contract is for construction of five piers forming the westbay substructure. Two other legal bids were received. Bids which were to have been received March 2 for Construction 4 and 4a, comprising the 21 piers of the Eastbay foundation were postponed by the California Toll Bridge Authority because of the legal holiday declared on that date by Governor Rolph. The bids will be opened on the first "business day." If the financial moratorium should be extended it will affect bid openings now scheduled for March 7 and 8 at which four additional bridge contract proposals were to be opened.

SAN FRANCISCO FEDERAL BUILDING—N. P. Severin Company, Chicago, submitted the low bid on construction of the six-story San Francisco Federal office building, one of the largest building jobs to be undertaken this year on the coast. Their bid was \$2,548,000. Second and third low bids were by eastern firms also. George Wagner, San Francisco, was fourth low at \$2,690,000. Twelve bids were received. Otis Elevator Company was low bidder at \$78,900 on the elevator installation.

HETCH HETCHY PIPE LINE—American Concrete and Steel Pipe Company, Oakland, was low bidder at \$129,606 under Proposals B and W. A. Bechtel Co., San Francisco, at \$129,606 under Proposal B, and laying 7120 feet of pipe line in the Bay Crossing Division of the Hetch Hetchy project. Bids were received by the Public Utilities Commission.

14 NOMINATED FOR EXCHANGE DIRECTORATE

Election March 21 To Choose New Members of S. F. Board

Fourteen nominees for directors of the San Francisco Builders' Exchange were announced yesterday following the balloting among member organizations. The annual election of the Exchange will be held March 21. The polls will be open between 12 o'clock and 3 o'clock.

Eleven directors are to be elected, chosen from the 14 nominees.

Following are the nominations:

Charles W. Carle, Reinforcing Steel Dealers; J. E. Connell, Master Plasterers; R. J. H. Forbes, Concrete Contractors; W. H. George, Building Material Dealers; Emil Hogberg, Masons and Builders; E. M. Hundley, Unorganized Crafts; Joseph B. Keenan, Marble Dealers; Frank Lawson, Roofing Contractors; J. D. McGilvray, Cut Stone Contractors; H. N. Patterson, Ornamental Iron; E. H. Peterson, Tile Dealers; Mrs. Grace Perego, Home Builders; James H. Pinkerton, Plumbing and Heating; A. H. Wilhelm, General Contractors.

SALT LAKE STARTS RENOVIZE CAMPAIGN

Civic leaders and construction interests are engaged in a campaign to "renovize" Salt Lake City, following the example of a recent successful campaign in Philadelphia. Mayor Louis Marcus has been chosen general chairman and J. B. Mullins, president of the Inter-mountain Chapter, Associated General Contractors, is chairman of the executive committee.

OAKLAND OPPOSES GAS TAX DIVERSION

Having previously endorsed the stand of Senator A. H. Breed against diversion of gasoline taxes from highway construction funds, the Oakland city council tabled a request from Rolland A. Vandegrift, state finance director, that the city endorse the proposal to place \$8,779,000 of gasoline tax money in the general fund.

U. S. BUILDING PERMIT TOTAL GAIN IN JANUARY

Expenditures for Month 39 Pct. Above December Figure

There was an increase of 39.6 per cent in indicated expenditures for total building operations comparing permits issued in January, 1933, with those issued in December 1932 according to reports received by the Bureau of Labor Statistics of the United States Department of Labor, from 351 identical cities having a population of 25,000 and over.

Indicated expenditures for all building operations for which permits were issued in these cities for January totaled \$42,826,707. Comparing January with December, there was an increase of 2.7 per cent in the number but a decrease of 6.3 per cent in the indicated expenditures for new residential buildings.

New nonresidential buildings increased 3.9 per cent in number and 55.0 per cent in indicated expenditures.

Additions, alterations, and repairs increased 10.1 per cent in number and 18.2 per cent in indicated expenditures. During January, 1933, 1,188 family dwelling units were provided in new buildings. This is a decrease of 1.9 per cent as compared with December, 1932.

Various agencies of the United States Government awarded contracts during January for buildings to cost \$16,588,489. This is nearly \$5,000,000 more than the value of contracts awarded during December, 1932, and approximately \$9,000,000 more than the value of contracts awarded by the Federal Government during January, 1932.

Comparing permits issued in 350 identical cities, with January, 1932, and January, 1933, there was a decrease of 55.7 per cent in the number and a decrease of 69.5 per cent in the estimated cost of new residential buildings. New nonresidential buildings decreased 30.3 per cent, and the indicated expenditures for this class of building increased 11.7 per cent. There was a decrease of 17.1 per cent in the number of additions, alterations, and repairs and a decrease of 31.0 per cent in the indicated expenditures for this class of structure. Total building operations in these cities decreased 24.4 per cent in number and 17.1 per cent in indicated expenditures. The number of family dwelling units decreased 66.2 per cent comparing January, 1933, with January, 1932.

Permits were issued during January, 1933, for the following important building projects: In Binghamton, N. Y., for a State Armory to cost over \$200,000; in Austin, Tex., for a junior high school building to cost over \$325,000; in Sacramento, Calif., for a school building to cost nearly \$300,000; and in San Francisco for public works to cost over

COUNCIL STUDIES CITY POWER PLANT FOR BURLINGAME

The Burlingame city council is studying a proposal for a municipal power plant submitted by Schoemaker, Hackett and McIntyre, San Francisco engineers.

According to the engineers' survey the municipal plant, which would be diesel operated would net the city an annual profit of \$106,020. Cost of the system would total \$863,610, including \$73,500 for land and buildings, \$480,000 for the engine and generators and \$187,990 for a distribution system.

Revenue is estimated on income from 4600 consumers whom it is estimated would pay \$20,700 monthly at an average of \$4.50 per month.

Councilmen A. A. Hock, Ernest Rickard and R. L. Stone have been appointed a special committee to review the proposal.

NEW BUILDING ACT REQUIRES METAL LATH

S. F. Public Works Board Introduces Ordinance To Bar Wood

A new ordinance regulating the construction of plastered partitions and ceilings in buildings over two stories in height was introduced in the San Francisco board of supervisors yesterday at the request of Director of Public Works W. H. Worden.

The act provides that in all buildings of more than two stories excepting private dwellings the partitions and ceilings must be plastered in metal or equally fire-resistant lath. Timber lath will be permitted in residences of two stories with attic.

Hearings on the measure probably will be set for an early date by the committee on public buildings and land, to which it was referred for recommendation.

The text of the ordinance follows:

Section 1. Partitions and ceilings in all buildings of more than two stories in height wherein studding and/or floor constructions are of wood shall be plastered on metal or equal fire-resistant lath, provided, however, that in residences of two stories with attics timber lath shall be permitted.

\$12,000,000. Contracts were awarded by the Supervising Architect of the Treasury Department for a Federal court house in the Borough of Manhattan, to cost nearly \$6,000,000; for a narcotic farm in Lexington, Ky., to cost over \$2,000,000; and the Bureau of Yards and Docks of the United States Navy Department awarded a contract for a Marine Hospital in Philadelphia to cost over \$2,500,000.

PLASTERERS VOTE FOR UNIFORM \$7 WAGE IN STATE

Convention Delegates Say Wide Variation Handicaps Contractors

A uniform wage scale in the state of \$7 for plasterers will be the objective of the Master Plasterers' Association of California, delegates to the annual convention in Fresno decided.

President M. E. Summers of Fresno said the effort to establish a uniform scale is prompted by wide variation existing in different localities. Wages now range from \$6 to \$12, Summers said.

"We feel that members of the craft and not outsiders can best decide which is the prevailing scale and members of the craft bidding on big contracts at present have great difficulty in figuring on wages," he said.

Committeemen of the association also are to study means of relieving unemployment within the craft and to report to the executive committee. The executive committee at its semi-annual meeting will select the 1934 convention city.

Summers and other officers were re-elected to succeed themselves. The officers are: N. L. McKenzie, treasurer Harry Cayford, secretary; W. B. Scollan, Sacramento; S. L. Ford, Long Beach, and Wm. A. Keen, Glendale, first, second and third vice presidents, respectively, and R. L. Finch, Glendale; Lew Hughes, Pasadena; Jos. Masi, Fresno; Sydney James, Los Angeles; Joe Provenzano, San Jose; J. G. Walker, Long Beach, and Jos. E. Young, Santa Monica, directors.

Bert Johansen of Los Angeles, was elected to the directorate to succeed the late Geo. Pedgrift of Los Angeles, and Robert Knowles of San Francisco was elected to the board for a term beginning this year.

EXTENSION COURSE IN ENGINEERING

Norman B. Green, consulting engineer of San Francisco, will conduct a lecture course in structural engineering under auspices of the University of California Extension Division at the San Francisco center, it was announced yesterday.

The first course, entitled "Strength of Materials" will begin Monday, March 27, at 7 P. M., in Room 402, at 540 Powell street.

These courses have been given by Mr. Green for several years and are intended primarily for architects, contractors and draftsmen.

GRAVEL ORDINANCE PASSED

An ordinance requiring sale of gravel by weight instead of by yardage has been passed to print by the San Jose city council. Councilmen indicated they would give the ordinance further consideration however, before final passage.

Truck Carriers Ready to Resist State Bills Proposed to Extend Regulation

By Roy B. Thompson
Secretary, Allied Truck Owners

The immediate future of highway transportation in California is in the hands of the State legislature—and the electorate that voted them into office.

By this I mean that unless the voters, after election, still retain a degree of influence with the assemblymen and senators from their respective districts—and I am particularly referring to the voting farmers, merchants and shippers in general—and unless the men they have sent to Sacramento to speak for them are fair minded the motor truck industry will be riddled to pieces by the onslaughts of its enemies. And the immediate effect will be felt by more than 300,000 Californians dependent upon the industry.

At the January session of the present legislature more than one hundred bills were introduced that aim directly at the heart of the trucking industry. Some call for unbearable taxation, others restrict height, width and load, and still others, devoid of camouflage, were presented for the sole purpose of driving the trucks from the highways through confiscatory regulation and thereby restore to the railroads the transportation monopoly the latter enjoyed for so many years at the expense of the shipping public.

With their tongue in their cheeks the California railroads deplore the suggestion that they are fighting the trucks, according to a statement made in the public print early in February by their legislative spokesmen. The expression is not unfair to the railroads, for in the same breath this spokesman openly admitted that the railroads will concentrate at Sacramento in pushing to enactment into law Senate Bills 125, 355, 356, 386 and 387.

And these five bills are the most vicious of the lot. On the statute books, they would adversely affect the business of contractors, draymen, farmer, merchant and private truck owner.

And we, the truck owners, resent this barrage leveled at us, if only because last year we paid in California taxes aggregating twenty-seven million dollars as against the railroads' eight million dollars; we employed more than one quarter of a million persons, as against 80,000 on the payroll of the rail carriers.

But, very frankly, we are handicapped. We are young; the highway transportation system is comparatively new; it has not had time to develop its defensive organization to that degree of perfection which the railroads, through long experience, sometimes even in control of great States, has acquired and which has led them from a defensive attitude to an aggressive one. But if the public, whose demand for economical, flexible and convenient transportation has been met by the trucks, will stand be-

hind our industry in this crisis in California, we are confident of the ultimate outcome.

A brief analysis of the legislative bills which the railroads openly sponsor will show that when the rails said they favored only those measures which would assign truck transportation "to its proper place" they had but one place in mind—the scrap pile.

Senate Bill 125 would impose a per ton mile tax on the gross weight, which would be the "unladen weight" together with the "safe carrying capacity" of each vehicle in the locality in which it is "habitually operated." The tax would apply to all privately owned trucks, contract carriers, city draymen, dump trucks—in fact all trucks except those of the common carriers. The tax would be doubled for trucks equipped with solid tires, and a \$20 charge would be assessed for cost of an odometer to check the mileage. This bill would cost truck owners at least \$1000 a year per vehicle, in addition to all other taxes. And the revenue therefrom would be applied to employment of a small army of persons to collect and enforce it.

Senate Bill 355—Most vicious of the lot, this railroad measure is aimed at the contract carrier "so there can be a fair distribution of traffic to the end that the necessary transportation facilities (rails) may be maintained." In other words what the railroads cannot obtain through legitimate service and time attractions, they would force the shippers to give them by making it illegal to give to the trucks. Every contract hauler would be required to obtain a certificate of necessity and convenience from the Railroad Commission. The permit could not legally be issued if the applicant's proposed operation would "impair the efficient public service of any common carrier" already serving the territory.

The commission would determine this, not the farmer, merchant, contractor or shipper. No permit would be necessary could a contract carrier find in the State any community, without transportation facilities, within 30 miles of an incorporated city. But should he find such a place, he would be enjoined from driving his truck past a receiving or loading station of any common carrier or railroad under penalty of a fine of \$1000 or one year's imprisonment or both. This bill would outlaw the contract carrier.

Senate Bill 356—This would force the freight forwarder into the common carrier class and bring him under jurisdiction of the public utility act, regardless of whether he owned transportation equipment, operated it, was an agent for any transportation agency or knew the difference between a waybill and a bill-of-fare. For example, a man who as an act of friendship arranged for transportation of his neighbor's household effects from

one city to another could be bound to the provisions of this measure.

Senate Bill 386 would require the certificated carrier to carry motor truck liability. It would likewise limit the hours of drivers to a maximum of ten hours spread within a 16 hour period in each 24 hour period.

Senate Bill 387 strikes at the certificated carrier with these provisions to make his business unprofitable and, in instances, to make his equipment obsolete and legally impossible of operation:

"No vehicle, unladen or with load shall exceed a height of 12 feet 6 inches.

"No vehicle shall exceed in length 33 feet.

"No combination of vehicles coupled together shall exceed a total length of 33 feet.

"Gross weight of no vehicle with load shall exceed 18,000 pounds when vehicle is equipped with two axles.

"Gross weight of no vehicle and load shall exceed 22,000 pounds when such vehicle is equipped with three axles.

"When any such vehicle has a gross weight including load of more than 18,000 pounds and is equipped with three or more rear axles, such axles shall be spaced not less than 40 inches apart."

The foregoing gives an idea of how the truck owner stands with his railroad friends. I mean no unfairness to the railroads in making such a statement. Transportation is a basic industry, and the railroad corporations play an all important part in our economic life. It is, however, the opinion of Allied Truck Owners, our automotive Chamber of Commerce, that there is room for both the rails and the trucks, and that it is unfair for one to attempt to stifle the other for which there is an unquestioned public demand, that instead of diminishing is growing because of the flexibility and convenience to the shipper that is offered.

The National Industrial Traffic Association told the Coolidge Transportation Committee that if the railroads paid as much for upkeep of their roadbeds as trucks pay for use of the highways, the railroads would be in bankruptcy. We are making a vigorous effort to bring such facts before the public, generally, as well as before the legislators.

A catastrophe that would wipe out California's railroads would evoke a nation-wide cry of horror. Yet in the legislative program already laid down at Sacramento against highway transportation, we find all the potentialities of a legalized disaster that would wipe out the trucks which have brought the country to the city and the city to the country, developed the hinterland and reached back into the byways of the State where steel rails have never penetrated.

We intend to lay the situation squarely before the State senators and assemblymen, to appeal to their sense of fair play. And in so doing we intend to enlist the active support of their constituents to avert a situation that is today unthinkable.

U. S. Committee on Timber Construction Reports Use of Metal Connectors Will Revolutionize Wood Structural Practice

Introduction in this country of a "revolutionary" method of making wood joints through use of metal connectors, strengthening timber at its critical point and thereby making it available for wider consideration in construction of major structures, is forecast in a handbook on "Modern Connectors for Timber Construction" issued today by the National Committee on Wood Utilization, U. S. Department of Commerce, and prepared jointly by engineers of the Committee and of the Forest Products Laboratory, U. S. Forest Service, Department of Agriculture.

Lumber, construction, and metal stamping and casting interests, as well as architectural and engineering groups have been awaiting this report with unusual interest thru its several years of preparation. The new practices it makes available for engineering use should result in marked economy in construction, serve as a stimulant to the advantageous investment of capital therein, and prove an innovation and a boon in several special fields to which it will afford new avenues for activity and development. "The application of 'Modern Connectors for Timber Construction,'" said Secretary of Commerce Chapin in releasing the report, "should be given careful study by architects, engineers and builders. The principle involves economy in construction cost and increased service from building materials."

The handbook "Modern Connectors for Timber Construction" constitutes a re-introduction into this country, in modern, usable form and under economically favorable circumstances, of construction principles which were abandoned in embryonic and vaguely developed stages nearly half a century ago. As a result of war-enforced construction economies, these principles were adopted and advanced by engineers and constructors in the Central European and Scandinavian countries to the point where they have been satisfactorily and economically employed in hundreds of timber structures and major engineering projects.

The connectors which they employ consist principally of metal rings, plates, and disks, of a dowel type, or semi-dowel, with teeth on one or both faces. In general and in non-technical language, the connectors are placed or forced into the faces of wooden members to be jointed. The members are then brought together and held by the accustomed bolt, but the bolt becomes primarily a binder and only secondarily a load-bearing unit. With their larger circumferences, these connectors take an increased load and distribute it over a larger area of the timbers, thus avoid-

ing the undistributed high unit "edge stresses" frequently experienced under bolted connections where the small diameter bolt played against a localized area of the timber face, crushing the timber at this point, and, together with bent bolts, accounting for slip with consequent sag in structures. Thus, on most conservative laboratory data, the load-bearing capacity of the joint is increased from 4 to 8 times—and in certain cases as high as twelve times—that of the ordinary bolted joint.

The new method is compared by engineers, and even more favorably, with the advance from the ancient hand or cut framing to that of the bolted joint. It has been described by Wilson Compton, President, American Forest Products Industries, Inc., and leading economist of the lumber industry, as the "most important advance in wood technique in more than a hundred years," F. L. Smith, technical secretary, American Institute of Architects, has written that it will "undoubtedly open new fields for the efficient use of wood in many types of construction." B. L. Knowles, leading New England construction engineer who served on a special sponsoring committee as representative of the Associated General Contractors of America, observes the new connecting methods with "a large vision of the value of this work in future construction projects." Other engineers have described the innovation as "revolutionary" and bound to lead to a new conception by architects and engineers of the place of wood in construction.

There are some sixty odd types of modern connectors used abroad, of which some six or eight are considered important to American practice. No one type will meet all engineering requirements, but it will seldom be necessary to go beyond one or two types to a given construction project.

Pre-fabrication, similar to that employed in the use of other structural materials, becomes a natural step in the preparation of wood members for use with the new systems. Seatings and borings for the connecting hardware will be made with precision tools at the shop according to specifications, where the standards of materials themselves can also be checked against requirements by experts. Partly assembled, and assembled units will be shipped ready for speedy erection. Where intended use requires preservative treatment, this will be given after the borings have exposed new surfaces.

The wide use of these connectors abroad first came to the attention of American industry through Axel H. Oxholm, of the Department of

Commerce toward the close of the War, who picked the fact up from German prisoners while on duty in France. As Director of the National Committee on Wood Utilization he has since followed the matter closely for the Department, bringing back, after several protracted investigations abroad, all available European information on the subject. On his last visit in 1931 Mr. Oxholm viewed in excess of 100 major engineering structures in which wood had proven suitable as the principal structural material as a result of the use of modern connectors.

Following are some imposing examples of the varied types of structures in which modern connectors have been used in timber joining:

The Saengerfest Halle, Vienna, occupying five acres of ground and accommodating 75,000 persons for grand concerts;

Skoda Ammunition Works (Czechoslovakia) largest munitions makers in Europe, have constructed a plant at Moosbierbaum, Austria, using three-hinged arches for a span of 148 feet, which architects and engineers will note with interest;

Westpfalen Hall, Dortmund, Germany, free span 250 feet;

Concrete pouring trestle, Bleiloch Dam, length 680 feet, spans 83 feet;

Roald Amundsen Dirigible Hangar, Spitzbergen, in the Arctic, northernmost Norwegian island;

German Government Railway Station, Stuttgart (wooden dowel connectors used);

Radio towers, Breslau, 460 feet high. (A new pair of towers over 500 feet high are now being erected).

In addition to these examples—"Modern Connectors for Timber Construction" lists a hundred others from Norway, Sweden, Germany, Austria, Finland, France, Switzerland, Denmark and other European countries.

To reduce this comprehensive information to practical American use, however, required the assembly of extensive engineering data regarding qualities of the metal used in the connectors, and, in particular, the behavior of these connectors when employed with the generally stronger structural woods available in this country. The U. S. Bureau of Standards conducted the necessary metallographic studies to determine the properties of the connectors. Through several years past the Forest Products Laboratory has conducted an extensive series of analyses of their behavior when applied with our woods, both green and seasoned. The result is a comprehensive and dependable compendium of working data for use in American practice.

All of these data have been assembled and presented in the report with professional exactness by Nelson S. Perkins, construction engineer, and Peter T. Landsem, assistant construction engineer, both of the Wood Utilization Committee's staff, and George W. Trayer,

senior engineer, of the Forst Products Laboratory.

Secretary Chapin appointed a special committee representing the professions and industries affected, including major consuming groups, to collaborate in the assembly of the material for this handbook and sponsor its publication. Major H. S. Bennion, director of engineering, National Electric Light Association, headed this committee of the following individuals representing professional groups having a total membership of 103,000:

Wallace Ashby, American Society of Agricultural Engineers.

W. H. Booth, American Petroleum Institute.

Ralph Budd, American Railway Association.

Clement E. Chase, American Society of Civil Engineers.

Wm. F. Chew, National Association of Builders' Exchanges.

A. S. Downey and B. L. Knowles, Associated General Contractors of America.

Capt. Ralph H. Higgins.

R. R. Hornor, American Institute of Mining and Metallurgical Engineers.

Henry G. Perring, American Engineering Council.

Col. D. H. Sawyer, director, Federal Employment Stabilization Board, U. S. Department of Commerce.

Searcy B. Slack, American Association of State Highway Officials.

F. Leo Smith, The American Institute of Architects.

"Modern Connectors for Timber Construction" is a 147 page handbook explaining the connectors and their use, giving the relative value and fields of utility of the several types as determined by European practice and analyses made in this country, and American use data including a discussion of stress and load factors. It is paper bound, amply illustrated, and may be obtained at 15 cents per copy from the Superintendent of Documents, Government Printing Office, or the National Committee on Wood Utilization, U. S. Department of Commerce, Washington, D. C.

BOERMAN OFFICER OF LUMBER ASSN.

B. J. Boerman, Oakland, was elected vice-president for California of the Western Retail Lumbermen's Association at the 30th annual convention in Portland last week.

W. W. Anderson of Ogden, Utah, was elected president, succeeding Windsor J. Lloyd of Nampa, Idaho.

The convention adopted a resolution urging congress to maintain an active public construction program during 1933.

MANAGER APPOINTED

J. M. Hipple has been appointed general manager of merchandising engineering of the Westinghouse company. He will have charge of the appliance, motored appliance, refrigeration engineering, small motor engineering, radio engineering and industrial heating engineering departments.

BOOKLET DESCRIBES FIR PLYWOOD USES

Test data, drawings of construction details, finishing instructions and other helpful facts about Douglas fir plywood and its increasing uses are presented in a new illustrated booklet for architects and builders just announced by Douglas Fir Plywood Manufacturers, Skinner Building, Seattle.

Obtainable in many thicknesses and in standard sizes up to 4x8 ft., Douglas fir plywood is said to be split-proof and highly warp-resistant, to cost less per surface foot than ordinary lumber, and to make possible very great savings in labor. It is real lumber, laminated for greater size and strength.

Douglas fir plywood is widely used—both in new and remodeling construction—for walls and ceilings, cabinets and built-ins, sub-flooring, partitions, sheathing and many other purposes. A special 3/4 inch Douglas fir plywood wallboard is available, and also a specially glued and treated 5/8 inch Douglas fir plywood for concrete forms. This latter product is said to make possible flawless concrete surfaces with virtually no rubbing, and at a saving of 15 to 50% in carpentry labor.

Douglas Fir Plywood Manufacturers is the cooperative organization representing the 17 mills that produce this material.

47 EXHIBITORS SIGN FOR SPACE IN BURNER SHOW

Tenth Anniversary Display Of Association To Be In Chicago

A total of 77 spaces by 47 exhibitors has been taken for the tenth National Oil Burner Show of the American Oil Burner Association to be held in Chicago at Hotel Stevens, June 12-16, according to H. F. Tapp, executive secretary of the association, who said that this large registration so far in advance of the opening date "will make this exposition a national event in the heating and air-conditioning field."

"Not in the ten years of the association's show history has there been such an enthusiastic response to a national convention," Mr. Tapp said. "While the World's Fair may be considered one factor in bringing about this enthusiasm, the fact is that this tenth anniversary of the association marks a veritable turning point in the industry's progress with mass marketing and air-conditioning immediately before us."

In addition, it is expected that there will be a large representation from the manufacturers of distillate burners who have recently placed the headquarters of their national association in the offices of the A.O.B.A. with the executive heads of the latter directing the activities of both groups.

Further Reduction in Lumber Stocks Recommended by Conservation Board

The seventh quarterly report of the Lumber Survey Committee of the Timber Conservation Board has just been issued, showing estimated lumber consumption during 1932 and three preceding years, lumber stocks as of the first of 1933 and 1932 and anticipated lumber consumption during the first quarter of 1933.

The committee points out that although lumber stocks have been much reduced since 1930 and over 2.5 billion feet during the past year, equivalent to nearly one-fourth of the total volume of lumber movement, the net decline since the beginning of 1929 has been only about 30 per cent, whereas consumption in 1932 has declined over 65 per cent from 1929. The committee states that further large reductions in stocks are essential to industry recuperation and recommends a reduction during the year of 3 1/2 billion feet.

The committee finds that average lumber prices at the mill in the last quarter of 1932 showed a slight advance, the first in three years. It states that increase in production is not justified until consumption has increased and excess stocks liquidated. It recommends that diligent efforts be made

through exchanges of stocks and sales, to avoid unnecessary production of items already in industry surplus.

The report shows that if the lumber industry generally had not followed the recommendations of the Timber Conservation Board during the past two years and had continued production schedules at the rate prevailing in 1930 and early 1931, instead of an average stocks surplus of 40 per cent at the beginning of 1933, the surplus would have been approximately 120 per cent.

The Lumber Survey Committee appointed on July 9, 1931, consists of Thomas S. Holden, vice president, F. W. Dodge Co., New York; Dr. Frank M. Surface, assistant director, Bureau of Foreign and Domestic Commerce; M. W. Stark, lumber and coal economist of Columbus, Ohio; Calvin Fentress, chairman of the board, Baker, Fentress & Co., Chicago, and Dr. Wilson Compton, secretary and manager, National Lumber Manufacturers' Association. This committee serves voluntarily in cooperation with the work of the Timber Conservation Board in its study of the economic situation in the forest products industries.

Railroads Win Action to Establish Rate Differential For Southern Cement Mills

Laying down the general principle that "theories of rate making, however sound they may have been in the past, cannot prevail to hamper the carriers in their voluntary efforts to meet existing conditions so long as in so doing they do not create undue discrimination or otherwise adversely affect the public interest," the Railroad Commission has handed down a decision in a series of cement rate cases involving questions resulting from railroad and truck competition at cement mills located at Colton, and Victorville, San Bernardino county; Crestmore, Riverside county, and Monolith, Kern county.

The decision makes this further comment: "The competition which respondent seeks to meet is unregulated and beyond its power to control. In such cases carriers have been, and should be, accorded a reasonable latitude to use their managerial discretion. Particularly during this period of economic stress, with uncontrolled competition diverting traffic from the regulated carriers, extreme caution should be used before anything is done to interfere with the initiative of railroad management."

Seven cases in all were settled in the decision, all involving the lawfulness of the rates on cement from Colton, Crestmore, Victorville and Monolith to (first) points in the Imperial Valley on the Southern Pacific Company and Holton Interurban Railway and to points intermediate thereto, and (second) points on The Atchison, Topeka & Santa Fe Railway Company and San Diego & Arizona Railway south of Santa Ana.

The main question at issue in all cases was the differentials maintained by railroads between the inner mills (Colton and Crestmore) and the outer mills (Victorville and Monolith). The inner mills strongly contend that they should have a rail differential substantially under the rail rate from the outer mills. On the other hand the outer mills just as strongly urge the retention of the narrowing of the present differentials or their elimination entirely.

The inner mills now move all their traffic to the Imperial Valley by truck. The Southern Pacific Company, not being committed to any set differential between the inner and outer mills, decided to attempt to regain the lost tonnage. Assurance was given by the inner mills that if a 15 cent rate from Colton and Crestmore to the Imperial Valley was published, the traffic would be returned to the rails, provided, however, that the Victorville rates were not reduced by a corresponding amount. The 15 cent rate was published but was suspended by the Commission. On this issue the decision of the Railroad Commission says:

"There can be no question but what the inner mills hold the whip

hand over the Southern Pacific. They now are able to obtain truck rates ranging from 10 cents to 15 cents per sack. The Southern Pacific is faced with two alternatives. They can either forego the business entirely or they can establish the 15 cent rate with a 20 cent rate from Victorville and a 24½ cent rate from Monolith. If they do the latter they are assured of the entire movement from Colton and Crestmore, and would probably hold the movement from Victorville and Monolith. The commitment is made by the inner mills regardless of what the truck rates may be in the future.

"The record warrants the conclusion that the 15 cent rate is justified and that by the publication of a 20 cent rate from Victorville and a 24½ cent rate from Monolith it will not unduly prefer the inner mills nor unduly prejudice the outer mills."

Accordingly the decision holds that the proposed 15 cent rate from Colton and Crestmore to points in the Imperial Valley and points intermediate thereto and the proposed rates of 20 cents from Victorville and 24½ cent from Monolith to the same points of destination are not unduly preferential of Colton and Crestmore nor unduly prejudicial to Victorville and Monolith; and that the rates from Victorville and Monolith to points in the Imperial Valley have not been shown to be unreasonable on this record. The order of suspension in regard to this rate is dismissed.

On the issues involving rates to points on The Atchison, Topeka & Santa Fe Railway Company and San Diego and Arizona Railway south of Santa Ana, the decision holds that conditions are somewhat different than those relating to the Imperial Valley adjustment, and that the rates from Colton, Crestmore, Victorville and Monolith to points on The Atchison, Topeka and Santa Fe Railway and San Diego & Arizona Railway south of Santa Ana are not unduly

prejudicial to Colton and Crestmore; unduly preferential of Victorville and Monolith; unduly prejudicial to Monolith nor unduly preferential of Colton and Crestmore except as set forth below; that the rates from Monolith to points south of Santa Ana here under attack are unduly prejudicial to Monolith and unduly preferential of Victorville to the extent such rates exceed by more than one cent the rates concurrently in effect from Victorville; and that the rates from Monolith to Aliso, National City and points between have not on this record been shown to be unreasonable.

The formal order provides that the defendant railroads shall establish rates on cement, in carloads, from Monolith to points involved in these proceedings south of Santa Ana which shall not be more than one cent per 100 pounds higher than the rates concurrently maintained from Victorville to the same points of destination.

The cases included in the decision are as follows:

Southwestern Portland Cement Co. vs. The Atchison, Topeka and Santa Fe Railway Company, Los Angeles & Salt Lake Railroad Co., Southern Pacific Company and Holton Interurban Railway Co.

In the Matter of the Suspension by the Commission on its own motion of certain reduced rates on cement named on pages 34 and 35 of Southern Pacific Company Local, Joint, Proportional and Transshipment Freight Tariff 584-D, C. R. C. 2861, applying from Colton and Crestmore to points east thereof;

Monolith Portland Cement Company vs. Southern Pacific Company and The Atchison, Topeka & Santa Fe Railway Company;

California Portland Cement Co. and Riverside Cement Co. vs. The Atchison, Topeka and Santa Fe Railway Company, (two);

California Portland Cement Co. and Riverside Cement Co. vs. The Atchison, Topeka & Santa Fe Railway Co. and Southern Pacific Co.;

California Portland Cement Co. and Riverside Cement Company vs. Southern Pacific Co., The Atchison, Topeka and Santa Fe Railway Company and San Diego & Arizona Railway Company.

DeGOLIA HEADS COMMITTEE ON U. S. ROAD AID

President of California Assn. To Organize Campaign For Highway Money

Presenting a nationwide approach by organized motorists to the question of future Federal Aid appropriations to assist states in highway development, a special committee representing all sections of the country and headed by E. B. DeGolia of San Francisco, president of the California State Automobile Association, has been formed. Selection of DeGolia for the chairmanship of the group is announced by Thomas P. Henry of Detroit, president of the American Automobile Association, with which the California organization is affiliated.

Appropriations for Federal Aid in furtherance of highway projects have been assured to the end of the fiscal year terminating next June, on the basis of \$125,000,000 a year, but legislation providing similar amounts for the fiscal years 1934 and 1935 are still pending in Congress.

A study of Federal Aid will be made by the special committee and a report prepared containing recommendations as to a future policy on the subject.

With highway work proving a popular and effective means of providing employment, it is being recognized that there is a need for sound policies which will assure highway construction being done on a basis of permanent rather than temporary benefits to the motoring public and other taxpayers.

The fact that states are required to match Federal Aid appropriations with equal sums from state funds is being emphasized by the California State Automobile Association and other groups which are resisting attempts to divert gasoline tax revenues from the highway fund to the state general fund. Such diversion, it is declared may endanger continuance of Federal Aid appropriations.

In addition to heading the Federal Aid committee, DeGolia also has been appointed chairman of the Good Roads Committee of the American Automobile Association.

BENNETT DEALERS HOLD CONFERENCE

A sales conference of more than five hundred representatives of the L. H. Bennett Co., Ltd., distributor of General Electric refrigerators, ranges, and other appliances, was held in San Francisco last Tuesday. The Alcazar theater was used to present a road show program demonstrating the utility and beauty of the line.

The feature of the show was the complete General Electric kitchen, featured by the L. H. Bennett Company in recent advertising.

ASSOCIATION GETS U. S. BANK APPROVAL

Surety Building and Loan Association of 285 South First Street, San Jose, has been notified by western headquarters of the Federal Home Loan bank at Los Angeles that it has qualified to obtain loans from the federal bank.

In commenting on Surety's acceptance as a member of the bank, W. C. Barkuloo, secretary of Surety Building and Loan, points out that in the past building and loan associations have appealed to the public for support. In good times that support has been forthcoming. Now that the public needs assistance, however, it is only fair that the building and loan association should cooperate to the fullest extent in making necessary adjustments.

"It is with this thought in mind," he said, "that Surety has availed itself at the first possible moment of the advantages of membership in the Federal Home Loan bank."

BERGSTROM HEADS S. F. CONTRACTORS

A. H. Bergstrom has been re-elected president of the General Contractors of San Francisco for a two-year term.

Other officers were elected as follows: W. W. Hayes, first vice-president; J. Martinelli, second vice-president; J. S. Malloch, treasurer, C. J. Dixon, secretary; Charles L. Taylor, G. K. Jensen and J. A. Grant directors.

President Bergstrom in his annual report outlines the activities of the past year, calling particular attention to the successful legislative campaign conducted in local and national governments.

Forty members of the chapter were present at the meeting and dinner at the Elks club.

City Engineer Gonzalez of Petaluma has been named building inspector to receive compensation by retaining inspection fees. The city council has finally passed the uniform building code, modified in minor respects to suit local conditions.

quantities included in the six sched-
ules for the construction of the Val-
verde and Bernasconi Tunnels, for
which bids will be opened by the
Metropolitan Water District, 306 W
3rd St., at 10 A. M., March 20 (pre-
viously noted) are given herewith. The
work is located in the vicinity of the
towns of Perris and Lakeview in Riv-
erside County. The work to be bid
upon consists of the excavating and
lining of two water supply tunnels
7.2 and 1.1 miles in length, respecti-
vely, and is divided as follows: Sched-
ules 1 or 2, Bernasconi Tunnel, 1.1
miles; Schedules 3 or 4, East Portion
Valverde Tunnel, 3.3 miles; Schedules
5 or 6, West Portion Valverde Tunnel,
3.9 miles.

Under Schedules 1, 3 and 5 pro-
posals will be received for construct-
ing the tunnels above listed with a
finished interior diameter of 15 ft. 3
in., and under Schedules 2, 4 and 6,
alternative proposals will be received
for their construction with a finished
interior diameter of 11 ft. 9 in.

SCHEDULE NO. 1

Construction of the Bernasconi Tun-
nel with a diameter of 15 ft. 3 in., to-
gether with appurtenant works.

(Schedules 1 and 2 are alternative
and both will not be awarded. A pro-
posal under Schedule 1 will not be
considered unless the bidder submits
a proposal under Schedule 2 also.)

- (1) tunnel access, lump sum;
- (2) 61,600 cu. yds. excav. in tunnel;
- (3) 50 cu. yds. excav. for tunnel en-
largement;
- (4) 16,600 cu. yds. concrete in tunnel;
- (5) 250 M. ft. B. M. furnish and place
permanent timber in tunnel;
- (6) 15 tons erect steel support in tun-
nel;
- (7) 10 cu. yds. Guniting coating of
rock in tunnel;
- (8) 25 connections for grouting;
- (9) 65 cu. yds. mix and place grout;
- (10) 25,000 lbs. place reinforcing steel
- (11) 100 tons miles hauling steel;
- (12) 14,000 ton miles hauling cement;
- (13) does not apply here.

SCHEDULE NO. 2

Construction of the Bernasconi Tun-
nel with a diameter of 11 ft. 9 in., to-
gether with appurtenant works.

(Schedules 1 and 2 are alternative and both will not be awarded. A proposal under Schedule 2 will not be considered unless the bidder submits a proposal under Schedule 1 also.)

- (1) tunnel access, lump sum;
- (2) 40,000 cu. yds. excav. in tunnel;
- (3) 25 cu. yds. excav. for tunnel enlargement;
- (4) 12,800 cu. yds. concrete in tunnel;
- (5) 148 M. ft. B.M. furnish and place permanent timber in tunnel;
- (6) 11 tons erect steel support in tunnel;
- (7) 10 cu. yds. Gunite coating of road in tunnel;
- (8) 25 connections for grouting;
- (9) 50 cu. yds. mix and place grout;
- (10) 20,000 lbs. place reinf. steel;
- (11) 80 ton miles hauling steel;
- (12) 11,750 ton miles haul cement;
- (13) does not apply here.

SCHEDULE NO. 3

Construction of the east portion of Valverde Tunnel, Station 11,695 plus 00 to Station 11,870 plus 00, with a diameter of 15 ft. 3 in., with appurtenant works.

(Schedules 3 and 4 are alternative and both will not be awarded. A proposal under Schedule 3 will not be considered unless the bidder submits a proposal under Schedule 4 also.)

- (1) tunnel access, lump sum;
- (2) 181,000 cu. yds. excav. in tunnel;
- (3) 100 cu. yds. excav. for tunnel enlargement;
- (4) 48,000 cu. yds. conc. in tunnel;
- (5) 530 M. ft. B.M. furnish and place permanent timber in tunnel;
- (6) 265 tons erect steel support in tunnel;
- (7) 110 cu. yds. Gunite coating of rock in tunnel;
- (8) 70 connections for grouting;
- (9) 180 cu. yds. mix and place grout;
- (10) 75,000 lbs. place reinf. steel;
- (11) 370 ton miles hauling steel;
- (12) 15,000 ton miles hauling cement;
- (13) 175,000 million foot gallons pumping water (at 12½¢ per million foot gallons, \$21,875).

SCHEDULE NO. 4

Construction of the east portion of Valverde Tunnel, Station 11,695 plus 00 to Station 11,870 plus 00, with a diameter of 11 ft. 19 in., together with appurtenant works.

(Schedules 3 and 4 are alternative and both will not be awarded. A proposal under Schedule 4 will not be considered unless the bidder submits a proposal under Schedule 3 also.)

- (1) tunnel access, lump sum;
- (2) 117,000 cu. yds. excav. in tunnel;
- (3) 75 cu. yds. excav. for tunnel enlargement;
- (4) 37,400 cu. yds. concrete in tunnel;
- (5) 330 M. ft. B.M. furnish and place permanent timber in tunnel;
- (6) 210 tons erect steel support in tunnel;
- (7) 75 cu. yds. Gunite coating of rock in tunnel;
- (8) 50 connections for grouting;
- (9) 110 cu. yds. mix and place grout;
- (10) 60,000 lbs. place reinf. steel;
- (11) 295 ton miles hauling steel;
- (12) 12,000 ton miles hauling cement;
- (13) 175,000 million foot gallons pumping water (at 12½¢ per million foot gallons, \$21,875).

SCHEDULE NO. 5

Construction of the west portion of Valverde Tunnel, Station 11,870 plus 00 to Station 12,066 plus 50, with a diameter of 15 ft. 3 in. with appurtenant works.

(Schedules 5 and 6 are alternative and both will not be awarded. A proposal under Schedule 5 will not be considered unless the bidder submits a proposal under Schedule 6 also.)

- (1) tunnel access, lump sum;
- (2) 197,000 cu. yds. excav. in tunnel;
- (3) 100 cu. yds. excav. for tunnel enlargement;
- (4) 52,900 cu. yds. concrete in tunnel;
- (5) 170 M. ft. B.M. furnish and place permanent timber in tunnel;

- (6) 85 tons erect steel support in tunnel;
- (7) 40 cu. yds. Gunite coating of rock in tunnel;
- (8) 80 connections for grouting;
- (9) 220 cu. yds. mix and place grout;
- (10) 75,000 lbs. place reinf. steel;
- (11) 660 ton miles hauling steel;
- (12) 74,000 ton miles haul cement;
- (13) 175,000 million foot gallons pumping water (at 12½¢ per million foot gallons, \$21,875).

SCHEDULE NO. 6

Construction of the west portion of Valverde Tunnel, Station 11,870 plus 00 to Station 12,066 plus 50, with a diameter of 11 ft. 9 in. with appurtenant works.

(Schedules 5 and 6 are alternative and both will not be awarded. A proposal under Schedule 6 will not be considered unless the bidder submits a proposal under Schedule 5 also.)

- (1) tunnel access, lump sum;
- (2) 128,000 cu. yds. excav. in tunnel;
- (3) 75 cu. yds. excav. for tunnel enlargement;
- (4) 41,750 cu. yds. concrete in tunnel;
- (5) 110 M. ft. B.M. furnish and place permanent timber in tunnel;
- (6) 70 tons erect steel support in tunnel;
- (7) 25 cu. yds. Gunite coating of rock in tunnel;
- (8) 60 connections for grouting;
- (9) 140 cu. yds. mix and place grout;
- (10) 60,000 lbs. place reinf. steel;
- (11) 540 ton miles hauling steel;
- (12) 59,000 ton miles haul cement;
- (13) 175,000 million foot gallons pumping water (at 12½¢ per million foot gallons, \$21,875).

Specifications and drawings obtainable from office of Chief Engineer, Rm. 1004, 306 W 3rd St. Copies may be seen at the above office and at the district's office at Beaumont, and may be purchased at the Los Angeles office upon payment of \$5 per set. The payment will not be returned.

Each proposal must be accompanied by a certified or cashier's check as a guaranty that the bidder will, if awarded any schedule or schedules, promptly secure workmen's compensation, execute a contract in the required form, and furnish satisfactory bonds for the faithful performance of the contract and for the payment of claims of materialmen and laborers thereunder. Said check shall be in the sum of \$50,000 for a bid on Schedules 1 and 2, and \$100,000 for each of the other parts of schedules bid upon up to the maximum number under which award is possible. The faithful performance bond shall be as shown below for each schedule included in the contract: Schedule 1 or 2, \$200,000; Schedule 3 or 4, \$500,000; Schedule 5 or 6, \$500,000. The bond for materialmen and laborers shall be in the sum required by statute.

BURLINGAME, San Mateo Co., Cal.—City council considers municipal power plant, estimated cost, \$863,610, including \$480,000 for engine and generators. Plans presented by Schoemaker, Hackett and McIntyre, San Francisco engineers.

LOS ANGELES, Cal.—F. E. Weymouth, general manager and chief engineer of the Metropolitan Water District, was authorized by the board of directors Feb. 24 to execute a contract with the Southern California Telephone Co. for the extension of the aqueduct communication system. The contract involves \$92,000.

LOS ANGELES, Calif.—Until 10 A. M., March 18, bids will be received by the Metropolitan Water District, 306 W 3rd St., Los Angeles, for the construction of transmission lines in the Mecca Pass to Colorado River Section of the Construction Power Transmission Line. The work to be contracted for consists of approximately 38 miles of 66,000-volt transmission line, and 147 miles of 33,000-volt transmission line. The lines are located between Mecca Pass and Parker dam site on the Colorado River. Butt-treated cedar poles and suspension insulators to be used on the lines specified will also be purchased under these specifications. Specifications may be obtained from the office of the Chief Engineer and General Manager, F. E. Weymouth, room 1004, 306 W 3rd St., Los Angeles, upon payment of \$3.00 per set. Certified check or cashier's check for 10% must accompany each bid. A list of the items to be bid on follows:

(1) Construction of transmission lines from Mecca Pass to Parker Substation. Bidder to state time in days for completion of 66-kv. line complete and four miles of 33-kv. line from Granite Substation east; also for completion of 33-kv. line from Mecca Pass to Granite Substation; and also balance of 33-kv. line;

(2) suspension insulator units:

- (a) 5000 insulator units;
- (b) 3000 insulator units;
- (c) 2000 insulator units;

(3) Suspension insulators, alloy type:

- (a) 3000 insulator units;
- (b) 2000 insulator units.

F.o.b. cars, Colton.

(4) Cedar poles, butt-treated:

- (a) 50 35-ft. Class 3 poles;
- (b) 100 35-ft. Class 4 poles;
- (c) 30 40-ft. Class 3 poles;
- (d) 120 45-ft. Class 3 poles;
- (e) 1050 45-ft. Class 4 poles;
- (f) 50 50-ft. Class 3 poles;
- (g) 1150 50-ft. Class 4 poles;
- (h) 90 55-ft. Class 3 poles;
- (i) 800 55-ft. Class 4 poles;
- (j) 10 60-ft. Class 3 poles;
- (k) 220 60-ft. Class 4 poles;
- (l) 20 70-ft. Class 3 poles.

F.o.b. cars, Colton.

Bidders to state number of days after notice to proceed within which delivery of poles will be made: First 500 poles, second 500 poles, third, fourth, fifth, sixth, and seventh 500 poles, and balance of poles.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

SAN DIEGO, Cal.—San Diego county supervisors have adopted a resolution favoring the construction of a combined city-county building to house all city and county departments. A similar resolution will be submitted to the city council next week pledging the city to carry out its share of the project. Application will be made to the Reconstruction Finance Corporation for a loan of not to exceed \$1,000,000 with which to finance the building.

To Ask Bids. Cost, \$800,000

Hardware—H. & H. Hardware Co., 1405 Broadway, Burlingame.

As previously reported—Structural steel to Schrader Iron Works, 1247 Harrison St., San Francisco; concrete

materials to Redwood Materials Co., Redwood City; excavation awarded to Chas. E. Archibald, 919 Arguella St., Redwood City; mill work to Pacific Mfg. Co., Santa Clara; reinforcing steel to W. S. Wetenhall, 17th and Wisconsin Sts.

WHARVES AND DOCKS

STOCKTON, San Joaquin Co., Cal. —Barrett-Cravens Co., 669 Howard St. San Francisco, at \$300 awarded contract by Stockton City Port Commission for two hand lift trucks for the transit sheds and wharves.

LOS ANGELES, Cal. — Harbor department's engineering division will prepare layout plans and cost estimates for a navy shore base at Los Angeles Outer Harbor. Improvements would include the construction of bulkheads and fill, a graving dock for warcraft repairs, warehouses and other buildings. A bill will be submitted at the next session of congress, requesting an appropriation for the base.

MISCELLANEOUS CONSTRUCTION

Contract Awarded.
BRIDGE Cost, \$4000
SAN FRANCISCO. Fifth St. to Red Cross Building.

Two-story steel and concrete bridge. Owner—The Emporium, 835 Market St., San Francisco.

Plans by Engineering Dept. of Owner. Contractor—Barrett & Hilp, 518 Harrison St., San Francisco.

Sub-bids are in and will be awarded shortly.

SANTA BARBARA, Calif.—Until 1 P. M., March 9, bids will be received by the Santa Barbara city clerk for the construction of shower and locker rooms at the Cabrillo soccer field, Santa Barbara. Plans and specifications may be obtained from the Santa Barbara park department, city hall. Certified check for 10% must accompany each bid.

SEATTLE, Wash.—Jos. A. Vance, Seattle, is planning the construction of a race track south of the Meadows to cost approximately \$200,000 if the State racing bill becomes a law. The track, if constructed, will be a mile in circumference, enclosing 80 acres with a grandstand to seat 100,000. Parking space for 35,000 automobiles. Fred C. Brown, attorney, has been retained to file articles of incorporation.

SEATTLE, Wash.—Radio Station KOMO has leased station KJR from the National Broadcasting Company and will make extensive expansions. A new transmitter station will be constructed and new joint studios will be established in the Skinner Building with new broadcasting equipment, etc. Plans prepared by Architect R. C. Reamer, 1201 4th St., Seattle.

SAN FRANCISCO.—Until March 8, 3 P. M., bids will be received by Felton Taylor, secretary, Public Utilities Commission, Room 225, City Hall, for changing heating system in the San Francisco Water Department Building from district steam supply to a steam generating plant using gas as fuel. Specification W. D. No. 31. Specifications may be procured at Room 605, San Francisco Water Department Bldg., 425 Mason St., upon deposit of \$5.00.

ENGINEERING NEWS

BRIDGES

LOS ANGELES, Cal.—E. E. McKittick Co., Inc., and J. E. Burrell, 5905 Pacific Blvd., Huntington Park, awarded contract by county supervisors on Feb. 24 at \$26702 to construct concrete bridge across the San Gabriel river at Second St., in Long Beach.

The proposed bridge will be 390 ft. long with a 50 ft. roadway and two 6-ft. walks. The superstructure will rest upon 14 pile lents. E. C. Eaton, County Flood Control Engineer. The bids were opened Dec. 19.

SIGNAL HILL, Los Angeles Co., Cal.—A. A. Taylor, City Engineer, has been authorized by city council to prepare plans for a bridge to be built across the railway tracks at Spring St. and California Ave. One end of the bridge will be in Long Beach. The decision to construct a bridge in preference to a grade separation was reached by the city councils of the two cities last Friday, February 17. Long Beach will probably pay a small share of the cost. Excavating and grading will be done by unemployed forces.

LOS ANGELES, Calif.—W. O. Armstrong, County Bridge Engineer, 12th floor Hall of Records, has completed plans for an A-frame truss bridge to be built on Garibaldi Ave. over Eaton Wash. The bridge will be of timber and steel construction, 36 ft. 8 in. long with a roadway 25 ft. 8 in. in width. The paving is not included in this contract.

The approximate quantities are:
 13,796 ft. B. M. creosoted timber (not sized or detailed);
 8,973 ft. B. M. creosoted timber (sized and detailed);
 1,988 ft. B. M. timber, sized but not creosoted;
 590 ft. B. M. timber not sized or creosoted;
 546 lin. ft. piling;
 6,195 lbs. structural steel;
 1,251 lbs. castings;
 258 lbs. drifts;
 1,162 lbs. bolts, deadman and lateral rods;
 700 lbs. upset rods;
 1 lb. cut washers;
 42 lbs. malleable washers;
 3 lbs. lock washers;
 120 sq. ft. burlap (10 oz.);
 65 lin. ft. No. 12 wire;
 135 cu. yds. excavation.

The county will furnish 26 truss beams and 4 clevises.

LOS ANGELES, Cal.—Until 2 P. M., March 6, bids will be received by county supervisors to construct a reinforced concrete culvert on Citrus Ave. over Little Dalton Wash, in the County of Los Angeles. The culvert will have an inside width of 13 ft., a height of 11 ft. 6 in. with 20-in. foundations, and 27.15 ft. in length. Geo. W. Jones, County Road Commissioner. Mame B. Beatty, 501 Hall of Records, Clerk of the Board.

LOS ANGELES COUNTY, Calif.—Clinton Construction Co., Spring Arcade Bldg., Los Angeles, at \$109,101.10 awarded contract by State Highway Commission to construct a reinforced concrete girder bridge across San Gabriel River about 2-mi. east of El Monte, consisting of fourteen 65-ft. spans and two 27-ft. cantilevers on concrete piers.

MODESTO, Stanislaus Counties, Cal.—County supervisors approve plans for 19th St. bridge over Dry Creek;

bids will be asked within the next few days. George D. Macomber, county surveyor. Estimated cost, \$2500.

MONTESANO, Grays Harbor Co., Wash.—Until March 6, 10 A. M., bids will be received by Grays Harbor County Commissioners to construct bridge approaches to the Lund span on lateral highway No. 20, about .13-mi. Work will include preparing site, constructing trestle approaches, timber bridge pier comprising furnishing and driving 58 piling and 90 M ft. b.b. of timber construction, also grading and gravel surfacing road connections. Specifications obtainable from Harold B. Kirkwood, commissioner.

LOS ANGELES, Cal.—Until 2 P. M., March 20, bids will be received by county supervisors to construct A-frame truss bridge on Garibaldi Ave. over Eaton Wash. The bridge will be of timber and steel construction, 36 ft. 8 in. long with a roadway 25 ft. 8 in. in width. The paving is not included in this contract.

The approximate quantities are:
 13,796 ft. B. M. creosoted timber (not sized or detailed);
 8,973 ft. B. M. creosoted timber (sized and detailed);
 1,988 ft. B. M. timber, sized but not creosoted;
 590 ft. B. M. timber not sized or creosoted;
 546 lin. ft. piling;
 6,195 lbs. structural steel;
 1,251 lbs. castings;
 258 lbs. drifts;
 1,162 lbs. bolts, deadman and lateral rods;
 700 lbs. upset rods;
 One lb. cut washers;
 42 lbs. malleable washers;
 3 lbs. lock washers;
 120 sq. ft. burlap (10 oz.);
 65 lin. ft. No. 12 wire;
 135 cu. yds. excav.

County will furnish 26 truss beams and 4 clevises.

Plans prepared by Geo. W. Jones, County Road Commissioner. Copies obtainable from Bridge Engineer, W. D. Armstrong, 12 Floor, Hall of Records. Mame B. Beatty, 501 Hall of Records, Clerk of the Board.

LOS ANGELES, Cal.—Until 2 P. M., March 20, bids will be received by county supervisors to construct railroad grade separation structure in Arcadia. Est. cost, \$82,660. The project calls for a highway subway under the S. F. tracks, connecting Orange Avenue and Colorado St. The total length of the subway will be about 900 ft. with a steel superstructure 80 ft. in length. The width of the street

will be 40 ft. Two contracts will be let, viz., the steel superstructure by the Santa Fe Railway and the subway portion by the county. The county work is estimated at about \$26,169. The total cost will be paid as follows: \$4000 by the City of Arcadia, \$16,532 by the railroad and \$62,123 by the county. The approximate quantities are:

15,407 cu. yds. excavation;
 15,872 sq. ft. hand shaping slopes;
 1,907 ft. 6x9x15-in. curb;
 136 sq. ft. 8-in. concrete aprons;
 2 No. 6 catchbasins;
 42 ft. 18-in. heavy reinf. conc. pipe;
 138 ft. 2-in. std. pipe (weepers);
 5 concrete junction chambers;
 46 ft. 22-in. O. D. steel pipe;
 concrete headwall outlet, complete;
 250 lbs. reinf. steel;
 3,335 lbs. steel wire mesh paved slopes
 7,282 sq. ft. forms, for abutments;
 280 ft. 21-in. D-1800 const. spun conc. pipe;
 224 ft. 21-in. D-2200 do;
 352 ft. 21-in. D-2500 do;
 536 ft. 21-in. D-2700 do;
 483 cu. yds. Class A conc. in paved slopes for placing;
 15,872 sq. ft. paved slopes for finishing
 756 cu. yds. conc. in abut. for placing;
 4 flood lights, complete with conduits, meter and time clock;
 1,630 bbls. cement, delivered;
 664 tons sand;
 1,600 tons rock.

The pavement is a separate contract and is not included in the above list.

Plans prepared by Geo. W. Jones, County Road Commissioner. Copies obtainable from office of Bridge Engineer, W. D. Armstrong, 12th floor, Hall of Records. Mame B. Beatty, 501 Hall of Records, clerk of board.

DREDGING, HARBOR WORKS & EXCAVATIONS

LONG BEACH, Calif.—Application has been made by the Puget Sound Bridge & Dredging Co. for War Department permission to dredge about 5000 cu. yds. of material at Graham Brothers' dock in Channel No. 3, Long Beach Harbor, Long Beach. The dredged material to be deposited at sea. Map showing location of the proposed work will be on exhibition in the office of the U. S. Engineer, 751 S Figueroa St., Los Angeles, until 11 A. M., Friday, March 3, 1933. W. H. Lanagan, Major, Corps of Engineers, District Engineer.

COCO SOLO, C. Z.—Winston Bros. Co., 1470 Northwestern Bank Building, Minneapolis, Minn., and 418 Pecan St., Los Angeles, have been awarded the contract by the Bureau of Yards and Docks at about \$80,000 for constructing an earth filled steel sheet pile pier and service piping and the removal of existing timber pier at the naval submarine base, Fort Clayton, Coco Solo, Canal Zone. Spec. No. 7141. The bids were opened February 8.

UPLAND, San Bernardino Co., Cal.—Until 5 P. M., March 7, bids will be received by Elementary School District for supplying one school bus, fully equipped, with a capacity of 49 to 55 school children. Bids will be required separately for the chassis and for the body. The District will interview sales agents on Friday, March 3, between the hours of 2 and 5 p. m. Clyde D. DuVall, clerk.

CAPITAL CITY TITLE COMPANY

J. C. PALEN,
Manager

914 Seventh Street
Sacramento :: California

IRRIGATION PROJECTS

OMAK, Wash.—Until March 7, bids will be received by Okanogan Irrigation District, Dale Thorp, Secretary, for lining 2300 ft. main canal on Progressive flat about one mile below the Salmon creek diversion. Specifications obtainable from above.

RED BLUFF, Texas.—S. J. Groves & Co., Minneapolis, Minn., and Los Angeles, awarded contract by the Red Bluff Water Improvement District to construct Red Bluff Storage Dam and Siphonic Spillway.

MACHINERY AND EQUIPMENT

OAKLAND, Cal.—G. F. Bishop Co., 1950 San Bruno Ave., San Francisco, at \$725 less \$225 awarded contract by Board of Playground Directors, Oakland, to furnish one light golf course tractor, 4-cylinder.

PORTLAND, Ore.—Until March 13, 10:30 A. M., bids will be received by Multnomah County Commission to furnish 7 current model automobiles for Sheriff's department. Specifications obtainable from county clerk. Certified check 10% required with bid.

WASHINGTON, D. C.—Until March 8, 11 A. M., under No. 363-M, bids will be received by the Procurement Division, Veterans' Administration, Washington, D. C., to furnish: one wheel type tractor; one track type, crawler tractor.

Specifications obtainable from above and on file with domestic trade department, Oakland Chamber of Commerce.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Until March 20, 7:30 P. M., bids will be received by Daniel McSweeney, city clerk, to furnish one Chevrolet automobile, 1933 Standard Coupe, 110-in. wheel base, equipped with bumpers tire lock and 5 5:25x18 balloon tires; 6 cylinder motor. State allowance for Ford Roadster.

FIRE ALARM SYSTEMS

ALAMEDA, Alameda Co., Cal.—City council will purchase new fire apparatus to replace present engine No. 4. New engine will have 10,000-gal. capacity. Ralph M. Bryant, city manager.

RESERVOIRS AND DAMS

SACRAMENTO, Cal.—Carter, Austin & Nicol, Oakland, plan to construct 170 ft. dam at Widow Creek, near Coloma; with the intention of selling water to City of Sacramento.

PIPE LINES, WELLS, ETC.

BURBANK, Los Angeles Co., Cal.—J. H. McCambridge, public service superintendent, is preparing plans for the laying of 8-in. water mains on Clark St. Labor will be paid from county stabilization funds.

SEWERS AND SEWAGE DISPOSAL PLANTS

SIGNAL HILL, Los Angeles Co., Cal.—Contracts for furnishing vit. sewer pipe have been awarded by the city council as follows:

Gladding, McBean & Co.—1000 feet or more 12-in. pipe at 46c ft. and 12-in. wyes or tees at \$1.82 each; 100 ft. 6-in. at 18½c ft. with wyes or tees at 74c each.

Pacific Clay Prod. Co.—1000 to 4,000 ft. 8-in. pipe at 24.5c f. with tees or wyes at \$1.10 each.

The bids, which were opened Feb. 21, were:

Gladding, McBean & Co.—12-in. 46c ft.; 10-in., 35c ft.; 8-in. 24.5c ft.; 6-in. 18.5c ft. 2 Wyes or tees: 12-in., \$1.82 each; 10-in., \$1.25 each; 8-in., \$1.10 ea.; 6-in. 74c each; 6-in., ½ or ¾ bends, 56.5c.

Pacific Clay Products Co.—Same as Gladding, McBean Co. except did not bid on bends.

Los Angeles Brick Co.—Bid irregular—12-in., 46c; 10-in., 33c; 8-in., 24.5c 6-in., 18.5c; wyes or tees: 12-in., \$1.82 10-in., \$1.25; 8-in., \$1.10; 6-in., 74c; 6-in. bends, 56.5c each.

SAN LEANDRO, Alameda Co., Cal.—Until March 13, 7:45 P. M. (postponed from March 6) bids will be received by A. E. Pelton, city manager, to furnish:

- (1) 10,000 ft. 12-in. vit. sewer pipe;
- (2) 12,000 ft. 14-in. do;

Certified check 10% required with bid. John C. Thayer, city engineer. Pipe is to be used for construction of sewer to bay; an unemployment relief project.

LOS ANGELES, Calif.—County supervisors have appropriated \$107,000 as an allocation to the city for the purchase of material for use in the construction of a storm drain to be built in the district from Florence Ave. to Slauson Ave. and from Western Ave. to Crenshaw Blvd. The material is principally cement and reinforced concrete pipe ranging from 12- to 101-in. in diameter. The labor will amount to \$200,000, funds for which will be allocated from the next Reconstruction Finance Corp. loan to the county. Plans for the drain have been prepared by L. W. Armstrong, engineer of Storm Drain Design, City Hall. All construction will be supervised by the city.

LOS ANGELES, Calif.—Hearing on the proposed construction of sewers in Belvedere Gardens, Unit No. 4, under C. I. No. 757, has been continued by county supervisors from Feb. 27 to March 27. The work as planned involves 4.73 miles of sewer and is estimated to cost \$66,300. The estimated quantities are:

- (1) 17,380 ft. 8-in. vit. sewer;
- (2) 3500 ft. 8-in. vitrified sewer with standard concrete cradle;
- (3) 870 ft. 8-in. vit. sewer (encased);
- (4) 475 ft. 8-in. Class B cast iron pipe
- (5) 410 ft. 10-in. vit. sewer;
- (6) 1840 ft. 10-in. vit. sewer with standard concrete cradle;
- (7) 6 ft. 10-in. vit. sewer (encased);
- (8) 24 ft. 10-in. Class B cast iron pipe
- (9) 156 ft. 12-in. vit. sewer;
- (10) 210 ft. 12-in. vitrified sewer with standard concrete cradle;
- (11) 16 ft. 12-in. Class B cast iron pipe
- (12) 12 ft. 12-in. vit. lateral sewer with standard conc. cradle;
- (13) 11,250 ft. 6-in. vit. house sewers;
- (14) 25 stand. flushing manholes;
- (15) 5 standard double flushing manholes;
- (16) 41 standard manholes;
- (17) 14 standard drop manholes;
- (18) 7 standard double drop manholes;
- (19) 12 stand. junction chambers;
- (20) 670 ft. 6-in. vit. chimney pipe;
- (21) 30 ft. 6-in. do;
- (22) stand. extension for brick struc.;

LOS ANGELES, Calif.—Hearing on the proposed construction of sewers in Belvedere Gardens, Unit No. 5, under County Improvement No. 770, has been continued by county supervisors from Feb. 27 to March 27. The items are:

- (1) 22,860 ft. 8-in. cement pipe main sewer;
- (2) 5440 ft. 8-in. do with conc. cradle

- (3) 96 ft. 8-in. Class B cast iron pipe or Class 150 centrif. cast C. I. pipe;
 - (4) 1570 ft. 12-in. cement pipe main sewer;
 - (5) 2855 ft. 12-in. do with conc. cradle
 - (6) 1070 ft. 15-in. do;
 - (7) 46 ft. 15-in. do (encased);
 - (8) 15,630 ft. 6-in. cement pipe house sewers;
 - (9) 160 ft. 6-in. cast iron soil pipe house connection sewers;
 - (10) 32 stand. flushing manholes;
 - (11) 3 double flushing manholes;
 - (12) 59 brick manholes;
 - (13) 16 drop manholes;
 - (14) 3 double drop manholes;
 - (15) 20 stand. junction chambers;
 - (16) 560 ft. 6-in. cement pipe chimney pipe;
 - (17) 130 ft. 6-in. do;
 - (18) 14 ft. stand. extension for orick structures;
 - (19) 1992 ft. ¾-in. red brass pipe extension to water mains;
 - (20) 1 break into existing manhole of County of L. A. and for new channel in base.
- The engineer's estimate is \$86,553.

MISCELLANEOUS CONSTRUCTION

CORONADO, San Diego Co., Cal.—Francis B. Smith, consulting engineer for the California Bridge and Tunnel Co. of San Francisco, appeared before the Coronado city council Feb. 20 with assurance that finances for construction of the tunnel between Coronado and San Diego would be forthcoming within the next ten months. Mr. Smith stated that the application for a loan of \$3,000,000 will be made to the Reconstruction Finance Corp. and that \$2,000,000 will be provided by junior financing. The statement was made to the council during a hearing on the application of the U. S. Department of Commerce to erect four 125-ft. towers on the northeast part of the island for a radio directional beam for planes. The site is the exact site planned for the Coronado terminus of the tube. Mr. Smith suggested that the department change its proposed location.

LOS ANGELES, Cal.—F. E. Weymouth, General Manager and Chief Engineer of the Metropolitan Water District, announced Saturday Feb. 25, that he had been notified by E. F. Henoch of the Wenzel & Henoch Construction Co. of Milwaukee, Wis., and by representatives of the bonding companies that the company's surety bonds in connection with the contract for the construction of the San Jacinto Tunnel had been oversubscribed by the group of bonding companies participating. Mr. Weymouth stated that the district is prepared to execute and sign a contract with this firm as soon as he necessary papers and legal preliminaries have been settled. These formalities, he stated, would be completed probably within the next few days and that he had every reason to expect that the work on the tunnel will be started early in March.

LONG BEACH, Los Angeles Co., Cal.—Charles L. Heartwell, chairman of the Municipal Water Commission, has announced that he is advocating the construction of a vehicular tunnel connecting Terminal Island with Long Beach under the harbor entrance channel, as part of the Reconstruction Finance Corp. construction program. The cost is estimated at \$2,600,000.

WATERWORKS

INGLEWOOD, Los Angeles Co., Cal. Layne & Bowler Corp., 900 Santa Fe Ave., Los Angeles, awarded contracts by city council Feb. 20, for equipment as follows:

Furnishing one deep well turbine pump for City Well No. 16 at \$1753.75
Furnishing and installing one 7-stage booster unit at City Well No. 16, at \$884.
The bids were opened Feb. 18.

LOS ANGELES, Cal.—Adams Pipe Co. awarded contract by H. E. Russell, County Purchasing Agent, for furnishing galvanized standard steel pipe under Spec. No. 5195.

25

LOS ANGELES, Cal.—Bids for furnishing bell and spigot, Class 250, cast iron water pipe, under Spec. No. 3002, opened by A. J. Holm, City Purchasing Agent, Feb. 21. Bids were taken as follows:

- (1) 30,000 ft. 8-in. I. D. to be delivered about April 15, 1933;
 - (2) 30,000 ft. 8-in. I. D. to be delivered on or about June 15, 1933;
 - (3) 30,000 ft. 8-in. I. D. to be delivered on or about Aug. 15, '33
- Above to be f.o.b. cars or trucks, Dept. of Water and Power Hewitt St. Yard, Los Angeles.
- (4) 20,000 ft. 8-in. I. D. to be delivered on or about May 15, 1933;
 - (5) 20,000 ft. 8-in. I. D. to be delivered on or about July 15, 1933;
 - (6) 20,000 ft. 8-in. I. D. to be delivered on or about Sept. 15, 1933.
- Above to be f. o. b. cars or trucks, Dept. of Water and Power, Slauson and Compton Ave. Yard, Los Angeles.

National Cast Iron Pipe Co.—(1) 90.6c; no bids on other items. No discount for combined award. Terms, net. Alt. f.o.b. cars Hewitt Spur, 89c based on proposed new rail rate. Lengths, 18 ft. Delavand make plain end, Type 1.

American Cast Iron Pipe Co.—(1) 91.5c; (2) 91.5c; (3) 91.5c; (4) 90.5c; (5) 90.5c; (6) 91.5c. Terms, net. No discount for combined award. Alt. f. o. b. cars Hewitt spur, deduct 1.6c per ft. on proposed new rail rate. Monocast, Type II.

Utilities Supply Co.—(1) 92c; (2) 93c (3) 94c (4) 92c (5) 93c (6) 94c. No discount for combined award. Terms, net. Lengths, 16 ft. 6-in. Alt. rail delivery, deduct 2c ft. based on new rail rate. R. D. Wood & Co. sand-spun, bell and spigot end.

Pacific States C. I. Pipe Co.—No bids on first three items; from Provo by rail (4) 93c (5) 93c (6) 96c. No discount for comb. award. from Birmingham, Ala.—(4) 95c (5) 95c (6) 95c. By trucks, (4) 96.5c (5) 96.5c (6) 96.5c. Lengths, 12 or 16 ft. McWayne, Type III.

U. S. Pipe & Foundry Co.—(1) 91c (2) 91c (3) 91c (4) 91c (5) 91c (6) 91c. No discount for combined award. Terms, net. Lengths, 12 or 18 ft. Alt. f.o.b. Hewitt Spur, 89.4c based on new rail rate. Delavaud, Type I.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$6385 submitted lone bid to East Bay Municipal Utility District to furnish 12 sections of steel pipe in lengths of approximately 20 ft., dia. 54- to 65-in. Bid held under advisement.

BEVERLY HILLS, Los Angeles Co. Cal.—Until 8 P. M., March 14, bids will be received by city council to furnish and lay cast iron pipe line in West Hollywood together with fittings, services, accessories, connections to existing mains and resurfacing. A list of the pipe to be furnished is as follows:

- (1) 800 ft. 8-in. cast iron pipe;
 - (2) 2800 ft. 6-in. cast iron pipe;
 - (3) 3250 ft. 4-in. cast iron pipe.
- Salisbury, Bradshaw and Taylor, 714 W 10th St., Los Angeles, engineers.

OAKLAND, Cal.—Until March 10, 8 P. M. bids will be received by John H. Kimball, Secretary, East Bay Municipal Utility District, 512 16th St., Oakland, to furnish 30 tons of joint compound for cast iron pipe, under Spec. LS-100, obtainable from above office.

GLENDALE, Los Angeles Co., Cal.—Until March 9, 10 A. M., bids will be received by city council to furnish f.o.b. trenchside, Glendale, valves and cast iron pipe, as follows:

- (1) 4 20-in. vertical hub end gate valves with spur gears, valves to conform to specifications of American Water Works Assn. and to open by turning nut counterwise.
- Bidders to furnish name of manufacturer, delivery date and specifications of valves they propose to furnish, including net weight of valve and diameter of operating stem.
- (2) 3400 ft. 24-in. Class C cast iron pipe;
- (3) 10 tons Class D bell and spigot cast iron fittings.

Alternate bids will be received on item 2 for Class 250 cast iron pipe, Federal Spec. WW-P-421.

Certified check 10%. G. E. Chapman, city clerk. P. Diederich, Supt. of Plant and Production.

REDWOOD CITY, San Mateo Co., Cal.—County Purchasing Agent will purchase the following supplies in connection with the \$36,953 Las Pulgas storm water conduit to be constructed along the Alameda:

- 2550 ft. 2½x3½-in. box conduit, concrete,
 - 700 ft. 3x3½-in. do.,
 - 1000 ft. 3½x3½-in. do.,
 - 800 ft. 21-in. vit. clay pipe,
 - 100 ft. reinf. conc. pipe, 18-in., Manholes,
- Catch basins.

An unemployment relief project.

SAN LUIS OBISPO, Cal.—Hearing on San Luis Obispo County Waterworks District No. 3 bonds, for water system at Cambria, ordered continued to March 6, 3 P. M.

LYNDEN, Wash.—Until March 6, 8 P. M., bids will be received by city council to furnish:

- (1) 4800 ft. 6-in. c. i. pipe, class B or class 150,
 - (2) 3 ½x6-in. c. i. tees, hub end,
 - (3) 6 6x5-in. c. i. tees, hub end.
- Delivery, April 15.

KINGSBURG, Fresno Co., Cal.—City council sets March 27 as date for bond election for \$8,000 bonds to replace old pipe in municipal water system. C. W. Trabing, city attorney.

ARCADIA, Los Angeles Co., Calif.—Layne & Bowler Corp., 900 Santa Fe Ave., awarded contract by city council at \$586.00 for repairs to one Layne & Bowler 7-stage deep well turbine pump. The bids were opened Feb. 21.

4-MI. GRADING — SAN DIEGO COUNTY

SAN DIEGO COUNTY, Cal.—Daley Corp., 4430 Boundary St., San Diego, at \$89,040.50 submitted low bid Feb. 23 to State Highway Commission, Sacramento, to grade 4.4 mi. between Barnett Ave. and Balboa Ave., involving:

- (1) 233 sta. clear and grub right-of-way;
- (2) 30,500 cu. yds. rdwy. excav., unclassified;
- (3) 210,000 sta. yds. overhaul;
- (4) 254,500 cu. yds. imported borrow;
- (5) 14,500 cu. yds. struc. excav.;
- (6) 880 cu. yds. Class A cem. conc. (struc.);
- (7) 1,350 cu. yds. rock foundation;
- (8) 83,000 lbs. bar reinf. steel (struc.);
- (9) 1,500 lbs. misc. iron and steel (struc.);

- (10) 340 lin. ft. 8-in. corr. metal pipe;
 - (11) 364 lin. ft. 12-in. do;
 - (12) 144 lin. ft. 14-in. do;
 - (13) 192 lin. ft. 18-in. do;
 - (14) 432 lin. ft. 24-in. do;
 - (15) 376 lin. ft. 30-in. do;
 - (16) 800 lin. ft. 36-in. do;
 - (17) 72 lin. ft. 48-in. do;
 - (18) 7,300 M. gals. water;
 - (19) 2.4 miles new property fence;
 - (20) 12 fence gates;
 - (21) 50 culvert markers;
 - (22) 233 sta. finish roadway;
 - (23) 64 monuments complete in place.
- State will furnish corrugated metal pipe and spillway assemblies.
- Complete bids follow:
- (A) Daley Corp., San Diego, \$89,040.50
 - (B) J. L. Connor and K. Kristich, Monterey, \$99,962.60.

- (C) Weymouth Crowell and E. Penn Watson Jr., Pasadena, \$101,568.70
- (D) Merritt-Chapman & Scott, San Pedro, \$103,529.30.

GR. 3-MI. ASHFORK-KINGMAN HWY—ARIZONA STATE

ARIZONA STATE—Martin Brothers Trucking Co., 1389 Gladys Ave., Long Beach, awarded contract by the State Highway Commission, Phoenix, Feb. 24, at \$44,020.34, for highway construction on the Ashfork-Kingman Highway, E-80-F (A. F. E. No. 6655). The work, which is located about 30 miles northeast of the town of Kingman, consists of the grading and draining of approximately three miles of roadway, involving:

- ROADWAY—INDIAN SER. LAND
(1) 16,895 cu. yds. rdwy. excav. (unclass.);
(2) 1826 cu. yds. drainage excav. (unclass.);
(3) 500 lin. ft. grader ditches;
(4) 1200 cu. yds. slides and overbreakage;
(5) 300 cu. yds. struc. exca. (unclass.)
(6) 1787 cu. yds. borrow excav. (unclass.) inc. cushion material;
(7) 105,000 sta. yds. earthwork overhaul (inc. haul of cushion material);
(8) 35 cu. yds. Class A concrete (including cement);
(9) 48 cu. yds. Class B do;
(10) 2190 lbs. reinf. steel;
(11) 152 lin. ft. 30-in. C.M.P.;
(12) 306 lin. ft. 36-in. C.M.P.;
(13) 1 cattle guard, type B;
(14) 3220 lin. ft. cable road guard;
(15) 125 lin. ft. standard line fence.
STRUC. OVER 20-FT. CLEAR SPAN (Indian Service Land)
(16) 650 cu. yds. drainage excav. (unclass.);

- (17) 132 cu. yds. struc. do;
(18) 125 cu. yds. Class A conc. (inc. cement);
(19) 13,010 lbs. reinf. steel.

ROADWAY

- (Outside of Indian Service Land)
(20) 12,059 cu. yds. rdwy. excav. (unclass.);
(21) 2210 cu. yds. drainage do;
(22) 3050 lin. ft. grader ditches;
(23) 800 cu. yds. slides and overbreakages;
(24) 309 cu. yds. structure excav. (unclass.);
(25) 11,125 cu. yds. borrow excav. (unclass. inc. cushion material);
(26) 34,000 sta. yds. earthwork overhaul (inc. haul of cushion material);
(27) 93 cu. yds. Class A concrete (inc. cement);
(28) 27 cu. yds. Class B do;
(29) 7247 lbs. reinf. steel;
(30) 38 lin. ft. 30-in. C.M.P.;
(31) 264 lin. ft. 36-in. C.M.P.;
(32) 2300 lin. ft. cable road guard.

- The total bids were:
(A) Martin Bros. Trucking Co., \$44,020.34.
(B) Hodgman & MacVicar Co., Holbrook, Ariz., \$44,909.57.
(C) Pearson & Dickerson, Riverside, \$45,679.91.
(D) Vinson & Pringle, Phoenix, \$47,844.52.
(E) Skousen Bros., Mesa, Ariz., \$49,903.18.
(F) H. L. Royden, Phoenix, \$51,970.96.
The unit bids were:

IRVINGTON PORTAL PIPE LINE—HETCH HETCHY

SAN FRANCISCO—American Concrete & Steel Pipe Co., 19th Ave. and Estuary, Oakland, at \$129,606.50 under proposition B and W. A. Bechtel Co., 155 Sansome St., San Francisco, at \$130,313 under Proposition A, submitted low bids Feb. 24 to Public Utilities Commission, to construct pipe line in the Bay Crossing Division of the Hetch Hetchy Aqueduct, H. H. W. S. Contract No. 137, consisting of 7120 ft. pipe line, Irvington Portal (west portal of Coast Range Tunnel) westerly to junction with east, and existing Bay Crossing pipe line at a

point one-half mile north of Irvington, Alameda County. The Irvington portal is 1 1/2-mi. north of Mission San Jose. Bidders follow

- (A) W. A. Bechtel, San Francisco, (Prop. A), \$130,313.
(B) C. L. Harney, San Francisco, (Prop. A), \$132,102.50.
(C) Youdall Constr. Co., San Francisco (Prop. A), \$135,950.60.
(D) Lindgren & Swinerton (Prop. A), \$136,958.65.
(E) American Concrete & Steel Pipe Co. (Prop. B), \$129,606.50.

AWARD

ARIZONA STATE—Martin Brothers Trucking Co., 1389 Gladys Ave., Long Beach, awarded contract by the State Highway Commission, Phoenix, Feb. 24 at \$56,911.41 (using road mix) for highway construction on the Phoenix-Prescott Highway, E-84-B (A.F.E. No. 8954) and E-84-C (A.F.E. No. 8920).

L. E. Dixon Co., 609 S Grand Ave., Los Angeles, submitted low bid on plant mix at \$62,607.48.

The work, which extends from the Wickenburg bridge northerly about 15 1/4 miles to town of Congress Junction, consists of the placing of sub-grade stabilizer and the oil processing by either the plant or road mix method, involving:

PLANT MIX FOR E-84-B

- (1) 293 M. gallons water applied to roadway;
(2) 22,417 tons plant mixed oil treated surf. inc. haul and all materials except oil;
(3) 224,167 gals. asph. road oil plant mix;
(4) 18,314 gals. asph. road oil for seal coat;
(5) 4877 cu. yds. shoulder material;
(6) 18,584 cu. yd. mi. shoulder material haul;
(7) 12,473 mi. spread, compact and finish;
(8) 959 cu yd. screenings for seal coat.

STRUCTURES OVER 20-FT. CLEAR SPAN

- (9) 23 tons plant mix oil treat. surf.;
(10) 277 gals. asph. road oil, plant mix
(11) 23 gals. asph. road oil for seal coat.
(12) 0.010 mile spread, compact and finish;
(13) 1 cu. yd. screenings for seal coat;
(14) 250 cu. yds. spec. min. aggregate, stockpile;

PLANT MIX FOR E-84-C

- (1) 2574 cu. yds. sub. stabilizer;
(2) 9809 cu. yd. mi. sub stab., haul;
(3) 75 M. gals. water applied to roadway;
(4) 5766 tons plant mix oil treat. surf.
(5) 57,655 gals. asph. road oil for plant mix;
(6) 4710 gals. asph. road oil for seal coat;
(7) 1352 cu. yds. shoulder material;
(8) 6931 cu. yd. mi. shoulder material, haul;
(9) 3,209 miles spread, compact and finish;
(10) 247 cu. yds. screenings for seal coat;
(11) 73 tons plant mix oil treat. surf.
(12) 734 gals. asph. road oil plant mix
(13) 1 cu. yd. screenings for seal coat;
(14) 0.040 mile spread, compact and finish;
(15) 3 cu. yds. screenings for seal coat
(16) 64 cu. yds. spec. min. aggregate, stockpile;

ALTERNATE ROAD MIX E-84-B

- (1) 293 M. gals. water applied to roadway;
(2a) 16,279 cu. yds. min. aggregate;
(2b) 125,211 cu. yds. mi. min. aggregate, haul;
(3a) 293,029 gals. asph. road oil;
(4) 18,314 gals. asph. road oil for seal coat;
(5) 4877 cu. yds. shoulder material;
(6) 18,584 cu. yd. mi. shoulder material, haul;
(7a) 12,473 miles mix, lay down and finish;
(8) 959 cu. yds. screenings for seal coat;

STRUCTURES OVER 20-FT. CLEAR SPAN

- (9a) 20 cu. yds. min. aggregate;
(9b) 155 cu. yd. mi. min. agg., haul;
(10a) 363 gals. asph. road oil;
(11) 23 gals. asph. road oil for seal coat;
(12a) 0.010 mile mix, lay down and finish;
(13) 1 cu. yd. screenings for seal coat;

(F) Bonna Pipe Co. of America (B), \$143,019.25.

Bids were taken under two alternate propositions, as follows: (a) steel pipe line and accessories; (b) steel cylinder reinforced concrete pipe line with short length of steel pipe and accessories.

Project involves:

- (1) furnish and lay 60-in. steel pipe, 5/16-in. plate, Prop. (A) \$3860 ft. (2) do, 3/4-in. plate, (A) 3220 (B) 255. (3) felt wrapping, (A) 103,000 sq. ft.; (B) 2200. (4) Gunite casement, 2-in. thick, (A) 550 sq. ft.; (B) 550. (5) do, 3/4-in. thick, (A) 10,000; (B) 2000. (6) expansion joints, (A) 1; (B) (7) manholes on pipe, (A) 5; (B) 5. (8) saddle nozzles, (A) 500 lbs.; (B) 500 lbs.; (9) companion flanges, (A) \$1000 lbs.; (B) 1000 lbs.; (10) gate valves, 6-in., (A) 5; (B) 5. (11) do, 8-in., (A) 1; (B) 1; (12) do, 16-in., (A) 1; (B) 1; (13) air valves, (A) 5; (B) 5. (14) air release valves, (A) 3; (B) 3. (15) steel frames and covers, (A) 2,000 lbs.; (B) 2000 lbs.; (16) furnish and lay wrought steel pipe 16-in. outside dia., (A) 120 ft.; (B) 120 ft.; (17) 8-in. flanged cast iron pipe, (A) 2000 lbs.; (B) 2000 lbs.; (18) corrugated metal pipe culverts, (A) 100 ft.; (B) 100 ft.; (19) steel bolts, nuts, washers, (A) 1000 lbs.; (B) 1000 lbs.; (20) steel manifold and accessories, (A) 1; (B) 1; (21) metal valve house, (A) 2500 lbs.; (B) 2500 lbs.; (22) miscellaneous steel work, (A) 2,000 lbs.; (B) 2000 lbs.; (23) install fittings furnished by city (A) 1000 lbs.; (B) 1000 lbs.;

- (24) install Venturi meter and butterfly valve (furnished by city) (A) 16,000 lbs.; (B) 16,000 lbs.; (25) install misc. metal work (furnished by city) (A) 10,000 lbs.; (B) 10,000 lbs.; (26) earth excavation, (A) 16,000 cu. yds.; (B) 16,000 cu. yds.; (26a) excavation for culvert under r.r. (A) 270 cu. yds.; (B) 270 cu. yds.; (27) rock excavation, (A) 600 cu. yds.; (B) 600 cu. yds.; (28) earth embankments east of r.r., (A) 700 cu. yds.; (B) 1200 cu. yds.; (28a) do, west of r.r., (A) 300 cu. yds.; (B) 500 cu. yds.; (29) concrete, Class A, (A) 240 cu. yds.; (B) 180 cu. yds.; (30) do, Class B, (A) 20 cu. yds.; (B) 20 cu. yds.; (31) do, Class C, (A) 50 cu. yds.; (B) 50 cu. yds.; (32) reinf. steel, (A) 45,000 lbs.; (B) 30,000 lbs.; (33) furnish and place steel beams, (A) 10,000 lbs.; (B) 10,000 lbs.; (34) valve house, (A) 1 (B) 1; (35) Venturi meter house, (A) 1; (B) 1; (36) crushed rock pavement, (A) 2,000 sq. ft.; (B) 2000 sq. ft.; (37) property line posts, (A) 60; (B) 60; (38) wood fences, (A) 3 MBM; (B) 3; (39) gates in right of way fences, (A) 4; (B) 4; (40) extra cement, (A) 100 bbl.; (B) 100 bbl.; (41) valve connection, (A) 1; (B) 1; (42) expansion joint in existing pipe line (A) 1; (B) 1; (43) furnish and lay 57-in. steel cylinder reinf. concrete pipe east of station 1734, (B) 2240 ft.; (44) do, west of station 1734, (B) 4,585 ft.

Unit bids follow:

- (14) 250 cu. yds. spec. min. aggregate for stockpile; ALTERNATE ROAD MIX E-84-C (1) 2574 cu. yds. sub. stab.; (2) 9809 cu. yd. mi. do, haul; (3) 75 M. gals. water applied to roadway; (4a) 4187 cu. yds. min. aggregate; (4b) 3693 cu. yd. mi. min. agg., haul; (5a) 75,366 gals. asph. road oil; (6) 4710 gals. asph. road oil for seal coat; (7) 1352 cu. yds. shoulder material; (8) 6931 cu. yds. shoulder material, haul; (9a) 3.209 miles mix, lay down and finish; (10) 247 cu. yds. screenings for seal coat;

STRUCTURES OVER 20-FT. CLEAR SPAN

- (11a) 53 cu. yds. min. aggregate; (11b) 58 cu. yds. mi. min. agg., haul; (12a) 960 gals. asph. road oil; (13) 60 gals. asph. road oil for seal coat; (14a) 0.040 miles mix, lay down and finish; (15) 3 cu. yds. screenings for seal coat (16) 64 cu. yds. spec. min. agg. for stockpile.

The total bids were:

- (A) Martin Bros. Trucking Co., road mix, \$56,911.41. (B) L. E. Dixon Co., Los Angeles, plant mix, \$62,607.48. (C) Heafey-Moore Co. and J. A. Casson, Phoenix, road mix, \$65,023.46. (D) Phoenix-Tempe Stone Co., Phoenix, road mix, \$67,696.95; plant mix \$76,819.47. (E) Ralph Pleasant Co., Phoenix, plant mix, \$88,338.02.

3.9-MI. GRADE & SURFACE—SISKIYOU COUNTY

SISKIYOU COUNTY, Cal. — J. F. Shepherd, 108 E. Miner Ave., Stockton, at \$85,909.50 submitted low bid February 23 to State Highway Commission, Sacramento, to grade and surface with untreated crushed gravel or stone and bituminous surface treatment to be applied over 3.9 mi. bet. Dorris and Oregon State Line, involving:

- (1) 163,200 cu. yds. rdwy. excav., unclass;
- (2) 1,831,200 sta. yds. overhaul;
- (3) 200 cu. yds. struc. excav.;
- (4) 17,050 tons untr. cru. gravel or stone surfacing;
- (5) 950 M. gals. water;
- (6) 5 cu. yds. class A cem. concr. (struc.);
- (7) 170 lbs. bar reinf. steel (struc.);
- (8) 300 bbls. heavy fuel oil;
- (9) 105 tons asphalt road oil;
- (10) 2,620 tons screenings;
- (11) 34 tons cut-back asphalt road oil seal coat;

- (12) 262 lin. ft. 12-in. corr. metal pipe;
- (13) 604 lin. ft. 18-in. do;
- (14) 130 lin. ft. 24-in. do;
- (15) .87 mi. new property fence;
- (16) 2 fence gates;
- (17) 201 sta. finish roadway;
- (18) 41 monuments complete in place. State will furnish corrugated metal pipe.

- Complete bids follow:
- (A) J. F. Shepherd, Stockton, \$85,909.50.
 - (B) A. Teichert & Son, Sacramento, \$114,670.70.
 - (C) Granfield, Farrar & Carlin, San Francisco, \$117,440.20.
 - (D) Dunn & Baker and Johnson Bros., Klamath Falls, \$119,676.20.

SAN DIEGO RIVER BRIDGE—SAN DIEGO COUNTY

SAN DIEGO COUNTY, Cal.—B. O. Larsen, 1340 E St., San Diego, at \$99,683.05 submitted low bid March 1 to State Highway Commission, Sacramento, to construct a deck plate girder bridge with concrete decks across San Diego River in San Diego, consisting of eight 80-ft. spans on concrete piers and abutments with pile foundations, involving:

- (1) 3,200 cu. yds. struc. excav;
- (2) 13,020 lin. ft. furnish untreated Douglas fir piles, inc. test piles;
- (3) 735 lin. ft. furnish creosoted Douglas fir piles;
- (4) 455 drive creosoted and untreated Douglas fir piles, inc. test piles;
- (5) 1,360 lin. ft. reinf. concrete piles, including test piles;
- (6) 680 cu. yds. Class A cement concrete (footing blocks);

- (7) 2,175 cu. yds. Class A do (struc.);
- (8) 65 cu. yds. Class A do (slope paving);
- (9) 45 cu. yds. Class E Portland cement concrete;
- (10) 230,000 lbs. bar reinf. steel;
- (11) 984,000 lbs. struc. steel;
- (12) 25,200 lbs. cast steel;
- (13) 3.5 ft. h.m. creosoted Douglas fir timber (struc. grade);
- (14) 1,925 lin. ft. traffic stripe;
- (15) 1,305 lin. ft. curb stripe;
- (16) 1 lot misc. items of work.

See call for bids under official proposal section in this issue.
Complete bids follow:
(A) B. O. Larsen, San Diego, \$99,683.05.
(B) Frank Doran, San Diego, \$103,721.35.

HOUSE EXHIBIT IS OPENED IN EASTBAY STORE

Architects Sponsor Display to
Encourage Home
Builders

Architects of the Eastbay are represented in an architects' exhibition of small houses, which has been opened at Breuner's Furniture Store, Oakland, and will continue until the end of the month.

Exhibits have been furnished by architects in Oakland, Berkeley, Alameda and Richmond.

Represented in the display are houses of various types of architectural design, ranging from \$4500 to \$7500 at present-day building costs. Details of floor plans and exteriors, as well as specifications and cost data, are shown.

The exhibition is being given under the auspices of the State Association of California Architects and the Alameda Society of Architects.

One of its main purposes is to stimulate interest in home building as a means of aiding employment, and to inform the public on the present-day low building costs. In addition to homes, there are exhibits showing recent examples by local architects of alterations and additions as applied to houses, store buildings and other types of structures.

During the exhibition talks will be given by several speakers. Among these are Harris Allen, president of the State Association of California Architects; Howard Gilkey, landscape architect; Franklin Blair and Carl S. Replogle.

The list of Eastbay architects represented includes Russell G. de Lappe, George Ellinger, Hardman & Russ, Angelo Hewetson, Charles W. McCall, Miller & Warnecke, James T. Narbett, Gwynn Officer, Wm. E. Schirmer, George Simonds, Edwin L. Snyder, Chester Treichel, Wm. Rich, Williams & Wastell, W. R. Yelland and Arthur Cobblestick, landscape architect.

Carl I. Warnecke is chairman of the exhibition committee.

OFFICES MOVED

De Laval Steam Turbine Company has moved its district offices to the Rialto Building. The company formerly was located at 61 Beale st.

THE WEEK'S NEWS

Highlights

BAY BRIDGE BIDS: Bids were opened Tues. and Wednes. for more than \$27,000,000 worth of work on the San Francisco-Oakland Bay Bridge. Low bids were: Columbia Steel Corp., for West Bay superstructure at \$13,732,471.80 and East Bay superstructure at \$8,798,096; Bridge Builders, Inc., at \$4,495,854 for East Bay substructure. (Complete report of bids received is included in the Engineering Section).

Time for receiving bids on two other contracts was extended until March 28 and March 29 in order to enable prospective bidders to arrange financing. These are for the San Francisco anchorage, estimated at \$1,700,000 and the Yerba Buena Island crossing at \$2,500,000.

Openings thus far have each shown the bid price to be substantially below the engineer's estimate, Chief Engineer C. H. Purcell announced. Saving over original figures on contracts to date is \$7,580,890, and indicates that the entire bridge structure will be completed at a cost of \$53,670,802, Purcell said. This figure is for structural costs alone and does not include interest, insurance, or contingency allowance.

SAN FRANCISCO JAIL: Department of Public Works set March 29 as date for opening bids on San Francisco county jail to be built at Sneath Ranch site, San Mateo county. Appropriation \$490,000. (See Building News Section.)

EXCHANGE ELECTIONS: Oakland Builders' Exchange will hold its annual meeting and election of directors, Monday, March 13; San Francisco, March 20.

PROGRAM IS SET FOR BUILDERS' EXCHANGE MEET

Two-Day Annual Convention
In Los Angeles on
March 17-18

The program for the annual convention of the State Builders' Exchange to be held in Los Angeles March 17 and 18 was announced yesterday.

Preceding the convention a banquet for the construction industry has been arranged by the industry committee of the Los Angeles chamber of commerce. Delegates to the convention are invited to attend the banquet which will be held Thursday night, March 16.

Reservations should be made with Louis R. Ball, executive secretary of the Los Angeles Builders' Exchange.

The banquet is sponsored by the American Institute of Architects, Associated General Contractors, Builders' Exchange, Merchant Plumbers Association, Structural Engineers Association, Electric Club, Electrical Contractors and Dealers Association and Contracting Plasterers Association.

Following is the program for the two-day session:

FRIDAY, MARCH 17th

Registration: Lobby of the Alexandria, 8:00 A. M. Friday.

Business and Committee: Ball room and Committee rooms, 9:30 A. M., until noon. Two hour intermission for luncheon as you will. Ball room and Committee rooms, 2:00 P. M. to 5:00 P. M. Friday evening, Paris Inn, 210 East Market Street.

Speaker: Lynn Atkinson, President of the Southern California Chapter of Associated General Contractors of America, will speak at the opening business session on Friday.

SATURDAY, March 18th

Business and Committee: Ball room and Committee rooms of the Alexandria from 9:30 A. M. until noon. The afternoon as you will. Saturday evening, 6:30 P. M. at The Alexandria: banquet, entertainment, dancing.

Speaker: Sylvester Weaver, Past President of the Los Angeles Chamber of Commerce, will speak at the business session on Saturday.

Special events have been arranged for the entertainment of wives of delegates, including visits to the motion picture studios and other points of interest.

SEASON UPTREND IN CONSTRUCTION DUE THIS MONTH

U. S. Study Shows Normal Gain of One-third During March

If 1933 construction follows the seasonal trend as indicated by the 1929 Census of Construction, now being issued by the U. S. Department of Commerce, by April a one-third increase in construction may be expected over February, and in May an advance of 12 percent over April, with June and July increasing each over the preceding month up to August and September, the construction peak months of the year. In other words, according to American Forest Products Industries, construction will soon enter its best six months of the year—a fact to be taken into account in business forecasts.

Contrary to general belief, the late summer and not the spring is the big building season of the year, although the increase from March to April in building employment is greater than between any other two months.

In 1924 the President's Conference on Unemployment surveyed the subject of seasonal operation in the construction industry and stressed the fact that bad weather was not the principal cause of seasonal idleness, but fixed customs in the building trades. It concluded that for most types of construction it is possible to build the year round in all parts of the United States. The 1929 Construction Census indicates that progress has been made toward greater stability in employment from month to month in the construction industry, despite the persistence of a distinct seasonal trend in all lines of construction activity in 1929. Seasonal fluctuation is apparently not so pronounced as it was ten years ago when (in 1922) the monthly employment of building labor was about 45 percent in January of what it was in July.

In 1929, building employment under contractors and builders was 59 percent in January of what it was in August and residential building was 56 percent of what it was in its peak month, or June.

The Construction Census also shows that in highway, bridge and culvert work, August and September employed more men in 1929 than any other months of the year; October and November for dredging; and July and August for carpentering under sub-contractors. In each case, January and February employment is the lowest of the year. These classes of construction took more lumber than did any other types in 1929, except building into which went 75 percent of all lumber used in construction under contractors and builders.

Of all construction covered by the 1929 Construction Census, for which nearly 150,000 establishments of contractors and builders reported, 30,597 establishments each

PITTSBURGH FIRM LOW ON DOCK BID

SPECIAL TO DAILY PACIFIC BUILDER
WASHINGTON, D. C., Mar. 8.
—Dravo Contracting Co., Pittsburgh, submitted the low bid for construction of a steel floating dock at the San Diego Naval Base. The bid was \$278,200. Second low bid was submitted by Puse & Jones Corp., Wilmington, Del., at \$359,860.

The dock is to be 393 ft. long, having a 50-foot beam. To include oil engine generator, pumps, piping and electric power and light system.

Bids were received by the Bureau of Yards and Docks, Navy Department.

STOCKTON EXCHANGE ELECTS DIRECTORS

Directors for the new year have been elected by the Stockton Builders' Exchange.

The new board includes: John Pengelly, president; Rollie Goold, A. Sandberg, J. C. McIntosh, A. F. Acker, R. A. Forbes, W. E. Bruce, W. T. Gibson, L. S. Peletz, E. M. Lewis and W. J. Scott.

The Exchange unanimously voted to adopt the Sacramento plan for eliminating bid-peddling to govern all contracts over \$5000. A committee consisting of L. S. Peletz, E. M. Lewis and W. J. Scott has been appointed to make the plan effective.

Support of the present contractors' license law was voted in a resolution adopted by the members.

S. F. FIRM SUES TO VOID AWARDS

Suit to restrain the Sacramento board of education from proceeding with three contracts awarded on the new Kit Carson junior high school has been filed on behalf of the Alta Electrical and Mechanical Company of San Francisco.

The action is brought in the name of Fred J. Harris, Sacramento taxpayer.

It asks that the district be enjoined from letting contracts for plumbing to Hately and Hately; heating and ventilating to Carpenter and Mendenhall; electrical work to George C. Foss. Alta Electric contends that its combination bid on these three contracts was \$2,155 lower than the total bids of the three firms receiving the contracts.

In contemplation of possible acquisition of a municipal water system the Se'ma city council has applied to the San Joaquin Light and Power Corporation for an estimate on the value of the local water system.

doing an annual business of more than \$25,000, showed \$28,772 as the average number of wage-earners employed, \$1,467,541,901 as the amount of wages paid; \$2,055,595,482 as cost of materials and \$4,794,772,665 as the value of all construction work done.

U. C. INSTALLS CEMENT KILNS FOR TEST WORK

Rotary Units For Experiments With Materials Added To Equipment

As a further aid in the experimental work of the University of California Engineering Materials Laboratory, two rotary cement kilns are being installed in the courtyard of the testing laboratory on the Berkeley campus and will be ready for use about March 1.

This announcement was made by Professor R. E. Davis on the eve of his departure for Chicago to attend the annual convention of the American Concrete Institute and a meeting of the committee on mortars for unit masonry of the American Society for Testing Materials.

Because one of the kilns is unique in type Professor Davis may report on it while attending the Chicago meetings. He will also confer with representatives of the U. S. Bureau of Reclamation in Denver, and speak before the central Illinois section of the American Society of Civil Engineers in Chicago.

The new kilns are of rotary type, consisting of steel tubes 30 inches in diameter and 30 feet long. The kilns are arranged on a slope so that the lower end of one will feed into the top end of the other. The upper kiln will be used for burning cement clinkers from clay and calcium oxide, while the lower kiln will be used for experimental handling of the clinkers after burning. This is the first kiln ever built which permits heat-treatment of clinkers in an atmosphere having either a deficiency or an excess of oxygen. It is expected that this apparatus will enable the University to extend cement research into the field of clinker-cooling.

The kilns will be rotated by a direct drive from electric motors, at a speed of from one-half to ten revolutions per minute. Natural gas is to be used as a fuel and the apparatus is designed to reach temperatures of 3000 degrees Fahrenheit.

WATER DISTRICT WILL PURCHASE IN OPEN MARKET

Los Angeles Metropolitan Water District will purchase certain items of used equipment and materials in the open market without calling for bids, Chief Engineer F. E. Weymouth has announced.

The board of directors has authorized Weymouth to obtain prices on second-hand equipment needed for construction of the Coachella tunnels, a portion of the aqueduct which is being done under force account.

Condition of the market which enables the district to obtain satisfactory machinery and materials at a price more favorable than by advertising for bids on new.

A. G. C. URGES REVENUE BOND ACT EXTENSION

State Should Prepare To Obtain R. F. C. Credit for Municipalities

In order that the State of California may take full advantage of any liberalization of loan policies approved by the Reconstruction Finance Corporation the state legislature was memorialized by the Associated General Contractors of America of their Northern California Chapter meeting Friday to bring municipal waterworks, dams and sewage disposal systems under provisions of the revenue bond act.

Many such municipal projects now planned would proceed if financing could be obtained through R. F. C. loans, George Pollock, president of the Chapter, asserted. Work of this character does not now come within the scope of R. F. C. loans because it must be financed through taxation in this state, Pollock pointed out. In anticipation of a more liberal attitude of the R.F.C. directors toward self-liquidating construction work the state legislature should remove any legal obstacles that might delay California municipalities from obtaining full benefits, said Pollock.

Bills are now pending in the senate and assembly to enable issuance of revenue bonds for municipal construction. These measures were endorsed by the Associated General Contractors.

The association adopted a resolution opposing Assembly Bill 878 which establishes a state unemployment insurance system. The effect of such legislation at this time would be to increase unemployment, reduce wages and increase the tax burden of business, the officers of the chapter declared.

The legislature is urged to defer action on this measure until a thorough investigation can be made by employers.

Colonel Charles R. Gow, president of Warren Brothers, nationally known contractors and among the firms bidding on bay bridge contracts, was the speaker of the evening. W. A. Bechtel, president of Six Companies, Inc., contractors on the Boulder Dam, and Henry J. Kaiser, also an executive of Six Companies, and former national president of the Associated General Contractors of America, were present.

Colonel Gow predicted an early recovery of construction from its present low levels.

"I am confident that we are going to come out of this period of depression to an era that will be as prosperous as any we have known," Colonel Gow declared. "The return to prosperity is apt to be very rapid when the movement gets underway, six months or a year even may show a complete change. I would not advise any business man to plan a program for the next year or two without anticipating a substantial increase in price levels."

Warren Brothers Company, of which Colonel Gow is president, is associated with others in Bridge Builders, Inc., bidders on the Golden Gate and San Francisco-Oakland bay bridge work.

The chapter meeting followed dinner at the Engineer's Club, which was attended by more than a hundred executives of Northern California manufacturing and construction companies. It was arranged to coincide with the bidding on bay bridge contracts which have attracted many nationally famous engineers and contractors to San Francisco. Among them are members of various Eastern chapters of the Associated General Contractors who were guests of honor of the local organization.

EASTBAY STEEL PLANT RENOVATED

The Alameda plant of the Bethlehem Shipbuilding Corporation is being renovated and will be used for storage of material manufactured for the Golden Gate bridge, according to E. F. Gohl, Pacific coast manager.

While no plans have been made for reopening the plant except for storage purposes, Gohl said the company might have a further announcement to make in the future.

CONVICT TWO FOR VIOLATING ENGINEERS' ACT

Suspended Sentences Given For Practicing Without Licenses

Two convictions for violations of the Civil Engineers' Registration Act during February are reported by H. M. Jones, secretary of the state board.

According to the board report, Preston M. Jones, Los Angeles, pleaded guilty in municipal court to having prepared plans for the J. C. Penny company store in Riverside after his registration certificate had lapsed. He was given a suspended sentence of thirty days in jail upon condition that he renew his certificate before resuming practice.

Verne Ostendorf of Colton received a suspended sentence from a justice of the peace at Compton for practicing without a license. The complaint was preferred after Ostendorf had assumed charge of design and construction of the Compton dog racing track.

MacDonald Asks Registrar to Revoke License for Violation of Wage Law

Revocation of a contractor's state license is asked by Frank C. MacDonald, state labor commissioner, in a complaint filed with the registrar of contractors against M. B. Wood, tile and brick contractor on the science building of the San Jose State College.

Penalties of \$300 have been assessed against Wood for alleged violations of the prevailing wage law.

The request to withhold \$300 due on the contract was forwarded to the State Division of Architecture by MacDonald after seven employees had testified that they received from \$1 to \$5 per day less than the scale specified for bricklayers, tile setters and hod carriers.

Evidence was produced at the hearing held at San Francisco, the commissioner stated, which showed that the receipts signed by the men for their weekly wages were altered later to show payments at the prevailing rate.

"This sort of falsification of records to the injury of the contractor on the job as well as the workmen will not be tolerated," MacDonald declared, "and whenever we find any evidence of it we shall call such evidence to the attention of the Registrar of Contractors, who has offered to cooperate with us to the fullest extent in our efforts to uniformly and fairly enforce the Prevailing Rate Law on Public Work.

"We have this month assessed

penalties totaling \$8,720.00 in our drive to enforce this law, and with our new policy of reporting all flagrant violations to the Registrar of Contractors for summary action under the power granted to him to revoke licenses of contractors and subcontractors who flagrantly violate any of the labor laws of the state, we hope to effectively stop violations of this law to the extent that no contractor will undertake to bid on a public job with the intention of cutting the legal wage rate which is binding on his competitors.

"In this particular case the general contractor on the job paid the prevailing rate and was led to believe by the altered payrolls submitted to him that his subcontractor was doing the same. When he learned that this was not the case he made up the difference to the men employed by the subcontractor and has fully cooperated with our office in every way.

"The penalties are against the subcontractor solely, as are the proceedings before the Registrar of Contractors, which proceedings will be pressed as an object lesson to others engaged in this glaringly unfair practice of securing rebates from the men by means of altered payrolls.

"We are secretly investigating a number of other similar cases and will take similar action against the contractors or subcontractors involved if the evidence warrants."

\$500,000 BANK CREDIT CREATED FOR REMODELING

**District of Columbia Financiers
To Cooperate With
Home Owners**

A carefully planned home repair and remodeling campaign is now under way in Washington, D. C., through the enlisted support of leading business, civic, and other interested local organizations. The main objectives are the increase of employment among building trades workers, stimulation of business, and stabilization of home property values.

The active participation of the District of Columbia Bankers Association, which has created a \$500,000 credit pool for the granting of small loans to home owners for desirable home improvements and repairs, should greatly assist in developing effective results. It is hoped to liberalize loan regulations so that the worthy small property owner may more easily finance home repairs and remodeling work.

Another constructive feature of the campaign is the plan of placing a dilapidated small house on a prominent down town site where it is to be completely remodeled and equipped under the supervision of local architects, in plain public view from day to day. Figures showing actual cost of the work as it progresses will be made public as a guide to home owners, and a public information booth where details on remodeling and home repairs may be secured will be erected near this house.

Reports received by the Department of Commerce Home Modernizing Committee show that during 1932, 144 cities conducted organized home improvement and repair work campaigns of various types. Of this group 81 reported expenditures by property owners for labor and materials of approximately 70 million dollars.

The value of conducting educational home improvement campaigns has impressed local leaders in many cities and towns over the country. A number of business leaders predict that replacement business, including the smaller projects involving home repairs and modernizing, will form an important part of the business program for 1933.

A careful study of successful community home improvement campaigns has been made during the past two years by the Home Modernizing Committee, chiefly to make available the best methods which have been employed in various cities, to other interested communities. This Committee, which is composed of a voluntary membership of 17 representative housing experts, functions as an advisory committee of the Division of Building and Housing of the Bureau of Standards, and has available on request details of methods which have been used in these various

OPEN S. F. JAIL BIDS MARCH 29

The San Francisco county jail general contract was ordered advertised for bids yesterday by the department of public works. Bids are to be opened March 29.

Estimated cost of the jail building is \$490,000. It will be located on the Sneath ranch, San Mateo county. The contract is for construction of a seven-story building designed for men's quarters and a two-story building for women's quarters.

Albert F. Roller, Crocker Bank Bldg., is architect. Dodge A. Reidy, Pacific Bldg., is associate architect and H. J. Brunner, Sharon Bldg., structural engineer.

S. F. THIRD IN PERMIT TOTALS

**Los Angeles Leads Coast
Cities; Nine Above
\$100,000 Mark**

Los Angeles with building permits in February virtually unchanged from the volume reported in January, lead all cities on the Pacific Coast, according to the monthly building permit survey prepared by S. W. Straus & Co. Sacramento advanced from third to second rank and likewise maintained its high degree of building activity.

San Francisco, which during previous months had been materially aided by the issuance of permits for the construction of the Golden Gate Bridge, ranked third in total volume. It was followed by Santa Barbara, Ogden, Utah, Los Angeles, Oakland, Beverly Hills and Portland, Oregon, all of which reported more than \$100,000 in permits issued during February.

While total building permits for the twenty-five leading cities dropped materially in February, 1933, from January, 1933, due to the absence of unusually large volume reported by San Francisco in previous months, more than half of the cities reported increases over January, 1933, and seven showed gains over the corresponding month of 1932. Those cities reporting increases in February, 1933, over January, 1933, were Sacramento, Santa Barbara, Ogden, Oakland, Beverly Hills, Portland, Vernon, Palo Alto, San Mateo, Fresno, Tacoma, Alhambra, Riverside and Pomona. Cities reporting gains in February, 1933, over February, 1932 were Sacramento, Santa Barbara, Ogden, Vernon, San Mateo, Riverside and Pomona.

Total volume of building permits in February, 1933, was \$3,030,645, compared with \$16,699,819 in January, 1933, and \$6,154,881 in February, 1932.

home repair and remodeling campaigns as well as information of interest to individual home owners.

FACTORY-BUILT HOMES URGED BY ARCHITECTS

**Institute Endorses Large-Scale
Production to Lower
Costs**

Mass production of small houses in factories is urged by the American Institute of Architects as a necessary measure to reduce housing costs and eliminate all wasteful and uneconomic features in construction.

In a resolution adopted by the Board of Directors of the Institute, it is pointed out that the importance of lower building costs is overshadowed only by the maintenance of the character of the American home. The Institute warns of the dangers of overstandardization and asserts that builders also have "the larger duty of making the home of the American citizen expressive of all the qualities that his citizenship implies."

By its action the Institute recognizes the need for factory production of small houses and considers the effect of such a development on the architecture in the United States. The resolution, however, calls attention to the latent possibility that the individuality and character of American houses may be obliterated and urges the utmost caution in proceeding with mass production in housing along lines similar to those laid down for the automobile industry.

"The Board of Directors of the American Institute of Architects recognizes fully the absolute necessity of the elimination of all waste and uneconomic features in the production of small houses for the purpose of reducing costs," the resolution said. "Therefore, the Board recognizes and commends proposals for mass or factory production of small houses.

"Nevertheless, attention is called to the danger of obliterating the individuality and character of the house, which is the home of the American family, and to the resultant effect upon the character of the family whose home it is.

"While cost is an important factor in home building, it must certainly be subservient to the larger duty of making the home of the American citizen expressive of all the qualities that his citizenship implies."

SET ROAD SCALE

The following pay scale for county road work in all supervisory districts of Glenn county has been approved by the board of supervisors:

Truck drivers, \$3:50; 30 Caterpillar tractor drivers, \$4; one-man motor control grader drivers, \$4; grader men, \$4; common labor, \$3; carpenters, \$4; concrete men, \$4; jack hammer and air compressor men, \$4; man with team and wagon, \$4; inspectors of roads and bridges, \$6; 1 horse, 50c; 1 wagon, 50c; 1 fresno scraper, 50c.

SMITH-EMERY CO. WILL INSPECT BRIDGE MATERIAL

Golden Gate District to Have Supplementary Inspection Bureau

Directors of the Golden Gate Bridge and Highway District yesterday adopted a two-fold plan for Western inspection of the materials for the \$35,000,000 project.

On recommendation of Manager James Reed, all cement and reinforcing steel will be inspected by Smith-Emery and Company of San Francisco, at two cents per barrel for cement and twenty-five cents per ton for reinforcing bars. Inspection will be done at the mills, and will include physical and chemical tests.

Mixed concrete and aggregates will be inspected by a bureau to be organized by the bridge district, under the direction of Chief Engineer Strauss. A force of thirty-five men will test material at the quarries.

The Smith-Emery offer was the lowest of five close bids. Other proposals were submitted by Robt. W. Hunt Co., San Francisco Inspection Bureau, John G. Little Co. and Pacific Engineering Laboratories.

Selection of the district's thirty-five inspectors was in progress today, though Reed announced that not more than six men would be required in the immediate future. A committee composed of N. D. Cook, manager of the National Association of Engineers, Prof. G. J. Sullivan, dean of the Engineering School of Santa Clara University, and Prof. Paul E. Holden of the Stanford Graduate School of Engineering, had under consideration a list of more than seven hundred applicants.

A requirement that inspectors must be residents of the bridge and highway district was laid down by the committee.

Contract awarded to Eaton and Smith for construction of the Presidio approach was still unsigned today as directors awaited word from the War Department approving the City Planning Commission's proposed new approach route, selected when Marina residents protested the Marina Boulevard approach.

The directors at their meeting yesterday approved initial bills of contractors, and it was announced that the Bank of America would honor bridge district warrants despite the bank holiday.

Heading the list were bills from the McClintic Marshall Co. for fabricating steel now en route here, amounting to \$15,162, and from Barrett and Hilp for excavation to date at \$13,651.

OPEN BRANCH

Incandescent Supply Company, wholesale electrical fixture and supply firm, has opened a San Joaquin valley branch in Fresno. Melvin J. Blessing of San Francisco has been appointed district manager.

Alteration Work Shows Percentage Gain In San Francisco Permits for February

San Francisco building permits for February total \$322,657, according to the report of Building Inspector John B. Leonard.

The second month's figures including estimated value of 319 permits, of which 268 are for alterations. The alterations represent \$147,785, or nearly half of the total

value, a significant indication of the trend toward remodeling and repairing of old structures.

In number of permits issued and dollar value the alteration work compares favorably with February of last year.

Following are the classifications and totals:

Classification	February, 1933	Feb., 1932
A	1 \$ 800	\$
B
C	8 18,400	4 11,000
Frames	39 132,835	131 534,085
Alterations	268 147,785	374 191,491
Public Buildings	1 3,737	5 299,700
U. S. Government	2 19,100	2 145,600
Total	319 \$ 322,657	516 \$1,181,876
First 2 months of year.....	591 \$14,880,212	887 \$1,788,025

Profitable Volume of Business is Unsolved Prob. of Factory-Built Home Merchandising, Asserts Spokesman for Lumber Industry

By C. E. Close,

American Forest Prod. Industries

Low cost housing is basically an economic problem whether it be single detached units or large scale multiple units.

Low cost housing can only be the result of cheap land, low cost building and favorable financing.

There has been and there will be a widespread and continued interest in the subject of housing by realization of the fact that it is the one field of construction in which there has been no overbuilding.

To prosper, housing must give more dollar value. Those interests providing housing or housing materials that give greatest dollar value will fare best. Dollar value in housing is not merely low initial cost but long life and low up-keep as well.

Inter-industry competition is an increasingly serious matter to all men in business. The fewer the consumer dollars the more serious it becomes.

An opinion is held and publicized that people get more dollar value in food, clothing, automobiles, radio, refrigeration, recreation, etc., than in housing. This militates against home ownership.

Only half the cost of a home is in labor and materials. If labor and material cost of a house that now sells for \$6400 can be reduced 50 percent the house would still have to sell for \$4000 unless we at the same time cut down the cost of those other elements of cost which are usually ignored—land cost, cost of improvements and utilities, sales cost and profits.

The building industry can furnish lower cost houses but this does not mean housing at much lower cost unless the factors I have mentioned are reduced proportionately.

It is held that dollar value has not been received largely because the house building industry has retained its traditional materials and construction methods, which do not allow to any extent mass production, factory supervision and control.

We hear this is a machine age. Machines produce more quickly, more accurately and cheaper than hand craft production. To secure these advantages it is generally recommended:

1. That prospective home owners be offered a standardized structure, adapted to the needs of the greatest numbers.

2. That materials be cut to length and/or shape to a greater extent than is now customary before being taken to the job.

3. That materials and equipment be assembled under factory conditions into convenient panels or sections which can be transported to

the job and assembled by hand or lifted to place with a small crane.

4. That complete small houses or assemblies of one or more rooms be built under factory conditions and trucked to the site to be there assembled into a finished structure.

Other large groups further demand that a radically new type of architectural treatment be adopted in combination with materials heretofore not generally employed for house construction and that a system of distribution and financing be set up for such structures which will by-pass the existing dealers in building supply materials.

Careful estimates (based on present population indicate there are about 250,000 new dwellings annually susceptible to standardized production.

If we divide 250,000 by 300 working days we have a production of 833 houses a day for the entire country.

A modern automobile plant can produce thousands of cars in a single day. Ask yourself if the production of 833 houses per day warrants the building of giant industrial organizations and the making of expensive machinery that mass production entails.

The U. S. Steel Corporation reports, despite the large amount of publicity which has been given the steel house that the American public does not want standardized houses. The report finds "the American owner insists on individuality in arrangement and appearance," and again "no proprietary system of steel panel units so far presented, either for framing or filling, contains features of outstanding merit.

"No proprietary system of construction having sufficient merit to be considered ideal has yet been developed, but it is possible that a satisfactory unit system may be evolved by its many investigators."

The way to cheaper housing is not through more machinery but less. A prevalent and common idea among some architects who profess to be modern seems to be we must be different at all costs. You have noted the absurdities presented by many designs shown in the professional and non-professional press which are considered epoch making.

Of the eight houses which will constitute the Housing Group at the Century of Progress exposition there will be only one with a sloping roof—The Lumber Industries house.

We refused to accept a flat roof, and only a flat roof, as authority for calling a house "modern."

We refuse to abandon a type of roof construction that is more economical to frame with our material than with other materials when radical changes are sought just because of this condition.

Undoubtedly we face changing conditions beyond control of any one group, which will greatly influence trends in the field of small housing. It seems to us that our job is to plan and produce the small house that Americans want with costs lowered by better planning and build with crafts and wage standards and distribution channels unimpaired.

Solely for the purpose of stimulating constructive thought on this problem and to indicate possibilities in several directions by the various units comprising the Lumber and Wood Using Industries, we have developed five types of small houses to be erected at costs ranging from \$1800 to \$4000, and to meet varying service conditions dependent upon climatic, transportation, fabricating, and distribution features, any one of which may readily dominate the actual construction.

OPEN S. F. BRANCH

J. D. Adams Co., manufacturers of road building machinery and tractors, with headquarters in Indianapolis has established a branch office and warehouse in San Francisco, at 230 Utah Street. Territory covered from this new branch includes Southern Oregon, California and Nevada. D. E. Hoffman is district manager.

Move More Dirt Faster with LE TOURNEAU Equipment

A complete line of grading machinery—designed by a contractor—developed on actual construction jobs—built to stand continuous use under the worst conditions.

Specifications obtainable from State Highway Commission, Room 322, State Office Bldg., Salem, on deposit of \$5, returnable.

SAN DIEGO, Calif.—B. O. Larsen, 1340 E St., San Diego, at \$99,683.05 awarded contract by State Highway Commission to construct a deck plate girder bridge with concrete decks across San Diego River in San Diego, consisting of eight 80-ft. spans on concrete piers and abutments with pile foundations.

SAN FRANCISCO.—Until March 29, 2 P. M. (postponed from March 8) bids will be received by State Department of Public Works, Room 235, City Hall, San Francisco, to construct Contract No. 3, San Francisco Anchorage, San Francisco - Oakland Bay Bridge, involving:

- (1) 50,000 cu. yds. excav., unclass.;
- (2) 2,700,000 lbs. anchorage steel work
- (3) 31,000 cu. yds. mass conc. erection block;
- (4) 34,000 cu. yds. concrete anchorage, mass concrete;
- (5) 3,000 cu. yds. concrete anchorage above lower deck;
- (6) 300 cu. yds. concrete viaduct, footings;
- (7) 5,800 cu. yds. concrete viaduct above footings;
- (8) 200 cu. yds. concrete railings;
- (9) 7,900 cu. yds. concrete foundations, Piers A, B and I;
- (10) 11,500 cu. yds. concrete above foundations, Piers A, B and I;
- (11) 3,000,000 lbs. reinf. steel;
- (12) 25,000 lbs. misc. metal work;
- (13) electric conduits and fittings, a lump sum;
- (14) 20,000 lbs. cast iron drain pipe & fittings;
- (15) 10,000 lbs. castings;
- (16) 2,000 bbls. extra Port. cement;
- (17) lump sum, demolish buildings.

Estimated cost \$1,580,000. San Francisco-Oakland Bay Bridge Office, 500 Sansome St., San Francisco. Chas. H. Purcell, Chief Engineer.

LOS ANGELES, Calif.—Plans for a steel rolled girder bridge with concrete bents and piers, to be built on Soto St. across Ramona Blvd.; and the Pacific Electric Railway tracks will be completed early in April by the Bridge Department of the city engineer's office. R. W. Stewart, engineer in charge. The proposed structure will be 430 ft. long with a 40-ft. roadway. The estimated cost is \$100,000, of which \$93,000 has been allocated from 1926 bridge bond funds.

SIGNAL HILL, Los Angeles Co., Cal.—A. A. Taylor, City Engineer, has been authorized by the Signal Hill city council to prepare plans for a bridge to be built across the railway tracks to be built across the railway tracks. One end of the bridge will be in Long Beach. The decision to construct a bridge in preference to a grade separation was reached by the city councils of the two cities Friday, Feb. 17. Long Beach will probably pay a small share of the cost. Excavating and grading will be done by unemployed forces. No details of the proposed bridge are available except that construction will probably be of creosoted timber.

22—DREDGING, HARBOR WORKS, EXCAVATION

NOME, Alaska—No bids received by U. S. Engineer Office, Seattle, to dredge 5100 cu. yds. of material from Nome Harbor at the mouth of Snake River, Nome; project will not be re-advertised.

PORTLAND, Ore.—Until March 31, 3 P. M., under Bid No. 33-283, bids will be received by U. S. Engineer Office, 321 Customhouse, Portland, to repair South Jetty at Mouth of Columbia River, Oregon and Washington, involving furnishing and placing 1,250,000 tons of stone. Quantities involved follow:

- (1) 165,000 lin. ft. Douglas fir piling;
- (2) 2550 MFEM Douglas fir lumber;
- (3) 57,000 lbs. bolts, drift;
- (4) 107,000 lbs. bolts, machine;
- (5) 87,000 lbs. spikes, ship and wire;
- (6) 63,000 lbs. spikes, railroad;
- (7) 570 tons rails, steel, 75-lb. relay;
- (8) 5 sets frogs and switches, complete;
- (9) 80,000 lin. ft. wire cable, 5/8-in. dia.
- (10) 46,000 lbs. straps, stel;
- (11) 5300 metal pile shoes;
- (12) 10,000 anti-rail creepers;
- (13) 1,250,000 tons stone;
- (14) 570 tons take up and store steel in tracks on mail jetty as directed.

PORTLAND, Ore.—Until March 7, bids will be received by U. S. Engi-

neer Office, 312 Customhouse, Portland, to repair dike at Henrici, on the lower Columbia River; 95 ft. of which were damaged by a passing vessel.

23—IRRIGATION PROJ.

IMPERIAL COUNTY, Cal.—Legislative validation of contracts between the United States Government and water district of Imperial Valley was delayed March 2 by the California legislature until after approval or disapproval of the contracts by the courts. A senate bill by Ben Hulse, Imperial, validating the contracts in connection with the construction of the all-American canal was to have been a special order of business before the assembly committee on irrigation. At the request of members who desired to await result of court action to start in a few days the bill was not taken up. It will be brought before the committee at a later date. Opposition to the measure was expected from representatives of Coachella valley, members of the committee said.

DENVER Colo. — Until March 10, bids will be received by U. S. Bureau of Reclamation, Denver, Colo., to construct lateral structures, Gooding Division Minidoka Project Idaho, under Spec. 587-D, involving:

- (1) 620 cu. yds. excav.;
- (2) 365 cu. yds. backfill, struc.;
- (3) 125 cu. yds. concrete;
- (4) 60 cu. yds. rubble masonry;
- (5) 5500 lbs. reinf. bars;
- (6) 404 lin. ft. 12- to 24-in. corr. metal pipe;
- (7) 4000 lb. gates and gate hoists;
- (8) 2.5 MFEM timber, struc.

Specifications obtainable from above, no deposit to prospective bidders; \$1 to others, not returnable.

25—MACHINERY AND EQUIPMENT

VERNON, Los Angeles Co., Calif.—Bids received by the city council Feb. 28 for furnishing f.o.b. warehouse, 4305 Santa Fe Ave., (1) one 4-wheel trailer with body and (2) one 2-wheel cable reel carrier under Spec. No. 62, are as follows:

- Utility Trailer Sales Co., (1) \$1249.60 (2) no bid.
Pile Auto & Trailer Works, (1) \$1-387 (2) \$1345.

Bids were referred to Howard S. McCurdy, city engineer.

LOS ANGELES, Cal.—All bids cancelled Feb. 28, 1933, by A. J. Holm, City Purchasing Agent for furnishing on 30-day rental basis, one No. 60 Caterpillar tractor and one No. 12 Gallion heavy duty grader with operator. Bids N. 3882.

LOS ANGELES, Calif.—The board of directors of the Metropolitan Water District of Southern California has granted authority to General Manager and Chief Engr. Weymouth to obtain prices and purchase, without advertising for bids, certain used or second-hand equipment and materials for use in the construction of the Coachella tunnels which are being constructed by force account. The general manager explained that for certain work second-hand or used equipment and materials would be satisfactory and could be purchased more advantageously in the open market without advertising for bids and awarding contracts to the lowest bid-

CAPITAL CITY TITLE COMPANY

J. C. PALEN,
Manager

914 Seventh Street

Sacramento :: California

ders as more consideration could be given to the condition and suitability of the equipment and materials.

SAN BERNARDINO, San Bernardino Co., Cal.—Until March 11, 2 P. M., bids will be received by the State Purchasing Agent, Sacramento, to furnish one 36-hp. track-laying type tractor with canopy top, street plates, fenders and spark arrester. Quotation No. 30444, Requisition No. 678. Submit allowance on used Caterpillar 30 CHC 161.

YUMA, Ariz.—Until 2 P. M., March 17, bids will be received by the U. S. Bureau of Reclamation, Custom House Denver, Colo., for furnishing one second-hand, standard gauge, oil-burning road locomotive complete with tender, to be delivered on track at shipping point and/or on track at destination, Yuma, for use on the Colorado River front and levee system. Bid No. A-14860-A. A. McD. Brooks.

26—RAILROADS

LIVINGSTON, Montana—The North-Pacific Ry. has authorized construction of steel relay for curves and main lines. The curve relays will be made at six points on the division in western Montana and main line relays on water grade freight lie between Bozeman and Belgrade. Some ballasting and tie replacement is contemplated.

28—FIRE EQUIPMENT

SEATTLE, Wash.—Until March 22, 10 A. M., bids will be received by W. A. Gaines, City Purchasing Agent, 511 County-City Bldg., Seattle, to furnish 14,000 ft. double jacket rubber lined fire hose. Specifications obtainable from above office.

29—STREETS AND HIGHWAYS

LOS ANGELES, Calif.—The Special Assessment Committee has been authorized to present proceedings for the improvement of the alley south of Ramona Blvd., between Herbert St. and Bonnie Beach Place, to county supervisors on July 10, 1933. Proceedings are under County Improvement No. 996. The quantities and estimates follow:

614 cu. yds. excavation;
16,571 sq. ft. 4-in. Durite pavement.
Total estimated contract price, \$3250.

LOS ANGELES, Calif.—The preliminary hearing on the improvement of Vine Ave., between Redondo and Wilmington Blvd., and the south line of lot 87, Tract 848, in the 4th Supervisorial District, County Improvement No. 991, was held April 12, 1932, and was ordered continued to May 1, 1933. The proposed work involves approximate quantities (and estimate) as follows:

Excav., incl. shaping (est. \$400).
Construction of 4-in. D. R. pavement (oil and rock wearing surface) (est. \$3030).
2368 ft. 6x9x15-in. concr. curbs at 40c per ft.
243 ft. 6x10x18-in. curb at 50c ft.
5227 sq. ft. 6-in. concr. gutter at 18c. ft.;
292 ft. of concr. sidewalks at 16c ft.;
5 cu. yds. of concrete wall at \$20. ft.;
25 lin. ft. highway guard fence at \$1.00 ft.;
Total est. contract price, \$5612.00.

PROSSER, Wash.—Until March 24, 2 P. M., bids will be received by E. O. Keene, County Auditor, Benton County, to construct Lateral Highway No. 10, near Richland, grading and surfacing with crushed stone

45083 ml. Specifications obtainable from County Engineer. Certified check 5% required with bid.

MENDOCINO, SONOMA, MARIN, Solano and Napa Co., Cal. — Basalt Rock Co. and Chas. Kupplinger, Napa, bidding jointly, at \$3384 awarded contract by State Highway Commission to apply 1800 bbls. Diesel oil to roadside vegetation over 135 roadside miles.

MONTEREY, Calif.—Until April 1, 10 A. M., bids will be received by Quartermaster, Presidio of Monterey, to construct asphaltic concrete roadways and concrete curbs at Presidio. Specifications obtainable from above on deposit of \$5, returnable.

LOS ANGELES & VENTURA Cos., Cal.—Square Oil Co., Inc., 916 Adobe St., Los Angeles, at \$3549 awarded contract by State Highway Commission to apply Diesel oil to roadside vegetation over 110.2 miles, involving 1690 bbls. Diesel oil.

Consumers Oil Co., Maywood, submitted low bid on this contract at \$3481.40.

LASSEN COUNTY, Cal.—Until Mar. 29, 2 P. M., bids will be received by State Highway Commission, Sacramento, to surface with bituminous treated crushed gravel or stone (road mix method) 2 miles between Susanville and Johnstonville, involving:

- (1) 2490 cu. yds. crusher run base;
- (2) 2925 cu. yds. crushed gravel or stone (bit. treated surfacing);
- (3) 200 M. gals. water;
- (4) 115 bbls. heavy fuel oil;
- (5) 187 tons cut-back asph. (bit. tr. surface);
- (6) 104 sta. mix cut-back asphalt and crushed gravel or stone;
- (7) 104 sta. finish roadway.

SAN FRANCISCO.—T. J. Doyle, 1527 17th Ave., at \$1,287.15 awarded contract by the Department of Public Works to improve Chestnut St. from Kearny St. 110-ft. east.

ARIZONA STATE—Until 2 P. M., March 11, bids will be received by State Highway Commission, Phoenix, for highway construction on the Holbrook-Winslow Highway, E-40, Schedules 1 and 2 (A.F.E. No. 6656).

The work on E-40 Schedule 1, which begins at the west city limits of Holbrook and extends westerly about 10.2 miles, consists of constructing two culverts, placing subgrade stabilizer and oil processing by the plant mix method, using cutback asphaltic cement.

The work on E-40, Schedule 2, which begins at a point about 10.2 miles west of the town of Holbrook and extends westerly about 11 miles, consists of constructing one C.M.P. culvert and oil processing by either the road or plant mix method, using asphaltic road oil.

The work on each of these schedules is to be completed on or before June 15, 1933. The principal items are: Schedule 1 Contract—

- 2,600 cu. yds. subgrade stabilizer;
 - 9,100 cu. yd. mi. subgrade stabilizer haul;
 - 18,400 tons plant mix;
 - 70,100 ton mi. plant mix haul;
 - 762 tons cutback asphaltic cement;
 - 10.2 mi. spreading compacting and finishing;
 - 790 cu. yds. screenings;
 - 3,250 cu. yds. shoulder material;
 - 12,400 cu. yd. mi. shoulder material haul;
 - 240 M. gallons water.
- Schedule 2 Contract—Road Mix—
14,400 cu. yds. mineral aggregate;
93,900 cu. yd. mi. mineral aggregate haul;
276,300 gallons asphaltic road oil;

- 11 miles mixing, laying and finishing;
 - 850 cu. yds. screenings;
 - 3,600 cu. yds. shoulder material;
 - 9,500 cu. yd. ml. shoulder material haul;
 - 260 M. gallons water.
- Alternate—Plant Mix—
19,900 tons plant mix;
129,200 ton ml. plant mix haul;
237,000 gallons asphaltic road oil;
11 mi. spreading, compacting and finishing;
and other incidental items.

A proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. T. S. O'Connell, State Highway Engineer.

Note: Bids on Schedule No. 2 will be opened at 2:30 p. m.

LOS ANGELES, Calif.—Arthur E. Pearson, 225 Glencoe St., Venice, submitted low bid to board of public works, March 1, at \$955.50, for the improvement of the alley south of 30th St. bet. 11th Ave. and Edgemoor Drive, under the 1911 act.

LOS ANGELES, Calif.—Until 10 A. M., March 15, bids will be received by board of public works for improving 67th St. bet. Main St. and Broadway, under cash contract, involving:

- (1) grading (830 cu. yds. excav. and 305 cu. yds. fill);
- (2) 50,310 sq. ft. 6-in. conc. paving;
- (3) 7 tons asph. conc. wearing surf. (variable thickness) inc. resurf.;
- (4) 5 tons asph. conc. base do;
- (5) 1741 ft. unplas. light curb;
- (6) 7530 sq. ft. 3-in. concrete sidewalk;
- (7) 278 sq. ft. 4-in. concrete sidewalk (driveways);
- (8) 44 sq. ft. 8-in. concrete gutter;
- (9) storm drain, complete, not inc. resurfacing;
- (10) ornamental lighting reconstruction, complete;
- (11) 2 manholes to be reset.

LAKE COUNTY, Calif.—Hanrahan Co., Hobart Bldg., San Francisco, at \$59,959.20 submitted low bid March 8 to State Highway Commission, Sacramento, to grade and surface with crushed rock base and bituminous treated crushed gravel or stone surfacing 3.2 miles between Manila ranch and Bartlett Springs road.

INYO COUNTY, Cal.—Basich Bros., 20550 Normandie Ave., Torrance, at \$54,193.20 submitted low bid March 8 to State Highway Commission, Sacramento, to grade 7 miles bet. Bishop and Round Valley road, of which 3.9 miles are to be surfaced with selected material and a bituminous treatment applied.

SAN FRANCISCO.—Department of Public Works, S. J. Hester, Secretary, plans to improve crossing at Carroll Ave. and Ingalls.

CLARK COUNTY, Nev.—Until Mar. 15 (previously reported March 8) 2 P. M., bids will be received by S. C. Durkee, State Highway Engineer, Heroes Memorial Bldg., Carson City, to furnish, apply and mix asphaltic fuel oil with the roadway surface over 11.51 miles between Lover Virgin River Bridge and Mesquite, involving:

- (1) 270,249 gals. fuel oil;
- (2) 11.51 miles road mix;
- (3) 11.51 miles finish roadway;
- (4) 558 cu. yds. load, haul and spread gravel.

Specifications obtainable from above also from county clerk's office at Las Vegas and from U. S. Bureau of Public Roads, 461 Market St., San Francisco, on payment of \$5, not returnable. Certified check 5% required with bid.

MERCED COUNTY, Cal.—Until March 29, 2 P. M., bids will be received by State Highway Commission, Sacramento, to grade and pave with Portland cement concrete about 0.9 mile Merced River Bridge approaches, involving:

- (1) 47 sta. clear and grub right-of-way;
- (2) 26,000 cu. yds. rdwy. excavation, unclassified;
- (3) 440,000 sta. yds. overhaul;
- (4) 100 cu. yds. struc. excavation;
- (5) 10,000 sq. yds. subgrade for pave.
- (6) 2,150 cu. yds. Class A cement concrete pavement;
- (7) 5 cu. yds. do. struc.;
- (8) 47,200 lbs. bar reinf. steel pave. and struc.;
- (9) 104 lin. ft. 8-in. corr. metal pipe;
- (10) 92 lin. ft. 12-in. do.;
- (11) 50 lin. ft. 18-in. do.;
- (12) 190 barrels light fuel oil;
- (13) 670 barrels heavy fuel oil;
- (14) 1200 tons untreated crushed stone or gravel surfacing (detours);
- (15) 1250 tons bit. treated crushed gravel or stone (borders);
- (16) 1800 M. gals. water;
- (17) 360 cu. yds. concrete remove from existing pave. and dispose of;
- (18) 0.1 mile existing fences remove and dispose of;
- (19) 24 guide posts complete in place;
- (20) 1406 lin. ft. lam. timber guard rail;
- (21) 47 sta. finish roadway;
- (22) 14 monuments complete in place;

State will furnish corrugated metal pipe and spillway assemblies.

SISKIYOU COUNTY, Calif.—J. F. Shepherd, 108 E. Miner Ave., Stockton, at \$85,909.50 awarded contract by State Highway Commission to grade and surface with untreated crushed gravel or stone and bituminous surface treatment to be applied over 3.9 miles between Dorris and Oregon state line.

SAN DIEGO COUNTY, Cal.—Daley Corp., 4430 Boundary St., San Diego, at \$89,040.50 awarded contract by State Highway Commission to grade 4.4 miles between Barnett Ave. and Balboa Ave.

OREGON STATE.—Until March 15, 9 A. M., bids will be received by the State Highway Commission, Multnomah Hotel, Portland, for highway construction as follows:

Douglas County—1.5 miles roadbed construction on Rice Hill Section, Pacific Highway, involving 120,000 cu. yds. excavation.

Linn County—Grade and pave approaches to the Santiam River bridge, Pacific Highway at Jefferson, involving 15,000 cu. yds. gravel embankment construction; 4,500 sq. yds. concrete pavement.

Malheur County—Ironsides - Brogan Station, John Day Highway, furnish 7,000 cu. yds. crushed rock in stockpiles.

Union County—Hot Lake - North Powder Section, Old Oregon Trail, furnish 6,000 cu. yds. crushed rock in stockpiles.

Specifications obtainable from State Highway Commission, Rm. 322, State Office Bldg., Salem, on deposit of \$5.

30—RESERVOIRS & DAMS

LOS ANGELES, Cal.—Plans and specifications for the Eaton Canyon Dam may be approved by the State Engineer so that bids may be called early this spring and contracts awarded by May 1. The proposed dam will be an earth fill structure with concrete channel. The dam will be approximately 40 ft. high with a length of 1000 ft. A gravel fill road with concrete face will be built along the top. This roadway will be an extension of East Washington St., Sierra Madre. The estimated cost is \$530,914.

32—SEWERS & SEWAGE DISPOSAL PLANTS

MONTEREY PARK, Los Angeles Co., Cal.—Until 8:30 P. M., March 13, bids will be received by city council to furnish the city with sewer pipe in the quantities shown below. Alternative bids will be taken on vit. clay and cement pipe. The quantities are: 11,800 ft. of 15-in. sewer pipe; 3,500 ft. of 12-in. sewer pipe; 109 pieces of 15x6-in. Y's; 65 pieces of 12x6-in. Y's.

Prices shall be quoted f.o.b. plant, and/or delivered along Garvey Ave. from New Ave. east to Walnut and along proposed route of sewer to end of Musactel Ave. Certified check or cash for 10% of bid required. A. W. Langley, city clerk.

ROSEBURG, Ore.—City plans intercepting and outfall sewer, involving 9500 ft. 24-in. pipe, 1200 ft. 21-in., 1,000 ft. 18-in., 10,500 ft. of 15-in., 1500 ft. of miscellaneous size pipe for reconstructing existing sewers, 1300 ft. creosoted wood trestle, 1 suspension bridge 80-ft. span. Estimated cost, \$50,000.

LOS ANGELES, Cal.—The Assessment Limitation Report on Snow Dr., Bonnie Beach Place, Hazard St., Miller Ave. and Van Pelt Ave., in City Terrace, under County Improvement No. 997, has been completed by the office of J. E. Rockhold, County Surveyor, and has been forwarded to the Special Assessment Committee. This work, which is estimated to cost \$26,875, involves:

- 7300 ft. 8-in. vitrified clay pipe;
- 2025 ft. 6-in. vitrified clay pipe;
- 19 standard manholes;
- 5 flushing manholes;
- 6 junction chambers;
- 1 drop manhole.

SEATTLE, Wash.—Until March 15, 10 A. M., bids will be received by Board of Public Works, G. W. Roberge, Secretary, to construct temporary sewage pumping plant near Dakota St. and 5th and 6th Aves., South; also to furnish and install pumping unit complete with all electrical apparatus, fixtures and wiring for above. Specifications obtainable from above office, also from City Engineer. Certified check 5% required with bid.

SEATTLE, Wash.—Until March 15, 10 A. M., bids will be received by Board of Public Works, G. W. Roberge, Secretary, to improve 29th Ave. West by constructing sewers. Specifications obtainable from above office. Certified check 5% required with bid.

CAPITOLA, Santa Cruz Co., Cal.—City may call bids on proposed sewage system in Capitola, estimated cost \$21,500, with the proviso that successful bidder will accept bonds in lieu of payment. Plans call for 1000 ft. disposal pipe.

BERKELEY, Alameda Co., Calif.—Until March 14, 10 A. M. (postponed from March 7) bids will be received by Florence E. Turner, city clerk, to construct storm sewer on Dwight Way from College Ave. to Prospect St. and on Prospect St. from Dwight Way northerly, together with catchbasins on Hillside Ave. southeast of Prospect St., involving:

- (1) 650 ft. 24-in. vit. or concrete pipe;
- (2) 70 ft. 10-in. do.;
- (3) 2 manholes;
- (4) curb inlet;
- (5) 7 catchbasins.

Specifications obtainable from above office. Certified check 10% required with bid.

33—WATER WORKS

BELMONT, San Mateo Co., Cal.—Richmond Oil Co., granted permit by Belmont City Council to erect three 10,000-gal. storage tanks at Bayshore highway and Ralston Blvd.

PIMA, Ariz.—The Pima Water Co., Pima, Ariz., has been granted a loan by the Reconstruction Finance Corp. of \$13,500 to be used for the construction of additions to the company's water works system.

SAN FRANCISCO—American Concrete and Steel Pipe Co., 19th Ave. and Estuary, Oakland, at \$129,576.50 awarded contract under Proposition B by Public Utilities Commission, to construct pipe line in the Bay Crossing Division of the Hetch Hetchy Aqueduct, H.H.W.S. Contract No. 137, consisting of 7120 ft. pipe line, Irvington Portal.

OAKLAND, Cal.—Steel Tank & Pipe Co., 1100 4th St., Berkeley, at \$6385 (lone bid) awarded contract by East Bay Municipal Utility District to furnish 12 sections of steel pipe in lengths of approximately 20 ft., dia. 54- to 65-ft.

SAN FRANCISCO—Until March 15, 2:30 P. M. (postponed from March 8) bids will be received by Department of Public Works, S. J. Hester, Secretary, to construct water system about 3 mi. in length from San Andreas to the site of the Sneath Ranch jail in San Mateo County. Will be of 10-in. c. i. pipe. Estimated cost, \$35,000. Plans by the Bureau of Architecture. Time limit, 90 days from award of contract.

SAN FRANCISCO—Until March 13, 3 P. M., under Bid No. 973, bids will be received by T. A. Brooks, City Purchasing Agent, Room 251, City Hall, to furnish pipe and fittings for a term of four months from April 1. Specifications obtainable from above.

SEATTLE, Wash.—Until March 15, 10 A. M., bids will be received by Board of Public Works, G. W. Roberge, Secretary, to construct steel standpipe near intersection of North 145 St. and Dayton Ave. at Foy, King County. Specifications obtainable from above office; also from City Engineer; deposit \$5 required. Certified check 5% required with bid.

34—PARKS AND PLAY-GROUNDS

SEAL BEACH, Orange Co., Cal.—Application has been made by Frank Haegle of Sunset Beach, Cal., for War Department permit to construct fences across two sloughs in Anaheim Bay for the protection of his oyster beds; the fences to be located about one-quarter mile and one-half mile, respectively, southeasterly of the east city limits of Seal Beach, in unincorporated territory; the fences to consist of 2-in. x 4-in. x 10-ft. posts set 7 in. center to center with openings 12 ft. wide in the center of the channels. This application is in lieu of his application of Feb. 4, 1933, for permission to construct fences in the same positions, but with 10 ft. openings with wire screens, which has been withdrawn. Maps showing location of the proposed work will be on exhibition in the office of the U. S. Engineer, 751 S. Figueroa St., until 11 A. M., Tuesday, March 14, 1933. W. H. Lanagan, Major, Corps of Engineers, District Engineer.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

SAN FRANCISCO-OAKLAND BAY BRIDGE—EAST BAY SUBSTRUCTURE—(Contracts 4 and 4a)

Contract No. 4—Piers E2 to E5 Incl.
 (1) 7,300 cu. yds. concrete below elevation 10, Pier E-2;
 (2) 4,960 cu. yds. concrete above elevation 10, Pier E-2;
 (3) 143,942 cu. yds. caisson work, Piers E-3, E-4, and E-5;
 (4) 10,000 cu. yds. addn. caisson work Piers E-3, E-4, and E-5;
 (5) 16,000 cu. yds. concrete seal, Piers E-3, E-4, and E-5;
 (6) 8,780 cu. yds. concrete above elevation 0, Piers E-3, E-4 and E-5;
 (7) 750,000 lbs. reinf. steel above elevation 0 in Pier E-2 and above elevation 0 in Piers E-3, E-4 and E-5;
 (8) 141,000 lbs. anchorage steel work, Piers E-2, E-3, E-4 and E-5;
 (9) reconstruct army wharf (lump sum);

(10) 540 M. ft. b.m. creosoted timber fenders;
 (11) 11,000 lin. ft. creosoted fender piles in place;
 (12) 165,000 lbs. metal work in fenders
 (13) 1,000 bbls. extra Port. cement;

Contract No. 4A—Piers E6 to E22 Inclusive
 (14) 372,000 lin. ft. timber piles in place;
 (15) 50,000 lin. ft. additional length timber piles in place;
 (16) 22,000 tons gravel blanket;
 (17) 61,500 cu. yds. concrete seal;
 (18) 38,000 cu. yds. conc. pier shafts;
 (19) 1,530,000 lbs. reinf. steel;
 (20) 186,500 lbs. anchorage steelwork;
 (21) alterations to Key Route Pier;
 (22) 1,000 bbls. extra Port. cement.

Complete bids follow:
 Bids were taken under three proposals, as follows: (a) Contract No. 4; (b) Contract No. 4A; (c) Contracts 4 and 4A combined.
 (A) Bridge Builders, Inc., (c) \$4,495,854.00.

SAND ISLAND WHARF, ETC.—PORTLAND, ORE.

PORTLAND, Ore. — As previously reported, Liesch & Tofte, Marshfield, Ore., at \$164,500.50 submitted low bid to U. S. Engineer Office, Portland, to construct a wharf, marine dolphins, trestle, land trackage, two axial dikes, revetment and two pile and stone dikes at Sand Island, in Columbia River, about 10-mi. below Astoria, Ore., involving:

- (1) 131,700 lin. ft. piling;
- (2) 6000 lin. ft. piling for cutoff;
- (3) 664 M FBM lumber;
- (4) 141 M FBM ties;
- (5) 56,400 lbs. tie rods, etc.;
- (6) 500 lbs. machine bolts;
- (7) 15,700 lbs. drift bolts;
- (8) 15,700 lbs. black boat spikes;
- (9) 15,200 lbs. track spikes;

- (10) 300 lbs. wire rope;
- (11) 180 tons steel rails;
- (12) 9 sets frogs and switches;
- (13) 3415 lin. ft. haul track;
- (14) 100 remove piles;
- (15) 18,000 cu. yds. shore rock;
- (16) 45,000 cu. yds. water rock;
- (17) 700 cu. yds. ballast.

Complete bids follow:

STANISLAUS, San Joaquin, Calaveras, Sacramento and Amador Cos., Calif.—Dee Strong, Box 143, Rio Vista at \$1364.22 submitted low bid to District Engineer, State Highway Commission, to apply Diesel oil to roadside vegetation over 110.7 roadside mi., involving 780 bbls. Diesel oil. Complete bids follow:

- (A) Dee Strong, Rio Vista, \$1,749; \$1,364.22.
- (B) R. M. Sheldon, Suisun, \$1,77; \$1,380.60.
- (C) L. J. Immel, Berkeley, \$1.58; \$1,466.40.

Bids held under advisement.

LOS ANGELES, Calif. — American Concrete & Steel Pipe Co., 4636 Firestone Bldv., Southgate, submitted low bid to board of public works March 6 for furnishing reinforced concrete pipe, centrifugal concrete pipe, laying equipment, and skilled pipe laying foreman in connection with the improvement of Western Ave. between 59th Place and 68th St., and other streets and rights of way, in the Western Ave. and 66th Street Imp. Dist. The schedule of quantities follows:

- (1) 2440 ft. 102-in. heavy reinf. conc. pipe, Case I, laying condition;

- (2) 100 ft. 66-in. centrif. conc. pipe, 1500-D, Case III, laying condition;
- (3) 1800 ft. 60-in. do;
- (4) 1000 ft. 60-in. 1200-D do;
- (5) 30 ft. 36-in. do;
- (6) 100 ft. 30-in., 1250-D do;
- (7) 900 ft. 24-in. do.

The bids were:
 American Concrete & Steel Pipe Co.,
 (1) \$15.85 (2) \$8.75 (3) \$8.00 (4) \$7.75
 (5) \$3.50 (6) \$3.10 (7) \$2.00.
 United Conc. Pipe Corp. (1) \$16.90
 (2) \$9.10 (3) \$8.40 (4) \$8.26 (5) \$3.75
 (6) \$3.30 (7) \$2.22.

LOS ANGELES, Cal.—Bids for furnishing welded steel water pipe under Spec. No. 3018 were opened by A. J. Holm, City Purchasing Agent, March 6. Bids were taken as follows:

1. 2730 lin. ft. electric fusion welded steel water pipe in 30-ft. laying length sections, having a wall thickness of 3/4-in., internal diameter of 30 inches, slip joint for field welding, dipped in coating f.o.b. trenchside on Pickford St. from Cloverdale Ave. to Longwood Avenue;

II. 5520 lin. ft. electric fusion welded steel water pipe in 30-ft. laying length sections, having a wall thickness of 3/4-in., internal diameter of 24 inches, slip joint for field welding, dipped in

coating, f.o.b. trenchside on Stonehurst Ave. from Sunland Blvd. and northely in San Fernando Valley.

The bids were:
 Southwest Welding & Mfg. Co., (1) 3.53 (alt. to specifications); (2) \$2.90 (alt. to specifications). Total \$25,700. Terms net. Delivery 60 days.
 Consolidated Steel Corp. (1) \$4.58 (2) \$3.87. Terms net. Delivery not stated.
 Western Pipe & Steel Co., (1) \$4.50 (2) \$3.65. Terms net. Delivery not stated.

SACRAMENTO, Cal.—Bids for furnishing one one-man grader unit f.o.b. North Hollywood, Quotation No. 27292, Requisition No. 5829 were opened by the State Purchasing Agent, Feb. 28. The bids were:

Crook Co. — Allis-Chalmers VH, \$2565, delivery 2 days.
 Shepherd Tractor & Equipment Co. —No. 7 Caterpillar Auto Patrol, \$3010, delivery 10 days, discount 2% 30.
 Smith-Booth-Usher Co.—Gallon EZ-Lift, \$2195, 35 days delivery; \$2225, 18 day delivery.
 Associated Equipment Co.—Rome Mod. SW-20-2, \$2224, 30 days delivery.
 Spears-Wells Machinery Co.—Spearwell Big 8, \$2243, 30 days delivery.
 Austin-Western Road Mch'y Co.—Austin single drive, \$2313.20, 15 days delivery; add \$60 for 40x8 dual rear pneumatic tires; add \$50 for leaning front wheels; add \$100 for IHC No. 20 or Case CI motors; add \$88 for 2-cyl. Kellogg tire pump.
 Brown-Bevis Co.—Adams No. 102, \$3075, 10 days delivery; Model 30, \$3175, 10 days delivery.

ARIZONA STATE—Until 10 A. M., March 11, bids will be received by State Highway Commission, Phoenix, for highway construction on the Prescott-Phoenix Highway, E-72-A (A. F. E. No. 8952). The work, which begins at the western boundary of the Prescott National Forest near Wilhoit and extends southwesterly approximately 8 miles, consists of grading, draining, placing of subgrade stabilizer and oil processing by the plant mix method, is to be completed on or before June 15, 1933. The principal items are:

- 4,200 cu. yds. roadway excavation;
- 3,200 cu. yds. drainage excavation;
- 600 cu. yds. structural excavation;
- 3,100 cu. yds. borrow excavation;
- 20,700 cu. yds. subgrade stabilizer;
- 21,800 cu. yd. mi. subgrade stabilizer; haul;
- 130 cu. yds. concrete;
- 9,700 lbs. reinforcing steel;
- 66 lin. ft. C. M. P. (two sizes);
- 1 each cattle guard;
- 1,100 lin. ft. cable road guard;
- 84,000 lin. ft. line fence;
- 35.3 M. B. M. treated timber;
- 2.2 M. B. M. untreated timber;
- 387 lin. ft. treated piling in timber bents;
- 191 M. gals. water;
- 14,700 tons plant mix;
- 687 tons cutback asphaltic cement;
- 8.1 mi. spread, compact, and finish;
- 700 cu. yds. screenings;
- 1,200 cu. yds. shoulder material;
- 1,300 cu. yd. mi. shoulder material, haul, and other incidental items.

A proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. T. S. O'Connell, State Highway Engineer.

UKIAH, Mendocino Co., Cal.—Richmond Sanitary Co., 290 Division St., San Francisco, at \$1345.25 awarded contract by city council to furnish 1900 ft. wrought steel pipe, 4 flanges and 2 gate valves, f.o.b. Ukiah.
 Complete bids follow:
 Richmond Sanitary Co.....\$1345.25
 Crane Co., S. F..... 1418.04
 Holz Co., Ukiah..... 2002.15
 Tay-Holbrook Co., S. F..... 2078.80

STATE BUREAU FORCE SENT TO L. A. QUAKE AREA

Huntington Details Inspectors
To Protect Public From
Fraud

Possibility that steps may be taken at the present session of the legislature to obtain passage of laws to compel the construction of quake-proof buildings is intimated in a statement issued by Col. Carlos W. Huntington, state registrar of contractors.

Drastic steps to halt the invasion of the Los Angeles quake-stricken area by any irresponsible or incompetent contractors during the reconstruction period were also ordered by Col. Huntington.

"A staff of inspectors has been assigned by the registrar to the quake-stricken area to prevent the public from being duped by carpet-bag contractors in the rebuilding of their homes or business properties. We are cooperating to the fullest extent with the legitimate contractor and building organizations," Col. Huntington said.

"With the reconstruction work already in the preliminary stages, we are faced with the problem of preventing fraudulent construction, which might constitute a menace to public health and safety. Likewise, we are determined to prevent the incompetent or crooked contractor from robbing the people of the stricken area.

"It is apparent that much of the quake damage can be traced to improper construction of homes and business buildings during the past decade.

"Consequently, I plan to confer with members of the board of engineers, the state board of architectural examiners, the Los Angeles City department of building and safety, representatives of the California building congress and other building and construction groups in the immediate future with a view of formulating some regulations or laws which would enable the state to compel the construction of earthquake-proof structures, within reasonable bounds and, insofar as it is humanly possible to do so.

"I firmly believe that some steps should be taken in this direction, and, if possible, legislation enacted at once.

THE WEEK'S NEWS Highlights

EARTHQUAKE DAMAGE—Revised damage estimates from the Southern California area affected by last week's earthquake indicate losses in excess of \$60,000,000. New reports from Long Beach, where the shock was heaviest, are that the losses in this city alone will reach \$50,000,000. Many public buildings in Long Beach, including six schools, were demolished. The county courthouse in Los Angeles was condemned, due to damage sustained, and the board of supervisors voted to petition the R.F.C. for a loan of \$10,000,000 to rebuild. The supervisors also are contemplating asking an additional \$10,000,000 for reconstruction of schools in the county, of which 142 were badly damaged. The state legislature has appropriated 150,000 in emergency funds for rebuilding streets and highways, principal highway damage being on the route between Long Beach and Huntington Beach.

* * * *

TUNNEL BIDS ASKED—Los Angeles Metropolitan Water District has set April 17 as the date for receiving bids on approximately 15 miles of tunnels for the Colorado River aqueduct. It is estimated the work will approximate \$4,000,000.

* * * *

STATE HARBOR CONSTRUCTION—Two additions to harbor facilities at San Francisco have been ordered by the State Harbor Commission. Bids will be received April 6 on a shed extension for Pier 35 and extension of the refrigeration terminal by construction of a new unit of approximately 27,000 square feet of floor space.

* * * *

OAKLAND EXCHANGE ELECTS—S. J. Bertelson, general contractor, was re-elected president of the Oakland Builders' Exchange at the first meeting of the new board of directors elected at the annual meeting March 13.

OAKLAND CHARTER AMENDMENTS WILL AFFECT BUILDERS

Unlimited Authority Given For
Day Labor by Proposed
Change

Four proposed amendments of the Oakland city charter to be voted on at a special election are of interest to contractors and materialmen.

Proposal No. 8 provides for an 8-hour day on all municipal public works and a wage "at least equal to the prevailing salary or wage for the same quality of service rendered to private persons, firms or corporations under similar employment in the city of Oakland."

Proposal No. 9 specifies the mode of making progressive payments on contracts. It provides that "no progressive payments can be provided for or made at any time which, with prior payments, if there have been such, shall exceed in amount at that time seventy-five per cent of the value of the labor done and the materials used" . . . "no contract shall authorize the payment of more than seventy-five per cent of the contract price before the completion and acceptance of the work."

Proposal No. 10 increases the limit of the expenditure permitted by the city council without calling for bids, applying to all material for repairs, construction and improvement work on public buildings, streets, sewers and harbor work. The limit would be raised from \$500 to \$1000.

Proposal No. 11 authorizes the city council to proceed with public works without advertising for bids under an "emergency" resolution, by which the council may determine with a vote of seven members that the emergency is "creating unemployment detrimental to the general welfare."

SUPERVISORS PASS BOILER ORDINANCE

San Francisco's new boiler and pressure vessels inspection and fee ordinance, which has been in preparation for more than a year, was passed without opposition by the Board of Supervisors. The measure will be effective next month.

STATE PROHIBITS FORECLOSURE ON HOME MORTGAGES

Sixty-day Moratorium Effective As Protection For Owner

A 60-day moratorium on mortgage and trust deed foreclosure in the state of California is provided by an act of the legislature which became effective Saturday when Governor Rolph signed the emergency measure.

Sponsors of the legislation said it was designed to protect home owners whose finances were temporarily involved because of the banking holiday. It will provide immediate relief from foreclosure until the present emergency is over and will enable the legislature to give further consideration to real estate debt burdens.

The bill provides:

"Section 1: From the date this act takes effect until sixty days thereafter no sale on execution or under power of sale contained in any mortgage or deed of trust or by direction of court in an action for the recovery of a debt or the enforcement of a right secured by mortgage or other lien shall be made by the dwelling house in which the owner resides or of any of the necessary outbuildings or of the land upon which it is situated and necessary for the convenient use thereof or of land used by the owner in farming or ranch operations conducted by him or under his immediate supervision or of any interest therein or in either thereof. Owner, as used herein, includes the debtor, mortgagor or trustor or his successor in interest in respect to such dwelling house, outbuilding or land. Any such sale held contrary to the provisions of this act or any deed given or executed pursuant to any such sale is void.

"Section 2: Notwithstanding any provision of law or any obligation or agreement affected by the provisions of this act the period of time during which proceedings must be instituted or a sale had on execution or under power contained in any mortgage or deed of trust or by direction of court in an action for the recovery of a debt or the enforcement of a right secured by mortgage or other lien is hereby extended for sixty days and any such sale heretofore set for a date which occurs during the period of time mentioned in Section 1 of this act may legally and effectually be postponed to a date subsequent to the expiration of said period of time. The owner has not the right to waive any of the provisions of benefits of this Act. Any such waiver by or for the owner is wholly null, void and ineffectual after or before or after the event."

SUPERVISORS ASSN. OPPOSE ABOLITION OF LICENSE LAW

SACRAMENTO, Cal. — Recommendations of the Senate Fact Finding Committee for abolition of the State Bureau of Contractors Registration were vigorously opposed in a resolution adopted by the California County Supervisors Association, in convention here. The 234 supervisors also went on record as opposing repeal of the State Barbers' Act and abolition of the State Department of Professional and Vocational Standards.

The following officers were elected: Supervisors W. J. Buchanan, Contra Costa County, President; J. E. MacGregor, Riverside, Vice-President; W. J. Mellon, Yuba City, Treasurer. Supervisor Stanley Abel, Kern County, former president of the association, was reappointed secretary.

Introduced by Supervisor John R. Quinn, Los Angeles County, and Supervisor Tom Hurley, San Diego County, the resolutions were approved by the 234 delegates at the closing session without a dissenting vote.

Pointing out that the Contractors' Bureau, and the Barber Board, as well as the entire department of Professional and Vocational Standards were entirely self-supporting, the resolution declared that repeal of these units of Government would "in no way, shape or form, aid in the solution of the State's financial problem, and would constitute false economy."

"We are unalterably opposed to the repeal or weakening of these laws," the resolution stated.

Abolition of the Contractors' Act, which has enabled the State to weed out irresponsible and crooked contractors and prevent racketeering in the construction industry is being sought in Senate Bill 183 by Senator R. R. Ingels, Ukiah.

Assemblyman James O'Connor, Los Angeles, is author of Bills to repeal the Barber Law and the Department of Professional and Vocational Standards.

PROPOSE REPEAL OF VISALIA ACT

An ordinance to repeal the Visalia building regulations and to permit cheaper types of construction in certain residential zones has been introduced in the city council by Councilman E. R. Connelly.

Connelly said that present restrictions were a deterrent to improvement of property.

SALES GAIN

Wayne Oil Burner Corporation of Indiana reports sales for 1932 with the exception of one month above the volume of each month in the previous year. The sales volume has shown an increase up to March 1 during the current year, according to John A. Berghoff, general manager.

29 COMPLAINTS INVESTIGATED IN FEBRUARY

Eighteen Contractors Lose State Licenses For Law Violation

Complaints filed with the State Registrar of Contractors during February involved a total of \$107,299, according to the report of Registrar Carlos G. Huntington.

Of 29 cases filed, eighteen resulted in suspension of state contractors' licenses.

In ten complaint cases, settlement was amicably effected after the filing of a formal charge, but prior to and without the necessity of a formal hearing, and the complainants allowed to withdraw the charges. One case was dismissed due to the lack of jurisdiction of the Registrar.

Five applications for contractors' licenses were denied, while one applicant was granted a license. A total of 34 hearings were held during the month in the formal complaint section, and 31 additional cases were settled by arbitration by inspectors in the field.

Six court cases were pending before the Registrar during the past month and a conviction was obtained in one case where a man was found to be operating as an unlicensed contractor.

PALO ALTO NAMES UTILITY MANAGER

Creation of a new department of public utilities has been authorized by the Palo Alto board of public works on the recommendation of J. F. Byxbee, city engineer.

L. Harold Anderson, deputy city engineer, was named director of public utilities. He will retain his position as deputy.

Anderson will have complete charge of all municipal utilities and will act as building inspector.

COLUSA COUNTY SETS ROAD WAGES

Colusa county supervisors have established a uniform scale of wages for road work providing \$3 for day laborers and \$4 for a man and team. The daily scale follows:

Truck drivers, \$3.50; caterpillar 30 tractor drivers, \$4; one-man motor control grader drivers, \$4; grader men, \$4; common labor, \$3; carpenters, \$4; concrete men, \$4; jackhammer and air compressor men, \$4; man with team and wagon \$4; inspector of roads and bridges, \$6; one horse, 50 cents; wagon, 50 cents; fresno scraper, 50 cents.

SAN ANSELMO PERMITS

Building permits authorized in San Anselmo during February totaled \$8,600, according to the report of Building Inspector Charles H. Cartwright.

SIX COMPANIES DENIED NEVADA TAX EXEMPTION

Federal Court Upholds Levy On Construction Company Properties

State of Nevada tax claims against the Six Companies for personal property and poll tax assessments in the amount of approximately \$200,000 were upheld by a decision of the Federal District Court at Carson City.

The court dissolved a temporary injunction obtained by Clark county authorities restraining them from levying taxes against the Six Companies property used in construction of Boulder dam. The company is not a government agency and cannot therefore claim exemption from local taxes, according to a decision by Judge Frank Norcross.

The taxes involved, officials estimated, now amount to \$200,000 and will be approximately \$100,000 a year during the course of construction.

Judge Norcross held that the only reservation property over which the Federal government has exclusive jurisdiction is the dam itself and the power plants and structures immediately appertaining.

Six Companies was successful in another Federal court action, decided at the same time, in obtaining a permanent order against enforcement of the Nevada state law prohibiting use of gasoline engines in underground work. A three-judge court which heard the case ruled that the state legislature had intended to apply the regulation only to mining operations and that the Boulder Dam construction did not come within its provisions.

TRUCKMEN ASK LOCAL PREFERENCE LAW

Dump truck owners have asked the Santa Clara county board of supervisors to enact an ordinance providing that only local labor and locally-owned equipment be used in county road work. They ask a minimum wage scale of from \$2.25 to \$4 an hour for trucks.

Representatives of the truck drivers' union demanded that the present wage scale be lowered not more than 50 cents daily which would make the range from \$5.50 to \$6.50 a day.

James Quinby, spokesman for truck contractors, asked that the scale be lowered \$1 a day.

The controversy has been referred to the district attorney for an opinion as to whether the board can enact an ordinance limiting truck contracting to county resi-

WATER SYSTEM SALES

The number of deep well water systems sold in January was above the total for December and equal to that of November, according to the monthly report to the Bureau of the Census. The net sales value was reported as \$32,663.

RILEY TO CONTINUE COUNTY BRIDGE JOB

E. H. Riley has been authorized to continue with his contract for construction of the Garwood Ferry bridge in San Joaquin county, it is announced.

The San Joaquin county board of supervisors last week declared Riley in default when he informed the board he would be unable to complete the structure. At the meeting this week Riley appeared before the board and said he had obtained financing to enable him to finish the contract.

The Columbia Casualty Company, surety for Riley, advised the board they were satisfied with his arrangement and recommended that he be permitted to resume the contract.

The supervisors rescinded their former action and ordered Riley to proceed with the work on recommendation of County Engineer Julius Manthey.

MONTEREY ENGINEER HEADS ASSOCIATION

Howard Cozzlins, Monterey county engineer, was elected president of the County Surveyors' and Engineers' Association of California for the new year at the annual convention in Sacramento.

Other officers are J. B. Mantley, San Joaquin county, vice-president; Lloyd Bowman, Santa Cruz county, secretary-treasurer.

WATER COMPANY TO SPEND \$22,700

Improvements totaling \$22,700 will be made by the Bear Gulch Water Company in the Menlo Park and Atherton district within the next few months, according to a program authorized by the board of directors.

Replacement of mains and extensions are the principal items scheduled.

Uniform State Building Code to End Danger From Earthquake, Says Leonard

Adoption of the California uniform building code and its rigid enforcement in every city of the state will forever end the earthquake menace, declared Building Inspector J. B. Leonard. Leonard is superintendent of the bureau of building inspection of San Francisco and vice-chairman of the uniform building code.

For the past four years this committee has been engaged in formulating a uniform building code that would set a new standard in safe and economical construction, Leonard said. Of first consideration in their study has been the means of eliminating the danger of collapse due to earth shocks.

The committee members include: Architects—D. J. Witmer of Los Angeles, Chairman of the Building Code Committee, Wm. Day of San Francisco.

Engineers—Mellville Dozier of Los Angeles; J. B. Leonard of San Francisco, Vice-Chairman of the Code Committee.

Contractors—Wm. Simpson of Los Angeles; George Wagner of San Francisco.

Building Officials—Waller Putnam of Pasadena; S. P. Koch of Berkeley.

Technical Editors—Edwin Bergstrom of Los Angeles, Architect; Henry Dewell of San Francisco, Engineer.

The special engineering sub-committee includes: Henry Dewell, Henry Brunnier, M. C. Couchot, L. H. Nishkian, Walter L. Huber, C. H. Snyder, H. B. Hammill, C. H. Kramer.

Leonard said:

"One of the first steps taken by the committee was to secure data not only on experience in every section of the United States that has ever had earthquake shocks,

but in practically every country in the world where damage has been recorded as a result of earth tremors. Outstanding among these were Japan, Italy, Australia, and South America. Intensive study was made of damage done to the various types of buildings and from this intensive study, taking into consideration every phase of building construction and the results of stresses and strains caused by earth tremors The California Uniform Building Code has been built carefully step by step.

"Upon its completion and adoption throughout the length and breadth of this state, I do not hesitate to say that loss of life due to any possible earth tremors in California will be a thing of the past. Our study has shown that loss of life has been due to falling walls of poorly constructed buildings, that Class A buildings generally, the tall buildings or so-called skyscrapers, have given splendid account of themselves, not only protecting the lives of all those within the building but protecting the lives of those in the street, due to the fact that the walls have not fallen. Upon the adoption of this code, California will be the safest place in the world to reside. Earthquakes, as such, in California, have never caused loss of life. It has been due purely to poorly constructed buildings of the lower classifications.

"Earthquakes in California should never have or ever should cause loss of life. The adoption of this Building Code would permanently establish this fact. California has taken advantage of its experience and the experiences in all other parts of the world. After analysis and intensive study of these experiences, it is providing an absolute safeguard to life and property."

SALES CONTRACT IS VOIDED BY LOAN AGREEMENT

Court Stops Radiator Company From Removing Fixtures

A decision recently by the appellate court is of importance to heating contractors.

The title of the case is Hammel Radiator Corp. vs. Mortgage Guarantee Company. (Appellate Court Decisions 682).

It is an action for damages for conversion where the radiator corporation had installed gas steam radiators in an apartment house under construction and for which the Mortgage Guarantee Company had made a loan.

The radiators were necessary in the use of the building as an apartment house. The defendant company did not pay out the last \$48,000 of its loan until after it had inspected the premises and found the radiators installed and attached to the building by means of slip joints threaded unit and flanges. The deed of trust purported to cover the land with appurtenances, buildings and improvements.

The radiators were placed under a conditional sales contract, providing title should remain in the corporation. The owner failed to make trust deed payment and the mortgage company foreclosed.

The court held the radiator company had no right to remove the radiators. The ruling was made removal would substantially injure the security of the prior encumbrance the conditional vendor's rights must be relegated to those of the prior encumbrancer.

BAUMBERGER NAMED INSPECTION CHIEF

Walter E. Baumberger of Kentfield has been appointed cost and progress engineer in charge of the inspection division of the Golden Gate Bridge District.

It is the first appointment announced by General Manager James Reed.

Baumberger is a well-known architect and engineer. He was selected from among three hundred applicants for inspection appointments.

Major local construction that Baumberger has supervised include the Hotel Mark Hopkins and the Pacific Telephone and Telegraph headquarters building.

PUMP UNIT SALES GAIN IN JANUARY

The number of pumps sold in January exceeded by nearly fifty percent the total for November, but the dollar value was approximately the same, according to manufacturers' reports to the Bureau of the Census. Sales in units and dollars were: November, 12,736 and \$75,595; December, 13,028 and \$56,664; January, 18,077 and \$75,238.

UPTREND SHOWN IN MATERIALS PRICES

An upward trend in wholesale prices of building materials during the past month is shown in the report of the Bureau of Labor Statistics. The increase in building materials prices is registered in the face of a decline in average prices of all commodities.

The wholesale price index on February 11 stood at 69.6 and had increased by March 4 to 70.1. The average commodity price on February 11 and 60.2 and on March 4 was 59.6.

Price comparisons are based on an index base of 10.0 representing the price level in 1926.

NEW DESIGN FOR SPOTLIGHT LAMPS

The Westinghouse Lamp Company announces a new base design for the Mazda 2000 watt, G-48 bulb projection or spotlight lamp.

This new "mechanical" base design consists of metal parts which are attached by machine. It replaces the use of cement and eliminates early deterioration of cement from heat dissipation in high wattage lamps, thus preventing loosening of bases which impair the position of the light center or cause short circuits.

Development of this new base design is an outgrowth of the reduction in the size of high wattage incandescent light sources. The trend to hotter operation has resulted in faster deterioration of the cement in the bases because of greater heat dissipation. The new base design corrects this condition.

The mechanical base is simple in design, consisting of a ferrule of eraydo metal and a standard mogul base. The ferrule is placed inside the base and both are slipped over the neck of the bulb then clamped into slight indentations moulded in the glass until a tight fit is obtained. One lead wire projects straight through the button of the base and the other is turned up into a groove along the glass neck. After the lead wires are welded to the base is clamped tight the ends of base.

18 CONTRACTS REMAINING ON S. F. BAY BRIDGE

Estimated Cost \$53,000,000 Bids Open on Three-fifths Of Schedule

Eighteen contracts remain to be advertised for bids before the San Francisco-Oakland Bay Bridge awards are completed, it is pointed out by State Director of Public Works Earl Lee Kelly. These are in addition to the five major units on which bids have been received.

On the basis of figures received covering nearly \$34,000,000 worth of the work the entire bridge structure will cost \$53,670,872, Chief Engineer C. H. Purcell estimated. This sum is now the estimated cost of the structural work alone and does not include interest charges during construction, insurance, engineering or legal services, administration costs or an allowance for contingencies.

However with savings to date of \$7,580,890 over original engineers' estimates on the contracts thus far authorized, it is expected that a further reduction will be seen in actual costs when bids are opened on work yet to be advertised.

The contracts on which bids have been received are:

	Low Bid
West Bay Substructure....	\$ 6,957,100.68
East Bay Substructure....	4,495,854.00
East Bay Superstructure	13,732,471.80
West Bay Superstructure..	8,798,096.50

\$33,983,522.98

The contracts on which a date has been set for opening bids are:

	Engineers' Estimate
Yerba Buena crossing,	
March 28	\$ 2,500,000.00
San Francisco Anchorage,	
March 29	1,700,000.00

The contracts on which bids have not been advertised and which will be deferred until the foundation work is well underway are:

No. 8 Demolition of the San Francisco Section; No. 9 San Francisco section; No. 10 Substructure girder spans on mole; No. 11 Moving buildings on Yerba Buena Island; No. 12 Light weight aggregate; No. 13 Administration and toll buildings; No. 14 Electrical work; No. 15 Wrapping cables; No. 16 Operating equipment; No. 17 Final field painting; No. 18 Demolition of San Francisco approaches; No. 19 San Francisco approaches; No. 20 Mole construction and waterfront grading; No. 21 East Bay viaducts; No. 22 Southern Pacific underpass; No. 23 Paving East Bay streets.

SEABERG APPOINTED

E. M. Seaberg has been named East Bay representative of the United States Gypsum Company during the absence of D. F. Scott, who has taken a leave on account of illness. Seaberg resides at 812 Creed Road, Oakland.

State Law Proposed to Aid Builder in Determining Property Loan Agreements

By J. W. MORIN

Following is a memorandum in support of Assembly Bill No. 711, a proposal known as the "Declaration of Intention to Build" Act:

The essential object of this bill is to make readily available the facts essential to a credit investigation of a building enterprise which seeks credit of the public, at its beginning. Ordinarily, a building projected on clear property is a fair credit risk—a building projected on encumbered property may or may not be a fair risk, depending upon not merely the recorded character of the encumbrances, but the facts which lie behind the record, to-wit, an answer to the question, do the encumbrances represent an arrangement under which money, or its equivalent, will be available for the project and, if so, the amount and the exact conditions under which it will be available.

As a matter of law, the borrower and the lender having once committed themselves to a definite set of loan conditions cannot, after the beginning of construction, change these conditions in any material detail without the lender surrendering his preferred lien over the material man, and therefore an intelligent credit investigator can examine the recorded credit set-up required under this proposed law; if it is good, he can sell his goods and rely on the set-up. He knows it will remain as set forth; and, if it is bad, he can stay out in the beginning.

If the credit set-up does not rationally support the construction program, the credit showing will occasion an immediate, consolidated investigation by accredited, responsible trade organizations and it may lead to a modification or abandonment of the abortive enterprise, or to a refinancing thereof along conventional lines, and this is as it should be. If this system had prevailed in the metropolitan areas during the last ten years, it would have finally saved builders, lenders, investors and material men the better part of \$100,000,000, and the building industry, the financing business, the building and loan business, and even the banking business would have been in better repute today. While times were booming, this proposed law was not particularly welcomed in some quarters because it might retard building. Now, while building is fully retarded, is the time to put it on an honest basis for future prosperity.

Purported building finance which is so recorded as to present only a half truth of the credit picture is frequently a device used by lender agencies in dealings with incompetent or visionary borrowers, many of which borrowers are the weakest financial members in society. There is no magic by which a

promise to repay a loan which was never substantially advanced in the first place can be made a real asset upon the books of a lending organization. A transaction which is founded in impossible discounts and commissions and full of junk is also characterized by inflation of material and labor bids, and is headed for trouble later, if not sooner.

The following statements can be made in reference to the proposed law:

FIRST: It does not touch the mechanic's lien law.

SECOND: It does not require anything of one building on clear property.

THIRD: It does not require anything of one building with the proceeds of personal unsecured loans.

FOURTH: It does not require any statement of assets or liabilities.

FIFTH: It does not require any statement of old or fully closed loans, proceeds of which have been heretofore fully advanced before construction.

SIXTH: It does not make a lender responsible for the borrower's statement.

SEVENTH: It only requires a statement of one building on a shoestring, that is, one whose building is to be a part of the security for the loaned funds.

EIGHTH: It does not even supervise or control the building fund in the hands of the borrower.

In summary—only necessitates a showing as to whether or not the project is actually financed or only abortive.

\$10,000,000 LOAN ASKED BY L. A. FOR REBUILDING

Petition R. F. C. For Money To Replace Wrecked Structures

Supervisors of Los Angeles county will appeal to the Reconstruction Finance Corporation for a loan of \$10,000,000 to build a new county courthouse. It was decided as one of the first moves toward reconstruction of public buildings destroyed by the earthquake.

An additional \$10,000,000 may be asked for constructing new school buildings.

The petition for funds will be filed through Governor Rolph. The district attorney has been instructed to prepare necessary legal forms.

W. E. Record, business manager of the Los Angeles board of education, has filed a preliminary report on school damage in which he stated 142 out of 392 in the city will be unable to open until repairs have been made. Twenty-two schools were reported seriously damaged, while the remaining 120 will be reoccupied after minor repairs.

Walter Barber, secretary of the Long Beach board of education, reported six schools in the district probably would have to be razed. These include four elementary schools and two high schools.

Interior damage to the new \$620,000 Federal Building at Third and American Avenue was estimated at between \$80,000 and \$100,000 by A. R. McPherson of Lindgren & Swinerton, contractors on the building. A considerable portion of the plaster and interior finish will have to be removed for inspection of girders and other structural elements.

Architect Claud Beelman, Union Bank Building, Los Angeles, who designed the Pacific Coast Club on East Ocean Avenue, Long Beach, made a complete inspection of the building and reported that repairs would cost about \$75,000.

Damage to state highways in the earthquake zone has been estimated at \$200,000 in reports to State Director of Public Works Earl Lee Kely. The pavement between Long Beach and Huntington Beach is damaged and bridge approaches have dropped from 3 to 12 inches. The fill at Hathaway cutoff shows large cracks and will require complete rebuilding.

F. J. Connolly, manager of Southern California Chapter, Associated General Contractors, yesterday issued a request for building contractors and qualified estimators to communicate with him at the Chamber of Commerce Building, Los Angeles. Volunteers are being sought for service in Long Beach.

A preliminary summary of damage surveys in affected cities follows:

LOS ANGELES COUNTY: Recommendations have been made by Wm. Davidson, Los Angeles county mechanical engineer that the old Court House be condemned; four old buildings at Rancho Los Amigos be con-

demned, and repairs be made to steel tank and tower.

LONG BEACH: Unofficial estimates of damage to buildings at Long Beach has been placed at not less than \$25,000,000. A survey is now under way to determine the exact extent of damage and which buildings will be condemned.

COMPTON: Practically all buildings in business section of Compton were either demolished or badly damaged and must be replaced or rebuilt. Preliminary surveys of damage now in progress. Estimated damage, \$6,000,000.

HUNTINGTON PARK: City Building Inspector Pryor has established temporary quarters in Bungalow No. 4 at rear of City Hall Park, from where he is directing survey of property damage. Contracting firms of Whipple & McDonald, Reid & Alexander and James C. Barr are working with city officials on the survey. Permits for reconstruction work will not be issued for two or three days. Estimated damage, \$1,000,000.

SANTA ANA: City Building Inspector Sam Preble estimated that fifty major buildings in Santa Ana were partially damaged and that cost of repairs to these structures would total \$150,000 or more.

COSTA MESA: Practically all buildings in the two-block business area were damaged, loss being estimated at \$100,000.

ARTESIA: Survey indicates damage to buildings will exceed \$150,000. A number of buildings were partially wrecked.

HERMOSA BEACH: Survey made by City Officials reveals damage confined to cracks in outer walls of business buildings, broken chimneys, etc. Damage estimated at \$100,000.

SEAL BEACH: Estimated property damage in Seal Beach is \$200,000.

ANAHEIM—Rudolph Nyboe, City Building Inspector is making a survey of damage. Estimate of damage placed at \$125,000.

HAWTHORNE: Property damage in Hawthorne will total less than \$10,000.

MANHATTAN BEACH—Late surveys disclose only slight building damage in Manhattan Beach. Damage confined to broken glass, weakened roofs, etc. Damage estimate, \$1000.

TORRANCE: Property damage in Torrance will probably not exceed \$100,000, according to report based on preliminary surveys.

NEWPORT BEACH: Newport Beach and Balboa report practically no damage.

UAGUNA BEACH—About \$10,000 damage was done. Portions of front fell off business buildings.

VERNON: An estimate of property damage in Vernon made by fire department officials was that loss will not exceed \$10,000.

BELLFLOWER: Business section, in which there were 60 stores and stands was practically demolished. Until survey is made plans for rebuilding will not be made. Damage estimated at \$200,000.

BUENA PARK: Virtually every building in Buena Park was seriously damaged, loss being estimated at \$40,000.

GARDENA: Damage will approximate \$50,000.

BELL: Buildings damaged to extent of \$600,000 according to insurance men. Estimate may increase after larger buildings are thoroughly inspected.

MAYWOOD: Property loss of approximately \$50,000, according to estimates made by Maywood police.

VENICE: Damage in Venice section will not exceed \$60,000.

SOUTH GATE: Mayor Harold Pomeroy estimates property loss at \$600,000.

INGLEWOOD: Building inspector Garfield Leftwich estimates damage at \$100,000.

SANTA MONICA: Officials of city building department state total property loss will not exceed \$5000.

NORWALK: No official estimate of damage has been made but it is expected to be about \$375,000.

WATTS: Stores fronting on two blocks of 103rd Street, either wrecked or seriously damaged. Damage estimated at \$200,000.

WHITTIER: Damage small and scattered. Estimated damage \$20,000.

REDONDO BEACH: Unofficial estimates place damage at \$100,000.

LYNWOOD: Fire department officials estimated property damage at \$3,000,000. Extensive damage to city's water system, including wrecking of steel water tank and tower.

GARDEN GROVE: Damage to buildings is set unofficially at \$50,000.

WILMINGTON: Approximately \$100,000 is a conservative estimate of property damage sustained in Wilmington.

HUNTINGTON BEACH: Major portion of the estimated \$600,000 loss was the destruction of the new \$500,000 elementary school which is a total loss.

DOMINQUEZ JUNCTION: Pacific Electric sub-station totally wrecked.

SAN PEDRO: Some damage to business buildings.

WATER DISTRICT ASKS BIDS ON THREE TUNNELS

Units of Colorado Aqueduct Are Advertised to Contractors

Bids will be received by the Los Angeles Metropolitan Water District on April 17 for constructing three tunnels of the Colorado River aqueduct.

The work includes excavation and lining of three tunnels divided as follows:

Iron Mountain Tunnel, East Portion, 4.5 mi., West Portion, 3.1 mi.; Coxcomb Tunnel, East Portion, 1.6 mi.; West Portion, 1.9 mi.;

Cottonwood Tunnel, East Portion, 1.9 mi., West Portion, 1.9 mi.

Proposals will be received for construction with a finished interior diameter of 16 feet and an alternate for a finished interior of 12 feet 4 inches. The total contract price will be in the vicinity of \$4,000,000, it is estimated.

Iron Mountain tunnel site is located about 20 miles west of Rice station on the A.T. & S. F. Ry.; Coxcomb tunnel site 36 miles west of Rice, and Cottonwood tunnel site about 17 miles east of Indio.

ENTERPRISE BOOTH FOR BURNER SHOW

Enterprise Oil Burner Company of San Francisco has reserved Booth 29 at the Tenth National Oil Burner Show to be conducted by the American Oil Burner Association at Hotel Stevens in Chicago, June 12-16.

The Enterprise display will feature domestic and commercial burners for heavy fuel oil. Mr. H. Barley, vice-president of the company, will be in attendance at the exhibit booth. Distributors of the company's products from various sections of the country also will have headquarters at the booth.

DELIVERY OF CEMENT FOR DAM IS STARTED

With a capacity cargo of cement from the plant of the Santa Cruz Cement Company, the S. S. Point Arena is on its way toward the Panama Canal to deliver the material to the site of the Madden dam near Balboa.

The shipment is the first of an order for 350,000 barrels to be produced by Santa Cruz for the United States Government for use in the dam construction. Madden dam is designed to protect the canal from floods and to provide a storage supply of water during drought periods.

The million-dollar contract will keep the cement plant busy for more than six months. Three ships have been chartered to carry the consignment to Panama, at the rate of 5350 barrels a trip.

BERTELSEN AGAIN PRESIDENT OF OAKLAND EXCHANGE

S. J. Bertelsen, Oakland general contractor, was re-elected president of the Oakland Builders' Exchange at the first meeting of the new board of directors.

Other officers elected are: W. E. McGrath of McGrath Steel Co., vice-president; William Makin, plastering contractor, treasurer; Sam C. Hanna, Port Costa Brick Co., secretary.

Twelve directors were elected at the annual meeting held Monday, a three-cornered tie occurring in the contest for twelfth member of the board. A drawing resulted in the seating of Carl Replogle, Judson-Pacific Company, who was tied with Clyde Sherwood and David Nordstrom in the original vote.

The other members of the board are S. J. Bertelsen, H. J. Christensen, William Makin, Sam C. Hanna, Thomas F. L. Furlong, Wm. E. McGrath, W. E. Lyons, W. W. Harmon, A. C. Bocchio, W. J. Rigney and Walter B. Innes.

Two hundred and fifty members of the Exchange attended the annual dinner served at Stephens'

Restaurant Monday night. An entertainment at the Exchange followed the dinner. Refreshments were donated by the following firms: Gladding McBean Co., McNear Brick Co., W. S. Dickey Co., Rhodes-Jamieson, Port Costa Brick Works, Sunset Lumber Co., N. Clark & Son, Union Oil Co.

Committees in charge of the annual affair included Sam C. Hanna, general chairman; Wm. McGrath, chairman of the house committee; Pierce Ricker, door prizes; Fred Bocchio, Carl Replogle, W. E. Thornally, refreshments; Ralph King, J. F. Fitzmaurice, R. O. Brown, entertainment.

TO TEST WOODLAND LICENSING ORDINANCE

Test of the validity of the Woodland city ordinance licensing electrical contractors has been undertaken by Ernest Conger, who was arrested on complaint of Building Inspector Geo. Hazeman.

Conger is charged with operating without a license. He entered a plea of not guilty and his trial has been set for March 21.

Forest Industries Designs Small House To be Built and Equipped for \$2500

By careful selection of floor plans and designing, and installation of suitable household equipment, the small house can provide many of the desirable features of a larger dwelling and at the same time be erected at very modest cost.

Plans, developed by American Forest Products Industries to meet the requirements of deflated income and new price levels, call for construction along customary lines, except that a departure from the standard type of wall framing makes it possible to install vertical boarding on the interior instead of plaster. A three-room modern house with standard household equipment included, will cost from \$1800 to \$2500 to build, not counting, of course, the price of lot, says a bulletin from the organization.

"The house is 20 feet wide by 30 feet deep and can be built on a comparatively narrow lot. By running a gable across the front of the house, the roof lines and side elevations are broken up and offer a more pleasing effect than is obtained with the single gable roof. The sloping roof at the front with the narrow overhang at the cornice hint of the Colonial type of architecture.

"The floor plan consists of a living room 13½ feet square at the front of the house, with storage space and bath at the right. The dinette and kitchen are to the left toward the rear of the house and a bedroom 10½ feet by 12 feet is at

the right rear. The living room may be utilized as a spare bedroom with a disappearing bed. When the bed is in use the bath is accessible from the living room through the bed-storage space. Otherwise the bath may be entered only through the bedroom.

'An excavated basement under the rear of the house accommodates the heater, fuel storage, laundry trays and provides space for limited storage and a work bench. The attic space may also be used for storage of articles. It is accessible through a trap door in the ceiling at the head of the basement stairs.

"The unique feature of the wall construction is the 2-in. by 2-in. studs spaced 16-in. on centers with 2-in. by 2-in. horizontal strips spaced 2 feet apart, to which the vertical interior finish boards are nailed. This construction with exterior diagonal sheathing provides ample strength for the loads to be carried.

"The house can be heated to advantage either by a 'pipeless' warm air furnace with short air ducts or by a hot water system. Insulating properties of the walls are slightly better than for the standard frame and plastered type. The 2½ inches of loose insulation over the wood finish ceiling cuts down the heat transfer to about one-fifth of what it would be through a lath and plastered ceiling. This effective type of insulation should make practical the installation of an automatic heating system with either gas or oil."

Also a 2-mi. tunnel from South Fork to Middle Fork, 7 ft. high, 7 ft. wide, unlined, estimated cost \$217,000. Thirteen and two-tenths miles collection canals estimated cost \$225,000. Construct 6-mi. new roads, estimated cost \$42,000. R. I. Meeker, Irrigation Engineer; E. H. Thwaites Consulting Engineer.

SAN FRANCISCO—Until March 24, 3 P. M., under Bid No. 979 bids will be received by T. A. Brooks, City Purchasing Agent, 270 City Hall to furnish stove oil, fuel oil and burning equipment for Hetch Hetchy Project. Specifications obtainable from above office.

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., April 10, bids will be received by City Council for drilling, casing, developing, and testing one 24-in. water well, in accordance with specifications which may be obtained from M. R. Bowen, Water Superintendent, 205 N. Greenleaf Ave., Whittier. Bidders shall name a lump sum price for a well 250 ft. deep and a price per foot for each additional foot of depth. Certified check or surety company bond, 10%. Debbie E. Allen, City Clerk.

MANTECA, San Joaquin Co., Cal.—Pacific States Cast Iron Pipe Co., Rialto Bldg., San Francisco, at \$786.30 awarded contract by city council to furnish 1200 ft. 6-in. pipe, tees and plugs. Complete bids follow:
Pacific States C. I. Pipe Co., pipe, \$.62½ ft., tees \$11, plugs \$1.10.

American C. I. Pipe Co. S. F. and U. S. Pipe & Foundry Co., submitted identical bids at \$.57½ per ft. for pipe, tees, \$10 each, and plugs \$.70 each.

HEMET, Riverside Co., Cal.—McDonnell-Smith Engineering Corp., Western Pacific Bldg., Los Angeles, consulting engineer, has completed a preliminary estimate of materials and construction required for the proposed new water system, for which an election to vote a \$121,000 bond issue is to be held April 4 (previously noted). The proposed system involves:
Drilling of two 16-in. wells complete. Furnishing and installing two well turbine pumps of 450 G. P. M. each Water supply line involving 15,600 ft. 10-in. electrically welded steel pipe.

- One 150,000-gal. steel storage tank on elevated steel tower.
- Distribution system involving:
- 11,510 ft. 2-in. cast iron water pipe;
- 35,720 ft. 4-in. cast iron water pipe;
- 23,900 ft. 6-in. cast iron water pipe;
- 5,960 ft. 8-in. cast iron water pipe;
- 4,100 ft. 10-in. cast iron water pipe;
- 12 2-in. gate valves;
- 32 4-in. gate valves;
- 28 6-in. gate valves;
- 6 8-in. gate valves;
- 3 10-in. gate valves;
- 16 steamer hydrants;
- 52 2½-in. nozzle hydrants.

LOS ANGELES, Cal.—Contracts for furnishing bell and spigot Class 250 cast iron water pipe under Spec. No. 3002, awarded by A. J. Holm, City Purchasing Agent, March 7, as follows:

National Cast Iron Pipe Co., item 1) 30,000 ft. 8-in., delivered on or about April 15, 1933, f.o.b. cars or trucks Hewitt St. yard, Water and Power Department, at \$26,700 (est. total).

U. S. Pipe & Foundry Co., items 2, 3, and 4, at \$71,520 (est. total). These items are: 30,000 ft. 8-in., June 15, and 30,000 ft. 8-in. Aug. 15, delivered f.o.b. cars or trucks Dept. of Water & Power Hewitt St. Yard; 20,000 ft. 8-in., Sept. 15, f.o.b. cars or trucks, Dept. of Water & Power, Slauson & Compton Ave. yard, Los Angeles.

American Cast Iron Pipe Co.—Items (4) and (5) at \$35,560 (est. cost). These items are: 20,000 ft. 8-in., May 15, and 20,000 ft. 8-in. July 15, f.o.b. cars or trucks, Dept. of Water and Power, Slauson and Compton Avenue yard.

The bids were opened Feb. 21.

SAN MATEO, Cal.—Byron-Jackson Pump Co., 111 Sutter St., San Francisco, at \$1432.60 awarded contract by city council to furnish one deep well turbine pump, capacity 350 to 400 G.P.M.

LOS ANGELES, Cal.—Saul A. Joseph, Purchasing Agent of the Metropolitan Water District, has announced that commencing March 13, notices inviting bids for miscellaneous materials, equipment and supplies will be posted in the corridor on the 5th floor of the Metropolitan Water District Building, 306 W. 3rd St., where they may be inspected by prospective bidders. Copies will be issued to bona fide bidders. Bid forms will be handled by George H. Millard, 5th Floor.

LOS ANGELES, Cal.—Western Pipe & Steel Co. of California, awarded the contract by A. J. Holm, City Purchasing Agent, March 9, at \$32,433 (estimated total) for furnishing welded steel water pipe under Spec. No. 3018. The bids were opened March 6.

HUNTINGTON BEACH, Los Angeles Co., Cal.—City council has under consideration a proposal to establish a

municipal water system. Dr. Roy White is circulating the petitions. The city will either purchase the system of the American States Water Service Corp. or install a new system.

OAKLAND, Cal.—Grinnel Company of the Pacific, Fifth and Brannan Sts. San Francisco, at \$2670 submitted low bid to East Bay Municipal Utility District to furnish 30 tons of joint compound for cast iron pipe. Complete bids follow:
Grinnel Co. "Basolite".....\$2670
Atlas Mineral Prod. Co., "Mineral Lead" 3360
Hydraulic Development Co. "Hydrolite" 4080
Waterworks Supply Co. "Lead-ite" 6300
Bids held under advisement.

PHOENIX, Ariz.—W. C. Lefebvre, City Engineer, has been authorized by the city commission to prepare a plan for the extension of the municipal water system. A field survey is to be made, including the district in which the Tovrea Packing Co.'s plant is located.

BELLINGHAM, Wash.—Ralph Turner at \$10,938 awarded contract by city council to furnish 15,675 feet wood water pipe. Morse Hardware Company second low at \$13,722; U. S. Pipe Foundry Co. third low at \$14,862.

SAN DIEGO, Cal.—Vernon Foundry, Inc., 1734 Iowa, Hollydale, submitted low bid to the City Purchasing Agent, A. R. Sauer, Jr., San Diego, March 8, at \$1342 for two 36-in. and two 42-in. cast iron saucer valves and cast steel covers with brass by-pass and bronze seat and miscellaneous items. The bids were:

- Vernon Foundry, Inc., \$1342; alternate, \$1222.
 - Southern Machinery Co., \$1596.60.
 - Relibale Iron Foundry, \$1642.80.
 - Enterprise Foundry Corp., \$1655.
 - Long Beach Iron Works, \$1691.02.
 - Consolidated Steel Corp., Ltd., \$1916.
 - Standard Iron Works, \$1919.50.
 - Sidney E. Mayer Mach. Co., \$2056.
 - Machinery Pipe & Supply Co., \$2290.
- Bids held under advisement.

MENLO PARK, Santa Clara Co., Cal.—Bids will be asked shortly by N. Hovey, Purchasing Agent, Bear Gulch Water Co., 1235 State Highway, Menlo Park, to furnish cast iron water pipe for contemplated improvements of water mains. Project involves:

- 7000 ft. 6-in. cast iron pipe;
 - 2000 ft. 10-in. do;
 - valves and fittings.
- Estimated cost, \$12,200.

35—TUNNELS

SOUTH PASADENA, Los Angeles Co., Cal.—A resolution asking the Board of Supervisors of Los Angeles County to appropriate \$43,852 for storm drain construction in South Pasadena was adopted by the South Pasadena City Council at a meeting March 8. Plans were prepared by Frank Clough, South Pasadena City Engineer. The project will include the extension of a 51-in. drain from Berkshire St. and Kendall Ave. to Hill Lane; shallow covered drain with gratings and asphalt concrete street resurfacing.

The city council has also adopted a resolution asking for \$23,000 for the improvement of the storm drain in San Pasqual Arroyo on the eastern boundary of the city.

29—STREETS AND HIGHWAYS

ALHAMBRA, Los Angeles Co., Cal.—Otto N. Rugen, city engineer, has completed plans and specifications for improving Alhambra Ave. bet. Huntington Drive and Atlantic Blvd. The county board of supervisors has appropriated \$15,000 for the purchase of materials and equipment (probably the rental of a few trucks). The proposed improvement will be 1.25 miles in length, with a 20 ft. paved roadway, exclusive of shoulders. Labor will be employed through R. F. C. funds. The quantities are:

- (1) 161,070 sq. ft. 6-in. asph. concrete pavement;
- (2) 59,633 sq. ft. 2-in. asph. concrete (on shoulders);
- (3) 2975 sq. ft. 3½-in. cement walk;
- (4) 2625 sq. ft. 8-in. gutter;
- (5) 400 ft. curb.

The city will probably lease and operate an existing asphalt plant in the immediate vicinity.

Work will probably be started at the same time on the paving on Garfield Ave. bet. Hellman Ave. and Ramona Blvd., one block, involving 6-in. asph. conc., 20 ft. wide, with 2-in. asphaltic concrete shoulders.

LOS ANGELES, Calif.—Until 10 A. M., March 22, bids will be received by board of public works for improving Woodlawn Ave. bet. 37th St. and Vernon Ave., under cash contract, involving:

- (1) grading (2720 cu. yds. excav.);
- (2) 883 sq. ft. 7-in. conc. pavement;
- (3) 482 sq. ft. 8-in. conc. pave. (local depressions);
- (4) 135,303 sq. ft. 7-in. Warrenite-bitul. pave. (5-in. conc. base and 2-in. W-B surf.);
- (5) 501 sq. ft. Warrenite-bitul. wearing surface of variable thickness (average thickness 1-in.);
- (6) 2011 sq. ft. rock and oil rdwy.;
- (7) 147 sq. ft. Class C resurf.;
- (8) 584 ft. unplas. heavy curb;
- (9) 241 sq. ft. 3-in. concrete walk;
- (10) 279 sq. ft. conc. walk (driveways)
- (11) 34 sq. ft. 8-in. conc. gutter;
- (12) 6788 sq. ft. 7-in. comb. gutter;
- (13) storm drain;
- (14) sanitary sewer;
- (15) 157 ft. 6-in. vit. clay pipe house conn. sewers;
- (16) 9 manholes to be reset.

ARIZONA STATE.—Until 10 A. M., March 18, bids will be received by the State Highway Commission, Phoenix, for highway construction on the Mesa-Casa Grande Ruins Highway, E-97-A (A. F. E. No. 8750) (A. F. E. No. 8751). The work, which begins at the end of the oiled surfacing about 1½ miles northwest of Santan and extends northwesterly approximately 10¼ miles to the concrete pavement south of the town of Chandler, consists of placing one C. M. P. culvert, one C. M. P. siphon and subgrade stabilizer and the oil processing of the roadway by either the road or plant mix method using asphaltic rd. oil, and is to be completed on or before June 15, 1933. The attention of the contractor is especially directed to the date of completion, and to the extra construction special provisions covering the right of highway commission to terminate contract. The principal items are:

ROAD MIX

- 14 cu. yds. Class A concrete;
- 5,000 cu. yds. subgrade stabilizer;
- 8,800 c. y. ml. subgrade stab., haul;
- 240 M. gals. water;
- 13,700 cu. yds. mineral aggregate;
- 83,800 cu. yd. ml. mineral aggregate, haul;
- 265,000 gals. asph. road oil;

10.2 miles mix, lay and finish;
800 cu. yds. screenings;
4,000 cu. yds. shoulder material;
11,600 cu. yd. ml. shoulder material, haul;

ALTERNATE PLANT MIX

18,900 tons plant mix;
115,400 ton ml. plant mix, haul;
207,000 gals. asphaltic road oil;
10.2 miles spread, compact and finish;
and other incidental items.

A proposal guarantee in cash or certified check of not less than 5% of the gross amount of the bid is required. T. S. O'Connell, State Highway Engineer. 29

MOUNTAIN VIEW, Santa Clara Co. Cal.—Hearing continued by Judge Syer, superior court, until March 16, on injunction on hearing on Resolution to extend Moffett Blvd. from the NE city limits to the Bayshore Highway. Ray Hays, City Clerk. C. C. Kennedy, Call Bldg., San Francisco, city engineer.

SAN MARINO, Los Angeles Co., Cal.—Wm. Chalmers, 35 S Raymond Ave., Pasadena, city engineer, has completed an estimate of the approximate quantities for the improvement of Oakleigh Drive, bet. Alhambra Road and West Drive, and a portion of Alhambra Road at its intersection with Oakleigh Drive, under the 1911 act. Hearing under the ordinance of intention has been continued until Mar. 15. The quantities are:

- (1) 3500 cu. yds. grading (approximate figure) lump sum bid;
- (2) 1976 lin. ft. curb;
- (3) 3992 sq. ft. gutter;
- (4) 35,930 sq. ft. light oil (1 gallon per sq. yd.) macadam pav. (1¼x1½ in. thick);
- (5) drainage struc., including:
 - 1 reinf. concrete box curb, 80 ft. long by 6 ft. x 8 ft. inside, involving approx. 94.5 cu. yds. Class A conc. and 8300 lbs. reinf. steel;
 - 2 catchbasins;
 - 21 lin. ft. 18-in. corr. metal pipe.

TUOLUMNE, Calaveras, Amador and Stanislaus Co., Cal.—Dee Strong, P. O. Box 143 Rio Vista at \$1692.80 submitted lone bid to District Engineer, State Highway Commission, Sacramento, to apply 920 bbls Diesel oil to roadside vegetation over 161 roadside miles. Unit bid was \$1.84.

SAN FRANCISCO—M. Bertolino, 32 Shotwell St., San Francisco, at \$6788 awarded contract by Dept. of Public Works to improve Bernal Ave. slopes, Randall to Diamond Sts, by planting.

HUMBOLDT COUNTY, Cal.—Until March 21, 2 P. M., bids will be received by Department of Public Works, Division of Highways, Office of the District Engineer, 546 West Wash Ave., Eureka for furnishing and stockpiling screenings in Humboldt County near Mad River Bridge about one and four-tenths miles west of Essex, road I-Hum-20-A.

COMPTON, Los Angeles Co., Cal.—City of Compton has received \$4500 from county gasoline tax funds for the improvement of a portion of Rosecrans Ave. and Compton Ave. The latter will be improved with rock and oil pavement between Barron St. and the west city limits, and between Long Beach Blvd. and the east city limits. The work on Rosecrans Ave. will involve the elimination of dangerous dips. James H. Park, city manager of Compton, will have charge of the work.

STANISLAUS, SAN JOAQUIN, Calaveras, Sacramento and Amador Co., Cal.—Dee Strong, Box 143, Rio

Vista, at \$1364.22 awarded contract by State Highway Commission to apply 780 bbls. Diesel oil to roadside vegetation over 110.7 roadside miles.

CLARK COUNTY, Nev.—Bids to have been opened March 15 by S. C. Durkee, State Highway Engineer, Heroes Memorial Bldg., Carson City, to furnish, apply and mix asphaltic fuel oil with the roadway surface over 11.51 ml. between Lower Virgin River Bridge and Mesquite, postponed.

SEATTLE, Wash.—Following contracts awarded by King County Commissioners for highway construction as follows, bids opened March 6:

Nick Florito at \$19,451 for one mile paving near Maple Valley-Black Diamond.

Florito Bros. at \$23,236 for one mile paving Pidgeon road between Renton and Three Tree Point.

SAN MATEO, San Mateo Co., Cal.—Oscar L. Cavanaugh, 432 Occidental San Mateo, submitted plans to city council for construction of road into new tract at Hillsborough Blvd. and North San Raymond Road.

MONTEREY, Monterey Co., Calif.—Sydney Ruthven, Seaside, at \$3,002 awarded contract by Quartermaster, Presidio of Monterey, to construct 2-300 ft. of asphaltic pavement 18 ft. the Post.

wide in front of officers' quarters at

LOS ANGELES, Calif.—Hearing on the improvement of Barrington Ave. from Barrington Place to Montana Ave., under 1911 Act, has been set by the city council for April 4. The work which is 3599 ft. in center line length, involves:

- (1) grading (14,030 cu. yds. cut, 2311 cu. yds. fill);
- (2) 15,473 sq. ft. 6-in. conc. paving;
- (3) 165,996 sq. ft. 6-in. asph. concrete wearing surf. (4-in. asph. conc. base, 2-in. asph. concrete wearing surface);
- (4) 535 sq. ft. 4-in. asph. concrete wearing surface;
- (5) 5685 ft. unplas. light curb;
- (6) 5176 sq. ft. 6-in. gutter;
- (7) sanitary sewer (est. at \$5570);
- (8) 2029 ft. house sewers;
- (9) 24 vert. ft. chimney pipe;
- (10) water system.
- (11) 92 water services;
- (12) 1418 ft. redwood header board;
- (13) lighting conduit.

Incidentals: 1400 cu. yds. special flooding;

Remove: 65 ft. curb, 250 sq. ft. gutter and refuse dump.

Sewer includes 3171 ft. 8-in. cement pipe besides items noted above. Average depth, 14.3 ft.

Engineer's estimate, \$44,941.08.

LOS ANGELES, Cal.—A. E. Pearson 2225 Glencoe Ave., Venice, awarded contract by board of public works, March 10, at \$3758.55 for improving 53rd St. bet. Long Beach Ave. and Fortuna St. under cash contract.

BOULDER CANYON, Nev.—Pacific Coast Steel Corp., 621 S Hope St., Los Angeles, has been awarded a contract by the U. S. Bureau of Reclamation, Denver, to furnish 759,658 lbs. deformed reinforcing steel for the Boulder Canyon Project. The bids follow: Colorado Fuel & Iron Co., f.o.b. Minnequa, Colo., (1) \$1.11 cwt. (2) \$1.05 cwt.; Sheffield Steel Corp., f.o.b. Kansas City (1) \$1.30 (2) \$1.20; Youngstown Sheet & Tube Co., f.o.b. Chicago (1) \$1.30 (2) \$1.20; Pacific Coast Steel Corp., f.o.b. Los Angeles, (1) \$1.31 (2) \$1.31.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

7-MI. GRADING AND SURFACING—INYO COUNTY

INYO COUNTY, Cal.—Basich Bros., 20,550 Normandle Ave., Torrance, at \$54,193.20 submitted low bid March 8 to State Highway Commission, Sacramento, to grade seven miles between Bishop and Round Valley Road, of which 3.9 miles are to be surfaced with selected material and a bituminous treatment applied, involving:

- (1) 325 move trees and stumps;
- (2) 45,000 cu. yds. rdwy. excav., unclass.;
- (3) 652,000 sta. yds. overhaul;
- (4) 24,500 cu. yds. imported borrow;
- (5) 6400 cu. yds. ditch excav.;
- (6) 2200 cu. yds. struc. excav.;
- (7) 11,000 cu. yds. sel. surf. material
- (8) 1000 cu. yds. binder for subgrade
- (9) 3.88 mi. mix bituminous binder and surface material;
- (10) 83 cu. yds. class A Portland cement concrete (struc.);
- (11) 5000 lbs. bar reinf. steel (struc.);
- (12) 494 lin. ft. 12-in. corr. metal pipe
- (13) 698 lin. ft. 18-in. do;
- (14) 414 lin. ft. 24-in. do;
- (15) 228 lin. ft. 30-in. do;
- (16) 782 lin. ft. corr. metal pipe,

clean and relay;

- (17) 2860 M. gal. water (embankment)
- (18) 610 bbls. light fuel oil;
- (19) 480 tons cut-back asph. road oil;
- (20) 5 ml. new property fence;
- (21) 10 fence gates;
- (22) 9 ml. exist. fence to be removed and reset;
- (23) 12 culvert headwalls to be removed and reset;
- (24) 4000 ft. b. m. redwood timber select all-heart struc. grade;
- (25) 370 sta. finish roadway;
- (26) 60 monuments in place.

Complete bids follow:

- (A) Basich Bros., Torrance, \$54,193.20.
- (B) Weymouth Crowell Co. and E. P. Watson, Jr., Pasadena, \$63,052.30.
- (C) Hemstreet and Bell, Marysville, \$63,288.70.
- (D) Southwest Paving Co., Los Angeles, \$65,070.70.
- (E) C. O. Sparks, Los Angeles, \$68,671.90.
- (F) F. W. Nighbert, Bakersfield, \$74,196.50.

LOS ANGELES, Cal.—Contracts for furnishing tractors and bulldozers under Spec. No. 8212 were awarded by the Metropolitan Water District Mar. 9, as follows:

Shepherd Tractor & Equip. Co.—One slightly used Model 35 Caterpillar at \$2850, less 2% 10 days.

Smith Booth Usher Co.—One new Cletrac at \$3349.

The bids were:

Shepherd Tractor & Equip. Co., \$3,535 each; total \$7070. Alternate: one new and one slightly used genuine model 35 Caterpillar at \$6285 for two units.

Smith Booth Usher Co., \$3349 each; total \$6698. Alternate: Cletrac tractor with trailbuilder, \$3459 each; total \$6,918. Alternate No. 2; used Cletrac 35 tractor with trailbuilder, \$2111. Terms net.

Crook Co., \$3400 each; total, \$6800 net.

B. Hayman Co., Inc., \$2997 each; total \$5994; terms net.

BEVERLY HILLS, Los Angeles Co., Cal.—Bids for renovating water department equipment opened by city council Feb. 28 follow:

Wintroath Pumps, Ltd.—Pulling and resetting pump (1) \$190.40 (2) \$350 (3) \$288 (4) \$368; new bearing in old column, each (1) \$3.25 (3) \$2.60 (4) \$2.60 new pump shaft, per ft. (1) 90c (2) 85c (3) 75c (4) 75c; replacing air lines per ft. (1) 16c (2) 16c (3) 16c (4) 16c.

Byron Jackson Co.—Pulling and resetting pump, (3) \$471 (4) \$612; new bearing in old column, each (3) \$4.05 (4) \$4.05; new spiders in old, each, (3) \$15.75 (4) \$15.75; new bowl added, ea., (3) \$29.70 (4) \$29.70; new pump shaft, per ft., (3) \$7; (4) \$7; new runner, ea., (3) \$17.55 (4) \$17.55; new pump bearings, each (3) \$5.50 (4) \$5.50; trimming old runners, each, (3) \$1.25 (4) \$1.25; replacing air lines, per ft., (3) 10c; (4) 10c.

Pomona Pump Co.—Pulling and resetting pump, \$33.75 for 10 ft. of column complete; new bearing in old column, \$2.75 each for rubber sleeve bearing, \$4.20 each for spiral sleeve to attach to shaft; new spiders in old, \$10.30 each for bearing retainer; new bowl added, \$35 for each; new pump shaft, \$18.20 for first stage, \$3.90 for each additional; new runner, \$18.85 each; new pump bearings, \$2.25 for suction bowl bearing, \$2.25 for discharge bowl bearing, \$1.15 each for intermediate stage; trimming old runners, \$1.00 each; replacing air lines, 30c per ft.

Pacific Pump Works, Ltd.—Pulling and resetting pump, (1) \$142.50 (3) \$227 (4) \$341; pulling and resetting pump (1) \$262 (3) \$200 (4) \$210; new bearing in old column, each (1) \$5.42 (3) \$3.45 (4) \$3.45; new spiders, each, (1) \$8.60 (3) \$12 (4) \$12; new bowl added, each (1) 55c (3) \$2.13 (4) \$380; new runner, each (1) \$27.50; new pump bearings, each (1) \$23; trimming old runners, each, \$6; replacing air lines with ¼-in. (1) \$6.65 (3) \$6.65 (4) \$6.35.

Layne & Bowler Corp.—Total price (1) \$272 (3) \$212 (4) \$523.

Peerless Pump Co.—Pulling and resetting pump, per ft., (1) 60c (3) 60 (4) 60c; new bearings in old column ea. (1) \$4.50 (3) \$3.25 (4) \$3.25; new spiders in old, each (1) \$14 (3) \$17 (4) \$17; replacing air lines, per ft., (1) 10c (3) 10c (4) 10c.

Bids taken under advlsement.

IMP. SAN PEDRO ST.—LOS ANGELES CITY

LOS ANGELES, Cal.—Griffith Co., 502 L. A. Railway Bldg., Los Angeles, submitted low bid to board of public works, March 8, at \$43,619.92, for the grading, paving and otherwise improving San Pedro St. bet. Vernon Ave. and Slauson Ave., cash contract.

- The items are: (1) grading (4630 cu. yds. excav.); (2) 217,118 sq. ft. 6-in. comp. concrete pavement; (3) 3365 sq. ft. 6-in. concrete pave. (Class E concrete); (4) 881 sq. ft. 8-in. conc. pavement (local depressions); (5) 577 sq. ft. 8-in. asph. conc. pave. (2-in. asph. conc. wearing surf. on 6-in. concrete base); (6) 490 sq. ft. asph. conc. wearing surf. of variable thickness (average thickness 2-in.); (7) 12,729 sq. ft. rock and oil rdwy.; (8) 154 ft. curb armor; (9) 1935 ft. unplas. light curb;

- (10) 3838 sq. ft. 3-in. conc. sidewalk; (11) 496 sq. ft. 4-in. concrete sidewalk (driveways); (12) 253 sq. ft. 6-in. do; (13) 23 sq. ft. 6-in. concrete gutter; (14) 64 sq. ft. 8-in. concrete gutter; (15) storm drain and appurtenances, complete, not inc. local depressions; (16) sanitary sewer, not inc. house connections; (17) 160 ft. 6-in. vit. house sewers; (18) ornamental lighting installation, complete; (19) 21 manholes to be reset. The total bids were: (A) Griffith Co., \$43,619.92. (B) J. L. McClain, \$45,275.06. (C) Southern Calif. Roads Co., \$45,844.90. (D) George H. Oswald, \$47,575.64. (E) L. A. Paving Co., \$51,357.80. (F) Engineer's estimate, \$45,064.72. The unit bids were:

Table with 5 columns (A-E) and 19 rows of unit bid prices for various construction items.

SANTA MONICA, Los Angeles Co., Cal.—Bids on March 10 for furnishing 6000 lin. ft. 6-in. Class B sand cast iron water pipe, delivered at the city yards, Ninth and Colorado Sts., opened by city council March 9, follow:

- Crane Co., 59c ft., f.o.b. trenchside. American Cast Iron Pipe Co., 65c ft.; alternates of 60c and 52 1/2 c ft.; all prices f.o.b. city yards. U. S. Pipe & Foundry Co., 66.8c ft. for 12-ft. and 16-ft. lengths, Class B sand cast pipe; alternate at 57.2c ft. for 250 bell Debar in 18-ft. lengths; alternate of 51.2c ft. for 150 DeLavaud. National Cast Iron Pipe Co., 67c ft. for 16-ft. B. & S. Class B. Itamco Pipe Corp., 59c ft. for Class B 6-in. pipe. Utilities Supply Co., 71.6c ft. for Class B, 6-in. pipe f.o.b. city yards; alternate of 71.6c ft. for 6-in. sand spun in 16-ft. lengths; alternate of 58.8c ft. for Class 150 pipe.

AWARD

RED BLUFF, Tehama Co., Calif.—Lyon & Garrett Co., Red Bluff, at 72c ft. awarded contract by city council to furnish 6000 ft. 12-in. water pipe and couplings. Pipe furnished by the Montague Pipe & Steel Co., San Francisco. Complete list of bidders follow: Pacific Pipe Co., San Francisco. California Corrugated Culvert Co., West Berkeley. Sacramento Pipe Works, Sacto. Western Pipe & Steel Co. San Francisco. Crane Co., Sacramento. U. S. Pipe & Foundry Co., San Francisco. Utilities Supply Co., Los Angeles. Ipamco Pipe Co., San Francisco.

3.2-MI. GRADE AND BITUMINOUS SURFACE—LAKE COUNTY

LAKE COUNTY, Cal.—Hanrahan Co., Hobart Bldg., San Francisco, at \$59,959.20 submitted low bid March 8 to State Highway Commission, Sacramento, to grade and surface with crushed rock base and bituminous treated crushed gravel or stone surfacing 3.2 mi. between Manilla Ranch and Bartlett Springs Road, involving:

- (1) 15 acres clear and grub right-of-way; (2) 47,500 cu. yds. rdwy. excav., unclass.; (3) 270,200 sta. yds. overhaul; (4) 1100 cu. yds. struc. excav.; (5) 12,400 tons cru. run base; (6) 6100 tons sru. gravel or stone bit. treated surf.; (7) 325 tons cut-back asphalt; (8) 230 bbls. light fuel oil; (9) 762 lin. ft. 12-in. corr. metal pipe (10) 992 lin. ft. 18-in. do; (11) 248 lin. ft. 24-in. do;

- (12) 60 lin. ft. 30-in. do; (13) 132 lin. ft. 36-in. do; (14) 350 lin. ft. 8-in. perf. metal pipe; (15) 36 lin. ft. corr. metal pipe, clean and relay; (16) 76 cu. yds. rubble masonry; (17) 1300 M. gals water; (18) 0.2 mi. new property fence; (19) 0.3 mi. special property fence; (20) 0.1 mi. existing fence to be removed and rese.; (21) 11 gates; (22) 500 lin. ft. lam. timber guardrail; (23) 168 sta. finish roadway; (24) 79 monuments complete in place. State will furnish corrugated metal pipe and perforated metal pipe.

Complete bids follow: (A) Hanrahan Co., S. F. \$59,959.20. (E) A. J. Raisch, S. F., \$60,723.20. (C) Granfield Farrar & Carlin, San Francisco, \$61,246.

- (D) Hein Bros. Basalt Rock Co., Petaluma, \$62,855.90. (E) E. B. Bishop, Sacramento, \$63,340.04. (F) Hemstreet & Bell, Marysville, \$63,561.20. (G) Fredrickson & Watson and Jones & King, Oakland, \$64,877.70. (H) A. Teichert & Son, Sacramento, \$64,292.65. (I) Artukovich Bros., Hynes, \$78,186.80. (J) Willard, Biasotti and Lovatti, Stockton, \$79,210.90. (K) von der Hellen & Pierson, Castaic \$79,831. (L) Heafy-Moore Co. and J. A. Casson, Oakland and Hayward, \$83,510.90. (M) D. McDonald, Sacramento, \$89,505.70.

Unit bids follow:

Table with 13 columns (A-M) and 24 rows of unit bid prices for various construction items.

No. 10

S. F. EXCHANGE DIRECTORS FOR 1933 ELECTED

**Entire Board Re-elected;
Patterson Named to Fill
Vacancy**

Directors of the San Francisco Builders' Exchange were re-elected yesterday at the annual meeting. H. N. Patterson, representing the ornamental iron manufacturers, was elected to the vacancy caused by the death of Alex. Mennie. The other ten members of the board were elected to succeed themselves.

The members of the board for the 1933 term are:

Joseph B. Keenan, Marble Dealers.

A. H. Wilhelm, General Contractors.

J. D. McGilvray, Cut Stone Contractors.

Charles W. Carle, Reinforcing Steel Dealers.

Emil Hogberg, Masons and Builders.

W. H. George, Building Material Dealers.

R. J. H. Forbes, Concrete Contractors.

E. M. H u n d l e y, Unorganized Crafts.

H. N. Patterson, Ornamental Iron
James H. Pinkerton, Plumbing
and Heating.

E. H. Peterson, Tile Dealers.

The directors will elect a president and other officers at their first meeting.

Reports of officers for 1932 were presented to the membership yesterday. W. H. George is president of the Exchange; R. J. H. Forbes is secretary.

BRIDGE DISTRICT INSPECTOR NAMED

Appointment of three inspectors in the Golden Gate Bridge District inspection bureau was announced yesterday by General Manager Jas. Reed.

The appointees are R. A. Daddisman, 1490 Francisco street, as chief concrete inspector at a salary of \$225; G. F. Douglas, 1719 Second street, Napa, engineering inspector at \$200 a month; H. H. Bruck, 495 Fulton street, San Francisco, assistant inspector at \$150.

THE WEEK'S NEWS Highlights

RECONSTRUCTION IS REGULATED—Southern California cities have adopted emergency ordinances prohibiting rebuilding except on earthquake - proof specifications. Long Beach has enacted an emergency measure restricting all reconstruction work for a period of 180 days to resident contractors and resident craftsmen, except where special permit is obtained from the City Council. (See pg. 4.)

ELECT DIRECTORS—The entire board of directors of the San Francisco Builders' Exchange was re-elected at the annual meeting held March 20.

EXCHANGE ASKS LAW REPEAL—State Builders' Exchange, meeting in semi-annual convention at Los Angeles, urged repeal of the state prevailing wage law; retention of state contractors' license law. (See page 6.)

BIDS POSTPONED—Financial holidays brought numerous bid postponements on Federal works, among them the San Diego Post Office, reset for April 3, and Phoenix Post Office, reset for April 6.

OPENINGS NEXT WEEK—Three important bid openings are scheduled in San Francisco Tuesday and Wednesday. Bids on general contract for San Francisco jail (\$490,000 appropriation) are to be opened Wednesday, also San Francisco anchorage of the bay bridge (estimated \$1,750,000). Yerba Buena crossing of bay bridge bids (estimated \$2,500,000) will be received Tuesday, March 28.

TUNNEL PLANS FOR \$3,750,000 LINK DESCRIBED

**District Engineer Tells Supervisors
Construction Project
Nearly Ready**

Construction plans for the Broadway tunnel to link Contra Costa and Alameda counties have reached the final stage, supervisors of the two counties were informed at a joint meeting this week. Plans will be forwarded to the State Department of Public Works at an early date.

The meeting was held at the Orinda Country Club, and in addition to the supervisors, was attended by Wallace B. Boggs, engineer for Joint Highway District No. 13, embracing the tunnel area; Ralph Hoyt, assistant district attorney, and A. B. Tinning, attorney for the district.

Plans submitted by Boggs contemplate a double bore, each 3168 feet long, the estimated cost being \$3,752,035.

The tunnel and approaches would cover 2.8 miles. Boggs estimated that the project would give work to from 450 to 500 men for eighteen months.

Materials needed for construction, he stated, would include 82,000 cubic yards of concrete; 123,000 barrels of cement; 160,000 tons of rock and sand; 4,870,000 pounds of reinforced steel, and 1,344,000 lbs. of structural steel. Boggs declared that 1,100,000 cubic yards of earth would be excavated.

All materials for the project, with the exception of ventilating equipment, could be bought in the bay district, Boggs reported. The twin bore would provide a roadway 22 feet wide for both Alameda and Contra Costa-bound traffic.

The board and district officials plan to hold another conference soon, at which plans are expected to be adopted and forwarded to the State Department of Public Works at Sacramento for approval.

Directors of the district, who attended the meeting, are Thomas E. Caldecott, chairman, a member of the Alameda board; Harry Stowe, Contra Costa supervisor and Henry Hinman, Oakland Chamber of Commerce official.

ORDINANCE BARS COMPETITION IN CITY REBUILDING

Long Beach To Protect Home Industry; Wage Scale Fixed

Contractors, architects or craftsmen who were not residents of Long Beach prior to the earthquake are barred from engaging in reconstruction work in that city for a period of six months under an emergency ordinance adopted by the Long Beach city council.

The ordinance is intended to restrict all repair and rebuilding to local firms and labor.

It is declared unlawful for any person, firm or corporation to employ any laborer, mechanic, artisan, contractor, architect or helper who was not a resident of the city of Long Beach on March 9, 1933, upon any work or construction, building, alteration, improvement or repair within the city limits for a period of 180 days after the adoption of the ordinance, unless a permit is obtained from the city council for the employment.

The ordinance declares:

"On March 10, 1933, an earthquake occurred in the city of Long Beach, damaging and destroying many buildings and improvements and causing many residents and citizens of the city of Long Beach to be thrown out of employment, and there are now in the city of Long Beach sufficient unemployed persons to carry on all necessary work of repair, alteration and construction and there is danger that many unemployed persons from other localities will seek to enter the city of Long Beach for the purpose of securing employment in the work of reconstruction and repair and the presence of such persons would be injurious and dangerous to the peace, health, safety and morals of the city."

A wage scale for the building trades to prevail during the period of reconstruction has been approved by the rehabilitation committee. It was recommended by a committee of six representing contractors, architects, real estate men and labor organizations.

Building labor will receive from \$4 to \$8 per day with no extra for overtime...Other common labor will be paid 40 cents an hour.

The wage scale includes the following rates: Carpenters, \$6; Bricklayers, \$8; Plumbers, \$8; Electricians, \$6.30; Hod Carriers, \$5; Lathers, \$6; Painters, \$6; Sheet Metal Workers, \$7; Roofers, \$6; Tile Setters, \$8; Plasterers, \$7; Floor Layers, \$7; Cement Finishers, \$6.

Total orders for steel furniture, reported by 36 manufacturers aggregating \$1,103,626, compared with \$1,165,817 in December, and \$1,582,195 in January a year ago.

Manufacturers of malleable steel castings report shipments for January at 14,077 net tons, compared with 14,366 net tons in December.

POSTPONE PHOENIX POST OFFICE BIDS

SPECIAL TO DAILY PACIFIC BUILDER
WASHINGTON, D. C.—March 17.—Postponement of the date for receiving bids on the Phoenix federal building and post office was ordered today by the treasury department. The bids will be opened April 6 instead of March 21.

The building is to be six stories of steel frame with granite and tufa stone exterior walls. The appropriation is \$675,000.

Plans were prepared by Architects Lescher and Mahoney, Phoenix.

IDAHO ENACTS LICENSE LAW; SET \$100 FEE

State Public Works Bidding Limited To Qualified Contractors

Legislation intended to give preference to local contractors and establishing stringent regulations for bonding of contractors on public works has been adopted by the Idaho state legislature.

Bidding will be confined to contractors licensed in the state and providing that licenses must have been procured at least 30 days prior to the letting of the contract. The license fee will be \$100 for the first year and \$50 a year for renewals. Applications for license must be accompanied by statement of experience and financial standing.

The bond to be required on public works has been increased from 60 per cent to 100 per cent of the contract price.

Provision is made that in case a bond shall become inadequate a new bond equal to the value of the contracted work uncompleted shall be substituted. The period for bringing suit is shortened from six months to 90 days. No suit can be brought six months after completion or abandonment.

A measure for diversion of two-thirds of the gasoline tax was defeated in the lower house where it was introduced.

Bond financing of construction and repair of municipal sewer and water systems is authorized in the state by two other bills approved by the legislature. Bond issues for this purpose would require approval of two-thirds of the taxpayers in the city.

SCHOOL SURVEY ORDERED

Building Inspector Stanley Koch has been instructed by City Manager Hollis Thompson to make a survey of all Berkeley school buildings to determine whether any of them should be strengthened against earthquake shocks. Koch visited Southern California recently to study building damage.

WELFARE BOARD HOMES EXEMPT FROM LIEN ACT

Attorney Discusses Recent Alameda Decision Refusing Foreclosure

Attorney Harry C. Westover comments on the recent decision of the Alameda county superior court holding that homes financed by the State Veterans' Welfare Board are not subject to provisions of the mechanics' lien law, his review of the decision appearing in a recent issue of the Long Beach Builders' Exchange Bulletin.

Following is his comment:

"In this community, as in every other community of the State, during the past several years a large number of homes have been constructed by the California Veterans Board for veterans. Materialmen, contractors and laborers are called upon to furnish materials and labor for such buildings. Materials and labor have been furnished to the contractor with the idea if for any reason the contractor was unable to pay the bill, the house would stand good for the shortage under the provision of the Mechanics' Lien Law.

"Such structures are financed by the Veterans' Welfare Board of the State of California. Title is usually taken in the name of the Board and then the Board enters into a contract with the veteran relative to the property.

"A general rule of law is to the effect that no lien can be affixed against property owned by the State or any of its subdivisions. The only rights provided by the Mechanics' Lien Law on property owned by a political subdivision is the right to file a stop notice. If there is sufficient money on hand to pay all bills, or if there is a bond the stop notice adequately protects those who furnished materials or labor. But if the money has already been paid to the contractor, or expended or pledged, and there is no bond, a stop of notice does not help materialmen and contractors, who have made the building possible, to collect their accounts.

"Some time ago the Tilden Lumber and Mill Company furnished materials to be used in the construction of a Veterans' Home in Alameda county. When the contractor failed to pay the bill, a lien was filed on the property. When the matter was presented, the Court followed the general rule of law to the effect that liens could not be filed on public property. The Court upheld the contention that the title to the property was held by the Veterans' Welfare Board for the people of the State of California, and that a lien could not be had upon state property.

"The Court in rendering the decision as stated above only reiterated the rule of law which has been in effect in this state for many years. The Court, however, did apply the rule to buildings being erected by the Veterans' Welfare Board and held that such buildings

were being erected by the state and not by the veteran.

"The decision is important to the building industry of the state inasmuch as it precludes those who furnished labor and materials from looking to such buildings for security for the payment of their accounts. Materialmen and contractors must look to the contractor or his bondsmen for money due them for labor and materials used and consumed in the buildings erected by the Veterans' Welfare Board of the State of California."

NEW HEATING BULLETIN

"Heating the Farm Home" is the title of a new bulletin issued by the Bureau of Agricultural Engineering, Department of Agriculture. The publication discusses types of heating plants suitable to different localities and exposures and comparative operating costs.

Local Electrical Contractors in Agreement on Policy Designed to Eliminate 'Bid-Peddling'

Adoption of a policy to be followed in submitting bids on electrical contracts is announced by the Electrical Contractors' Association of Northern California in a letter to architects, engineers and general contractors. The association's action is aimed at elimination of "bid-peddling." Members have subscribed to the following statement:

"In all cases where electrical work exceeds \$100 on a building project of any kind, members of this association will submit bids and enter into contracts only with the owner or his immediate representative, which bids will be presented only at a specified time, and which bids shall not be prior to the reception of bids for other parts of the work, if any.

"By owner's immediate representative" the members of this organization recognize only one of that owner's immediate employees, an architect or a consulting engineer. Another contractor, either general or sub-contractor, will not be recognized as the owner's representative until the owner has definitely contracted with such a contractor for a major part of the work. In such a case, members will submit bids covering the electrical work to such an actual contracted representative provided he has not previously received a bid covering the electrical work, only if the latter designates a definite time and place for public opening of bids and agrees that the work in question will be awarded to the lowest solicited bidder. Unsolicited bids are to be discarded by the recipient previous to the bid opening.

"We recognize that much of the fault in connection with bid-peddling lies with hungry subcontractors who beg for an opportunity to undercut an already submitted and accepted low bid. To this problem, an internal one within the membership of the association, we will devote our efforts. But to the general contractor we feel no man in business should be asked to ex-

ALASKA SCHOOL BIDS INVITED

California contractors are invited to bid on construction of a three-story concrete school building to be erected at Fairbanks, Alaska. Estimated cost of the building is \$135,000.

Three sets of plans have been received at the San Francisco Builders' Exchange and may be obtained by contractors upon deposit of \$25. Bids are to be received on the general contract and a separate contract for mechanical equipment. Proposals will be opened April 26.

The architects are Tourtelotte and Hummel, Postal Bldg., Portland.

LEGISLATURE IS WARNED FEDERAL AID THREATENED

Proposal to Eliminate Flood Control Funds Jeopardizes Many Projects

Withdrawal of state support for the Sacramento river flood control project to which California is committed in a contract with the federal government will jeopardize other federal construction appropriations in the state, according to a warning telegraphed the legislature by the California delegation in congress.

The message was received after the assembly ways and means committee indicated that it would eliminate an item of \$1,052,000 from the budget bill covering appropriations for flood control work in the next biennium.

Major A. M. Barton, state reclamation engineer, asserted that such a cut would be a repudiation of the agreement with the federal government for the completion of the \$51,000,000 project, which was to be financed by equal contributions from the state, federal government and land owners.

The federal government has put up \$13,000,000 and the state \$11,400,000 to date.

"Project construction must proceed steadily or work already done at great cost will be impaired," Barton asserted.

"Congress already has appropriated all funds to meet its share.

"Breaking faith now would wipe out the results of 10 years of work. Failure of the state to honor the agreement cannot but have its effect on federal aid now gained or being sought for California in the future to the possible extent of \$300,000,000."

He included in his total such loan proposals from the Reconstruction Finance Corporation as the \$62,000,000 San Francisco bay bridge; the \$42,000,000 loan for the Los Angeles metropolitan water system; the \$22,000,000 sought for Los Angeles

city power lines, and \$2,250,000 San Diego water system. In addition, money is being sought for the statewide water system and the All-American canal.

CONTRACTORS AID CITY OFFICIALS IN QUAKE AREA

A. G. C. Organizes Volunteer Groups to Rush Building Inspection

A crew of expert building appraisers was organized by F. J. Connolly, manager of the Southern California Chapter, Associated General Contractors, and placed at the service of public officials within a few hours after the earthquake last Friday night. The volunteers are still at work examining damaged buildings and preparing reports for municipal building departments.

All members of the committee gave their services without compensation.

Before noon on Saturday a preliminary report had been prepared for the mayor and city council of Compton covering the two principal business blocks on Main street and before evening a survey had been made of all business structures in the city.

Early Sunday a detailed report on every building in Artesia was delivered to the county supervisors who immediately mobilized the equipment of the forestry department and county fire department to start cleaning up debris littering the streets and to raze dangerous walls.

Every commercial building in Bellflower had been examined by Monday morning and an individual report prepared for each.

On Monday morning City Engineer A. H. Adams of Long Beach asked for a committee of contractors to appraise damage there. The A.G.C. sent twenty experts at once and the following day 58 more men were assigned to this work.

Contractors are renting steam shovels, trucks and other necessary equipment at actual operating cost in addition to donating their services.

The members of the A.G.C. also have pledged their aid to the state registrar of contractors in preventing profiteering in the reconstruction of buildings and in protecting owners from fraud by incompetent contractors.

GATE BRIDGE STEEL DUE HERE MARCH 27

The first shipment of reinforcing steel for the Golden Gate bridge is due to arrive here March 27, it was announced yesterday when the "Edward Luckenbach" will dock at San Francisco with a cargo of 107 tons of steel from the Pottstown plant of the Bethlehem Steel Corporation.

The steel is consigned to the Pacific Bridge Company to be used in the Marin pier. It will be lightered from the ship at Lime Point.

Pacific Bridge Company officials reported yesterday that the last crib section of the cofferdam had been put in place, completing this portion of the preliminary work.

BUILDERS' ALUMINUM BOOKLET IS PREPARED

Aluminum Company of America has just published a 274-page volume entitled "Aluminum in Architecture." The company states that it is the first complete study of the uses of aluminum in building.

The following is quoted from the foreword:

"This handbook on aluminum for architectural purposes has been compiled with a sincere desire to place before the building industry an authoritative treatise on the subject, which will prove of assistance and value in design and fabrication.

"While fair results may be obtained from most materials under almost any circumstances, it is essential in order to secure the optimum of service to have an accurate knowledge of the characteristics of the materials and to know how to employ them.

"Aluminum Company of America maintains a technical staff whose services are available to architects, builders and specialty manufacturers to assist them in the proper use of aluminum. In order to insure further the protection and satisfactory use of the metal, a corps of trained inspectors is constantly in the field to check the various architectural installations."

ARCHITECT ELECTED

Birge M. Clark, Palo Alto architect, has been elected president of the Palo Alto chamber of commerce. The chamber was reorganized recently.

COFFMAN WINS APPEAL FROM STATE BOARD

Appellate Court Finds Charges Behind Suspension Order Unproven

William E. Coffman, Sacramento architect, has been exonerated by the Third District Court of Appeal of charges on which the State Board of Architectural Examiners suspended his license for thirty days.

The decision, given by Presiding Justice John F. Preston, annulled the suspension and ordered his certificated reinstated. Judge Preston held that the charges against Coffman were unproved and that the examiners did not have authority to deprive him of his license on the basis of the complaint.

Action of the board was announced February 3 when it was reported the examiners had personally investigated the complaint of Miss Nelle U. Branch, librarian of Davis, that substitutions had been made in the construction of her residence in College Park, thereby cheapening the building and rendering it unsafe.

The court found that the complainant knew of and consented to the changes ordered in her home during construction and also took judicial notice of a notice of completion filed by the owner eighteen months prior to preferring charges against the architect.

Robert H. Schwab, Sacramento attorney, represented Coffman.

State Exchange Endorses License Law; Demands Repeal of Prevailing Wage Act

Following is a summary of resolutions adopted by the California State Builders' Exchange at the semi-annual convention in Los Angeles:

ENDORSING LICENSE LAW: Expressing appreciation to Colonel Huntington and his aides for the efficient manner in which they have conducted the affairs of the state contractors' bureau to the benefit of the ethics of the construction business and in behalf of the public interest.

CONDEMNING FAULTY CONSTRUCTION: Urging public bodies to amend building ordinances and codes by the adoption of adequate minimum structural requirements to withstand earthquakes; that public officials in letting contracts for earthquake rehabilitation work and all future public construction require higher standards of bidders, both technical and financial, so that the low dollar bid on public work shall be indicative of a dollar's worth of substantial, safe structure.

TAX ADJUSTMENT: During the succeeding months of economic reconstruction member Exchanges

are advised to give their attention to the reduction of public expenditures, to adjustment of taxation and the elimination of tax exemptions.

OPPOSING 30-HOUR WEEK: Holding the 30-hour week as impractical and detrimental to the interests of building in attempting to re-establish normal business conditions.

PREVAILING WAGE LAW: Condemning the practices which have grown out of the prevailing wage law, contending that the law in nowise has accomplished its purpose, and demanding repeal.

PENDING LEGISLATION: Opposing Assembly Bill 1813 proposing to eliminate the Department of Professional and Vocational Standards; opposing Assembly Bill 2156 providing that an individual may do electrical or plumbing work on his own property; endorsing Assembly Bill 1326 repealing the prevailing wage law; Assembly Bill 780 and Senate Bill 266, amending the contractors' license law and Assembly Bill 711 providing for a declaration of intention to build.

\$52,000,000 Advanced on Home Mortgages In 1932 by Building and Loan Associations

More than one-half of the new homes built in 1932 were financed by the building and loan association monthly installment mortgage, it is reported by the United States Building and Loan league. The first check-ups on total loaning last year show that the associations advanced \$52,000,000 for the construction of 19,370 one-family homes.

Statistical organization figures show that only 35,600 single-family houses were built in the past year and thus the building and loan business provided for 55 per cent of them.

Ward B. Whitlock, Springfield, Ill., president of the league, says that the associations devoted 10 per cent of their total lending activity to mortgages on newly built homes. The remainder was for refinancing of home mortgages held by other institutions, some for remodeling loans, and others for purchase of existing homes. Total mortgage loans estimated for 1932 show the associations pouring \$521,000,000 into the home mortgage field, in spite of decreased income from savings shareholders and the need of many other shareholders to use their building and loan savings in the emergencies of the critical year.

NEW SOURCE FOR 1933

"It is important that the loaning business done in 1932 was almost entirely out of the regular receipts of building and loan associations from members, either older shareholders continuing payments, borrowers reducing the principal of their mortgage indebtedness, or new shareholders opening accounts with the associations," said Mr. Whitlock. "Not until the groundwork for the operations of the new federal home loan bank system was laid did the helpful possibility of increasing loaning funds by obtaining advances from a long-time credit-source become a reality. Because this source is now definitely established we may look for an increase of lending in 1933 over the previous year, especially in view of the growing demand for home mortgage loans noted in 25 states.

"The homes for which building and loan associations provided the major construction financing in 1932 were financed with mortgages averaging smaller amounts than those of previous years. This means one of two things, or perhaps it shows the influence of both—the downward trend of construction costs and the greater emphasis on the lower-cost home in view of the indisputably greater market for \$2000 to \$5000 homes than for those of higher price range.

AVERAGE LOAN LOWER

"The average mortgage loan for a newly built home in 1932 was \$2,685. This compares with \$3500 and \$3600 for the periods of 1928, 1929 and 1930. Taking the average building and loan association mortgage

as 60 per cent of the total value of the home, we find the average home built with association financing last year costing around \$4,500. This is a step in the right direction, and business and finance may rest assured that the one-family homes built in 1932 at an average cost of \$4500 are not only better suited to the market than any homes have been for years, but they are also better built than the average home of four years ago. Loaning agencies are paying marked attention to building methods in the present crisis, and as a result the homes which they finance today will be outstanding in the residential realty structure of the years to come.

ARCHITECTS BOARD AWARDS CERTIFICATES

Provisional certificates to practice architecture in the state of California have been granted as follows by the State Board of Architectural Examiners following recent examinations:

Edwin Bradley Mead, 2618 Etna street, Berkeley; Edward John Maher, 3033 Wheeler street, Berkeley; Edward W. Kress, 453 S 12th street San Jose; James Donald Wicken-den, 1408 Spring Way, Berkeley; Winfield Hadsell Hyde, 2458 Vallejo street, San Francisco; Charles Hugh Gibbs, 3128½ Theresa, Long Beach; Miss Irene Margaret McPaul, Route 1, Box 887½, San Gabriel; Walter Charles Wurdeman, 1108 W. P. Story Bldg., Los Angeles.

The next written examinations will be conducted by the board June 12 to 15, inclusive.

 One-story Class C wood frame top addition to office building.
 Owner—Western Waxed Paper Co., 1311 63rd St., Emeryville.
 Architect—A. J. Froberg, Ray Bldg., Oakland.
 Contractor—H. J. Christensen, Ray Bldg., Oakland.
Structural Steel—Judson Pacific Co., foot of Park Ave., Oakland.
Steel Sash—Soule Steel Co., 1750 Army St., San Francisco.
Plumbing and Heating—F. A. Gottstein, 226 8th St., Oakland.

Contract Awarded.
ADDITIONS Cost, \$20,000
STOCKTON, San Joaquin Co., Cal.
 Wilson Way and Channel Street.
 Additions to present building (brick and stucco administration building 44x90 feet; shed space 14x75 ft.; lodge room, kitchen, dining room to seat 250, etc.)
 Owner—San Joaquin Marketing Assn. (Dr. J. V. Craviotto, President).
 Plans by Elmore Ernst, 9 W. Cleveland St., Stockton.
 Contractor—Carl Nelson, 1421 E. Channel St., Stockton.

Contract Awarded.
BUILDING Cost, \$3045
CARPINTERIA, Santa Barbara Co.
 One-story Post office building.
 Owner—T. N. Fish.
 Architect—E. Keith Lockard, 117 E. De la Guerra, Santa Barbara.
 Contractor—Robert D. Paterson, 1911 San Andres St., Santa Barbara.
 Lessee—United States Government.

Contract Awarded.
ALTERATIONS Cost, \$7500
OAKLAND, Alameda Co., Cal. No. 1450 Broadway.
 Alterations to store.
 Owner—Metropolitan Life Insurance Company.
 Architect—Bliss & Fairweather, Balboa Bldg., San Francisco.
 Lessee—Moore's Store.
 Contractor—H. S. Meinberger, 343 4th St., San Francisco.
 Streamline front (Verde antique marble with black oxidized and bright bronze); plate glass, etc.

Contract Awarded.
REMODEL STORE Cost, \$4000
STOCKTON, San Joaquin Co., Cal. E-Main Street.
 Remodel clothing store (store front, plate glass, plastering, vitrolite, etc.)
 Owner—E. W. Wilhoit.
 Architect—Frank V. Mayo, 108 E. Miner St., Stockton.
 Contractor—J. F. Shepherd, 108 E. Miner St., Stockton.
 Lessee—Bravo & McKeegan, 23 N-Sutter St., Stockton.

Planned.
OFFICES & STORES Cost, \$—
OAKLAND, Alameda Co., Calif. SE Grand and Ellita Avenue.
 Two-story store and offices.
 Owner—R. L. Uelsmann, 178 Grand Ave., Oakland.
 Architect—Not Given.

To Be Done By Day's Work.
ALTERATIONS Cost, \$2000
SAN FRANCISCO. S Jessie St. bet. 4th and 5th Sts.
 Alterations to lunch counter.
 Owner—The Emporium, 835 Market.
 Plans by Engr. Dept. of Owner.

Contract Awarded.
ALTERATIONS Cost, \$15,000
OAKLAND, Alameda Co., Calif. 1521 and 1545 Franklin St.
 Alter interior of brick telephone exchange building.
 Owner—Pacific Telephone & Telegraph Co., 140 New Montgomery St., San Francisco.
 Plans by Engineering Dept. of Owner.
 Contractor—W. G. Thornally, 354 Hobart St., Oakland.
 Sub-bids are in and will be awarded shortly.

Being Done by Day's Work
OFFICES Cost, \$—
WILLITTS, Mendocino Co., Calif. Wood Street.
 One-story wood frame offices (36x18) studded bldg., covered with iron, corrugated iron roof, lined with lum-

ber, cement foundation and floors.
 Owner—H. P. Muir, Willitts.
 Plans by Owner.

Sub-Contracts Awarded.
STORE Cost, \$22,000
OAKLAND, Alameda Co., Cal. Broadway N 19th Street.

One-story and basement and mezzanine reinforced concrete store (30 by 100 feet).

Owner—Twentieth & Broadway Realty Co., 1175 Market St., San Francisco.

Architect—Albert Evers, 525 Market St., San Francisco.

Contractor—Lindgren & Swinerton, Inc., 225 Bush St., San Francisco.

Lessee—Kushins Shoe Company.

Structural Steel—Judson Pacific Co., 609 Mission St., San Francisco.

Terra Cotta—Art Tile Co., Richmond.

Reinforcing Steel—W. S. Wetenhall, 17th and Wisconsin Sts., S. F.

Glass—W. P. Fuller & Co., 301 Mission St., San Francisco.

Excavation and Grading—J. Catucci, 1212 18th Ave., Oakland.

Electric—Scott-Buttner Elec. Co., 19 Grand Ave., Oakland.

Marble—Vermont Marble Co., 525 Market St., San Francisco.

Tile—Rigney Tile Co., 3012 Harrison St., Oakland.

Metal Partitions—Mills Company.

Mill Work—Lannom Bros. Mfg. Co., 5th and Magnolia Sts., Oakland.

As previously reported, common brick awarded to Remillard Brick Co., 960 7th St., San Francisco.

17—THEATRES

Plans Prepared.
THEATRE Cost, \$30,000
CARLSBAD, New Mexico.
 Modern theatre (to seat 1000).

Owner—Griffith Amusement Co. and Fred Morley (Mgr. Yucca Theatre, Roswell, New Mexico.)

Architect—M. L. Parker, Roswell, New Mexico.

18—WHARVES & DOCKS

SAN FRANCISCO.—Healy - Tibbitts Const. Co. 64 Pine St., at \$4990 awarded contract by Board of Park Commissioners for constructing two fire-proof piers and fire walls at yacht harbor on the Marina.

Plans Being Completed.
REPAIRS Cost, \$—
SAN FRANCISCO. Fort Winfield Scott
 Repairs to torpedo dock (new creosoted piles and timber bracing, etc.)

Owner—United States Government.
 Plans by Constructing Quartermaster, Fort Mason, San Francisco.

Bids will be asked in about one week

SAN FRANCISCO.—McClintle Marshall Company, 2050 Bryant St., at \$1639, 10 day delivery, awarded contract by State Harbor Board Purchasing Department for structural steel fabrication, etc. Second low bid was submitted by the Western Iron Works, at \$1749.

19—MISC. CONSTRUCTION

SOUTHERN CALIFORNIA.—Paramount Securities Co., owner, Spring Arcade Bldg., Los Angeles, Frank Johnson, superintendent of maintenance, 908½ Lucille Ave., Los Angeles, is making a survey of the earthquake damage to various buildings owned by the company in Long Beach, Bell and Los Angeles County. The list includes the Hotel Gifford, two-story, brick store and hotel building at the northwest corner of Gifford and Gage Ave., Bell. The second story of this building has been condemned by the build-

ing inspector. Hotel Johnson, two-story brick store and hotel building on Gage Ave., Bell. A two-story brick building on Joseph St., Long Beach, and a two-story frame and magnesite apartment building at 821 Olive Ave., Long Beach. A one-story and part two-story store, apartment and theatre building located at the corner of Compton Ave. and Firestone Blvd., Los Angeles. Plans for reconstruction have not been completed.

Planned.
RACE TRACK Cost, \$—
PORTLAND, Oregon. Hayden Island. Race track (500 acre site).

Owner—Hayden Island Amusement Co. (Harvey Wells, president).

Architect—Not Given.

Construction will start as soon as a permit to operate has been obtained.

Contract Awarded.
ADDITION Cost, \$—
SANTA BARBARA, Santa Barbara Co., Calif.

Addition to the Santa Barbara Museum of Natural History.

Owner—Santa Barbara Museum of Natural History.

Architect—Carleton M. Winslow, 1410 Chapala St., Santa Barbara.

Contractor—W. J. Campbell, Santa Barbara.

Planned.
BUILDING Cost, \$—
MARYSVILLE, Yuba Co., Calif. SE 7th and D Streets.

Mortician's Home.

Owner—Lipp & Sullivan, Marysville.

Architect—Not Given.

To Be Done by Day's Work
BUILDING Cost, \$675
EL CERRITO, Contra Costa Co., Cal. Manila Ave. and Kearney St.

One-story frame corporation bldg. (60x34) to house city vehicle and equipment.

Owner—City of El Cerrito.

Engineer—H. D. Chapman.

Work will be done by day's labor under the supervision of A. A. Arnesen, Building Inspector.

LOS ANGELES, Calif.—Until 9 A. M., March 31, bids will be received by Saul A. Joseph, Purchasing Agent, Metropolitan Water District, Room 504, 306 W Third St., Los Angeles, for furnishing six complete pump house and derrick assemblies, f.o.b. cars or trucks. They are to be of wood frame structures with galvanized corrugated iron roofing and siding, etc.

Plans Being Prepared.
BOAT HOUSE Cost, \$6000
OAKLAND, Alameda Co., Cal. Municipal Airport.

One-story frame boat house (14x40) to house U. S. Naval Reserve speed boat.

Owner—City of Oakland Port Commission.

Plans by Eng. Dept. of Owner.

SACRAMENTO, Calif.—Sacramento county supervisors will ask bids to raze the old unoccupied buildings on the Sacramento Hospital grounds.

20—MISC. SUPPLIES AND MATERIALS

SAN DIEGO, Calif.—Patten - Blinn Lumber Co., San Diego, submitted the low bid to A. R. Sauer, Jr., City Purchasing Agent, San Diego, March 17 at \$1827.84 or 59½ c. for furnishing f.o.b. Municipal Pier No. 1 or upon bulkhead at foot of B St., San Diego, 3072 ft. creosoted treated piles.

21—BRIDGES

STOCKTON, San Joaquin Co., Cal.—E. H. Riley, Stockton, will continue construction of the Garwood Ferry bridge, having obtained additional finances in order to complete the structure.

PEND OREILLE COUNTY, Wash. Until March 29, 10 A. M., bids will be received by W. H. Lynch, District Engineer, U. S. Bureau of Public Roads, 316 New Post Office Bldg., Portland, to construct one bridge over Slate Creek together with approach connections to existing road on Pend Oreille Highway, N. F. R. Pro. E-22-10 in Kaniksu National Forest, involving:

- (1) 0.4 acres clear and grub
- (2) 10,600 cu. yds. unclass. excav.
- (3) 300 cu. yds. unclass. excav., struc.
- (5) 64000 sta. yds. overhaul
- (6) 1100 tons surfacing (placing only)
- (7) 10 dangerous trees and snags
- (8) 120 cu. yds. class A concrete
- (9) 115 cu. yds. class B concrete
- (10) 213 cu. yds. class D concrete
- (11) 48,000 lbs. reinf. steel
- (1) 246,000 lbs. struc. steel
- (13) Remove old bridge and maintain traffic.

PATTERSON, Stanislaus Co., Cal.—Irrigation District discusses plan for bridge, retaining dam and lock on the San Joaquin River at the foot of Las Palmas Ave. War Department has already approved a high level bridge. J. P. Sillerman, manager of the Irrigation District.

LOS ANGELES, Cal.—The condemnation necessary for the proposed Gaffey St. grade separation at Wilmington has been completed. As these structures are essential, grading of the approaches will probably be done by R.F.C. labor while awaiting an allocation by the city council. The cost of the project is estimated at \$225,000. One will be built to carry Gaffey St. over Summerland Ave., a reinforced concrete girder bridge costing \$125,000, and the other carrying Gaffey St. under Elberon Ave., a reinforced concrete arch bridge costing \$80,000. R. W. Stewart, engineer of bridge and structures.

LOS ANGELES, Cal.—Plans for a reinforced concrete girder type bridge to be built on San Fernando Road at Tunnel Station completed by bridge department; R. W. Stewart, engineer of bridge and structures. The proposed bridge will be 300 ft. in length, with a 40-ft. roadway and one 5-ft. walk. The work will consist of building two wedge-shaped structures to

widen the present structure and to realign the roadway. The cost is estimated at \$35,000. Construction is now awaiting an allocation by the city council.

LOS ANGELES, Cal.—H. H. Walker Inc., 1323 Venice Blvd., Los Angeles, at \$77,560 (lump sum bid on item 1) submitted low bid March 18 to Metropolitan Water District to construct transmission lines in the Mecca Pass to Colorado River Section, Construction Power Transmission Line.

24—ST. LIGHT. SYSTEMS

LOS ANGELES, Calif.—Proceedings for an ornamental lighting system in the Park Oak Drive and Live Oak Dr. District abandoned by city council on March 16.

25—MACHINERY AND EQUIPMENT

DALY CITY, San Mateo Co., Cal.—Until March 27, 8 P. M., bids will be received by B. C. Ross, city clerk, to furnish one panel truck, 141-in. wheelbase, 7-in. frame; further specifications obtainable from above office. Certified check 10% required with bid.

LOS ANGELES, Cal.—Contracts for furnishing air compressors, air receivers and motor generator sets for use in connection with the construction of the Coachella Tunnels were awarded by the Metropolitan Water District Board of Directors March 17 as follows:

AIR COMPRESSORS

Herberts Machinery Co., Ltd., 2929 Santa Fe Ave., Vernon—Schedule No. 1, twelve air compressors at \$65,820.

AIR RECEIVERS

Western Pipe and Steel Co., 5717 Santa Fe Ave., Los Angeles—12 air receivers, Schedule No. 12, at \$1884.

MOTOR GENERATOR SETS

Electrical Products Corp., 1128 Venice Blvd., Los Angeles—Six motor generator sets, Schedule No. 4 at \$6,666.

The board of directors also took action on other schedules under same specifications as follows:

Schedule 2, storage battery locomotives; Schedule No. 3, same, using steel batteries; Schedule No. 9, wood body dump cars; and Schedule No. 10, steel body dump cars. Three low bids on each schedule ordered held under advisement.

Schedule No. 11, flat cars, all bids rejected.

SAN FRANCISCO.—Until March 31, 3 P. M., under Bid No. 985, bids will be received by T. A. Brooks, City Purchasing Agent, to furnish automo-

biles for Police Department. Specifications obtainable from above office.

LOS ANGELES, Cal.—Until 2 P. M., April 5, bids will be received by the Metropolitan Water District, 306 West Third St., Los Angeles, for furnishing machinery and equipment for use in connection with the construction of the Coachella Tunnels. This proposal covers equipment designed for use if the half capacity tunnel (12 ft. 4 in. diameter) is used in lieu of the 16-ft. tunnel. Bids on the larger equipment were opened Feb. 28 under Specifications No. 17. The new specifications (No. 22) will provide for equipment as follows:

Battery locomotives.

Electric shovels.

Tunnel mucking machines.

Flat cars.

Steel dump cars (3-yd. capacity).

Specifications may be obtained at room 1004, 306 West Third St., March 18, upon payment of \$2.

LOS ANGELES, Cal.—Bids held for further consideration by the engineering department of the Metropolitan Water District for furnishing construction equipment under Spec. No. 17, opened Feb. 28, are as follows:

(Three low on each schedule).

Schedule No. 2 storage battery locomotives, using Exide iron clad batteries: General Electric Co., Westinghouse Electric & Mfg. Co., and the Whitcomb Locomotive Co.

Schedule No. 3, alternative to Sched. No. 2, using Edison batteries: General Electric Co., Westinghouse Electric & Mfg. Co. and Whitcomb Locomotive Company.

Schedule No. 9, wood body dump cars: Concrete Machinery & Supply Co., Madsen Iron Works and Smith-Booth-Usher Co.

Schedule No. 10, steel body dump cars: Concrete Machinery & Supply Co., Emsco Derrick & Equipment Co. and Madsen Iron Works.

LOS ANGELES, Cal.—The city engineer has been authorized by city council to prepare plans for the improvement of Woodlawn Ave. between 51st and 52nd Sts., and 51st St. bet. Main St. and Avalon Blvd., in the 51st St. and Woodlawn Ave. Improvement District. The proposed pavement will be 6-in. cement concrete. The city allocation is \$23,997.60.

30—RESERVOIRS & DAMS

ALBUQUERQUE, N. M.—Construction of the El Vado Dam on the Chama River will probably be started by the Middle Rio Grande Conservation District early this summer. Plans are being prepared by C. H. Howell, chief engineer of the district, Albuquerque. The estimated cost is \$1,600,000.

31—PIPE LINES & WELLS

LOS ANGELES, Calif.—W. H. Bucher, M. D., superintendent of Olive View Sanitarium, has requested the supervisors to transfer \$20,000 from the maintenance and operation account to structural and non-structural improvement fund for the purpose of drilling and equipping a water well. The recommendation was approved by the Superintendent of Charities and was referred by the board to Supervisor Jessup.

CAPITAL CITY TITLE COMPANY

J. C. PALEN,
Manager

914 Seventh Street
Sacramento :: California

LOS ANGELES, Calif.—Until 10 A. M., April 4, bids will be received by the Metropolitan Water District, 306 W 3rd St., Los Angeles, for the construction of pipe lines and Gunited reservoirs for Sections 1 and 2 of the construction water system for the Colorado River Aqueduct.

The work to be contracted for consists of excavating a trench, hauling and stringing pipe, welding joints, testing and lowering lines of pipe, backfilling the trench, connecting valves and fittings, and performing appurtenant work for the construction of 60 miles of 5-in. 6-in. and 8-in. pipe line, together with the construction of three 300,000-gal. Gunited reservoirs. All materials with the exception of the pipe, valves, and fittings are to be furnished by the contractor. Each proposal must be accompanied by a certified or cashier's check for the following amounts: Schedule 1, \$1500; Schedule 2, \$2000; Schedule 3, \$1000. Plans may be purchased from the office of the engineer, room 1004, 306 W 3rd St., Los Angeles. This sum is not returnable. F. E. Weymouth is the general manager and chief engineer of the district.

32—SEWERS & SEWAGE DISPOSAL PLANTS

LOS ANGELES, Calif.—County supervisors have appropriated \$159,700 from the general fund for the construction of storm drains in Alhambra Ave. and Mission Road from Marenco to San Pablo St.

LOS ANGELES, Calif.—Plans for sewers to be constructed in Baird Ave. and other streets in the Baird Ave. and Gault St. Sewer District, are being completed by L. O. Turner, District Engineer, Van Nuys office of the city engineering department. The proceedings are under the 1911 Act and the 1931 Assessment Limitation Act. The area affected by this improvement embraces 175 acres and the sewers will have an average depth of 12.2 ft. The items are:
 7,555 ft. 6-in. stand. strength cement pipe;
 13,969 ft. 8-in. do;
 5,780 ft. 8-in. extra strength cement pipe;
 1,787 ft. 10-in. stand. strength cement pipe;
 2,820 ft. 12-in. do;
 779 ft. 8-in. vitrified clay pipe;
 320 ft. 12-in. do;
 74 manholes;
 18 standard flushing manholes;
 4 special flushing manholes;
 96 manhole frame and cover sets;
 44 ft. type X for 12-in.;
 20 ft. do for 8-in.;
 13,949 ft. type Z for 8-in.;
 1,787 ft. do for 10-in.;
 2,780 ft. do for 12-in.
 Average depth 12.2 ft.

LOS ANGELES, Calif.—Artukovich Bros., 912 S Atlantic Blvd., Hynes, awarded contract by the board of public works March 15 at \$34,958, to construct Wilmington intercepting sewer in Fries Ave. between Water St. and a point 734 ft. southerly therefrom, and in a portion of Water St. and another right of way, under cash contract.

LOS ANGELES, Calif.—City council has under consideration construction of storm water drainage in the Huntington Drive and Berkshire Ave. area and will probably ask the board of supervisors to allocate the sum of \$56,243 for the purchase of materials, service and equipment hire.

LOS ANGELES, Calif.—Pacific Clay Products Co. awarded contract by A. J. Holm, City Purchasing Agent, Mar-

16 at \$15,877.32 (estimated total) for furnishing and delivering along Venice Blvd. and Lincoln Blvd. Sewer District, vitrified clay pipe and wye branches, under Spec. No. 3024.

LOS ANGELES, Cal.—Plans for the construction of sewers in the Belle Porte Ave. and 253rd St. Sewer District have been completed by city engineer. The report under the Assessment Limitation Act of 1931 is being prepared. The estimated cost is \$130,000.

LOS ANGELES, Calif.—County supervisors have appropriated \$40,000 from the general fund for the acquisition of materials and supervision of work for the installation of storm drains in Eagle Rock Blvd. between Yosemite Drive and Colorado Blvd., and in Colorado Blvd. between Maywood and El Rio Ave.

33—WATER WORKS

LOS ANGELES, Cal.—Wm. Davidson, county mechanical engineer, 10th floor, Hall of Records, has completed his preliminary estimate of the cost of constructing a water system in the vicinity of Florence under County Water Works District No. 20. Hearing on the formation of this district was ordered by the board of supervisors March 16 and will be held within the next 30 days. The cost is estimated at \$390,000 and covers several contracts as follows:

Drilling of three wells.
 Installation of necessary pumps.
 Erection of two 250,000-gal. steel tanks and towers on concrete foundations.
 Piping, involving 30 to 35 miles of cast iron pipe ranging from 14- to 3-in. diameter (principally 10- to 3-in.)
 Ditching, laying of pipe, backfill and resurfacing.
 Valves and fittings.

OAKLAND, Cal.—Grinnell Co. of the Pacific, Fifth and Brannan Sts., San Francisco, at \$2670 awarded contract by East Bay Municipal Utility District to furnish 30 tons of joint compound for cast iron pipe.

SAN DIEGO, Cal.—Water and sewer improvement planned by the city in the event that federal funds are obtained, total \$999,260, are noted in a report submitted to city council by A. V. Goeddel, city manager. Water main construction, estimated to cost \$251,960, would include the following lines:

30-in. line on Upas from 5th and 20th Sts., \$100,000.
 16-in. line on Rosecrans from Taylor and San Diego Aves. to Lytton, and thence to the military reservation, \$68,212.
 12-in. line on 21st from L to Beardsley along Julian Ave. from Beardsley to Marcey and on Marcey to 28th St., \$23,585.
 10-in. line on 35th from El Cajon to Monroe and on Hawley from Monroe to Mountain View, \$17,807.
 30-in. line under 30th St. bridge, \$10,275.
 8-in. line on Poplar from Fairmount to Maple, \$11,344.
 8-in. line on Woden from Main to Acacia, on Epsilon from Acacia to 42nd, and on 42nd from Epsilon to Division, \$7500.
 8-in. line on 35th from Newton to Acacia and on Regal from Acacia to Main, \$3000.
 8-in. from Acacia to Main, \$3000.
 8-in. line on Dwight from Euclid to Wabash, \$1623.

LOS ANGELES, Calif.—County Supervisors have authorized the ex-

penditure of \$30,000 for immediate construction from R. F. C. funds of a portion of the 8th St. viaduct, north of the City of San Fernando. E. C. Eaton, County Flood Control Engr.

WINTERSBURG, Orange Co., Cal.—The Standard Oil Co. is clearing the site of a 35,000-gal. oil storage tank at its Wintersburg tank farm, damaged by the earthquake, preparatory to rebuilding the tank. The estimated cost is \$75,000.

LOS ANGELES, Calif.—Hearing on the proposed formation of County Water Works District No. 20 (vicinity of Florence) set by county supervisors for April 17. Wm. Davidson, county mechanical engineer, 10th floor, Hall of Records, has completed his preliminary estimate of the cost of constructing the water system, \$390,000.

35—TUNNELS

LOS ANGELES, Calif.—Contract for the construction of the San Jacinto Tunnel for the Metropolitan Water District Colorado River aqueduct has been signed by the contractors, Wenzel & Henoch Const. Co., Milwaukee, Wis., and the company's surety bonds were approved by the board of directors March 17. The contract was referred to the chief engineer and secretary of the district for signing.

29—STREETS AND HIGHWAYS

SEATTLE, Wash.—As previously reported, until April 12, 10 A. M., bids will be received by board of public works, G. W. Roberge, secretary, to improve Railroad Ave. from Madison to Bay Sts., including construction of a concrete sea wall, involving:
 245,000 cu. yds. embankment;
 3,561 tons steel sheet piling;
 585,000 lin. ft. timber piling;
 3,290 M. ft. b.m. lumber;
 1,754 tons reinf. steel;
 15,090 cu. yds. concrete;
 47,475 sq. yds. 9-in. conc. paving;
 9,740 lin. ft. water mains;
 6,200 lin. ft. pipe sewer.

Estimated cost, \$1,200,000. Certified check 5% required with bid. Specifications obtainable from above on deposit of \$25.

SAN FRANCISCO.—Until March 29, 2:30 P. M., bids will be received by Department of Public Works, S. J. Hester, secretary, to widen Turk St. from St. Joseph's to Masonic Ave., involving:

- (1) 14,500 cu. yds. excavation;
- (2) 1,045 ft. 8-in. V.C.P. sewer;
- (3) 690 ft. 10-in. do;
- (4) 39 8x6 Y branches;
- (5) 25 10x6 do;
- (6) 8 brick manholes;
- (7) 6 brick catchbasins;
- (8) 5 do, reset;
- (9) 85 ft. 10-in. VCP culvert;
- (10) 384 ft. 6-in. VCP side sewer;
- (11) 2,900 ft. granite curb, reset;
- (12) 200 ft. armored concrete curb;
- (13) 43,640 sq. ft. asph. conc. pave.;
- (14) 6,500 sq. ft. 6-in. Class E conc. pavement;
- (15) 9,800 sq. ft. asph. conc. conform pavement;
- (16) 3,680 sq. ft. asph. conc. wearing surface;
- (17) 50 tons asph. concrete;
- (18) 21,500 sq. ft. 1-course concrete sidewalk.

Specifications obtainable from the office of John J. Casey, city engineer, 3rd floor, City Hall.

SACRAMENTO COUNTY, Cal.—D. McDonald, 204 23rd St., Sacramento, at \$90,675 awarded contract by State Highway Commission to grade and pave with asphalt about 4.5 mi. between Mills and Nimbus.

TUOLUMNE, Calaveras, Amador, and Stanislaus Co., Cal.—Dee Strong, Box 272, Sacramento, at \$1698.80 awarded contract (lons bid submitted) by State Highway Commission to apply 920 bbls. Diesel oil to roadside vegetation over 161 roadside miles.

COCONINO COUNTY, Ariz.—Until April 13, 10 A. M., bids will be received by C. H. Sweetser, District Engineer, U. S. Bureau of Public Roads, 802 Title and Trust Bldg., Phoenix, Ariz., to place subgrade reinforcement on 3.556 mi. Grand Canyon Route 10, Grand Canyon National Park, involving:

- (1) 5650 cu. yds. subgrade relnf.;
- (2) 8750 cu. yds. ml. haul subgrade relnf.

Specifications obtainable from above office on deposit of \$10.

SAN JOSE, Santa Clara Co., Cal.—City council has approved specifications for Julian St. Bridge over Coyote Creek, involving:

- (1) 1548 cu. yds. excav.;
- (2) 823 cu. yds. concrete;
- (3) 75.17 tons steel;
- (4) 177 concrete piles 20-ft. long;
- (5) 314 lin. ft. concrete handrall;
- (6) 100 lin. ft. galv. pipe handrall;
- (7) 6360 sq. ft. 2-in. asph. conc. surf.;
- (8) 560 cu yds. excav. in widening channel;
- (9) 36 lin. ft. 27-in. Portland cement concrete pipe.

NOTE: Steel and concrete estimate exclusive of piles and handrall. Handrall consists of 23.26 cu. yds. concrete and 1.44 tons steel. Piles consist of 152.75 c. yds. concrete and 15.2 tons steel.

NOTE: Bridge approach:
1672 sq. ft. 5-in. asph. conc. pavement
231 sq. ft. 2-in. asph. conc. surfacing;
25 lin. ft. 8x10x14-in. Portland cement concrete curb;

31 sq. ft. 15x6-in. Portland cement concrete gutter.

W. L. Popp, City Engineer.

OREGON STATE.—Following contracts awarded March 15 by the State Highway Commission for highway construction as follows:

Douglas County—S. H. Newell and Co., Board of Trade Bldg., Portland, at \$30,250 for 1.5 miles roadbed construction on Rice Hill Section, Pacific Highway. Barnham Bros. second low at \$32,982.

Lynn County—Lindstrom & Feigenson, Railway Exchange Bldg., Portland, at \$14,355 to grade and pave approaches to the Santiam River bridge, Pacific Highway at Jefferson. Washburn & Hall, second low at \$14,438.

Malheur County—Schmeer & Williams, Portland, at \$9,850 for Ironside Brogan Station, John Day Highway, furnish 7000 cu. yds. crushed rock in stockpiles.

Union County—Edwin Gerber, Oregon City, at \$7530 for Hot Lake-North Powder Section, Old Oregon Trall, to furnish 6000 cu. yds. crushed rock in stockpiles.

ARIZONA STATE—Phoenix-Tempe Stone Co., P. O. Box 1645, Phoenix, submitted low bid to State Highway Commission, Phoenix, March 18, at \$45,199.99, for highway construction on the Mesa-Casa Grande Ruins Highway, E-97-A (A. F. E. No. 8760) (A. F. E. E. No. 8751). The work, which begins at the end of the oiled surfacing about 1½ miles northwest of Santan and extends northwesterly approximately 10¼ miles to the concrete

pavement south of the town of Chandler, consists of placing one C. M. P. culvert, one C. M. P. siphon and subgrade stabilizer, and the oil processing of the roadway by either the road or plant mix method using asphaltic road oil.

PASADENA, Los Angeles Co., Cal.—City has asked the board of supervisors to re-allocate certain funds previously allocated to certain specific jobs, so that the total sum may be used for miscellaneous road, bridge, and culvert construction. The total is \$17,520.22.

LOS ANGELES, Cal.—The proceedings for the improvement of Lankershim Blvd. between Burbank Blvd. and Chandler Blvd. were abandoned by city council March 15.

ARIZONA STATE.—Hodgman and MacVicar, 714 Plymouth Road, Pasadena, submitted low bid to the State Highway Commission, Phoenix, Mar. 17, at \$135,577.46 for highway construction under E-95-D and (A.F.E. No. 8915) and F.L.H.P. E-4-A (A.F.E. No. 8951). The work on E-95-D and F.L.H. E-4-A, begins at the northwest end of the Grand Canyon bridge near Lee's Ferry and extends southwest approximately nine miles and consists of the grading and draining and placing of subgrade stabilizer.

ARIZONA STATE.—L. E. Dixon Co. 609 South Grand Ave., Los Angeles, submitted low bid to State Highway Commission, Phoenix, March 17, at \$65,812.71 for highway construction on the Holbrook-Winslow Highway, E-40, Schedule 1 (A.F.E. No. 6656).

The work on E-40, Schedule 1, which begins at the west city limits of Holbrook and extends westerly about 10.2 miles, consists of constructing two culverts, placing subgrade stabilizer and oil processing by the plant mix method, using cutback asphaltic cement.

LOS ANGELES, Cal.—G. W. Jones, County Road Commissioner, has completed plans for the paving of Mission Road, from Hidalgo St. in the City of Alhambra, to Santa Anita Ave. in the City of San Gabriel, 1666 ft. or 0.32 mile, under Cash Contract No. 451, involving:

- (1) 34,132 sq. ft. 2-in. asph. concrete wearing surface;
- (2) 34,132 sq. ft. 4-in. asph. concrete base.

Bids will be called within the next ten days.

ARIZONA STATE.—Arizona Sand & Rock Co., Phoenix, submitted low bid to State Highway Commission, Phoenix, March 17, at \$78,615.01, for highway construction on the Prescott-Phoenix Highway, E-72-A (A.F.E. No. 8952). The work, which begins at the western boundary of the Prescott National Forest near Wilhoit and extends southwestwardly approximately 8 miles, consists of grading, draining, placing of subgrade stabilizer and oil processing by the plant mix method.

HUMBOLDT COUNTY, Cal.—Smith Bros. Co., 1636 B St., Eureka, at \$3262.80 (\$3.04 per cu. yd.) submitted low bid to District Engineer, State Highway Commission, Eureka, to furnish and stockpile screenings in Humboldt County near Mad River Bridge about 1.4 ml. west of Essex. early issue.

GLENDALE Los Angeles Co., Cal.—City will ask the county supervisors for \$15,000 of R. F. C. funds for widening of Victory Blvd.

LAKE COUNTY, Calif.—Hanrahan Co., Hobart Bldg., San Francisco, at \$59,959.20 awarded contract by State Highway Commission to grade and surface with crushed rock base and bituminous treated crushed gravel or stone surfacing 3.2 ml. between Manilla Ranch and Bartlett Springs road.

LOS ANGELES, Cal.—The improvement of Wilshire Blvd. from Figueroa St. to Park View St. has been approved by city council public works committee and has been referred to the city engineer for ordinances incidental to the necessary condemnation. Bids for this project were opened Aug. 31, 1932, at which time the low bid was submitted by Griffith Co. at \$282,679.89. All work is to be paid for in cash. The delay in awarding the contract has been occasioned by the city council's desire to study the alternative plans for improving the lake portion of the improvement.

LOS ANGELES, Cal.—John Topich, 988 Everett St., submitted low bid to board of public works March 15 at \$3-821.08 for the improvement of 76th St. between 8th Ave. and 10th Ave., and portions of 77th St., 75th St., 8th Ave., 10th Ave. and the alley west of 8th Ave., under the 1911 Act.

LOS ANGELES, Orange, San Diego and Imperial Counties, Calif.—Square Oil Co., 916 Adobe St., Los Angeles, submitted low bid to State Highway Commission State Bldg., Los Angeles, at \$2752.20 for applying Diesel oil to roadside vegetation over 79.4 roadside miles, involving 1390 bbls. Diesel Oil. Square Oil Co., \$1.98 bbl.; total \$2,-752.20.

Consumers Oil Co., \$2.14 bbl.; total \$2974.60.

Gilmore Oil Co., Ltd., \$2.63 barrel; \$3655.70.

Bonkosky & Oelke, Anahelm, \$2.94 bbl.; total \$4086.60.

The opening of these bids was postponed from March 6 on account of the recent bank holiday.

SAN MARINO, Los Angeles Co., Cal.—Until 8 P. M., April 12, bids will be received by city council to improve Oakleigh Drive, between Alhambra Road and West Drive, and a portion of Alhambra Road at its intersection with Oakleigh Drive, under the 1911 Act. Bids will be taken on items as follows:

- (1) 2000 cu. yds. grading (lump sum bid);
- (2) 1976 lin. ft. curb;
- (3) 3992 sq. ft. gutter;
- (4) 35,930 sq. ft. light oil (1 gallon per sq. yd) macadam paving (¼-½-in. thick);
- (6) drainage structures including:

1 reinforced concrete box curb, 80 ft. long by 6 ft. x 8 ft. inside, involving approx. 94.5 cu. yds. class "A" concrete and 8300 lbs. reinf. steel,
2 catchbasins;
21 lin. ft. 18-in. corr. metal pipe.

Plans may be obtained from the city engineer, Wm. Chalmers, 35 So. Raymond Ave., Pasadena. H. W. Joyce, City clerk.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., April 11, bids will be received by city council for cleaning weeds from lots in the city of Beverly Hills. B. J. Firmlinger, city clerk.

LOS ANGELES, Cal.—Griffith Co., 502 L. A. Railway Bldg., Los Angeles, awarded contract by Board of Public Works, March 17, at \$43,619.92, for grading, paving and otherwise improving San Pedro St., between Vernon Ave. and Slauson Ave. Cash contract.

UNIT BID SUMMARY

Compiled from the Daily News Service of Pacific Constructor

4.5 MILES GRADE AND PAVE—SACRAMENTO COUNTY

SACRAMENTO COUNTY Cal. — D. McDonald, 204 23rd St., Sacramento, at \$90,675 submitted low bid March 15 to State Highway Commission, Sacramento, to grade and pave with asphalt about 4.5 mi. between Mills and Nimbus, involving:

- (1) 95 sta. clear and grub right of way;
- (2) 16,000 cu. yds. rdwy. excavation, unclass.;
- (3) 5,600 sta. yds. overhaul;
- (4) 64,000 cu. yds. imp. borrow;
- (5) 1000 cu. yds. struc. excav.;
- (6) 7250 cu. yds. salvage macadam (borders and surfacing);
- (7) 52,100 sq. yds. subgrade for pave.
- (8) 22,500 tons asph. concrete;
- (9) 190 cu. yds. Class A Portland cement concrete (struc.);
- (10) 15,100 lbs. bar reinf. steel (struc.)
- (11) 548 lin. ft. 12-in. corr. metal pipe
- (12) 558 lin. ft. 18-in. do;
- (13) 24 lin. ft. 24-in. do;
- (14) 1.6 miles new property fence;
- (15) 30 drive gates complete in place;
- (16) 3 walk gates complete in place;
- (17) 50 cu. yds. light rip-rap;

- (18) 130 cu. yds. Portland cem. conc. remove from existing struc.;
 - (19) 1350 M. gals. water;
 - (20) 140 bbls. light fuel oil;
 - (21) 25 tons asph. road oil;
 - (22) 300 tons screenings;
 - (23) 150 lin. ft. special timber header;
 - (24) 235 sta. finish roadway;
 - (25) 26 monuments complete in place. State will furnish corrugated metal pipe.
- Complete bids follow:
- (A) D. McDonald, Sacramento, \$90,675.
 - (B) Heafey-Moore, Oakland and J. A. Casson, Hayward, \$95320.50.
 - (C) Peninsula Paving Co., San Francisco, \$99,555.50.
 - (D) Basich Bros. Torrance, \$102,141.30.
 - (E) Fredrickson & Watson and Jones & King, Oakland, \$105,474.96.
 - (F) Hanrahan Co., San Francisco, \$107,270.70.
 - (G) A. Teichert & Son, Sacramento, \$112,848.65.

3.3-MI. GRADE AND PAVE—SAN MATEO COUNTY

SAN MATEO COUNTY, Cal.—Basich Bros., 20,550 Normandie Ave., Torrance, and Los Angeles, at \$166,161.70 submitted low bid March 22 to State Highway Commission, Sacramento, to grade and pave with Portland cement concrete 3.3 mi. between San Francisco and South San Francisco, involving:

- (1) 3000 cu. yds. rdwy. excav., unclass.;
- (2) 43,000 cu. yds. borrow;
- (3) 12 cu. yds. struc. excav.;
- (4) 19,350 cu. yds. class A Portland cem. conc. (pave);
- (5) 537,000 lbs. bar reinf. steel (pave)
- (6) 1230 tons asph. conc.;
- (7) 21,200 tons cru. run base,
- (8) 360 tons screenings;
- (9) 660 bbls. heavy fuel oil;
- (10) 40 lin. ft. 8-in. corr. metal pipe;
- (11) 4 raise drop inlets and headwalls to grade;
- (12) 10 raise manholes to grade;
- (13) 600 sq. yds. cobble gutter;
- (14) 2560 lin. ft. remove and reset timber guardrail;

- (15) 4200 lin. ft. lam. timber guard-rail;
 - (16) 704 lin. ft. flexible metal guard-rail;
 - (17) 14 6-ft. metal headers (cribbing)
 - (18) 13 8-ft. metal headers (cribbing)
 - (19) 52 8-ft. metal stretchers (cribbing);
 - (20) 28 metal header caps (cribbing);
 - (21) 8160 lin. ft. traffic stripe;
 - (22) 163 sta. finish roadway;
 - (23) 47 monuments complete in place. State will furnish corrugated metal pipe, spillway assemblies and rail plates, spring supports and fastenings for metal guard rail.
- Complete bids follow:
- (A) Basich Brothers, Torrance, \$166,161.70.
 - (B) Hanrahan Co., S. F., \$169,710.20.
 - (C) Fredrickson & Watson, Oakland, \$172,685.
 - (D) N. M. Ball, Porterville, \$176,432.
 - (E) Peninsula Paving Co., San Francisco, \$184,738.10.
 - (F) Eaton & Smith, S. F., \$203,153.50
 - (G) Fay Imp. Co., S. F. \$221,674.96.
- Unit bids follow:

SHASTA COUNTY, Calif.—As previously reported, Tiffany-McReynolds-Tiffany Co., 535 N 7th St., San Jose, at \$9163 submitted low bid to the District Engineer, State Highway Commission, Redding, to surface 1.1 miles with crusher run base and bituminous treated crushed gravel or stone surfacing between Jenny Creek and Redding, involving:

- (1) 1700 cu. yds. crushed run base;
 - (2) 116 tons cu. yds. crushed gravel or stone (bit. treated surface);
 - (3) 6 bbls. heavy fuel oil;
 - (4) 116 tons cut-back asphalt;
 - (5) 60 sta. mix bit. binder and surfacing;
 - (6) 135 M. gals. water;
 - (7) 60 sta. finish roadway;
- Complete bids follow:
- (A) Tiffany-McReynolds-Tiffany, \$9,163.00.
 - (B) Highway Builders, Ltd., San Anselmo, \$9,326.84.
 - (C) J. P. Brennan, Redding, \$11,915.50.
 - (D) E. B. Bishop, Sacramento, \$12,428.50.
 - (E) Hemstreet and Bell, Marysville, \$12,515.50.
 - (F) Peninsula Paving Co., San Francisco, \$13,493.96.

- (11) 10,000 lin. ft. laminated timber guard rail;
- (12) 1034 timber guide posts;
- (13) 294 culvert markers;
- (14) 607 sta. finish roadway.

See call for bids under official proposal section in this issue.

PRELIMINARY ESTIMATE

OAKLAND, Cal.—Preliminary estimate of cost, quantities, etc., on Broadway Tunnel presented to Alameda and Contra Costa County Supervisors by Wallace B. Boggs, Joint Highway District Engineer.

Plans call for a double bore, each 3168 ft. long, total cost \$3,752,035; tunnel and approaches to be 2.08 mile long; project to involve approximately: 82,000 cu. yds. concrete; 123,000 bbls. cement; 160,000 tons rock and sand; 4,870,000 lbs. reinf. steel; 1,344,000 lbs. structural steel; 1,100,000 cu. yds. earth excav. Of the cost, the state is to pay \$300,000; Contra Costa County 10% and Alameda County 90%.

SAN FRANCISCO.—Link Belt Co., 400 Paul Ave., San Francisco, at \$2,196 submitted low bid to City Purchasing Agent under Bid No. 976, to furnish fifteen 2-compartment cars for concrete materials for Hetch Hetchy Project. Complete bids follow:
 Link Belt Company.....\$2,196
 Berkeley Steel Const. Co..... 2,400
 Montague Pipe & Steel Co..... 2,445
 California Steel Products Co..... 2,458
 Western Pipe & Steel Co..... 2,655
 Mutual Engineering Co..... 2,759
 Ocean Shore Iron Works..... 2,765
 Bay City Iron Works..... 2,998
 Fair Manufacturing Co..... 3,660
 Bethlehem Shipbuilding Corp..... 3,743
 Bids held under advisement.

BIDS WANTED

PLACER COUNTY, Cal.—Until Apr. 12, 2 P. M., bids will be received by State Highway Commission, to surface with bituminous treated crushed gravel or stone 11.5 miles between Gold Run and Airport, involving:
 (1) 100 cu. yds. struc. excavation;
 (2) 9000 cu. yds. selected material;
 (3) 33,000 tons crushed run base;
 (4) 23,000 tons crushed gravel or stone (bit. treated surf.);
 (5) 11,000 tons untreated crushed gravel or stone surf. (shoulders)

REMOVE AND CONSTRUCT BRIDGE—LAKE COUNTY

LAKE COUNTY, Calif.—Thomas J. Doyle, 1527 17th Ave., San Francisco, at \$7757 submitted low bid March 16 to District Engineer, State Highway Commission, Sacramento, to remove an existing timber bridge and construct a reinforced concrete slab bridge across Morrison Creek, 23 mi. east of Mendocino County line, consisting of two 30-ft. spans on a concrete pier and concrete abutments, involving:
 (1) 600 cu. yds. struc. excav.;
 (2) 170 cu. yds. rdwy. excav., unclass.

- (3) 192 cu. yds. Class A Portland cement concrete (footing blocks);
 - (4) 280 do (structures);
 - (5) 6 cu. yds. Class E Port. cement concrete;
 - (6) 36,000 lbs. bar reinf. steel;
 - (7) 6.5 cu. yds. sand fill;
 - (8) 1 existing bridge, remove;
 - (9) 1 existing pipe line, move.
- Complete bids follow:
 (A) T. J. Doyle, San Francisco, \$7,757.
 (B) Whited & Whited, Santa Rosa, \$7,900.50.
 (C) Sam Sciarrino, San Jose, \$8,500.

- (D) M. B. McGowan, San Francisco, \$8,878.
 - (E) E. T. Lesure, Oakland, \$9,169.20.
 - (F) Smith Bros., Eureka, \$9,551.31.
 - (G) A. F. Anderson, Chico, \$10,304.
 - (H) H. Sneed, Berkeley, \$10,481.25.
 - (I) F. J. Maurer, Eureka, \$10,900.

SNEATH RANCH JAIL WATER SYSTEM—SAN FRANCISCO

SAN FRANCISCO — West Coast Construction Co., 100 Potrero Ave., San Francisco, at \$29,700 (lump sum bid) submitted low bid March 15 to Department of Public Works to construct water system about 3-mi. in length from San Andreas to the site of the Sneath Ranch jail in San Mateo County. Complete bids follow:
 (A) West Coast Constr. Co., \$29,700.
 (B) F. W. Snook, \$20,892.
 (C) E. J. Treacy, \$31,248.12.
 (D) P. L. Burr, \$31,642.

- (E) Scott Co., \$32,427.
 - (F) Alta Elec. Co., \$32,440.
 - (G) Eaton & Smith, \$33,400.
 - (H) Geo. Frankel (Anderson & Rowe), \$33,425.
 - (I) J. O'Shea, \$33,500.
 - (J) Herman Lawson Co., \$34,000.
 - (K) MacDonald & Kahn, \$34,810.
 - (L) Fay Improvement Co., \$36,268.
 - (M) C. L. Harney, \$37,500.
 - (N) W. J. Tobin, \$37,839.90.
- Bids were taken on alternates as follows:

- (1) deduct for 6-in. pipe instead of 10-inch;
- (2) add for wrought iron plates instead of steel water storage tank;
- (3) deduct for tank to be steel with all joints welded.
- (4) add or deduct for universal cast iron pipe instead of bell and spigot;
- (5) add for water tank of Ormcov Ingot iron, joints welded.

Alternate bids follow:

HOMANN ASSERTS NEED OF STATE LICENSE PROVED

Says Building Failures in Earthquake Demonstrates Regulation Essential

SACRAMENTO, March 29. — Declaring that the recent earthquake disaster in Southern California "clearly demonstrates the need of strict regulation of contractors," Ralph Homann, Los Angeles, president of the California State Builders' Exchange, today issued a strong appeal for defeat of impending legislation to abolish the state contractors' registration bureau.

Homann also pointed out that the illegal substitution of materials of a cheaper, inferior quality than those called for in plans for public and private construction "was responsible for considerable damage."

"In order that the building public may receive adequate protection of life and property," Homann said, "it is imperative that strict supervision and regulation of contractors be maintained by the state.

"The fact that many buildings collapsed during the earthquake, due to inferior workmanship and illegal substitution of cheaper and inferior materials, clearly demonstrates this need.

"It is, indeed, significant that a majority of the schools and other buildings which collapsed during the quake were erected prior to enactment of the state contractors' act by the 1929 legislature, while other similar buildings erected since withstood the strain of the quake.

"Consequently, The California State Builders' Exchange is unalterably opposed to any movement which will break down the present state system of regulation of contractors, which has resulted in untold benefit to the public and the building industry."

He said, "Repeal of the contractors' law would also be false economy, inasmuch as its operation is financed by fees paid by contractors."

THE WEEK'S NEWS Highlights

BRIDGE BIDS—Clinton Construction Company, San Francisco, submitted the low bid on construction of the Yerba Buena Island tunnel and cable anchorages for the bay bridge at \$1,821,292. Healy-Tibbitts Construction Company, San Francisco, on the following day was low bidder, at \$1,036,500, for construction of the San Francisco cable anchorage. These openings brought the total bridge work authorized to date to \$36,841,315, and initiated all of the major contracts for the structure, including east and west bay foundations and suspension spans, tunnel crossing and anchorages. On the basis of present figures, Chief Engineer Charles H. Purcell estimates a saving over original estimates of \$8,000,000, bringing the probable total cost of the actual construction of the entire crossing to \$55,000,000.

STATE LICENSING — Contractors' associations are preparing to defend the California State Registration Act at committee hearings next week, when the Legislature will consider proposals for repeal of the licensing act and elimination of the office of registrar.

LUMBER ORDERS GAIN — New business booked at the nation's lumber mills for the week ended March 18, was 31 per cent above the previous high week of the year to date, and 14 per cent above the corresponding week of 1932. West Coast pine mills contributed substantially to this increase, showing new business nearly 40 per cent above that for the same week a year ago.

WAGE SCALE SET—Reductions ranging up to 25 per cent in the prevailing wage scale for Santa Clara County were voted by the Board of Supervisors in fixing the rate to be paid on public works during 1933. Five road improvement contracts and a contract for construction of the Julian street bridge in San Jose were advertised immediately after the wage scale was fixed.

SUPERIOR COURT RULES ON WAGE SCALE ORDINANCE

Specific Rate Declaration Is Unnecessary In Bid Call

Legality of a municipal bid call that did not specify the prevailing wage scale was upheld by a decision of Superior Judge E. P. Shortall in San Francisco county made public yesterday.

The court denied a petition filed by Edmund Brown, a taxpayer, to enjoin the Public Utility Commission from entering into a contract with Meyer Rosenberg for hauling Hetch Hetchy sand and gravel.

The petitioner contended that the bid call was illegal by reason of failure to include the county wage scale as fixed by the board of supervisors. The bid call specified only that the wages paid must not be lower than the highest prevailing scale in private employment. This general provision was held to be sufficient by Judge Shortall.

"It is not necessary to include a specific wage scale," Judge Shortall's opinion said. "The contract is legal inasmuch as it follows the charter provision and stipulates that the wages paid shall be the same as the highest prevailing wages in private employment."

A contract awarded to American Concrete Pipe Company for 7000 feet of pipe line is affected by the decision, also.

The opinion is considered an important interpretation of the prevailing wage law which is being tested in another action now pending in the supreme court that seeks to restrain the board of public works from proceeding with a contract for the county hospital psychopathic ward under the wage scale specified.

The board of public works is continuing its bid opening date from time to time on this project, awaiting the court's decision. The opening now tentatively set for April 5 will be set ahead again probably at the next meeting of the board, according to William H. Worden, director of public works.

NATIONAL CENSUS REPORTS 144,396 U. S. CONTRACTORS

Summary Fixes \$4,794,772,-
665 As Building Total
in 1929

The Bureau of the Census announces that the United States Summary of the Construction Industry has been issued. The statistics presented are based on data gathered in 1930 as a part of the Fifteenth Decennial Census.

Pertinent figures on the construction industry; how the construction dollar is spent, the percentage for wages and materials, the amount of overhead, the items making up this overhead, the proportionate market for each of the basic construction materials, the type of construction firms, the amount of work executed by the out-of-state contractors, the distribution of the market, are items on which the summary presents adequate data.

Reports were received from 144,396 firms in the contracting business as operative builders, general contractors, or subcontractors. Of this number 30,597 firms which had a business of \$25,000 or more during 1929, reported a total business of \$6,250,266,665, of which \$4,217,366,643 of business was done by 14,766 general contractors of all classes; \$153,523,886 by 750 operative builders; and \$1,879,376,136 by 15,081 subcontractors.

As much of the volume of business reported by subcontractors was also reported by general contractors as subcontract work let, the volume of actual construction executed by all these larger reporting firms amounted to \$4,794,772,665 for the year. The business of the contracting establishments which did a business of less than \$25,000 in 1929 is estimated at over \$1,000,000,000.

The larger-sized group of contractors furnished 828,772 man-years of work while the smaller contractors augmented this number by about 179,000 man-years of work or, together, a total of approximately 1,008,000 man-years. These figures do not include salaried employees or proprietors or firm members.

Copies of this report entitled, "Construction Industry — Summary for the United States," are obtainable from the Superintendent of Documents, Government Printing Office, Washington, D. C., at the price of 20 cents. Remittance may be made by postal money order (not stamps), express money order, check made payable to the Superintendent of Documents, or by currency sent at the sender's risk.

JAIL BID OPENING RESET FOR APRIL 12

Bids on the new San Francisco county jail general contract will be received until April 12, it was announced Saturday by Director of Public Works William H. Worden. The date was advanced two weeks after having been set originally for March 29 at the request of contractors who desired more time to figure the plans.

Worden said also that the contract for mechanical work probably will be advertised shortly for bids on April 19.

The estimated cost of the jail building is \$490,000.

LAW TO COMPEL RESIDENT LABOR

Ordinance Being Drafted To Bar Outsiders From Public Construction

City Attorney J. J. O'Toole is preparing the preliminary draft of an ordinance to compel contractors on city construction projects to employ San Francisco residents only.

The ordinance was proposed by the Public Welfare Committee of the Board of Supervisors, and sponsored by the Junior Chamber of Commerce.

It is proposed that Board of Public Works inspectors be assigned to see that contractors carry out the ruling if the ordinance is passed. O'Toole pointed out that such inspectors could not be used to investigate workmen on projects of the Public Utilities Commission, without inter-departmental adjustment.

\$311,000 HETCH HETCHY APPROPRIATION OKEHD

The finance committee of the board of supervisors yesterday recommended the appropriation of \$311,000 in Hetch Hetchy bond money to cover remaining contracts on the Hetch Hetchy project.

E. G. Cahill, director of public utilities, explained to the committee that the appropriation was necessary since sums now on hand were specifically budgeted for "tunnel work," and could not be used for the remaining units, which include the pipe line from Irvington portal to the Bay crossing, the Alameda creek syphon, and the drainage canal at Moccasin power house.

SCHOOL CHIEF TO ASK STATE PLAN BUREAU

Kersey Will Recommend Legislation To Regulate All Building

Introduction in the state legislature of a bill to require state approval for all school building plans is proposed by Vierling Kersey, state superintendent of public instruction.

Kersey made this announcement after an inspection of school buildings wrecked in the Southern California earthquake. He said he would ask the legislature to empower the state department of education to approve or reject plans for any school building.

He estimated that seventy school buildings were destroyed by the quake and will have to be replaced at a cost of \$12,000,000; 120 others sustained major damage which will cost \$5,000,000 to repair; while 300 others slightly damaged and can be repaired for \$100,000.

Kersey predicted that a state school building code would be adopted to guarantee buildings of adequate protection in case of earthquake.

"At present," he said, "the state division of school house planning is only an advisory board. Instead of abolishing it, as was proposed by one legislator, we should strengthen it.

"I believe school districts should be required by law to conform to the recommendations of this division.

"It need cost no more to build an adequate, attractive, safe school building, of simple rather than ornate design than it has cost to build any of the structures which have been destroyed."

State Director of Finance Roland Vandegrift who accompanied Kersey on his trip said he would include the following provisions in school building restrictions: First, no hollow tile bearing walls; second, on unsupported brick bearing walls; third, no brick veneering; fourth, no supported brick parapet walls; fifth, no stilt foundations for frame buildings; sixth, no decorations on the buildings which might fall in case of an earthquake.

NEW BOARD CHAIRMAN

J. F. Cambiano, San Mateo, has been elected chairman of the San Mateo county planning commission, succeeding Roy Bishop, Woodside, who resigned a short time ago. Alvin S. Hatch of Half Moon Bay, was named vice-chairman and Jas. J. James has been reappointed secretary.

EXPLAIN CITY ACT BARRING NON-RESIDENTS

**Long Beach Exchange Comm.
Will Certify Permits for
Outside Firms**

Explanation of the adoption of an emergency ordinance by the Long Beach city council in effect restricting earthquake reconstruction work to resident contractors is contained in a bulletin issued by Long Beach Builders' Exchange.

Reputable firms will be permitted to engage in rebuilding, provided a license is obtained from the city council, the bulletin declares. A certification committee composed of representatives from seven civic organizations will be formed to pass on applications from non-resident contractors, the Exchange announces. The committee members will be from the Builders' Exchange, Chamber of Commerce, Architects' Club, Realty Board, Better Business Bureau, American Society of Engineers and Long Beach Credit Association.

Following is the Exchange statement on the certification ordinance:

By reason of the disaster that has befallen Long Beach, the loss suffered by our local firms and crafts in the construction industry and the unemployment condition existing previous to the time of this disaster, the City Council passed an Emergency Ordinance covering non-resident contractors, labor, mechanics, architects, and artisans not residents of Long Beach on March 9, 1933.

We feel that we voice the sentiment of our City Council and the people of this city when we say that we deeply appreciate the wonderful spirit exemplified by all who have rushed to our relief in the time of need. In the passing of such an ordinance we only ask and hope that the outside world will consider our action in the same light as they would had it happened in their own community. In the loss our own people have suffered, we believe they should be given the first consideration in helping them

to recover their loss as far as is possible for them to do so and we feel that we have an obligation in protecting our people from racketeering, profiteering, and an irresponsible element in the construction industry who have sought to take advantage of this condition and reap a harvest from an unfortunate people.

Long Beach has been flooded with this element and already many of our citizens will suffer a further loss by reason of their haste to get back into their homes and re-establish their business. It is for these reasons only that we have sought to stem the tide and keep this element from our city. We want to deal fairly with the non-resident legitimate element in the construction industry and give them every consideration possible and this Emergency Ordinance provides that, upon a proper showing, they may apply for a permit to the City Council and we feel confident that our program for protection will not work any undue hardships upon any concern who can establish a proper standing of responsibility. There is little doubt but that considerable outside help will soon be needed and called upon and until we reach this point, we trust we have your cooperation and support in the measure we have adopted for self-protection.

A Certification Committee has been named by the City Council to pass upon all non-resident applications for a permit as provided by the Emergency Ordinance. Application forms may be secured at the Builders' Exchange, 947 Pine Ave., Long Beach, headquarters for this committee and will receive attention with all possible speed, and their recommendation certified at once to the City Council. It is hoped that this committee will be organized to function commencing Thursday, March 23. Application forms will be mailed upon request.

Copies of the handbook "Modern Connectors for Timber Construction" may be obtained at 30 cents a copy by addressing J. Kaplan, Washington Loan and Trust Bldg., Washington, D. C. The price includes mailing cost.

59 EXHIBITORS SIGN FOR SPACE IN BURNER SHOW

**Manager Reports 85% Available
Booths Reserved by
Manufacturers**

Approximately 85 per cent of all available space for the Tenth National Oil Burner Show to be held in Chicago, June 12-16, has already been reserved, according to Harry F. Tapp, executive secretary of the American Oil Burner Association, who said that a total of 59 exhibitors had taken 90 spaces up to March 8.

"Considering that our show and convention is still three months away and in view of the immediate interest now in evidence among prospective participants in the show our optimistic expectations of a few months back will be more than surpassed," Mr. Tapp said.

"We believe that when the complete list of companies, who will participate, is announced, that the show will be truly a roll-call of leaders in their line and will reflect the decade of progress through which our industry has passed since the formation of the Association ten years ago," he stated.

In addition to a wide variety of exhibits at the show itself, it is anticipated that the convention sessions will bring our new attendance records. Dealer representation during the convention is expected to approximate 5,000 not only because of the oil burner show but also because of the Century of Progress which opens in Chicago June 1. Plans are now being developed by the A.O.B.A. whereby it will be possible for large groups of eastern dealers to make the round trip from Buffalo to Chicago entirely by water on specially chartered boats at substantially reduced rates.

Within the next 30 days the complete program for the convention together with the list of speakers will be announced to the industry.

1933 WAGES FOR S. CLARA COUNTY WORK DECIDED

Supervisors Order Reductions From Last Year's Scale

Santa Clara county prevailing wage scales will be from 10 to 25 percent lower in 1933, according to the rates set in the ordinance adopted by the board of supervisors at its meeting last Monday.

Reductions range up to \$2.50 a day in the case of steam shovel operators.

The wage scale for 1933 was set as follows:

Asphaltic plant platform labor.....	\$6.00
Bricklayers.....	9.00
Bricklayers, tenders.....	5.50
Blacksmith.....	6.00
Carpenters.....	8.00
Cement finishers.....	8.00
Concrete mixer operator, small....	6.00
Concrete mixer operator, large....	9.00
Engineers, hoisting, portable quarries, tractor over 50-hp. rating.....	8.00
Engineers, rollers, mixers, asphalt plants, stone derricks.....	8.00
Engineers, bridge and structural.....	8.00
Engineers, pile drivers, derrick barges, cableways.....	9.00
Engineers, firemen and apprentices.....	6.00
Engineers, portable compressor operator.....	6.00
Graderman.....	5.00
Iron workers, reinf. concrete.....	8.00
Iron workers, bridge and struc....	9.60
Laborers.....	4.00
Pile drivers, wharf builders.....	9.00
Plasterers.....	8.00
Plasterers, hod carriers.....	5.50
Powderman.....	5.00
Mechanical pavement finisher operator.....	6.00
Shovel operators, up to and including 1/2 yard.....	7.50
Shovel operators, from 1/2 yard up and including 1 yard.....	9.00
Shovel operators, from 1 yard up....	10.00
Shovel operators, underground....	11.00
Shovel operators, cranesmen.....	8.50
Shovel operators, cranesmen underground.....	9.50
Shovel operators, firemen and watchmen.....	7.00
Shovel operators, oilers.....	5.00
Teamsters, 1 and 2 horse team drivers.....	5.00
Truck drivers, under 3 ton.....	5.00
Truck drivers, 3 ton and up to 6 1/2 tons.....	5.60
Truck drivers, over 6 1/2 tons.....	6.00
Tractors, up to and including 50-hp.	6.50
Tractors, under 30-hp.	5.00
Trouble shooter, mechanic.....	6.40

Reductions from the 1932 scale are as follows:

Bricklayers, from \$11 to \$9; bricklayers' helpers, \$6.50 to \$5.50; hoisting, mixing, roller and portable equipment engineers, \$9 to \$8; hridge and structural engineers, \$10 to \$8; firemen and apprentices, \$7 to \$6; portable compressor operator, \$7 to \$6; gradermen.

W. E. HAGUE INJURED IN ACCIDENT HERE

Wm. E. Hague, secretary-manager of Alameda county chapter, Associated General Contractors, suffered a fractured leg when he was knocked down while boarding a street car in San Francisco Monday night. He was taken to Mouni Zion Hospital where the broken bone was set yesterday.

Mr. Hague was getting on a car at Ninth avenue and California street on his way downtown when it started with a jerk that caused him to lose his footing. His right leg was broken by the fall.

Mr. Hague is widely known in Northern California, having been identified with the construction industry for many years. His home is at 4639 California street.

ASK DATA ON CITY SEWER PLANT PLAN

Palo Alto authorities have been invited to submit data on the contemplated municipal sewage disposal plant for consideration of United States public health service.

The national bureau is seeking information on necessary sanitary projects. The city of Palo Alto has plans for a new sewage disposal plant which it is estimated could be constructed at a cost of \$160,000.

STRUCTURAL ENGINEERS ELECT NEW OFFICERS

Blaine Noice was elected president of the Structural Engineers' Association of Southern California at the annual meeting of that organization at Los Angeles. R. V. LaMarre was elected vice-president and J. E. Shield, secretary-treasurer.

The new board of directors consists of Oliver G. Bowen, George J. Carroll, Clarence J. Derrick, Mur. R. R. Martel and Blaine Noice.

BRANCH OPENED

Plymouth Cordage Company with headquarters in North Plymouth, Mass., manufacturers of Manila and Sisal rope, cordage, twines and cables, has established a branch office and warehouse at 56 Sacramento street, San Francisco. Bartlett Bradley is in charge of the office as Pacific Coast representative.

\$6 to \$5; plaster hod carriers, \$6.50 to \$5.50; shovel operators up to 1/2-yard, \$10 to \$7.50; teamsters, \$5.50 to \$5.00; truck drivers, 3 tons to 6 1/2 tons, \$6.50 to \$5.60; tractor operators up to 50-hp., \$7.50 to \$6.50; trouble shooter mechanics, \$7 to \$6.40.

MATERIAL LIEN CLAIM DENIED BY HIGH COURT

Segregation of Contractor's Payments Held Responsibility of Vendor

The principle that materialmen who receive payment from loan associations through contractors who have accounts with them are bound to determine to what particular job the money is to be applied, was affirmed in a decision on file today in the State Supreme Court here, reversing a Modesto judgment upholding materialmen in a lien against a home.

The Modesto Lumber Company and the Turner Hardware and Implement Company had sued the Modesto Building and Loan Association, V. L. Bates, contractor, and Lewis D. Wyld and wife, owners of the home, claiming liens amounting to \$900.

The Wylde had secured a loan of \$3575 from the association, to construct a house. Bates was given checks by the association to cover cost of materials used in the house. Having a personal account with the materialmen, he turned the checks over to them, to be applied to the account. He had several building projects on hand at the time, and failed to inform the materialmen which job the payments covered.

When the work was completed, the two firms filed a lien, alleging that the payments merely covered a part of Bates's balance, leaving the materials in the Wylde home unpaid for.

The owners filed a cross-complaint, with Bates and the loan company as co-defendants. They alleged the association had guaranteed to protect them from all claims of lien.

Judge Fulkerth of Modesto upheld the plaintiffs, but ruled that the claim should be paid by the loan association and not by the owners.

The Wylde and the loan association filed an appeal, which resulted in reversal of the verdict by the Supreme Court.

The court held that in the majority of such cases the payments would be naturally applied to the account of the contractor, but that when the checks come from a building and loan association and the materialmen have knowledge of the circumstances, it is their duty to inquire of the loan association as to what specific project the payments are to cover, and that they are not to rely on the statements of the contractor.

Confidence Reflected in Heavy Buying at Mills; Weekly Orders Highest for Year

SEATTLE, Wash. (Special)—The marked increase in lumber orders reported by mills in the Douglas fir region to the West Coast Lumbermen's Association for the week ending March 18 is the result of more active buying in the Middle West, and the Atlantic Coast districts. Orders received by the industry were more in total than in any previous week this year and were equalled by only two weeks in 1932.

The immediate cause of the increased buying of West Coast lumber is undoubtedly the greater confidence which pervades business circles as the result of the effective action of the government in dealing with the banking situation and the widespread belief that this and other vigorous public measures mark a turning point in the depression. Rising commodity values are expected. A gradual resumption of building is believed to be not far away. Lumber dealers are taking advantage of the present very low prices to somewhat augment their stocks.

The buying movement in western lumber evident during the past two weeks is not expected to attain large proportions; and is still, of course, for short of anything approaching a normal demand for the products of West Coast sawmills. Its extent will depend upon the actual resumption of building and industrial use of lumber, which can not yet be predicted. Underlying it, however, is the important fact that the West Coast lumber industry has reached rock-bottom prices, the lowest of the past thirty years, and has cleaned its house of surplus stocks. Mill inventories in the Pacific Northwest were reduced 25 per cent during the past year and have nearly been cut in half in the past three years. The West Coast lumber stocks on January 1 were equivalent to but one-third of the volume of lumber sales during 1932, although such sales were only about one-third of the yearly business of the industry prior to the depression.

Retail yard stocks are exceptionally low in most portions of the United States. There is no surplus of lumber in the country. Even at the very low business ebb of recent months, supply has been well balanced with demand. Any increase in consumption will strengthen the market position of lumber.

The West Coast Lumbermen's Association does not anticipate large construction activities during 1933. It does look forward, however, to the resumption of building in the form of small homes and, sooner or later, to farm improvement with new buildings and repairs.

There is a shortage of homes in the United States today. The next large building movement bids fair to be the extensive construction of small, inexpensive houses, partic-

ularly in suburban and rural districts. Housing and living conditions in many parts of the country point to a demand for small homes that will attain large proportions when home financing becomes available within reasonable cost.

It is this market, together with farm improvements and repairs, that the lumber industry is preparing for. The home owner's dollar will buy almost twice as much lumber at West Coast mills as it did four years ago. It will buy better lumber, of standard uniform grades. It will buy better service from the lumber manufacturer and retail dealer, including the furnishing of well-designed complete homes, with many modern improvements in the use of West Coast lumber, millwork, plywood and Western Red Cedar shingles of the standard grades approved by the United States government. Many new forms of mill fabrication in the furnishing of these materials are now available which give the home

builder a lower cost and greater utility, comfort, and beauty in his home.

The West Coast Association is this week distributing designs for four cottage homes of West Coast woods, which can be built today for from \$1000 to \$1800. These have all been designed by experienced architects and tested by actual construction. It is proposed to make the designs and materials for these inexpensive houses widely available to families desiring homes through the retail lumber dealers in their communities. It is the purpose of the Association to enlist the interest and active support of many architects in designing small and inexpensive but well-built homes of wood as a means of stimulating this type of construction.

PUBLICATION REVISED

Portland Cement Association has issued a revised edition of a booklet describing concrete swimming pools, the original edition having been exhausted by trade demands. Illustrations of several California pools are included in the text.
